[#phrase structure](#) [#linguistics](#) [#syntax theory](#) [#grammatical analysis](#) [#first edition](#)

Explore diverse perspectives on phrase structure, a foundational concept in linguistics, through this critical first edition. Delving into the intricate mechanisms of syntax, it offers comprehensive grammatical analysis, making it an essential resource for scholars and students. This influential work provides profound insights into how words combine to form meaningful units, shaping our understanding of language structure.

Views on Phrase Structure

O. PRELIMINARY REMARKS Initial drafts of the papers in this collection were presented in a conference entitled 'Views on Phrase Structure', held at the University of Florida, Gainesville, in March, 1989. Eleven of the twenty-three participants in the conference were able to contribute to this volume. The purpose of the conference was to explore theories of phrase structure in their relation to other subsystems of grammar and/or systems of nonlinguistic knowledge. Some of the grammatical subsystems which the authors consider are theta-theory, movement, Case, and binding; a number of papers address how the conceptual system and/or aspects of language use may interact. Unifying the various approaches and perspectives is an attempt to furnish hypotheses concerning principles of phrase structure with some sort of independent justification. 1. PHRASE STRUCTURE THEORY: A BRIEF HISTORY A basic outline for a theory of phrase structure theory is accepted by all of the authors here; it is known as 'X-bar theory'. The concepts of X-bar theory are expressed in some form by a number of pre-generative linguists. For example, Bloomfield (1933) contrasted endocentric structures such as noun phrases and verb phrases with those he considered exocentric, e. g. prepositional phrases and clauses. Jespersen (1933), while presenting a functional system of description (in terms of 'ranks', where rank one is 'nominal', for example), clarified the relations among the head of a phrase, its modifier, and a phrase which modifies the modifier.

Syntactic Structures

No detailed description available for "Syntactic Structures".

An Introduction to English Sentence Structure

A readable introduction to English syntax and syntactic theory, argumentation and description, suitable for students with little prior knowledge.

Perspectives on Phrase Structure: Heads and Licensing

Explores licensing theory and its implications for a theory of syntax. This book brings a series of papers which focus on developing a constrained set of licensing mechanisms relating elements in a syntactic representation, and on the different properties of lexical and functional heads as licenses of complements and specifiers.

Nominal Modifiers in Noun Phrase Structure: Evidence from Contemporary English.

The Glot International State-of-the-Article books constitute the ideal solution for everyone who wants to have a good idea of what the others are doing but does not have time to follow the developments in all other parts of the field on a day to day basis. All articles were previously published in Glot International and have been revised and updated, and special attention was given to the extensive bibliography, which constitutes an important part of each overview article. Among the essays in the first volume are overview articles dealing with VP ellipsis (by Kyle Johnson), Ergativity (by Alana Johns), tone (by San Duanmu), acquisition of phonology (by Paula Fikkert), and semantic change (by Elizabeth Closs Traugott). The second volume offers articles on subjects ranging from the development of grammars (by David Lightfoot) and markedness in phonology (by Keren Rice) to the syntactic representation of linguistic events (by Sara Thomas Rosen), optionality in Optimality syntax (by Gereon Müller) and the nature of coordination (by Ljiljana Progovac).

The First Glot International State-of-the-Article Book

Head-Driven Phrase Structure Grammar (HPSG) is a constraint-based or declarative approach to linguistic knowledge, which analyses all descriptive levels (phonology, morphology, syntax, semantics, pragmatics) with feature value pairs, structure sharing, and relational constraints. In syntax it assumes that expressions have a single relatively simple constituent structure. This volume provides a state-of-the-art introduction to the framework. Various chapters discuss basic assumptions and formal foundations, describe the evolution of the framework, and go into the details of the main syntactic phenomena. Further chapters are devoted to non-syntactic levels of description. The book also considers related fields and research areas (gesture, sign languages, computational linguistics) and includes chapters comparing HPSG with other frameworks (Lexical Functional Grammar, Categorical Grammar, Construction Grammar, Dependency Grammar, and Minimalism).

Head-Driven Phrase Structure Grammar

One of the liveliest forums for sharing psychological, linguistic, philosophical, and computer science perspectives on psycholinguistics has been the annual meeting of the CUNY Sentence Processing Conference. Documenting the state of the art in several important approaches to sentence processing, this volume consists of selected papers that had been presented at the Sixth CUNY Conference. The editors not only present the main themes that ran through the conference but also honor the breadth of the presentations from disciplines including linguistics, experimental psychology, and computer science. The variety of sentence processing topics examined includes: * how evoked brain potentials reflect sentence comprehension * how auditory words are processed * how various sources of grammatical and nongrammatical information are coordinated and used * how sentence processing and language acquisition might be related. This distinctive volume not only presents the most exciting current work in sentence processing, but also places this research into the broader context of theorizing about it.

Perspectives on Sentence Processing

The Eighteenth Round Table of South Asian Language Analysis (SALA) was organised by the Centre of Linguistics and English, School of Languages, Jawaharlal Nehru University, New Delhi (India), January 4-6, 1997. The conference was attended by scholars from all over the world and about 150 papers were presented in 20 parallel sessions and plenary sessions. This volume is a representative sample of the breadth and quality of research that is being carried out in South Asian linguistics today.

Linguistic Structure and Language Dynamics in South Asia

The typological, contrastive, and descriptive studies in this volume investigate the strategies employed by the world's languages to create complex denotations by combining two noun-like elements, together with the kinds of semantic relation they involve, and their acquisition by children. The term 'binominal lexeme' is employed to cover both noun-noun compounds and a range of other naming strategies, including prepositional compounds, relational compounds, construct forms, genitival constructions, and more. Overall, the volume suggests a new, cross-linguistic approach to the study of complex lexeme formation that cuts across the traditional boundaries between syntax, morphology, and lexicon.

The generative structure of the Slovak sentence

In *A Hubterranean View Of Syntax*, Julie Louise Steele explores the notion that "patterns in nature may be realised in the linguistic form of our own conversations; that our words dance to the same tune that is played out in our world." To show this, "the branch configuration of a tree and its leaf structure echoed in the distributary arrangement in a river delta and the blood vessels of a kidney. Recall the spiral of a shell, its shape reflected in the wind currents of a tornado, the florets of a sunflower head and the curl of a ram's horn." Splendidly written in the beautiful country of Australia, where the Aborigines have an innate relationship with their language and the land. "Language is nature and nature is language." – Michael Steele

Binominal Lexemes in Cross-Linguistic Perspective

Provides an overview of the fundamental psycholinguistic topics involved in sentence processing. Proposing a cross-linguistic approach, this book offers a theory that characterizes universal cognitive features of the human language processor, independent of a single language structure. It addresses word recognition, fixed expressions, and more.

A Hubterranean View of Syntax

Few composers even begin to approach Beethoven's pervasive presence in modern Western culture, from the concert hall to the comic strip. Edited by a cultural historian and a music theorist, *Beethoven and His World* gathers eminent scholars from several disciplines who collectively speak to the range of Beethoven's importance and of our perennial fascination with him. The contributors address Beethoven's musical works and their cultural contexts. Reinhold Brinkmann explores the post-revolutionary context of Beethoven's "Eroica" Symphony, while Lewis Lockwood establishes a typology of heroism in works like *Fidelio*. Elaine Sisman, Nicholas Marston, and Glenn Stanley discuss issues of temporality, memory, and voice in works at the threshold of Beethoven's late style, such as *An die Ferne Geliebte*, the Cello Sonata op. 102, no. 1, and the somewhat later Piano Sonata op. 109. Peering behind the scenes into Beethoven's workshop, Tilman Skowronek explains how the young Beethoven chose his pianos, and William Kinderman shows Beethoven in the process of sketching and revising his compositions. The volume concludes with four essays engaging the broader question of reception of Beethoven's impact on his world and ours. Christopher Gibbs' study of Beethoven's funeral and its aftermath features documentary material appearing in English for the first time; art historian Alessandra Comini offers an illustrated discussion of Beethoven's ubiquitous and iconic frown; Sanna Pederson takes up the theme of masculinity in critical representations of Beethoven; and Leon Botstein examines the aesthetics and politics of hearing extramusical narratives and plots in Beethoven's music. Bringing together varied and fresh approaches to the West's most celebrated composer, this collection of essays provides music lovers with an enriched understanding of Beethoven--as man, musician, and phenomenon.

Resources in Education

The relation between phrase structure and the lexicon has always been an area of prime concern in syntactic theory, but never more so than in the recently developed minimalist framework, where the lexicon is largely reduced to configurational and computational properties of the grammar. Taking this perspective as their point of departure, the authors of this volume address issues including the mapping between thematic information and phrase structure, the way in which the configurational character of functional categories determines interpretation in a theory of phrase structure, and methodological discussions about core assumptions of phrase structure itself. Some of the essential themes that emerge are that projection and interpretation go hand in hand (a successful projection in an interpretable one), and that, to a large extent, phrase structure itself encodes lexical information

and determines interpretation in the thematic domain. Audience: Theoreticians in syntax, semantics and language acquisition, and in related fields.

Sentence Processing: A Crosslinguistic Perspective

This book presents the most complete exposition of the theory of head-driven phrase structure grammar (HPSG), introduced in the authors' *Information-Based Syntax and Semantics*. HPSG provides an integration of key ideas from the various disciplines of cognitive science, drawing on results from diverse approaches to syntactic theory, situation semantics, data type theory, and knowledge representation. The result is a conception of grammar as a set of declarative and order-independent constraints, a conception well suited to modelling human language processing. This self-contained volume demonstrates the applicability of the HPSG approach to a wide range of empirical problems, including a number which have occupied center-stage within syntactic theory for well over twenty years: the control of "understood" subjects, long-distance dependencies conventionally treated in terms of wh-movement, and syntactic constraints on the relationship between various kinds of pronouns and their antecedents. The authors make clear how their approach compares with and improves upon approaches undertaken in other frameworks, including in particular the government-binding theory of Noam Chomsky.

Beethoven and His World

Professor Ferenc Kiefer of the Linguistics Institute of the Hungarian Academy of Sciences was instrumental in bringing early transformational grammar to Europe. His extensive work contributes substantially to making a connection between the grammatical theory and other areas of linguistics. The 17 essays in this book celebrate his career by continuing to explore inter-area research in linguistics: pragmatics in grammar (de Groot, van Riemsdijk, Dressler & Barbaresi, Comrie), semantic compositionality and pragmatics (Wunderlich, Partee, Borschev, Szabo, Bach), logical structures and universals in semantics and pragmatics (van der Auwera, Bultinck, Burton-Roberts, Harnish, Wierzbicka) dialogue and thematic structure (Jonasson, Doherty, Hajicova, Panevova, Sgall, Allwood, Fraser).

Phrase Structure and the Lexicon

The volume presents the author's articles written in the last fifteen years, dealing with the interaction between syntax, functional sentence perspective (information structure) and text in present-day English. It is divided into five parts, I Syntactic Constancy, II Syntax FSP Interface, III FSP and Semantics, IV Syntax, FSP, Text and V Style, which reveal the two facets of functional sentence perspective: syntactic structures as realization forms of the carriers of FSP functions, and the connection of FSP with the level of text. The first and the last two parts frame the content of the volume in treating the role of functional sentence perspective at the syntactic and the textual levels. At the former, FSP is investigated as a potential factor of syntactic divergence between English and Czech, at the latter the role of FSP is examined with respect to theme development, text build-up and style. The points discussed in the other parts concern, among others, the hierarchical relationship between syntax and FSP, the question of potentiality in FSP structure, different realization forms of FSP structure and FSP functions, general and specific questions of word order, with major attention paid to the role of semantics.

Head-Driven Phrase Structure Grammar

This volume contains a selection of reviewed and revised papers, originally presented at the International Pragmatics Conference held in Viareggio, Italy, 1 5 September 1985.

Perspectives on Semantics, Pragmatics, and Discourse

Comparative syntax has been playing an increasingly important role in research in syntactic theory. Japanese has also been discussed in comparative perspective, but the comparison has been mostly with English. This volume aims to pursue the comparative syntax of Japanese with other Asian languages and, by doing so, to make original contributions to syntactic theory.

From Syntax to Text: The Janus Face of Functional Sentence Perspective

Against the background of the proliferation of the various subdisciplines of language acquisition research over the past decades, this volume aims to enhance the existing but somewhat fragile links between language acquisition and theoretical linguistics. With regard to previous research, the

book focuses on the acquisition of syntax and syntactic theory, specifically on Chomskyan Generative Grammar.

The Pragmatic Perspective

Language comprehension and production is a uniquely human capability. We know little about the evolution of language as a human trait, possibly because our direct ancestors lived several million years ago. This fact certainly impedes the desirable advances in the biological basis of any theory of language evolution. Our knowledge about language as an existing species-specific biological system, however, has advanced dramatically over the last two decades. New experimental techniques have allowed the investigation of language and language use within the methodological framework of the natural sciences. The present book provides an overview of the experimental research in the area of language comprehension in particular. A biological perspective on language appears to be the common ground for all the contributors. Their research view is based on the conviction that knowledge about the language system can be gained on the basis of empirical research guided by modifiable theories. Each of the contributors reports and discusses the relevant work in hers or his specific field of research. Each of the nine chapters in this book focuses on a different level or aspect of language comprehension thereby covering the level of input processes and word recognition, the level of sentence processing as well as the level of text processing. Aspects of structural representation, and access to this representation are also discussed. One chapter finally attempts to describe the neurobiological basis of the different aspects of the language comprehension process.

Japanese Syntax in Comparative Perspective

The work of the linguist Charles A. Ferguson spans more than three decades, and is remarkable for having been consistently at the forefront of scholarship on the relationship between language and society. This volume collects his most influential and seminal papers, each having expanded the parameters of sociolinguistics and the sociology of language. Taken together, they cover a wide range of topics and issues, and, more importantly, reflect the intellectual progress of a founder of the sociolinguistic field. The volume is divided thematically into four sections, and an introduction by Thom Huebner outlines the evolution of Ferguson's ideas and the impact they have had on other scholars. This book is essential reading for everyone interested in the field of sociolinguistics.

Generative Perspectives on Language Acquisition

If the invective of Nietzsche and Shaw is to be taken as an endorsement of the lasting quality of an artist, then Felix Mendelssohn Bartholdy takes pride of place beside Tennyson and Brahms in the canon of great nineteenth-century artists. Mendelssohn Perspectives presents valuable new insights into Mendelssohn's music, biography and reception. Critically engaging a wide range of source materials, the volume combines traditional musical-analytical studies with those that draw on other humanistic disciplines to shed new light on the composer's life, and on his contemporary and posthumous reputations. Together, these essays bring new historical and interpretive dimensions to Mendelssohn studies. The volume offers essays on Mendelssohn's Jewishness, his vast correspondence, his music for the stage, and his relationship with music of the past and future, as well as the compositional process and handling of form in the music of both Mendelssohn and his sister, the composer Fanny Hensel. German literature and aesthetics, gender and race, philosophy and science, and issues of historicism all come to bear on these new perspectives on Mendelssohn.

Language Comprehension: A Biological Perspective

First published in 1975, *The Correspondence Theory of Truth* examines the simplest statements of empirical fact and establishes what we can mean when we say that such statements are true. In particular, the author has considered whether any or all of beliefs, sentences, statements, or propositions are properly said to be true or false. He proceeds to examine what we mean by the term 'fact' and what possible relation between facts and beliefs (or their linguistic embodiments) could be meant by the term 'correspondence'. The second part of the book is a critical survey of important contemporary accounts of truth. The author examines Tarski's semantic theory to see if it offers a satisfactory reconstruction of the essence of the traditional notion of correspondence, then J.L. Austin's recent and famous version of the correspondence theory and some criticisms of it by Professor P. E. Strawson. A final chapter summarizes the viable content of the correspondence theory and suggests

what problems about truth still remain for discussion if the theory is accepted. This book will be an essential read for students and scholars of Philosophy.

Sociolinguistic Perspectives

A COMPANION TO CHOMSKY Widely considered to be one of the most important public intellectuals of our time, Noam Chomsky has revolutionized modern linguistics. His thought has had a profound impact upon the philosophy of language, mind, and science, as well as the interdisciplinary field of cognitive science which his work helped to establish. Now, in this new Companion dedicated to his substantial body of work and the range of its influence, an international assembly of prominent linguists, philosophers, and cognitive scientists reflect upon the interdisciplinary reach of Chomsky's intellectual contributions. Balancing theoretical rigor with accessibility to the non-specialist, the Companion is organized into eight sections—including the historical development of Chomsky's theories and the current state of the art, comparison with rival usage-based approaches, and the relation of his generative approach to work on linguistic processing, acquisition, semantics, pragmatics, and philosophy of language. Later chapters address Chomsky's rationalist critique of behaviorism and related empiricist approaches to psychology, as well as his insistence upon a "Galilean" methodology in cognitive science. Following a brief discussion of the relation of his work in linguistics to his work on political issues, the book concludes with an essay written by Chomsky himself, reflecting on the history and character of his work in his own words. A significant contribution to the study of Chomsky's thought, *A Companion to Chomsky* is an indispensable resource for philosophers, linguists, psychologists, advanced undergraduate and graduate students, and general readers with interest in Noam Chomsky's intellectual legacy as one of the great thinkers of the twentieth century.

Mendelssohn Perspectives

This book explores relationships and maps out intersections between discussions on causation in three scientific disciplines: linguistics, philosophy, and psychology. The book is organized in five thematic parts, investigating connections between philosophical and linguistic studies of causation; presenting novel methodologies for studying the representation of causation; tackling central issues in syntactic and semantic representation of causal relations; and introducing recent advances in philosophical thinking on causation. Beyond its thematic organization, readers will find several recurring topics throughout this book, such as the attempt to reduce causality to other non-causal terms; causal pluralism vs. one all-encompassing account for causation; causal relations pertaining to the mental as opposed to the physical realm, and more. This collection also lays the foundation for questioning whether it is possible to evaluate available philosophical approaches to causation against the variety of linguistic phenomena ranging across diverse lexical and grammatical items, such as bound morphemes, prepositions, connectives, and verbs. Above all, it lays the groundwork for considering whether the fruits of the psychological-cognitive study of the perception of causal relations may contribute to linguistic and philosophical studies, and whether insights from linguistics can benefit the other two disciplines.

The Correspondence Theory of Truth

The work of the linguist Charles A. Ferguson spans more than three decades, and is remarkable for having been consistently at the forefront of scholarship on the relationship between language and society. This volume collects his most influential and seminal papers, each having expanded the parameters of sociolinguistics and the sociology of language. Taken together, they cover a wide range of topics and issues, and, more importantly, reflect the intellectual progress of a founder of the sociolinguistic field. The volume is divided thematically into four sections, and an introduction by Thom Huebner outlines the evolution of Ferguson's ideas and the impact they have had on other scholars. This book is essential reading for everyone interested in the field of sociolinguistics.

A Companion to Chomsky

Building on the insights of the first volume on *Music and Gesture* (Gritten and King, Ashgate 2006), the rationale for this sequel volume is twofold: first, to clarify the way in which the subject is continuing to take shape by highlighting both central and developing trends, as well as popular and less frequent areas of investigation; second, to provide alternative and complementary insights into the particular areas of the subject articulated in the first volume. The thirteen chapters are structured in a broad narrative trajectory moving from theory to practice, embracing Western and non-Western practices, real and

virtual gestures, live and recorded performances, physical and acoustic gestures, visual and auditory perception, among other themes of topical interest. The main areas of enquiry include psychobiology; perception and cognition; philosophy and semiotics; conducting; ensemble work and solo piano playing. The volume is intended to promote and stimulate further research in Musical Gesture Studies.

Perspectives on Causation

These essays offer a range of approaches central to the performance of French piano music of the nineteenth and twentieth centuries. The contributors include scholars and performers who see performance as a practice enriched by a wealth of historical and analytical approaches. Each author considers examples drawn from a particular repertoire or composer. Themes that emerge demonstrate the importance of editions as a form of communication, the challenges of notation, the significance of detail and of deeper continuity, the importance of performing and teaching traditions, and the influence of cross disciplinary frameworks.

Sociolinguistic Perspectives : Papers on Language in Society, 1959-1994

This book argues convincingly against the widespread opinion that very few syntactic studies were carried out before the 1950s. Relying on the detailed analysis of a large amount of original sources, it shows that syntactic matters were in fact carefully investigated throughout both the 19th century and during the first half of the 20th century. Moreover, it illustrates how the enormous development of syntactic research in the last fifty years has already condemned even several recent ideas and analyses to oblivion, and deeply influenced current research programs. The wealth of research undertaken over the last two centuries is presented here in a systematic way, taking as its starting point the relationship of syntax with psychology throughout this period. The critical ideas expressed in the text are based on a detailed illustration of the different syntactic models and analyses rather than on the polemics between the different schools.

New Perspectives on Music and Gesture

This critical history of research on acquired language deficits (aphasias) demonstrates the usefulness of linguistic analysis of aphasic syndrome for neuropsychology, linguistics, and psycholinguistics. Drawing on new empirical studies, Grodzinsky concludes that the use of grammatical tools for the description of the aphasias is critical. The selective nature of these deficits offers a novel view into the inner workings of our language faculty and the mechanisms that support it. In contrast to other proposals that the left anterior cerebral cortex is crucial for all syntactic capacity, Grodzinsky's discoveries support his theory that this region is necessary for only a small component of the human language faculty. On this basis he provides a detailed explanation for many aphasic phenomena - including a number of puzzling cross-linguistic aphasia differences - and uses aphasic data to evaluate competing linguistic theories. Yosef Grodzinsky is a member of the psychology faculty at Tel Aviv University. "Theoretical Perspectives on Language Deficits" is included in the series *Biology of Language and Cognition*, edited by John P. Marshall. A Bradford Book.

Perspectives on the Performance of French Piano Music

Published in the year 1982, *Perspectives on the Study of Speech* is a valuable contribution to the field of Cognitive Psychology.

200 Years of Syntax

This book is concerned with dictionary-making and dictionary-research carried out in Romania. The outcome of extensive, hands-on experience in dictionary making and dictionary research, the volume addresses a range of culture-specific topics related to both dictionary-as-process and dictionary-as-product. It reflects the interests and concerns of all the stakeholders on the lexicographic continuum: theorists, practitioners, and dictionary users. The topics covered here encompass a number of macro- and micro-structural aspects relating to paper and online, monolingual and bilingual, general and specialized reference works. They create a composite picture of the lexicographic landscape in Romania set against a wider sociocultural backdrop. It is this ecology of dictionary making that helps explain the priorities, influences, pressures, and challenges that have shaped the local dictionary culture. The book will also provide researchers, practitioners, teachers and students with a clearer view of the peculiarities of the dictionary.

Theoretical Perspectives on Language Deficits

The evolution of human language has been discussed for centuries from different perspectives. Linguistic theory has proposed grammar as a core part of human language that has to be considered in this context. Recent advances in neurosciences have allowed us to take a new neurobiological look on the similarities and dissimilarities of cognitive capacities and their neural basis across both closely and distantly related species. A couple of decades ago the comparisons were mainly drawn between human and non-human primates, investigating the cytoarchitecture of particular brain areas and their structural connectivity. Moreover, comparative studies were conducted with respect to their ability to process grammars of different complexity. So far the available data suggest that non-human primates are able to learn simple probabilistic grammars, but not hierarchically structured complex grammars. The human brain, which easily learns both grammars, differs from the non-human brain (among others) in how two language-relevant brain regions (Broca's area and superior temporal cortex) are connected structurally. Whether the more dominant dorsal pathway in humans compared to non-human primates is causally related to this behavioral difference is an issue of current debate. Ontogenetic findings suggest at least a correlation between the maturation of the dorsal pathway and the behavior to process syntactically complex structures, although a causal prove is still not available. Thus the neural basis of complex grammar processing in humans remains to be defined. More recently it has been reported that songbirds are also able to distinguish between sound sequences reflecting complex grammar. Interestingly, songbirds learn to sing by imitating adult song in a process not unlike language development in children. Moreover, the neural circuits supporting this behavior in songbirds bear anatomical and functional similarities to those in humans. In adult humans the fiber tract connecting the auditory cortex and motor cortex dorsally is known to be involved in the repetition of spoken language. This pathway is present already at birth and is taken to play a major role during language acquisition. In songbirds, detailed information exist concerning the interaction of auditory, motor and cortical-basal ganglia processing during song learning, and present a rich substrate for comparative studies. The scope of the Research Topic is to bring together contributions of researchers from different fields, who investigate grammar processing in humans, non-human primates and songbirds with the aim to find answers to the question of what constitutes the neurobiological basis of grammar learning. Open questions are: Which brain networks are relevant for grammar learning? Is there more than one dorsal pathway (one from temporal cortex to motor cortex and one to Broca's area) and if so what are their functions? Has the ability to process sequences of a given hierarchical complexity evolved in different phylogenetic lines (birds, primates, other vocal production learners such as bats)? Is the presence of a sensory-to-motor circuit in humans a precondition for development of a dorsal pathway between the temporal cortex and Broca's area? What role do subcortical structures (Basal Ganglia) play in vocal and grammar learning?

Perspectives on the Study of Speech

"This book presents a systematic discussion of hypermeter and phrase structure in eighteenth-century music. It combines perspectives from historical and modern music theory with insights from the cognitive study of music and introduces a dynamic model of hypermeter, which allows the analyst to trace the effect of hypermetric manipulations in real time. This model is applied in analyses of string chamber music by Haydn and Mozart. The analyses shed a new light upon this celebrated musical repertoire, but the aim of this book goes far beyond an analytical survey of specific compositions. Rather, it is to give a comprehensive account of the ways in which phrase structure and hypermeter were described by eighteenth-century music theorists, conceived by eighteenth-century composers, and perceived by eighteenth-century listeners"--

A Local Perspective on Lexicography

Successful speaking and understanding hinges on the almost effortless capacity of speakers to decode and build dependencies among words in a sentence, based on covariance in some specific feature(s). Whenever two features covary, an agreement relation is established. Agreement is a widespread and varied phenomenon: its pervasiveness in some languages contrasts with its near absence in others, which poses a challenge for linguists and psycholinguists that attempt to explain the mechanics of its representation, processing and acquisition. Agreement has been extensively investigated from a theoretical perspective, but also from the point of view of psycholinguistics and the cognitive neuroscience of language. Theoretical linguistics has provided an articulated system of structural representations and computations on which the establishment of agreement relations hinges, while psycholinguistics and cognitive neuroscience have aimed at unveiling the algorithms that underlie the use of these computations and their behavioral and neuro-physiological bases. The goal of this

Research Topic is to draw together multiple and interdisciplinary work to highlight the state of the art in the study of agreement and propose new perspectives on this research topic. Publisher's note: In this 2nd edition, the following article was added: Mancini S, Caffarra S and Nevins A (2021) Editorial: Featural Relations in the Brain: Theoretical and Experimental Perspectives on Grammatical Agreement. Front. Psychol. 12:754430. doi: 10.3389/fpsyg.2021.754430

Neurobiology of human language and its evolution: Primate and Nonprimate Perspectives

The papers in this volume deal with various topics in Arabic Linguistics. Most of the papers focus on new issues and introduce new empirical generalizations that haven't been studied before within the context of Arabic linguistics. The syntax and morphosyntax papers explore issues ranging from the nature of extraction strategies to various types of Construct State representations and the proper analysis of the distribution of the nominal, adjectival and verbal morphological features. The computational linguistics papers focus on the challenge posed by the non-concatenative nature of Arabic morphology. The authors illustrate how their programs can handle Arabic morphology. The papers in morpho-phonology and historical linguistics deal with the development of the Arabic complementizer system and the empirical and theoretical problems that arise in the context of hypocoristic formation in Arabic. The sociolinguistics papers take up the issues of sociolinguistic variation as they pertain to the phenomenon of diglossia and regional uses of the Standard variety of Arabic.

Hypermetric Manipulations in Haydn and Mozart

Tense, Mood and Aspect

This book is a collection of articles dealing with theoretical issues in the study of tense, mood and aspect, as well as with specific semantic and syntactic problems raised by linguistic expressions dedicated to these domains across a variety of languages. Through these papers, strong variations are explored, but also crosslinguistic convergences are investigated. Numerous phenomena so far often left aside in linguistics are described and enlightened by different scientific standpoints, which they serve to illustrate. The languages investigated in this volume include Germanic languages (Dutch, English, German), Romance (French, Catalan, Italian), Slavic (Serbo-Croatian, Czech, Russian), Greek, and non-indoeuropean languages such as Thai, Digo and Kikuyu. Related topics such as grammaticalization, presuppositions, questions in dialogue, illocutionary acts and acquisition are incidentally called upon in order to shed light from the outside onto tense, mood (and modality) and aspect. This volume is of great interest for all scholars engaged in contemporary research on the linguistic expression of tense, mood and aspect. The papers gathered in this volume are a tight selection of the ones that were presented at the 6th Chronos colloquium.

Tense, Aspect and Action

Research on language universals and research on linguistic typology are not antagonistic, but rather complementary approaches to the same fundamental problem: the relationship between the amazing diversity of languages and the profound unity of language. Only if the true extent of typological divergence is recognized can universal laws be formulated. In recent years it has become more and more evident that a broad range of languages of radically different types must be carefully analyzed before general theories are possible. Typological comparison of this kind is now at the centre of linguistic research. The series *Empirical approaches to language typology* presents a platform for contributions of all kinds to this rapidly developing field. The distinctive feature of the series is its markedly empirical orientation. All conclusions to be reached are the result of a deepened study of empirical data. General problems are focused on from the perspective of individual languages, language families, language groups, or language samples. Special emphasis is given to the analysis of phenomena from little known languages, which shed new light on long-standing problems in general linguistics. The series is open to contributions from different theoretical persuasions. It thus reflects the methodological pluralism that characterizes the present situation. Care is taken that all volumes be accessible to every linguist and, moreover, to every reader specializing in some domain related to human language. A deeper understanding of human language in general, based on a detailed analysis of typological diversity among individual languages, is fundamental for many sciences, not only for linguists. Therefore, this series has proven to be indispensable in every research library, be it public or private, which has a specialization in language and the language sciences. To discuss your book idea or submit a proposal, please contact Birgit Sievert.

The Oxford Handbook of Tense and Aspect

This Handbook is a comprehensive, authoritative, and accessible guide to the topics and theories that current form the front line of research into tense, aspect, and related areas.

Pondering on Problems of Argumentation

Pondering on Problems of Argumentation is a collection of twenty essays brought together for anyone who is interested in theoretical issues in the study of argumentation. This collection of papers gives the reader an insightful and balanced view of the kind of theoretical issues argumentation theorists are currently concerned with. Because most of the perspectives on argumentation that are en vogue are represented, this volume provides a multidisciplinary and even interdisciplinary outlook on the current state of affairs in argumentation theory. Some of the contributions in *Pondering on Problems of Argumentation* deal with problems of argumentation that have been recognized as theoretical issues for a considerable time, like the problems of fallaciousness and identifying argumentation structures. Other contributions discuss issues that have become a focus of attention only recently or regained their prominence, such as the relationship between dialectic and rhetoric, and the strategic use of the argumentative technique of dissociation. In five separate sections papers are included dealing with argumentative strategies, problems of norms of reasonableness and fallaciousness, types of argument and argument schemes the structure of argumentation and rules for advocacy and discussion.

Operators vs Quantifiers

In this volume, seven experts in logic and semantics examine reasons for using the intensional operator approach over the variable binding approach and vice versa. In logic and semantics there are two alternative tools that can be applied to many types of embedding phrases (modal, temporal, etc): the intensional operator approach and the variable binding approach. A rivalry between operators and quantifiers occurs in many areas of semantics: e.g. tense, modality, locational operators, epistemic modality. There are areas where the operator approach dominates, and areas where quantifiers prevail. Sometimes, as in the case of tense, roles have switched, and where one approach used to dominate, the other has taken over. This volume features contributions from leading experts in the field that examine the following questions: what exactly is at stake in a choice between the alternatives? are there any principled reasons for deciding which approach to use in which case? should we be purists and eliminate one approach completely in favour of the other? *Operators vs Quantifiers* will be a key resource for academics, researchers, and advanced students of philosophy, linguistics, computer science and mathematics. This book was originally published as a special issue of *Inquiry*.

Time: Language, Cognition & Reality

Linguists and philosophers examine the representation of temporal reference; the interaction of the temporal information from tense, aspect, modality, and context; and the representation of the temporal relations between facts, events, states, propositions, and utterances. They link this to current research in psychology and anthropology.

The Oxford Handbook of Inflection

This handbook provides a comprehensive state-of-the-art overview of work on inflection - the expression of grammatical information through changes in word forms. The volume's 24 chapters are written by experts in the field from a variety of theoretical backgrounds, with examples drawn from a wide range of languages.

Modality and Mood in Romance

This collective volume contains a selection of research contributions, presented at the 30th Deutscher Romanistentag [German Conference on Romance languages and literatures] in 2007 in Vienna in the section "Mood and Modality in Romance". The Romance languages studied here include Portuguese, Italian, Spanish, Romanian, Catalan and French. All contributions thematically explore the status and importance of modality and mood and their reciprocal relationships with reference to theoretical approaches.

In the Mood for Mood

This volume is a selection of papers presented at the 7th Chronos colloquium in Antwerp (2006), which deal with the expression of modality (in a wide sense), by modal and semi-modal verbs (in Germanic and Romance languages), on the one hand, and by other markers (in languages like Turkish, Tibetan and Japanese), on the other. The Antwerp edition OCOs special conference topic was the interaction between tense and modality, of which some of the papers collected in this volume also testify. The volume covers a wide range of languages and topics. Specific topics include: the distinction between root and epistemic modality and its interaction with tense and counterfactuality; epistemic *deve* and *dovrebbe* in Italian; semi-modals in German; the interpretation of epistemic past modals in English and Spanish; the interface between Turkish OCO adverbs and the Turkish verbal system; the meaning of epistemic endings in Spoken Standard Tibetan; Korean OCO markers *teiru* and *ta* and so-called fake past sentences in Japanese."

Telling Time

Bringing together philosophers, logicians and linguists, *Telling Time* provides, in one handy volume, a short collection of historically informed, systematically comprehensive and critically argued articles devoted to some of the major issues of the contemporary debate on the relationship between time and language. Readers will learn about temporal proper names and localising temporal expressions, monstrous eternalism, how natural language codes temporal meaning, and how tensed beliefs can be explained. The book also contains a detailed introduction presenting some fundamental concepts, terms, methods, and claims of contemporary philosophy and linguistics on the subject of time, and proposes a list of titles for further study. Scholars and students in logic, linguistics, philosophy and epistemology alike will find this volume a useful aid to their current research.

Mood in the Languages of Europe

This book is the first comprehensive survey of mood in the languages of Europe. It gives readers access to a collection of data on mood. Each article presents the mood system of a specific European language in a way that readers not familiar with this language are able to understand and to interpret the data. The articles contain information on the morphology and semantics of the mood system, the possible combinations of tense and mood morphology, and the possible uses of the non-indicative mood(s). The papers address the explanation of mood from an empirical and descriptive perspective. This book is of interest to scholars of mood and modality, language contact, and areal linguistics and typology.

The Prominence of Tense, Aspect, and Mood

In this monograph, the author argues that natural languages exemplify the language type by assigning prominence to just one of the three verbal categories of tense, aspect and mood.

Mood, Aspect, Modality Revisited

Over the past several decades, linguistic theorizing of tense, aspect, and mood (TAM), along with a strongly growing body of crosslinguistic studies, has revealed complexity in the data that challenges traditional distinctions and treatments of these categories. *Mood, Aspect, Modality Revisited* argues that it's time to revisit our conventional assumptions and reconsider our foundational questions: What exactly is a linguistic category? What kinds of categories do labels such as “subjunctive,” “imperative,” “future,” and “modality” truly refer to? In short, how categorical are categories? Current literature assumes a straightforward link between grammatical category and semantic function, and descriptions of well-studied languages have cultivated a sense of predictability in patterns over time. As the editors and contributors of *Mood, Aspect, Modality Revisited* prove, however, this predictability and stability vanish in the study of lesser-known patterns and languages. The ten provocative essays gathered here present fascinating cutting-edge research demonstrating that the traditional grammatical distinctions are ultimately fluid—and perhaps even illusory. Developing groundbreaking and highly original theories, the contributors in this volume seek to unravel more general, fundamental principles of TAM that can help us better understand the nature of linguistic representations.

Revisiting Modality

This book presents the first in-depth investigation of modality in Galician linguistics, offering a theoretical discussion of modal categories and a fine-grained description of epistemic adverbs. The first half of the monograph deconstructs the most relevant approaches to modal categories and shows how the traditional concept of modality is a problematic notion, how it relates to other concepts such as evidentiality and mitigation, and how it ought to be conceived of in order to become a more useful instrument for linguistic analysis. A new way of understanding modality is explored and illustrated through Galician examples. The second half of the book zooms in on six epistemic adverbs, which are exhaustively studied from both a formal and a functional perspective. Combining a quantitative and a qualitative perspective, the book shows that adverbs make up a rich semantic scale and establishes several factors that condition their occurrence in discourse, challenging previous conceptions of this grammatical domain.

Aspectuality and Temporality

This volume brings together a collection of articles exploring tense and aspect phenomena in a variety of non-related languages: Indo-European (Albanian, Bulgarian, Armenian, English, Norwegian, Hindi), Hamito-Semitic (Berber, Zenaga Berber, Arabic varieties, Neo-Aramaic), African (Wolof, Langi), Asian (Badaga, Korean, Mongolian languages – Khalkha, Buriat, Kalmuck – Thai, Tibetic languages), Amerindian (Yucatec Maya, Sikuani), Greenlandic (Eskimo) and Oceanian (Nêlêmwa). Each article is grounded in solid empirical knowledge. It offers an in-depth study of aspectual and temporal devices as manifested in many diverse and complex ways from a cross-linguistic perspective and seeks to contribute to our understanding of the domain under consideration and more broadly to linguistic typology and theoretical linguistics, especially the enunciative approach. The book gives readers access to a collection of data and is of particular interest to scholars working on aspectuality and temporality, on pragmatics, on areal linguistics and on typology.

Models of Modals

Modal verbs in English communicate delicate shades of meaning, there being a large range of verbs both on the necessity side (must, have to, should, ought to, need, need to) and the possibility side (can, may, could, might, be able to). They therefore constitute excellent test ground to apply and compare different methodologies that can lay bare the factors that drive the speaker's choice of modal verb. This book is not merely concerned with a purely grammatical description of the use of modal verbs, but aims at advancing our understanding of lexical and grammatical units in general and of linguistic methodologies to explore these. It thus involves a genuine effort to compare, assess and combine a variety of approaches. It complements the leading descriptive qualitative work on modal verbs by testing a diverse range of quantitative methods, while not ignoring qualitative issues pertaining to the semantics-pragmatics interface. Starting from a critical assessment of what constitutes the meaning of modal verbs, different types of empirical studies (usage-based, data-driven and experimental), drawing considerably on the same data sets, shows how method triangulation can contribute to an enhanced understanding. Due attention is also given to individual variation as well as the degree to which modals can predict L2 proficiency level.

Periphrasis and Inflexion in Diachrony

This volume brings together contributions from leading specialists in syntax and morphology to explore the complex relation between periphrasis and inflexion from both a synchronic and diachronic perspective. The chapters draw on data from across the Romance language family, including standard and regional varieties and dialects. The relation between periphrasis and inflexion raises questions for both syntax and morphology, and understanding the phenomena involved requires cooperation across these sub-domains. For example, the components that express many periphrases can be interrupted by other words in a way that is common in syntax but not in morphology, and in some contexts, a periphrastic form may be semantically equivalent to a single-word inflected form, with which it arguably forms part of a paradigmatic set. Patterns of this kind are found across Romance, albeit with significant local differences. Moreover, diachrony is essential in understanding these phenomena, and the rich historical documentation available for Romance allows an in-depth exploration of the changes and variation involved, as different members of the family may instantiate different stages of development. Studying these changes also raises important questions about the relation between attested and reconstructed patterns. Although the empirical focus of the volume is on the Romance languages, the analyses and conclusions presented shed light on the development and nature of similar structures in other language families and provide valuable insights relevant to linguistic theory more broadly.

Modality in Argumentation

This book addresses two related questions that have first arisen in Toulmin's seminal book on the uses of argument. The first question is the one of the relationship between the semantic analysis of modality and the structure of arguments. The second question is the one of the distinctive place, or role, of modality in the fundamental structure of arguments. These two questions concern how modality, as a semantic category, relates to the fundamental structure of arguments. The book addresses modality and argumentation also according to another perspective by looking at how different linguistic modal expressions may be taken as argumentative indicators. It explores the role of modal expressions as argumentative indicators by using the Italian modal system as a case study. At the same time, it uses predictions/forecasts in the business-financial daily press to investigate the relation between modality and the context of argumentation.

The Oxford Handbook of Grammaticalization

This book presents a critical assessment of research on grammaticalization, a central element in the process by which grammars are created. Leading scholars discuss its core theoretical and methodological bases, report on work in the field, and point to directions for new research. They represent every relevant theoretical perspective and approach.

New applications of Role & Reference Grammar

The first part is comprised of seven articles dealing with possible applications of RRG to diachronic syntax and grammaticalization. Beside an overview article, the papers are mainly concerned with changes either in the interaction between topic-focus structure and the Layered Structure of the Clause

or in the selection of Privileged Syntactic Arguments and case assignment. The second part consists of applications of RRG to Romance languages, and most of these applications are mainly concerned with the syntax-semantics interface. Different aspects of verbs (verbs as operators, verbs as sentence predicates, verb alternations) and the syntactic and semantic structures they involve are analyzed from an RRG perspective.

Mass Theatre in Interwar Europe

Ideological heterogeneity in mass plays in Flanders and the Netherlands In many European countries mass theatre was a widespread expression of 'community art' which became increasingly popular shortly before the First World War. From Max Reinhardt's lavish open-air spectacles to socialist workers' Laienspiel (lay theatre), theatre visionaries focused on ever larger groups for entertainment as well as political agitation. Despite wide research on the Soviet and German cases, examples from the Low Countries have hardly been examined. However, mass plays in Flanders and the Netherlands had a distinctive character, displaying an ideological heterogeneity not seen elsewhere. Mass Theatre in Interwar Europe studies this peculiar phenomenon of the Low Countries in its European context and sheds light on the broader framework of mass movements in the interwar period.

The Cambridge Handbook of Generative Syntax

Syntax – the study of sentence structure – has been at the centre of generative linguistics from its inception and has developed rapidly and in various directions. The Cambridge Handbook of Generative Syntax provides a historical context for what is happening in the field of generative syntax today, a survey of the various generative approaches to syntactic structure available in the literature and an overview of the state of the art in the principal modules of the theory and the interfaces with semantics, phonology, information structure and sentence processing, as well as linguistic variation and language acquisition. This indispensable resource for advanced students, professional linguists (generative and non-generative alike) and scholars in related fields of inquiry presents a comprehensive survey of the field of generative syntactic research in all its variety, written by leading experts and providing a proper sense of the range of syntactic theories calling themselves generative.

The Oxford Guide to the Romance Languages

Series statement "Oxford linguistics" from jacket.

Cross-linguistic Semantics of Tense, Aspect and Modality

Preface -- 1. The semantics of tense, aspect and modality in the languages of the world / Lotte Hogeweg, Helen de Hoop & Andrej Malchukov -- 2. Incompatible categories: Resolving the 'present perfective paradox' / Andrej L. Malchukov -- 3. The perfective/imperfective distinction: Coercion or aspectual operators? / Corien Bary -- 4. Lexical and compositional factors in the aspectual system of Adyghe / Peter M. Arkadiev -- 5. Event structure of non-culminating accomplishments / Sergei Tatevosov & Mikhail Ivanov -- 6. The grammaticalised use of the Burmese verbs *la* 'come' and *.wà* 'go' / Nicoletta Romeo -- 7. Irrealis in Yurakaré and other languages: On the cross-linguistic consistency of an elusive category / Rik van Gijn & Sonja Gipper -- 8. On the selection of mood in complement clauses / Rui Marques -- 9. 'Out of control' marking as circumstantial modality in St'át'imcets / Henry Davis, Lisa Matthewson & Hotze Rullmann -- 10. Modal geometry: Remarks on the structure of a modal map / Kees de Schepper & Joost Zwarts -- 11. Acquisitive modals / Johan van der Auwera, Petar Kehayov & Alice Vittrant -- 12. Conflicting constraints on the interpretation of modal auxiliaries / Ad Foolen & Helen de Hoop -- 13. Modality and context dependence / Fabrice Nauze -- 14. Verbal semantic shifts under negation, intensionality, and imperfectivity: Russian genitive objects / Barbara H. Partee & Vladimir Borschev -- 15. The Estonian partitive evidential: Some notes on the semantic parallels between aspect and evidential categories / Anne Tamm -- Index.

Tense, Aspect, Modality, and Evidentiality

After an introductory chapter that provides an overview to theoretical issues in tense, aspect, modality and evidentiality, this volume presents a variety of original contributions that are firmly empirically-grounded based on elicited or corpus data, while adopting different theoretical frameworks. Thus, some chapters rely on large diachronic corpora and provide new qualitative insight on the evolution of TAM systems through quantitative methods, while others carry out a collostructional analysis of

past-tensed verbs using inferential statistics to explore the lexical grammar of verbs. A common goal is to uncover semantic regularities and variation in the TAM systems of the languages under study by taking a close look at context. Such a fine-grained approach contributes to our understanding of the TAM systems from a typological perspective. The focus on well-known Indo-European languages (e.g. French, German, English, Spanish) and also on less commonly studied languages (e.g. Hungarian, Estonian, Avar, Andi, Tagalog) provides a valuable cross-linguistic perspective.

The Compositional Nature of Tense, Mood and Aspect

A linguistic view of how natural language speakers package and open information, to deal with the expression of time.

Mood, Aspect, Modality Revisited

What is a linguistic category and what kinds of categories do the labels subjunctive, imperative, future, aspect, and modality refer to? The current literature assumes a straightforward mapping between grammatical category and semantic function, and descriptions of well-studied languages cultivate a sense of predictability in patterns. However, as the editors and contributors of "Mood, Aspect, Modality Revisited" show, this predictability and stability vanish once lesser known patterns and languages are studied. While it is feasible to retain certain distinctions among tense, aspect, and mood (TAM) in analysis of specific issues in specific languages, ongoing formal and experimental research seems to indicate that these traditional grammatical distinctions may ultimately be illusory. "Mood, Aspect, Modality Revisited" seeks more general or fundamental grammatical structures that can encompass the breadth of related concepts traditionally placed in the TAM categories."

The Syntax of Cape Verdean Creole

This book offers an in-depth treatment of a variety of morpho-syntactic issues in Cape Verdean Creole (CVC) both from a descriptive and theoretical perspective. The investigated topics include the determiner system, Tense, Mood, Aspect markers and pronominal paradigms. The study of TMA markers reveals morpho-syntactic configurations with interesting ramifications for syntactic theory and parametric variation. This book targets creolists, theoretical linguists, and the Cape Verdean community. Given the diversified targeted audience, the descriptive chapters are purposefully kept separate from their theoretical counterparts, presenting issues that are later revisited in the Minimalist framework. The data used in this study are primarily drawn from 83 transcribed interviews from a pool of 187 speakers. The interviews were collected during fieldwork conducted in 1997, 2000 and 2001 in the Cape Verdean Sotavento (leeward) islands representing the more basilectal varieties of the creole. As all natural languages, CVC displays syntactic similarities and differences with other creoles and noncreoles. Hence, in the spirit of comparative syntax, this volume compares CVC to other creoles like Guinea-Bissau Creole and to noncreoles like Portuguese, French, Icelandic and Italian dialects.

The Syntax of Mauritian Creole

A detailed study of different aspects of the syntax of Mauritian creole within a Chomskyan theoretical framework

The Perfect Volume

Drawing on the data and history from a wide range of languages, from Atayal to Zapotec, this volume brings together leading scholars in the field of tense and aspect research resulting in 18 contributions on the perfect and some of its close relatives (e.g. iamitives). Different approaches complement each other to shed light on the source, emergence, grammaticalization, and the typological extension of perfect constructions cross-linguistically. One focal point is the so-called aoristic drift, where the perfect comes to resemble the simple past or aorist (often via the hodiernal 'today' reading). The semantics and pragmatics of perfects are also investigated through their interaction with other categories (e.g. negation, mood). Over time some perfects undergo auxiliary doubling or omission, or the auxiliary becomes subject to selection. These facts also receive special attention in this book, presenting new insights on perfects in both well-studied as well as very understudied languages.

Tense across Languages

This book addresses recent developments in the study of tense from a cross-paradigm and cross-linguistic point of view. Leading international scholars explore challenging ideas about tense at the interfaces between semantics and syntax as well as syntax and morphology. The book is divided into three main subsections: 1) Tense in tenseless languages; 2) Tense, mood, and modality, and 3) Descriptive approaches to some tense phenomena. Although time is a universal dimension of the human experience, some languages encode reference to time without any grammatical tense morphology of the verb. Some of these exceptional “tenseless” languages are investigated in this volume: Kalaallisut, Paraguayan Guaraní and Movima. Modal verbs are polyfunctional in the sense that they express both tense and modality. In this volume, an untypical modal is analyzed, a modal analysis of imperatives is argued for, and sentential mood, which is closely related to modality, is analyzed. It is always interesting to look at the expression of tense in understudied languages, which is done here for Scottish Gaelic, Austronesian Rukai and German dialects. The volume can be used for graduate and undergraduate level teaching

Argumentation in the Newsroom

The news we see daily is selected from among alternatives by journalists. Argumentation in the Newsroom uses ethnographic data from Swiss television and print newsrooms to shed light on how journalists make decisions regarding the selection and presentation of news items in their daily professional practice. The evidence illustrates that, contrary to the standard view, journalistic decisions are not limited to the influence of standardized production patterns, instinct, or editors' orders. Rather, in their attempt to produce the best news possible, journalists carefully ponder and discuss their choices, utilizing full-fledged critical discussions at all stages of the newsmaking process. By employing the pragma-dialectical model of a critical discussion in conjunction with the Argumentum Model of Topics, this study provides a detailed reconstruction of how journalists make use of argumentative reasoning, basing their decisions on a complex set of material premises and on recurrent procedural premises.

Pidgin and Creole Tense/Mood/Aspect Systems

More than any other area of the grammar, tense-mood-aspect (TMA) has provided evidence to fuel the ongoing debates about creole genesis and about the relevance of pidgin and creole phenomena to language theory more generally. This volume advances the debate in two ways. First, it makes available in print for the first time and in its original form William Labov's *On the Adequacy of Natural Languages: I. "The Development of Tense"*. Second, the volume features detailed analyses of the TMA systems of seven diverse pidgins and creoles, which vary in terms of their lexifying (superstrate) languages, their location, and their social histories. With the authors employing a broad range of theoretical perspectives for their analyses, the study demonstrates both the extent to which pidgins and creoles share a single, prototypical TMA system and the degree to which individual pidgins and creoles diverge from that prototype. This is a volume that brings forward our knowledge and understanding of pidgin and creole TMA. The seven languages analyzed are: Capeverdean Crioulo, Kituba, Papiamentu, Berbice Dutch, Haitian Creole, Kru Pidgin English, and Eighteenth Century Nigerian Pidgin English.

The Expression of Phasal Polarity in African Languages

The book provides insights into the systems and strategies of expressing the Phasal Polarity (PhP) concepts ALREADY, STILL, NOT YET and NO LONGER in African languages. Special emphasis is laid on careful examination of the functional spectrum and paradigmatic affiliation of PhP expressions. The book challenges hypotheses and established assumptions in the typological literature.

Tense-aspect

The verbal categories of tense and aspect have been studied traditionally from the point of view of their reference to the timing and time-perspective of the speaker's reported experience. They are universal categories both in terms of the semantic-functional domain they cover as well as in terms of their syntactic and morphological realization. Nevertheless, their treatment in contemporary linguistics is often restricted and narrow based, often involving mere recapitulation of traditional semantic and morphotactic studies. The present volume arises out of a symposium held at UCLA in May 1979, in which a group of linguists gathered to re-open the subject of tense-and-aspect from a variety of perspectives, including — in addition to the traditional semantics — also discourse-pragmatics, psycholinguistics, child language, Creolization and diachronic change. The languages discussed in this volume include Russian, Turkish, English, Indonesian, Ameslan, Eskimo, various Creoles, Mandari,

Hebrew, Bantu and others. The emphasis throughout is not only on the description of language-specific tense-aspect phenomenon, but more on the search for universal categories and principles which underlie the cross-language variety of tense and aspect. In particular, many of the participants address themselves to the relationship between propositional-semantics and discourse-pragmatics, in so far as these two functional domains interact within tense-aspect systems.

Propositionale Argumente im Sprachvergleich / Propositional Arguments in Cross-Linguistic Research

Die Ars Grammatica-Tagungen am Leibniz-Institut für Deutsche Sprache befassen sich mit aktuellen Themen der linguistischen Forschung, denen sich die Abteilung Grammatik in Einzelprojekten widmet. Dieser Band ist aus der Tagung "Theorie und Empirie im Sprachvergleich" hervorgegangen und thematisiert die übereinzelsprachliche Variation bei der Realisierung von propositionalen (Sachverhalts-)Argumenten. Es handelt sich dabei im weitesten Sinne um Argumente, die Ereignisse, Propositionen oder Situationen beschreiben und in der Regel als Komplementsätze, Infinitivkomplemente, Gerundivkomplemente oder nominale/nominalisierte Komplemente realisiert werden. Detailarbeiten hierzu befassen sich mit Phänomenen in Einzelsprachen oder Sprachpaaren, doch bei detaillierten Analysen eines Phänomens gerät die Überprüfung der Implikationen für den Sprachvergleich und das Sprachprofil leicht aus dem Blick. Ein Desiderat der Forschung insbesondere im Bereich der Sachverhalts-Argumente ist es daher, Wege zu finden, die Variation detailliert zu analysieren und die Komplexität in der Variation kontrastiv und theoretisch adäquat zu beschreiben.

MLA International Bibliography of Books and Articles on the Modern Languages and Literatures

This handbook offers an in depth and comprehensive state of the art survey of the linguistic domains of modality and mood. An international team of experts in the field examine the full range of methodological and theoretical approaches to the many facets of the phenomena involved. Following an opening section that provides an introduction and historical background to the topic, the volume is divided into five parts. Parts 1 and 2 present the basic linguistic facts about the systems of modality and mood in the languages of the world, covering the semantics and the expression of different subtypes of modality and mood respectively. The authors also examine the interaction of modality and mood, mutually and with other semantic categories such as aspect, time, negation, and evidentiality. In Part 3, authors discuss the features of the modality and mood systems in five typologically different language groups, while chapters in Part 4 deal with wider perspectives on modality and mood: diachrony, areality, first language acquisition, and sign language. Finally, Part 5 looks at how modality and mood are handled in different theoretical approaches: formal syntax, functional linguistics, cognitive linguistics and construction grammar, and formal semantics.

The Oxford Handbook of Modality and Mood

Over patronen in taal en visies met verrassende argumenten in de Nederlandse taalkunde Naar aanleiding van het emeritaat van de Leuvense hoogleraren William Van Belle en Joop van der Horst hebben niet minder dan 80 collega's uit binnen- en buitenland samen 53 artikelen geschreven over een breed scala van thema's in de Nederlandse en algemene taalkunde. De titel 'patroon en argument' verwijst naar de belangstelling van de beide jubilarissen voor patronen in taal – van het grammaticale microniveau tot het taalpolitieke en taalhistorische macroniveau – en naar hun talent om hun visies te ondersteunen met uiteenlopende en vaak verrassende argumenten, zowel van technische als van meer beschouwende aard. Die veelzijdige eruditie is ook weerspiegeld in de bijdragen, die verschillend in opzet, toon en onderwerp zijn, en gezamenlijk een mooie stand van zaken geven van het onderzoek in de Nederlandse taalkunde.

Patroon en argument

This book offers both a retrospective view on how theories of aspectuality have developed over the past 30 years, and presents current, new directions of aspectuality research. The articles in this book take a wide crosslinguistic scope including aspectual analyses of the following languages: English and two varieties of English: African American English and Colloquial Singapore English, Italian, French, Bulgarian, Czech, Mandarin Chinese, West-Greenlandic, Wakashan languages, and Nahk-Daghestanian languages.

Following the Mystery Man

Margery Louise Allingham was an English writer of mystery and detective fiction, best remembered for her stories featuring gentleman sleuth Albert Campion. She also wrote a number of non-series stories, some under the pseudonym of Maxwell March. The Mystery Man of Soho is one such stories. It features Detective Inspector Bob Fisher of Scotland Yard. Although it is a book length novel, it was published originally in the December 1946 issue of the magazine Thrilling Detective. This book, including its cover, is illustrated with all the artwork of the original magazine publication

The Mystery Man of Soho

A superbly gripping and blackly funny mystery by the king of the comic crime caper. He's the Man With No Name and the owner of No Alibis, a mystery bookshop in Belfast. But when a detective agency next door goes bust, the agency's clients start calling into his shop asking him to solve their cases. It's not as if there's any danger involved. It's an easy way to sell books to his gullible customers and Alison, the beautiful girl in the jewellery shop across the road, will surely be impressed. Except she's not - because she can see the bigger picture. And when they break into the shuttered shop next door on a dare, they have their answer. Suddenly they're catapulted along a murder trail which leads them from small-time publishing to Nazi concentration camps and serial killers...

Mystery Man

You think that you know the Mystery Man, but then things happen and you are still not sure! You looked at him, but he is really not the one's you thought he was! So who's the mystery man? His he your friend, or he is someone that you never knew..He willtried to fool you and trick you! Do you really want to meet? " Mystery Man". It might be your lastthing that you will sees! Who's the Mystery man? But you taking a chance with your life, Watch your back! My website www.jean39sbooks.com

Mystery Man

This story has a genre of thrill and mystery. The main character of this story is a boy, who has to go find answers to secret codes in order to solve a mystery.This is a great book for relaxation and to enjoy.

The Mystery Man

Are you up for a thrilling adventure? While picnicking at Willow Lake, the Mystery Kids don't pay much attention when they spot a man rowing to the small island. However, when another man rows there as well, shortly after the first one has departed, the children's suspicious are aroused. What could be happening in such a peaceful and desolate spot? What secret does the island hold? Why is Mr Peterson acting so suspiciously? Set in 1950's Britain, this adventure story will suit anyone who enjoys Nancy Drew, the Hardy Boys or the Famous Five. THE MYSTERY SERIES This middle grade series set in 1950's UK will delight children of all ages. Perfect for fans of Enid Blyton (Famous Five/Secret Seven), Carolyn Keene (Nancy Drew), Franklin Dixon (Hardy Boys) and Gertrude Chandler Warner (The Boxcar Children). The Mystery Man

Night time is the right time... Gwendolyn Kidd has met the man of her dreams. He's hot, he's sexy, and what started as a no-names-exchanged night of passion has blossomed into a year and a half-long pleasure fest. Sure, it's a little strange that he only appears in her bed at night, but Gwen is so sure he's the one, she just can't turn him away... Hawk Delgado knows more about Gwen than she could ever imagine. She's gorgeous, headstrong, and skittish about relationships. But Hawk is facing his own demons, demons that keep him from connecting with anyone. Yet when Gwen is drawn into Denver's lethal underground scene, Hawk's protective nature comes out full force. The problem is, when Gwen gets a dose of Hawk's Alpha attitude in the daylight, she's not so sure he's the one anymore.... 130,000 words.

The Mystery Man

Jack goes on a family camping trip what he doesn't know is that there is a mad man on the loose and eventually he will have to save his parents from the depth of evil.

The Mystery of the Mysterious Man (The Mystery Series Short Story 3)

Meg & The Mystery Man by Elise Title released on Sep 23, 1994 is available now for purchase.

Mystery Man

"Gwendolyn Kidd has met the man of her dreams. He's hot, he's sexy, and what started as a no-names-exchanged night of passion has blossomed into a year and a half-long pleasure fest. The Mystery Man

When notorious gangster 'Fat Sam' Mahood is murdered, the chief suspect is arrested nearby. But he seems to have suffered a breakdown. Incarcerated in a mental institution, he's known only as the Man in the White Suit. The suspect remains an enigma until Nurse Brenda calls on Mystery Man, former patient and owner of No Alibis, Belfast's finest mystery bookshop, to bring his powers of investigation to bear... However, before our hero can even begin, the Man in the White Suit is arrested for the murder of a fellow patient. But is he a double murderer or a helpless scapegoat? Intrigue, conspiracy, and ancient Latin curses all combine to give the Small Bookseller with No Name his most difficult case to date.

Meg & the Mystery Man

Madigan's grandmother rents a room to a handsome stranger. But the stranger has sinister reasons for coming to Maryland, as Madigan soon discovers. Mary Downing-Hahn is the author of The Doll in the Garden.

Mystery Man

When Clint, a handsome, mysterious stranger, rents a room in Madigan's grandmother's house, Madigan becomes convinced that he is the father she's never met.

The Prisoner of Brenda

Sam is convinced that his neighbour is a mystery burglar. So Sam decides to spy on him, but when he finds out the truth he is forced to apologise. Illustrated by Sholto Walker

Following the Mystery Man

This is a new release of the original 1929 edition.

Following the Mystery Man

The Mystery Man is the story of a peaceful housing society who are suddenly faced with a Man who starts his first appearance on rainy night on the terrace of his apartment dancing gloriously and disappears with the rain. Here the Mystery begins, Who is this guy and what is he doing here. Never a public and nor known to anyone. Different people different reactions and yet majority chose that this is a mystery. First they follow him Only to find all the places he is gone to and then left behind either murders, kidnappings, thefts or shoot outs. Mystery deepens as simultaneously police are facing challenges and they also get involved to know this person and if he has anything to do with the cases they are investigating. Lot of attempts are made, but no results. All this now is difficult as lot of other activities are picking up around the city. Doubts are within police circles too. The underground is acting strange. All this when the Mysterious Man is creating a lot of doubts. What will happen as the noose and vigilance is tightened and yet the Man continues. All are baffled it leads to a major confusion all around. Attempts are made to trap the guys by the housing society members but to no avail. Where will all of this end now. Only an Climax will open the plot however it remains to be seen the Mysterious Man slippery enough to create his own space or will the police and the Housing Society Members trap him. Read it to know it!!! Hope you love it!!! ??

The Mysterious Man

James Fitzjames was a hero of the early nineteenth-century Royal Navy. A charismatic man with a wicked sense of humour, he pursued his naval career with wily determination. When he joined the Franklin Expedition at the age of 32 he thought he would make his name. But instead the expedition completely disappeared and he never returned. Its fate is one of history's last great unsolved mysteries, as were the origins and background of James Fitzjames – until now. Fitzjames packed a great deal into his thirty-two years. He had sailed an iron paddle steamer down the River Euphrates and fought with spectacular bravery in wars in Syria and China. But Fitzjames was not what he seemed. He concealed several secrets, including the scandal of his birth, the source of his influence and his plans for after the Franklin Expedition. In this first complete biography of the captain of the HMS Erebus, William Battersby draws extensively on Fitzjames' personal letters and journals – most never published before – as well as official naval records, to strip away 200 years of misinformation and half-truths and enables us to understand for the first time this intriguing man and his significance for the Franklin Expedition.

Mystery Men

The hilarious new Mystery Man crime caper from the master of menace and mirth You don't say no to Dr. Yes, the charismatic plastic surgeon on the fast track to fame and fortune. But when the wife of obscure and paranoid crime writer Augustine Wogan disappears shortly after entering his exclusive clinic, the Small Bookseller with No Name is persuaded to investigate. As fatherhood approaches, our

intrepid hero is interested only in a quick buck and the chance to exploit a neglected writer, but he soon finds himself up to his neck in murder, make-up and madness - and face to face with the most gruesome serial killer since the last one.

Mr. Mystery Man

This is a true story about the most interesting person you've never heard of: Arthur Cravan, major figure in pre-WWI cutting-edge art circles, was among the greatest mysterious figures of the Twentieth Century. A self-confessed thief, forger, and con-artist, he used a roster of assumed names and false identities. He was known, at various times, as a novelist, poet, painter, art critic, lecturer, publisher, and the lightweight boxing champion of France. Always a rebellious, restless spirit, this dedicated rule-breaker was a political radical whose friendship with Leon Trotsky earned him the surveillance of the U.S. government—even through his immigration to Mexico with his wife, the poet Mina Loy. In 1918, at the age of thirty-one, the fascinating physical giant vanished without a trace, and—despite several supposed sightings over the years—was never seen again. Is it possible that he became the mysterious, reclusive novelist B. Traven, who wrote *The Treasure of the Sierra Madre*?

James Fitzjames

The Life of Apollonius; The Hidden Life of Jesus; The Council of Nicaea; Falsification; The Legend and the Truth Interwoven—Why?; The Mystic Sleep; The Second Coming; The True Understanding of the Biblical Statement. Many reject this book at the first reading—later they come back to buy scores to give to their friends. It is a book which will change your entire life. The author says: "TRUTH is such a rare quality—a stranger so seldom met in this civilization of fraud, that it is never received freely, but must always fight its way into the world." Get this book now—read it—and you'll probably become another follower of Hilton Hotema.

The Mystery Man of the Bible

Love is just around the corner . . . Sweet, shy Mara Hanover is in love with her neighbor. For four years, she has secretly watched her dream man from afar. Handsome police detective Mitch Lawson is way out of her league. She's a girl from the wrong side of the tracks, and there's no way a guy like Mitch would want anything to do with her. But when Mara has a leaky faucet that she can't fix, it's Mitch who comes to her rescue. Mitch has been eyeing his beautiful neighbor for a long time. He jumps at the chance to help her, and soon their formerly platonic relationship gets very hot and heavy. But when Mara gets a disturbing phone call from her cousin's kids, she gets pulled back into the life she's tried so hard to leave behind. Can the hot law man convince Mara to let go of her past—and build a future with him? 140,000 words

Dr. Yes

Tycoon Canton Rourke, was beset and besieged - and all because of his neighbor, Janine Curtis. The woman was out to get him, he was sure of it. He'd come to Cancun, Mexico, with his daughter to relax, not catch bandits, track kidnappers...or save the woman from any other fine mess she landed herself in!

Cravan Mystery Man of the Twentieth Century

The Cold War, The Lavender Scare, and the Untold Story of Eisenhower's First National Security Advisor. President Eisenhower's National Security Advisor Robert "Bobby" Cutler -- working alongside Ike and also the Dulles brothers at the CIA and State Department -- shaped US Cold War strategy in far more consequential ways than previously understood. A lifelong Republican, Cutler also served three Democratic presidents. A charming raconteur, he was a tight-lipped loyalist who worked behind the scenes to get things done. Cutler was in love with a man half his age, naval intelligence officer and NSC staffer Skip Koons. Cutler poured his emotions into a six-volume diary and dozens of letters that have been hidden from history. Steve Benedict, who was White House security officer, Cutler's friend and Koons' friend and former lover, preserved Cutler's papers. All three men served Eisenhower at a time when anyone suspected of "sexual perversion"

Mystery Man of the Bible

Nora Baron assumes the identity of a notorious femme fatale—who technically doesn't exist—in a powerhouse thriller from the bestselling author of Mrs. John Doe. “Tom Savage is a master of the high-speed thriller.”—Michael Connelly In a Manhattan safe house, Nora Baron—a Long Island mother and drama teacher leading a double life as a CIA operative—meets a spymaster who offers her a top-secret mission. Nora is to take on the role of Chris Waverly, a legend in the field—literally. As Nora's handler explains, Waverly isn't so much a person as she is an alias, a cover name shared by several American agents throughout the world. Now, a mysterious ransom note threatens these agents with exposure and certain death. As the new “Chris Waverly,” Nora travels to Paris to trap the anonymous blackmailer. But from the start, the mission is more dangerous than she could have anticipated. She encounters secrets and lies from her own people, and she's stalked by shadowy assassins. From the City of Light to a remote village high in the Swiss Alps, Nora follows the trail to a chilling international conspiracy—and the shocking truth about “Chris Waverly.” Be sure to read all three titles in Tom Savage's exciting Nora Baron series: MRS. JOHN DOE | THE WOMAN WHO KNEW TOO MUCH | THE SPY WHO NEVER WAS And don't miss his standalone thriller A PENNY FOR THE HANGMAN!

Law Man

WrestleCrap: The Very Worst of Professional Wrestling examines some of the ridiculously horrible characters and storylines that pro wrestling promoters have subjected their fans to over the past twenty years. Why would any sane person think that having two grown men fight over a turkey was actually a reasonable idea? Was George Ringo, the Wrestling Beatle, really the best gimmick that a major promotional organization could come up with? And who would charge fans to watch a wrestler named the Gobbeldy Gooker emerge from an egg? In an attempt to answer such questions and figure out just what the promoters were thinking, authors Randy Baer and R.D. Reynolds go beyond what wrestling fans saw on the screen and delve into the mindset of those in the production booth. In some instances, the motivations driving the spectacle prove even more laughable than what was actually seen in the ring. Covering such entertainment catastrophes as an evil one-eyed midget and a wrestler from the mystical land of Oz, not to mention the utterly comprehensible Turkey-on-a-Pole match (a gimmick which AWA fans might recall), WrestleCrap is hysterically merciless in its evaluation of such organizations as the WCW and the WWF. This retrospective look at the wrestling world's misguided attempts to attract viewers will leave wrestling fans and critics alike in stitches.

Mystery Man

When Scott, Jack and Emily rescue a drowning man from the waves they are keen to hear his story, but their new friend can't remember how he came to be stranded at sea! The friends are instantly on the case - with enthusiastic assistance from Drift the dog - determined to find the truth and solve the mystery of the drowning man.

Ike's Mystery Man

The mysterious life and career of Desmond Morton, Intelligence officer and personal adviser to Winston Churchill during the Second World War, is exposed for the first time in this study based on full access to official records. After distinguished service as artillery officer and aide-de-camp to General Haig during the First World War, Morton worked for the Secret Intelligence Service from 1919-1934, and the fortunes of SIS in the interwar years are described here in unprecedented detail. As Director of the Industrial Intelligence Centre in the 1930s, Morton's warnings of Germany's military and industrial preparations for war were widely read in Whitehall, though they failed to accelerate British rearmament as much as Morton - and Churchill - considered imperative. Morton had met Churchill on the Western Front in 1916 and supported him throughout the 'wilderness years', moving to Downing Street as the Prime Minister's Intelligence adviser in May 1940. There he remained in a liaison role, with the Intelligence Agencies and with Allied resistance authorities, until the end of the war, when he became a 'troubleshooter' for the Treasury in a series of tricky international assignments. Throughout Morton's career, myth, rumour and deliberate obfuscation have created a misleading picture of his role and influence. This book shines a light into many hitherto shadowy corners of British history in the first half of the twentieth century. This book will be of great interest to scholars and informed lay readers with an interest in the Second World War, intelligence studies and the life of Winston Churchill.

The Spy Who Never Was

A brilliant mystery series from bestselling author Enid Blyton, perfect for fans of The Secret Seven. The Trotteville's have a house guest named Eunice, and Fatty will do anything to avoid her. While hiding from Eunice his disguise leads a mystery right to him: there's an escaped prisoner in Peterswood who is also a master of disguise. Now Fatty, Larry, Daisy, Pip and Bets have to find the man and avoid Eunice at the same time... First published in 1956, this edition contains the original text and is unillustrated.

Daniel, The mystery man

Black Books meets Lead Balloon meets Gavin and Stacey in this hugely entertaining follow-up to MYSTERY MAN, from acclaimed author Bateman. The Small Shop Keeper With No Name is back. Hired to find the vandals responsible for spraying graffiti on an airline mogul's advertising hoarding, he soon finds himself up to his ears in intrigue and battling to solve murders which echo in the corridors of power. With MI5 getting involved and everyone on the hunt for a missing Jack Russell, can Our Man Behind the Counter stay alive as well as keep his world renowned but criminally ignored No Alibis mystery bookshop afloat?

Wrestlecrap

"Revenge is best served cold..."Especially when two large, canvas, cargo bags are filled with cash and locked in a vault.Apparently, crime lord Tubby Gustafson has a habit of not paying small contractors.But everyone deserves legal representation, and Hubert Holly, Tubby's lawyer, goes to bat for his client.Meanwhile, Dev Haskell picks up a side job with one of the largest investigative firms in the region.What could possibly go wrong?! Someone is about to pay... big time. Just who is thisMystery Man?

The Mystery of the Drowning Man

The Mystery of Woman is a dynamic, groundbreaking and deeply thought-provoking book that compiles the perspectives of more than 30 different authors, men and women. It tackles everything under the sun when it comes to understanding women and navigating the tricky waters of relationships: from love to romance, dating, masculine and feminine energies, sexuality, spirituality, tantra, communication, emotions, the suppression of women, the power of the masculine and much more. The Mystery of Woman features writings from Gabriel Morris, author of Kundalini and the Art of Being; Alice Grist, author of The High-Heeled Guide to Enlightenment; prominent yoga figure Dashama Konah; an interview with Maya Yonika, main character in the movie Sex Magic: Manifesting Maya; and many other leading figures in the realms of relationships, spirituality and sexuality. ,
