[#heating and cooling buildings](#) [#building energy efficiency](#) [#HVAC system design](#) [#sustainable building design](#)
[#mechanical engineering series](#)

This revised second edition delves into the critical aspects of heating and cooling buildings, with a strong emphasis on design for efficiency. It provides comprehensive insights into optimizing building energy efficiency through effective HVAC system design and sustainable building design principles. Part of the esteemed Mechanical and Aerospace Engineering Series, this resource is essential for engineers and designers aiming to create high-performance, energy-saving structures.
