Understanding Career Counselling

[This] is an exciting book, written in clear, accessible style. It's an informative guide for anyone wishing to explore career counselling as a topic and process – Professional Manager. This is an excellent book – practical yet scholarly. It is a must-read for anyone who wants to understand how to facilitate the career development of other people in formal or informal settings – John Arnold, Professor of Organisational Behaviour, Loughborough University. At a time when the career counselling profession has been under some pressure in the UK, it is good to have an up-to-date text which cogently outlines the strong base of theory, research and practice upon which this professional activity is built. Jenny Kidd's lucid text will provide an invaluable resource for new entrants to career counselling and related fields, as well as for established practitioners – Professor Tony Watts, Senior Fellow and Life President, National Institute for Careers Education and Counselling, Cambridge. Understanding Career Counselling explores the theory, research and practice of career counselling from a British perspective and brings them together in one concise volume. The book addresses exactly what is meant by the term 'career' in the 21st century and the implications this has for those working with clients at different stages of their career. This book is unique in that it clearly relates career theories to career counselling, which is often an unclear area for trainees. Divided into two clear parts, the first provides a comprehensive account of theories of career development and career counselling and their implications for practice. Taking a critical approach, it also shows how research informs our understanding of the field. In the second part, career counselling skills, tools and techniques are described, including the use of assessment tools and

the internet. The book also covers ethical issues and evaluation. Understanding Career Counselling is invaluable for students undergoing training in career guidance, career counselling, outplacement counselling or career coaching, but it will also be a use to students on occupational psychology and human resource management courses. In addition, experienced career practitioners wishing to find out more about recent developments within their profession. Career Counselling

In a changing employment climate and with the growth of demand for careers guidance at all stages of life, careers guidance practice has moved from its positivist world view, with the counsellor as expert and client as passive responder, to more holistic 'constructivist' approaches. In essence, these approaches view the career as a holistic concept in which work and personal life are inextricably intertwined, and individuals are experts in their own lives, actively constructing their careers. The first to fully explore the constructivist approach, this book: provides a theoretical background to constructivism outlines a range of constructivist approaches to career counselling gives examples of the practical application of constructivism. Essential for anyone involved in career guidance wishing to learn more about this vital new approach, this book combines theory with practicable guidance, and represents a new direction for career counselling.

Career Counselling and Guidance in the Workplace

The average 21st-century career is one of constant change: an individual can no longer expect to remain with one organisation his or her entire life, achieving managerial status through natural progression. Today's job market requires constant re-training and adjustment because of skills obsolescence, age discrimination and technological illiteracy. On the other hand, younger or less qualified workers find it difficult to enter the labour market because of a lack of skills or experience. Career counsellors should be able to help clients to navigate this difficult and changing role. The book offers a practical framework within which the career counsellor can work. The text explains the role of the career counsellor within the organisation; discusses the key concepts that influence career behaviour; explains the use of counselling and guidance tools and techniques; offers insight into the profession and practice of career counselling; and provides guidance within an international and a South African context. Integrating theoretical and practical perspectives, this book offers a comprehensive overview of career counselling and guidance services, practices, tools and techniques in an organisational context. It consists of five chapters, each of which has a summary, key terms and review and discussion questions.

Career counselling

In this book, career counselling history, best practices as well as contemporary models and methods are brought together. In reflecting on the past, present, and future of career counselling, the story of the postmodern, narrative or career construction approach and the model and methods used to advance careers in the 21st century is told. A meta-reflection concept is proposed, based on career construction principles and practices and aimed at providing an examination of repeated reflection in career counselling. Overall, an attempt is made to craft a text that is not just specifically instructive but also more generally so. Whereas the theory section includes much that is hands-on and practical, the inclusion of narratives in the practice section turns theory into practice. Narratives illustrate the complexity and contextuality of partnering with clients toward (re-)designed lives. Ultimately, the volume aims to demonstrate how Mark Savickas' counselling for career construction approach can be used by clients to connect life themes in order to construct life portraits under the guidance of counsellors.

Creative Career Coaching: Theory into Practice is an innovative book for career development students and professionals aiming to creatively progress their coaching practice. Without losing sight of fundamental coaching values and practices, it encourages career development professionals to adapt their practice by harnessing imagination, intuition and critical reflection to engage clients. Hambly and Bomford consider the usefulness of creativity alongside traditional coaching models to reach "harder to help" groups. They consider a whole-brain approach to creativity, emphasising the need for coaches to adapt their client-facing skills for individual cases. They work through how clients make career decisions, how to use labour market information to motivate clients, how to frame a creative coaching session using techniques such as metaphor, visualisation and role play, how to use practical tools and techniques to resolve a client's individual needs, and how to deliver on digital platforms. Combining the latest neuroscientific research with activities, summaries and case studies, this book provides a practical, skills-based approach to coaching. Creative Career Coaching: Theory into Practice is the first book to summarise the Creative Career Coaching Model. It will be an indispensable resource for students of career development, career coaching, coaching psychology and advice and guidance courses. It will also be of interest to career coaches in practice seeking to enhance their skills.

Creative Career Coaching

The authors of this book demonstrate with case examples how to apply career development theories to career counselling practice. Each chapter applies a different theory to case examples and - to provide continuity - to a fictitious 'client' constructed from many past clients of the authors.

SAGE Guide to Careers for Counseling and Clinical Practice

Engaging in action is at the heart of our most meaningful experiences. And given the fast-paced, goal-driven nature of modern society, engagement in action is also central to how we perceive ourselves. Action has traditionally been viewed as an end product of the counseling process, but now a bold new redefinition makes counseling not only a driver of action, but an action in itself. Counseling and Action couples a timely update on the multiple roles of action in counseling with an action-based framework for enhancing progress between client and professional. Grounded in the core concepts of contextual action theory as well as key aspects of counseling (e.g., identity, intentionality, emotion), the book explicates an approach that is responsive to client complexities and the larger social conditions that frame them. Expert-penned chapters apply theory to practice, illustrating levels of engagement in action as counselor and client negotiate goals and work toward their realization. And an especially useful section offers guidelines for intervening with specific populations and addressing particular issues. Among the topics covered: Designing projects for career construction. Agentic action in context. Counseling intentional addiction recovery grounded in relationships and social meaning. The action of mindfulness in counseling. A contextual action theory perspective on self-efficacy in individual counseling. Counseling processes and procedures through the lens of contextual action theory. With its forceful argument for a quantum leap in both theory and practice, Counseling and Action is transformative reading for professionals, educators, and graduate students in social work, psychotherapy, psychology, and counseling.

Jayasinghe traces and discusses the ambivalence, resistance, often blatant hostility to the self-evident truth that a counselling approach to careers practice is crucial to ensure positive outcomes for clients" - Jenny Bimrose, Head of Centre for Training in Careers Guidance, University of East London

Catherine Ayers, PhD discusses the treatment of hoarding disorder in **older adults**,. Learn about

new interventions and how to help ...

And People Have Very Strong Reactions about Even Having To Throw Out some of these Possessions so There's Very Strong Emotional Attachments to these Items so It's Not As Simple as Just Cleaning Things Up and Moving Forward so the Interesting News Is that Hoarding Disorder Has Just Recently Become an Official Disorder in Our Mental Health Handbook so Our Diagnostic and Statistical Manual for Mental Disorders Hoarding Disorder Is Now a Part of that It Wasn't before So We Really as Researchers Didn't Know How To Treat It Was Treated as More of a Symptom or Something That We Just Didn't Know How To Categorize

So Again It's Not As Simple as Simply Throwing Something Out and Parting with It It Causes a Great Amount of Distress People Often Don't Know What To Do with the Item or It Just Doesn't Feel Right To Throw It Out so We'll Get into some of the Reasons for Saving in a Moment Now these Symptoms Result in a Large Volume of Clutter so You Can Imagine and You Know for People Who Are Older if They've Been Doing this for a Very Long Time that Clutter Volume Is Going To Sneak Up over the Years so We'll Talk about the Onset and Trajectory in a Moment So How Does Hoarding Disorder Come To Be How Does Someone Develop

You Know Oftentimes You'll Hear in Popular Media or on some of those Tv Shows that It Was some Kind of Life Event That Got this Whole Thing Started Unfortunately It's Not As Simple as that There's a Variety of Things That Have Led to this Person and Their Current Condition and the Hoarding Symptoms so It's a Combination of Their Personal History so Their Family History and some Learned Behaviors You Know if You Grow Up in a Household Where There Is Hoarding Behavior Happening You May Learn that You Might Need To Keep those Items As Well as Genetic Vulnerabilities There's a Strong Genetic Component So if You Have a First-Degree Relative with this Condition You're Much More Likely To Have It We Also Know that People Have the Way that Their Brain Functions Is a Bit Differently

If any of You Know Somebody with Hoarding They Have a Great Amount of Distress When They Have To Do Something about Their Items and All this Leads to Just a Nonstop Constant and Ongoing Condition of Saving Items and an Inability To Discard So What Are the Primary Reasons for Saving I Often Get Asked the Questions Why Does Somebody Do this Why Can't They Just Clean Up Well that's a Whole Loaded Question but Why Do Why Do People Save Things You Know Commonly We'll Hear Something like It Just Doesn't Feel Right I Just Can't Throw It Out It Makes Me So Uncomfortable To Get Rid of Something

So What Are the Primary Reasons for Saving I Often Get Asked the Questions Why Does Somebody Do this Why Can't They Just Clean Up Well that's a Whole Loaded Question but Why Do Why Do People Save Things You Know Commonly We'll Hear Something like It Just Doesn't Feel Right I Just Can't Throw It Out It Makes Me So Uncomfortable To Get Rid of Something so They Don't Really Know Why It Just Doesn't Feel Good It Just Creates some Distress

You Remember You Recall a Relative Reading the Newspaper a Lot and that Reminds You of that so There's Just Just Strong Emotional Significance to that and Finally I Will Lose Important Information if I Throw this Out so Paper Is the Biggest Culprit Here because Paper Has a Lot of Information on It There's a Lot of Words on those Pages Sometimes and if that's Gone It's Gone Forever Is the Idea so Rather than Having To Face the Fear of Losing that People Will End Up Keeping It Just in Case Now I Suspect It's More the Clutter That Increases over Time because Natural Build Up You Know Just Practically Speaking Forty Years of Stuff Is Going To Look Different than 80 Years of Stuff so the Clutter Volume Probably Increases I'm Not Sure about whether or Not those Urges To Save in Difficulty Discarding Increase or Do They Probably Remain Stable but the Clutter Increases Which Poses Special Issues for Seniors Which We'll Get into So Unfortunately When One Has Hoarding Symptoms and Hoarding Disorder Probably More Often than Not You're Going To See Psychiatric Comorbidities Meaning They're Going To Have Other Kinds of Mental Health Issues Happening and Most Commonly Is Depression

And Interestingly Enough that Depression Sometimes Will with Appropriate Treatment Will Go Away with the Treatment of Hoarding so We Could We Consider the Depression Piece Often Secondary so the Hoarding Symptoms Cause the Person To Feel Depressed and if You Think about It You Know if You're Embarrassed or Shamed about Having People Over and You're Upset about Not Being Able To Clean Up Your House Even though You Want To but You Just Can't because It's Hard for You To Get Your Possessions out the Door and a Variety of Other Things That Are Going On if It Makes Sense that People Are Feeling More Depressed

You Know if You're Embarrassed or Shamed about Having People Over and You're Upset about Not Being Able To Clean Up Your House Even though You Want To but You Just Can't because It's Hard for You To Get Your Possessions out the Door and a Variety of Other Things That Are Going On if It

Makes Sense that People Are Feeling More Depressed You Know About 20 % We'll See Other Folks with Anxiety Disorders so Things like Excessive Worry or Social Concerns or Things of that Nature and Then We See some Other Things like Obsessive Compulsive Disorder but Most Commonly in Seniors We Will See Depressive Symptoms Now What Is It that People Collect

It's Hard for Them To Eat Three Meals a Day They're Not Going To Be Taking Their Medications Appropriately and Planning Ahead To Get those Refills in Time Further They're Not Really Taking Care of Their Nutritional Needs some May Be Eating Spoiled Food some May Be Just Skipping Meals All Together There Is an Increased Fall Risk so I Have Personally Fallen in some of My Clients Homes and So Many of My Staff Imagine Somebody with some Medical Issues or Problems Trying To Get through Narrow Pathways in Their Home so We Often Do See Again an Increased Fall Risk and Serious Consequences Associated with that They Have Impairment in Their Activities of Daily Living And It Can Be Challenging for the Person To Get Out and the Fire People To Get in We Often We Also in San Diego County Have Had People Go to Jail for this So There They Are Prosecuted by the City Attorney's if Folks Are Not Appropriately Cleaning Up Their Spaces Where It's Impacting Other Homeowners and Community Values So if Somebody Has a Yard for Example That's Probably the Most Obvious Place Where You're Going To Get a Fine from Code Enforcement and Then They May Pursue Legal Issues Pending the Case

So if Somebody Has an Injury They Break a Leg and They're Not Able To Clean Up and Things Really Accumulate over Time That May Be a Reason Why There's a Lot of Clutter in There Sometimes Folks Will Inherit a Lot of Items Rather Quickly and Have To Clean Out Their Parents Home or Siblings Home and Their Home Is Filled Quickly Sometimes Their Spouse Is Hoarding Disorder and It's Not Them At All so It's Important To Do this Assessment To Really Determined What's What's Creating this Clutter and What We're Looking for Again Are those Two Key Things Urges To Save and Difficulty Discarding those Are the Key Components

That's Not What We Do that's Only Done Typically When Clinicians Are Not Involved or if There's a Very Serious Health Hazard or Threat this May Need To Happen Obviously Understandably People with Hoarding Are Reluctant To Let this Happen this Is Very Distressing for the Older Person and It's Not It's Not Treatment It's Not Treatment this Doesn't Treat the Urges To Save and Difficulty Discarding this Treats the Clutter Volume Only So I Will Bet Money That We Go Back in a Year and that Home Is Required I Can Guarantee It So so We See this Happen Again Particularly in Cases Where There's Rentals and a Landlord Must Have the Place Cleared You Know We Certainly See that but It's Not the Best

And Three Got a Lot Better but Still that's Not Quite Good Only Three People Got Better out of All those Folks so We Concluded that Gold Standard Cognitive Behavioral Therapy for Hoarding Disorder May Not Work Well for Older Adults but What We Did Learn Is that Older People Can Tolerate 26 Sessions of Treatment There's Often this Kind of Myth Out There that Older People Don't Want To Stick and Treatment or Stay in Treatment for 26 Sessions It's Too Taxing or for some Reason but It Wasn't We Didn't Have any Drop Even though They Didn't Get Better They Stuck It Out and Didn't Drop Homework Compliance Was Super Important so those That Did Well Did the Homework If We Have Time We'll Talk about What that Looks like a Little Bit More but Exposure Therapy for Making Choices and Discarding Possessions Did Appear To Work Well Based on Clinician Rapport and Participant Rapport and Then We Thought We Could Teach Skills To Actually Improve or Remediate Cognitive Functioning So in those Areas Where We've Found and We Know that There Are some Problems or Weaknesses We Can Improve that and Hopefully this Will Help with Compliance Issues and and Relapsing Back to Bad Habits So this Is Kinda these Are All the Skills That We Have Put Together that We Believed Would Be Helpful for Folks with Hoarding Disorder We Start with some Standard Organizational Strategies Again these Are Things We Could all Use some Brushing Up on People without Hoarding Disorder I'm Sure-. so these Are Basic Rules That We've Heard and We've Kind Of Read in Magazines over the Years and Thought Would Be Good Ideas but We Actually Teach People How To Do this because They May Not Have a Filing System They May Not Have a Bookshelf To Put Their Books in some of this Basic Groundwork Does Need To Be Laid and Then We Move Right into Our Cognitive Rehabilitation so That Includes Doing Practical Skill Sets on Problem Solving Perspective Memory and Planning

What Are some of the Steps You Need To Take To Get Everything Prepared and Ready To Go if You Have a Doctor's Visit Today What Is It that You Need To Do To Make that Happen As Well as Cognitive Flexibility and that Is Being Able To Think a Little Bit Flexibly People with Hoarding Often Have the Problem of if Something Doesn't Work They Just Keep Doing It Even though It's Not Working We Need To Have Them Identify When It's Not Working and When To Shift and Try a New Strategy Often Have the Problem of if Something Doesn't Work They Just Keep Doing It Even though It's Not

Working We Need To Have Them Identify When It's Not Working and When To Shift and Try a New Strategy so We Teach People How To Do these Things and in Light of Time I'M Just Going To Quickly Skip a Few Slides Here and Talk about What We Do in Our Exposure Therapy Piece of the Treatment so this Is the Most Emphasized Portion of Treatment the Rationale Is Based on Habituation and Distress Tolerance so It's Basic Principle if You're Scared of a Dog What Is It that We Do with People Who Are Scared of Dogs

We Have Them Make Difficult Choices and Discard Things Again It's Based on Their Own Choice We Don't Tell People To Throw Things Out It's Based on Their Choice To Throw Things Out and by Sticking with It and Doing It Repeatedly over Time They Learn that They Can Tolerate They Can Make Decisions Bad Things Don't Happen that's Hopefully What They Learn So Daily Practice Is Key So once We Start the Exposure Therapy in Session They Must Do It every Day and We Call this the Life You Know the New Lifestyle so It's Not like You Know It's Just like Exercise

Now this Is this Is Part of a Skill Set That Must Be Practiced and Maintained Remembering that this Is a Chronic Disorder this Is Again It's Not Something That's Going To Completely Clear Up in Time Yes Symptoms Will Decrease Significantly but You Got To Keep Up with It So Let's Talk about some of Our Preliminary Results so We Did a Similar Study with Same Sample Size Where We Tried this New Technique So Again this Is the Cog Rehab or Rehabilitation plus Exposure Therapy and after 24 Weeks That's Actually Two Weeks Less Sessions We Had some Great Results

Counselling for Alcohol Problems, third edition, is a practical and bestselling guide to working with people who have problems with their use of alcohol. It is the key book recommended by most alcohol counselling courses in the UK, including the Scottish national alcohol counsellors training scheme. The author provides clear guidance for counsellors and demonstrates the need to treat every client as an individual, attempting to understand and therefore enable the client to understand, what they are doing and why. This new edition includes: - New content on the current political, social and counselling context surrounding alcohol use - A wider range of case-studies - New ideas that help students and trainees develop the skills and strategies they need for working with their clients - Further guidance for generic or non-alcohol counsellors who face alcohol problems with their clients. This third edition is an invaluable resource for practitioners, both those specialising in work with alcohol misusers and those who encounter problem drinkers in the context of a more general counselling practice.

Counselling the Person Beyond the Alcohol Problem

At the heart of Richard Bryant-Jefferies' work with problem drinkers is his belief in the power and effectiveness of the person-centred approach to counselling. He suggests that many alcohol problems develop out of, or are connected with, relationship difficulties. He highlights the importance of building a therapeutic relationship with the person, and of engaging with their individuality to encourage sustainable lifestyle change underpinned by personal growth. This practical book shows how such client-focused counselling can support problem drinkers who are seeking to develop and sustain a less alcohol-centred way of life. Demonstrating how the client-counsellor relationship can be harnessed to empower the individual to help themselves, Richard * describes the health risks and effects on family life of alcohol dependency * considers the differences between young and old problem drinkers * analyses the support services available to those seeking change * suggests ways of coping with relapse. Supported by contributions from clients who have undergone counselling for alcohol reliance, this is a comprehensive and positive guide for people working with those who have a problematic relationship with alcohol.

Counselling Older People with Alcohol Problems

Alcohol misuse is becoming an increasingly significant issue for people aged 55 and over, and providing effective counselling services to this growing client group requires a unique and specialised approach. This practical guide explores the factors that differentiate older drinkers, and introduces an innovative person-centred model that will help counsellors and other healthcare professionals to give older people with alcohol problems the help and support they need. Older people with alcohol problems often have complex personal histories, and are particularly vulnerable to long-term dependency, social isolation and self-medication. This book explores the influences, patterns and triggers that affect the development and progression of alcohol dependency in this age group, and provides a detailed description of a theoretical model and therapeutic process that has proved successful in practice. Informative case studies demonstrate the approach in action and guidance is also given for working with clients with dementia or mental health problems. This book will prove an invaluable resource for counsellors and other healthcare professionals who encounter alcohol problems in their clinical practice, including clinical psychologists, social workers, occupational therapists and community psychiatric nurses.

Social Behaviour and Network Therapy for Alcohol Problems

This book serves as a manual for clinicians working with people with alcohol problems. Containing a range of ideas the book is guided by a key principle: the development of social support for a positive change in drinking behaviour.

Treating Alcohol and Drug Problems in Psychotherapy Practice

This book has been replaced by *Treating Alcohol and Drug Problems in Psychotherapy Practice*, Second Edition, ISBN 978-1-4625-5086-9.

Counselling Problem Drinkers

How far should counselling be tailored to an individual's needs? What intervention is most effective for which kind of problem drinker? How can the counsellor successfully guide the client through the process of deciding to change? Originally published in 1991, *Counselling Problem Drinkers* provides an illuminating and invaluable guide for the counsellor trying to help clients control their drinking. Written

in a clear, straightforward way, it offers practical but imaginative advice, and places alcohol counselling firmly in context.

Counseling and Therapy With Clients Who Abuse Alcohol or Other Drugs

Every day, huge numbers of people use drugs or alcohol for recreation, medication, celebration, stress management, social lubrication, or escape. The abuse of psychoactive chemicals touches individual lives in countless ways, and clients frequently hint in therapy sessions at problems related to substance misuse. But historically, substance abuse treatment has been regarded as a separate specialty, for which students and trainees often prepare along tracks different from those leading to licensing or certification as psychotherapists. Few non-specialists feel completely competent and willing to grapple closely with the issues these clients present, in spite of the fact that such problems are quite frequent among client populations. In this book, Cynthia Glidden-Tracey lays out an integrated, holistic, and effective approach to clients' inevitably intertwined problems, which encourages all practitioners to develop skills for detecting, assessing, and addressing substance use whenever concerns about it emerge in the course of therapy. She describes the frequent co-occurrence of substance misuse and other mental health problems, reviews therapy models and current professional questions, and empowers practitioners with the latest scientific knowledge about the causes and effective treatment of addictions. Throughout, her points are grounded in rich clinical examples.

Treatment Approaches for Alcohol and Drug Dependence

The first edition of this book was based upon the recommendations of the Quality Assurance in the Treatment of Drug Dependence Project, and provided a step-by-step-guide for therapists working with clients with alcohol or other drug dependency or misuse. Since publication in 1995 it has become well known for its easy-to-read style and wealth of practical resource materials. However, the evidence in the field has moved forward in the last eight years, creating a need for an updated edition. Retaining the trademark easy-to-use, up-to-date style, the Second Edition offers new chapters on pharmacotherapies, case management, young people, and dual diagnosis. Other chapters have been updated to reflect the latest research findings and current practice, and the practice sheets and client handouts are made available online for downloading and customization by therapists.

Group Psychotherapy and Addiction

Rich traditions of group therapy permeate the substance misuse field - from residential and day-centre group programmes and the fellowship group tradition to the panoply of support/education and relapse prevention groups offered by out-patient services. There are specialist groups - e.g. art therapy and psychodrama- and groups for special population- e.g. relatives, prisoners and adult children of alcoholics. This important collection is written by many well-known experts, several renowned on the international stage, with perspectives from the UK, USA and Scandinavia. They share their extensive experiences in the conceptualisation, setting up and running of therapy groups. Ultimately, all are concerned in their groups to increase empathic contact and thereby to facilitate opportunities for addicts to embark upon change. With no equivalent UK book of its kind, the reader has a rare opportunity to consider this subject in impressive scope, diversity and depth.

Substance Abuse Counseling

A guide for counselors which takes them through the process of working with substance abusers, presenting etiological theories of substance abuse, looking at the major drugs of abuse and their effects, and discussing assessment and diagnosis, treatment settings and types, and other topics.

Counseling and Therapy With Clients Who Abuse Alcohol Or Other Drugs

Every day, huge numbers of people use drugs or alcohol for recreation, medication, celebration, stress management, social lubrication, or escape. The abuse of psychoactive chemicals touches individual lives in countless ways, and clients frequently hint in therapy sessions at problems related to substance misuse. But historically, substance abuse treatment has been regarded as a separate specialty, for which students and trainees often prepare along tracks different from those leading to licensing or certification as psychotherapists. Few non-specialists feel completely competent and willing to grapple closely with the issues these clients present, in spite of the fact that such problems are quite frequent among client populations. In this book, Cynthia Glidden-Tracey lays out an integrated, holistic, and

effective approach to clients' inevitably intertwined problems, which encourages all practitioners to develop skills for detecting, assessing, and addressing substance use whenever concerns about it emerge in the course of therapy. She describes the frequent co-occurrence of substance misuse and other mental health problems, reviews therapy models and current professional questions, and empowers practitioners with the latest scientific knowledge about the causes and effective treatment of addictions. Throughout, her points are grounded in rich clinical examples.

Social Work Practice with Clients who Have Alcohol Problems

Co-existing mental health and drug and alcohol problems occur frequently in primary care and clinical settings. Despite this, health professionals rarely receive training in how to detect, assess and formulate interventions for co-existing problems and few clinical guidelines exist. This Handbook provides an exciting and highly useful addition to this area. Leading clinicians from the UK, the US and Australia provide practical descriptions of assessments and interventions for co-existing problems. These will enable professionals working with co-existing problems to understand best practice and ensure that people with co-existing problems receive optimal treatment. A range of overarching approaches are covered, including: • working within a cognitive behavioural framework; • provision of consultation-liaison services, training and supervision; • individual, group and family interventions; and • working with rurally isolated populations. The contributors also provide detailed descriptions of assessments and treatments for a range of disorders when accompanied by drug and alcohol problems, including anxiety, depression, schizophrenia, bipolar disorder and learning difficulties. The Clinical Handbook of Co-existing Mental Health and Drug and Alcohol Problems will enhance clinicians' confidence in working with people with co-existing problems. It will prove a valuable resource for all psychologists, psychiatrists, counsellors, social workers and all those working in both primary and secondary care health settings.

Clinical Handbook of Co-existing Mental Health and Drug and Alcohol Problems

How can the group setting be used to treat those with drug and alcohol problems? Many professionals working across a variety of addictions settings find themselves working in groups and tackling complex issues; however, there is often very little initial training or on-the-job support to help them in this challenging task. Principles and Practice of Group Work in Addictions has been written with the aim of addressing the key areas in working with drug and alcohol misuse while providing practical solutions to the more common problems that emerge in group work. Drawing on the expertise of clinicians who work in the field of addictions, this book offers readers practical advice for everyday practice. Divided into three sections it covers: core group work in addictions practical issues and solutions to common problems specific issues within the field of addictions. Principles and Practice of Group Work in Addictions is illustrated throughout with practical case examples, providing the reader with an insight into group work in this area. The book will supply guidance for mental health professionals including clinicians, psychologists, nurses and medical staff who encounter group work in addictions for the first time, as well as providing further knowledge and support to those who already work in the field.

Treatment Approaches for Alcohol and Drug Dependence

Treatment of Addiction is a lively exploration of the growing use of creative arts therapies as a treatment for drug and alcohol dependency. Current treatment options for drug and alcohol addiction vary widely and have in the past been somewhat fragmented. In this book, contributors quote recent research and clinical case studies to argue that the arts therapies offer an appropriate, effective and coherent treatment approach. They explore in detail the practice of film, art, dance and drama therapies in both individual and group settings. Treatment of Addiction is an unusual collection which challenges professionals working with drug and alcohol addiction to think about difficult treatment issues and how other professions approach them. For art therapists in practice, it will provide a lively account of a new application for their growing profession.

Counselling and Psychotherapy in Organisational Settings

"Most mental health professionals are ill prepared to help the alcoholic or drug abuser to recover, even though addicted people and their families regularly turn to them for help. For many such patients, years of therapy have meant that they have achieved "insight," but their drinking has continued." "How can we engage and treat these troubled people more effectively? In this book, Marc Galanter outlines an innovative approach to office-based addiction treatment in which the therapist assembles a support network of family members and friends to meet with the patient and therapist at regular intervals. The bonds of social cohesion in the network aid the patient in overcoming denial, achieving abstinence, and avoiding relapse. The network approach thereby provides a remarkably effective vehicle for bringing substance abusers into treatment and helping them achieve recovery." "This is also the first approach to the treatment of substance abuse that integrates individual psychotherapy with support from family and friends. It employs contemporary approaches like relapse prevention, and helps introduce patients to Alcoholics Anonymous. Dr. Galanter defines how treatment is implemented and then illustrates his technique with many case studies. He provides a full explanation of what addiction is, from both a psychological and a pharmacological perspective. The book demonstrates that addicted people can be treated effectively with this combination of individual therapy, self-help, and peer support."--BOOK JACKET. Network Therapy For Alcohol And Drug Abuse

When a family member drinks to excess, the repercussions for the health and well-being of all involved are profound and long-lasting. While it has always been accepted that alcoholism is a major factor in family distress, today there is a clearer understanding of how alcohol problems may be implicated in family upheaval and breakdown. Definitions of alcoholism are also more sophisticated, and the problem may be labelled as hazardous, harmful or dependent drinking. However, the victims of alcohol-fuelled hatred, anger, abuse, fear, neglect and threats do not care about the label. All they focus on is survival. A victim of drunken assault by a family member does not care whether or not the perpetrator is sick, bad or crazy - the hurt and is still the same, no matter what the label. This book looks at how to deal with the damage done to families by alcohol problems, and how to move on, even if the alcoholic denies

the problem. Topics include: definitions of alcoholism - is alcoholism a 'disease'? dealing with denial in the alcoholic recognizing how complex family dynamics may contribute to alcohol problems 'coping strategies' such as enabling (accepting unacceptable behaviour) recognising and dealing with negative emotions eg defiance and deep resentment types of problems for family members - mental health, personality issues coping with violence, emotional and physical dealing with money worries and other practical issues such as protecting any children.

Group Psychotherapy with Addicted Populations

'The style of writing, including individual stories, makes the text easy to read and accessible. As a result this book is suitable for both academic as well as non-academic readers.' - Book Reviews 'An easily readable and informative text. This book should be well thumbed book in all occupational therapy departments, if only to provide us with a consistent reminder of the complex interplay between the physical, emotional and psychological aspects of living, which enable each individual to achieve the balanced state of being a well person.' - British Journal of Occupational Therapy 'This is a very engaging book which presents the topic of counselling in health care in a readable and accessible way.[It] is a good resource for occupational therapists wishing to know more about counselling in healthcare settings. It is suitable for both students and qualified staff and is written in a style that encourages further reading. It is well referenced and relevant research is referred to throughout.' British Journal of Occupational Therapy 'This is an excellent sequel to Counsellors in Health Settings. The honesty of the accounts is inspiring as the authors explore frankly the difficulties they and their clients face, rather than simply giving idealistic accounts of how counselling should work. It cannot fail to increase awareness about a wide range of health problems that people experience and the often hidden consequences.' - Mental Health Magazine 'What I find most interesting about this book is that counselling is considered as part of the multidisciplinary team approach and thus is an interesting example of how counselling can work when offered in the rehabilitative or primary care setting to great advantage to both the client and rehab team. The book is easy to read and offers an experiential perspective rather than a theoretical one. However, the book does have a research perspective, and examples of narrative and postmodernist approach are used to complement the stories in the book without being overbearing.' - Healthcare Counselling and Psychotherapy Journal Individuals experiencing rehabilitation are subject to profound life adjustments, and the contributors to this book explore how the relationship between counsellor and client can be a source of support during that time. Describing pioneering initiatives in a range of rehabilitation settings the authors draw out the historical background and theoretical implications of their work and make recommendations for good practice. Rehabilitation experiences in both physical and psychological health care are described, including those of survivors of strokes, problematic drug or alcohol users, people who have sustained hearing loss or head injury and those affected by chronic bowel disorder and multiple sclerosis. Contributors describe the innovative work they are undertaking in NHS rehabilitation settings such as a head injury unit and a post-operative rehabilitation counselling service. Other contributions include a chapter from the perspective of a counsellor within a voluntary organisation, the Bristol Area Stroke Foundation, and a chapter by a counsellor working with clients undergoing community rehabilitation. Several chapters are written from the client's perspective by authors who have themselves received counselling as part of their programme of rehabilitation. This pioneering book introduces the reader to creative approaches to research and counselling including the use of poetry, groupwork and narrative ideas and will inform the work of counsellors, clients, health care workers and policy makers.

Handbook of Counselling

Both research and clinical findings indicate a significant reciprocal relationship between marital-family interactions and abusive drinking: Chronic problem drinking is often a component in marital and familial discord; and, conversely, positive marital and family adjustment is clearly associated with better alcohol treatment outcomes. An ideal resource, this volume is a practical guide to the most up-to-date marital and family therapy practices that have been shown to be effective in treating alcohol problems. Chapters by leading clinician-researchers present practical "how to" information on research-tested methods for use at different stages of the alcoholism recovery process. Each chapter includes an overview of the specific method under consideration and detailed guidelines for implementation. Special clinical considerations are discussed, and a summary of current knowledge regarding efficacy as well as an extensive reference list are included. Illustrative case examples are provided throughout. Part I describes strategies for initiating change and helping the family when the alcoholic is unwilling to seek help on his own. Chapters cover unilateral family therapy, community reinforcement training for

families, the Johnson Institute intervention approach, and a group program designed to help the wives of treatment-resistant alcoholics decrease their own emotional distress and examine their options. Chapters in Part II present methods drawn from a variety of theoretical approaches for stabilizing sobriety when the alcoholic has sought help in both inpatient and outpatient treatment centers. Approaches discussed include an eclectic approach to family treatment in short-term detoxification, the Hazelden residential family program, a behavioral marital therapy couples group program, an alcohol-focused spouse involvement with behavioral marital therapy, systemic couples therapy for alcohol-abusing women, and family therapy for adolescent alcohol abuse. Strategies for maintaining long-term recovery and preventing relapse, including behavioral contracts between alcoholics and family members, couples relapse prevention sessions, and an outpatient couples therapy program based on Marlatt and Gordon's model of the relapse process, are described in Part III. Finally, ways to deal with alcohol problems encountered by practitioners outside the alcoholism treatment setting and directions for future research are explored in Part IV. Timely and relevant, *Treating Alcohol Problems* is designed for clinical psychologists, marital and family therapists, counselors, and social workers working with alcohol problems. Perfect as a teaching text, this book provides carefully developed, well-conceived marital and family therapy methods that have been shown to be effective with this difficult clinical problem.

Exploring New Horizons in Career Counselling

"This book brings together eminent global theorists and practitioners to share their views on the evolution of career counselling in recent decades. Multiple changes of a fundamental and complex nature, as well as related challenges in the world of work, have necessitated career counselling to undergo such an evolution. The authors examine the future nature and scope of new directions in the field of career counselling psychology and they critically reflect on, as well as promote the predominant theoretical and conceptual framework of the field of career counselling. The latest models and methods in and for the 21st century are explored and teased out, including Mark Savickas' proposal to shift the focus in interventions from conceptualising the self as content to seeing the self as a process. This approach is in keeping with the notion of career as a story and consistent with leading theories such as Jean Guichard's self-construction framework and the life design paradigm. The authors deliver an avant garde text that is easy to read and use without diluting the conceptual and terminological complexities of the field. The book is an invaluable resource for new, emerging and experienced researchers, academics, scholars, researchers, psychologists, social workers, teachers and clients:

Career Development and Counseling

This book examines a topic widely regarded as the most pressing in career counselling today, i.e., how to ensure that everyone receives career counselling and that all workers have the opportunity to engage in sustainable, decent work. The author holds that career counselling should not only advance workers' self- and career construction, helping them design successful career-lives and make social contributions, and live purposeful lives – it should also expound new theoretical approaches and interventions. Furthermore, the book criticizes global society for overlooking the basic needs of many workers, especially the most vulnerable and disadvantaged. An important feature of the book is its emphasis on promoting a creative and innovative approach to career counselling so as to better answer contemporary career-related questions. It offers guidance on how to advance entrepreneurship and help workers develop critical thinking, curiosity, creativity, collaboration, and communication skills. In this way the book promotes innovation in career counselling and maps the way forward in a theoretical and practical manner that helps clients 'flourish' rather than merely 'survive' in turbulent times impacted by the fourth wave in psychology, career counselling, the economy, as well as the 4th industrial revolution (Work 4.0).

Career Guidance and Counseling Through the Life Span

In this book, career counselling history, best practices as well as contemporary models and methods are brought together. In reflecting on the past, present, and future of career counselling, the story of the postmodern, narrative or career construction approach and the model and methods used to advance careers in the 21st century is told. A meta-reflection concept is proposed, based on career construction principles and practices and aimed at providing an examination of repeated reflection in career counselling. Overall, an attempt is made to craft a text that is not just specifically instructive but also more generally so. Whereas the theory section includes much that is hands-on and practical, the inclusion of narratives in the practice section turns theory into practice. Narratives illustrate the complexity and contextuality of partnering with clients toward (re-)designed lives. Ultimately, the volume aims to demonstrate how Mark Savickas' counselling for career construction approach can be used by clients to connect life themes in order to construct life portraits under the guidance of counsellors.

Counselling for Career Construction

This book covers the background and history of the Center, its functioning and management, the clients and the counsellors (with case studies), and conclusions and evaluation.

Art Therapy and Career Counseling

Engaging in action is at the heart of our most meaningful experiences. And given the fast-paced, goal-driven nature of modern society, engagement in action is also central to how we perceive ourselves. Action has traditionally been viewed as an end product of the counseling process, but now a bold new redefinition makes counseling not only a driver of action, but an action in itself. Counseling and Action couples a timely update on the multiple roles of action in counseling with an action-based framework for enhancing progress between client and professional. Grounded in the core concepts of contextual action theory as well as key aspects of counseling (e.g., identity, intentionality, emotion), the book explicates an approach that is responsive to client complexities and the larger social conditions that frame them. Expert-penned chapters apply theory to practice, illustrating levels of engagement in action as counselor and client negotiate goals and work toward their realization. And an especially useful section offers guidelines for intervening with specific populations and addressing particular issues. Among the topics covered: Designing projects for career construction. Agentic action in context. Counseling intentional addiction recovery grounded in relationships and social meaning. The action of mindfulness in counseling. A contextual action theory perspective on self-efficacy in individual counseling. Counseling processes and procedures through the lens of contextual action theory. With its forceful argument for a quantum leap in both theory and practice, Counseling and Action is transformative reading for professionals, educators, and graduate students in social work, psychotherapy, psychology, and counseling.

It draws together and extends the work that the authors have been doing over the last 8 to 10 years. This text represents a new perspective on the nature of career development. It emphasizes the dimensions of careers frequently neglected by contemporary accounts of careers such as the challenges and opportunities of uncertainty, the interconnectedness of current life and the potential

It will be vital reading for all those working in and studying career development, either at advanced undergraduate or postgraduate level and provides a new and refreshing approach to this fast changing subject. Key themes include: Factors such as complexity, change, and contribution People's aspirations in relation to work and personal fulfilment Contemporary realities of career choice, career development and the working world

The Chaos Theory of Careers

This book sets out to provide context for innovating counseling for self- and career construction. It gives readers insight into the theory underlying an innovative, integrative qualitative-quantitative approach to career counseling. Three key ideas recur throughout the book. First, the idea of not dispensing “advice” to people—instead, enabling them to advise themselves. Second, the idea of listening for instead of to people’s stories to help them choose and construct careers and themselves and shape their career identities. Third, the idea of helping people connect what they know about themselves consciously with what they are aware of subconsciously. The book confronts some of the main challenges posed by Work 4.0 on the workplace but also foreshadows the imminent advent of Work 5.0. It endeavors to promote career counselors’ ability to help people “thrive” at a time when many speculate that work itself is at risk, occupational contexts no longer “hold” workers in the way they used to, and the coronavirus pandemic is disrupting the workplace.

Theory and Practice of Counselling and Therapy

An Introduction to Counselling and Psychotherapy takes professional trainees through the entire therapeutic process, introducing the theory and applying it to real-life practice. It is, in short, an authoritative introduction to everything a trainee needs to know to become a professional therapist. Drawing on years of experience as a counseling practitioner and researcher, Andrew Reeves provides a uniquely practical consideration of counseling and psychotherapy theory, linked to the development of appropriate skills and located within the context of therapeutic practice today.

Counseling Theory

In this book, we contend that the psychologist who engages in counseling can be both practitioner and scientist—that he can contribute to knowledge while helping clients. Admittedly, few counselors are theorists in the strict sense of the term, but inevitably every counselor will bring to his work with clients certain assumptions. He will have some underlying rationale (vague and implicit though it may be) for what he does, some hunches about what different clients will do in different situations, and some general ideas about the counseling procedures that are apt to be effective. If he is to make claims for the efficacy of his practice, he must be willing to subject these ideas to empirical test. Only then can he begin to find out whether what he has done works and how it works. Only as the counselor makes communicable what he does can his knowledge be imparted to others. This book begins with our argument for reconciling the dual roles of practicing counselor and researcher and proceeds to a short "guided tour" of current empirical and theoretical approaches to counseling. We do not insist upon the adoption of any particular approach to counseling. But we do urge the practicing counselor to make explicit his own assumptions and to use them in making verifiable predictions about the observable behavior of clients and counselor. Contemporary Theory and Practice in Counseling and Psychotherapy

"*Theories of Counseling and Psychotherapy: Systems, Strategies, and Skills*" offers an innovative look at emerging and well-established counseling theories. Organizing theories into four broad themes (Background, Emotions, Thoughts, and Actions), authors underscore key similarities and differences in each approach. Moving beyond a traditional theories book, chapters include skill development sections that connect counseling theories with clinical practice. Fully revised, this edition brings a stronger multicultural focus, includes over 400 new research references, and offers new activities to sharpen clinical understanding. Expanded research coverage includes over 400 new references that validate each treatment approach in the text. More information on cognitive and cognitive-behavioral treatments appears in Chapters 12-16. New information on psychodynamic psychotherapy, experiential therapies, and interpersonal psychotherapy appears in Chapters 2, 5, 6, 18, and 19. More on the common factors

approach appears in Chapter 1 and Chapter 19. A stronger multicultural focus covers Hayes's AD-DRESSING acronym and revises multicultural sections in each theoretical chapter. Consolidated coverage of solution-focused therapy appears within Chapter 11 on constructivist theories. A reorganized integrative therapy chapter (Chapter 19) expands discussion of Wachtel's cyclical psychodynamics and the transtheoretical model of change. Expanded treatment of spiritually-integrated approaches appears in this edition. Also from Linda Seligman and Lourie W. Counseling

Today's counseling and psychotherapy-related careers require practitioners to grasp and respond to a continually changing context. This comprehensive and contemporary introduction to the field prepares students to engage productively with a variety of theoretical models, practice settings, and patient problems. The author draws on her experience as a practicing therapist and professor in presenting theory, practice, and research in a clear and compelling style. Starting with the big picture of psychotherapy within its sociocultural context and fundamental issues, Austad then reviews the major theoretical models. Students are encouraged to develop a mental model that helps them to compare and contrast key features of each theory and to understand the settings in which each best applies.

Research has shown that the most effective way to prepare students for practice with real clients is to learn to think in a new way rather than simply learning and using a set of steps. While there is much to be learned from what master practitioners do in their sessions, there is even more knowledge to gain from learning how they think. The second edition of *Principles of Counseling and Psychotherapy* offers students and practitioners a way to understand the processes behind effective outcomes with a wide variety of clients. The second edition is infused with real-world clinical case examples and opportunities for readers to apply the material to the cases being presented. New "thought-exercise" sections are specifically designed to engage the reader's natural non-linear thinking, and transcript material both from cases and from master therapists themselves are interwoven in the text. Accompanying videos, available through Alexander Street Press, bring the text to life, and instructors will find testbanks, transition notes, and narrated PowerPoint slides available for free download from the book's website at www.routledgejournalhealth.com
