Gregg Braden discussing The Gospel of Thomas

When you come to know yourselves, then you will become known, and you will realize that it is you who are the sons of the living Father.

But if you will not know yourselves, you dwell in poverty and it is you who are that poverty.

If you do not fast from the world, you will not find the (Father's) domain.

His disciples said to him, "When will the kingdom come?"

Artificial intelligence is divided into narrow AI and general AI, with the latter being a simulation of human intelligence but not conscious.

The concept of consciousness remains a mystery, with no one understanding what it truly is.

The language used to describe AI is misleading and anthropomorphized, creating a false understanding of its capabilities.

The potential dangers of AI, including ChatGPT, are discussed, with concerns about fake news and misinformation, as well as the need for ethical guidelines.

The use of facial recognition technology raises concerns about privacy and human rights, as it can be used for both security and control purposes.

The dangers and ethical concerns of AI, including privacy invasion, devaluation of human beings, and biases in AI systems.

The ethical implications of AI and the need for regulation from a Christian perspective.

The impact of AI on children's development and education is concerning, especially in relation to the transhumanist agenda and the undermining of the concept of humanity.

The Cure for Consciousness

YOU HAVE A DISEASE. YOUR BRAIN IS INFECTED. POISONED. CONTAMINATED. But don't worry. Ernie Lobe, a fifty-four year old baker, sociopath, and father of two is looking for the cure, which he thinks he may have found. The only problem is there's a slight side-effect...death. But don't worry about that either, because you can get paid to die.

The Cure of Self-consciousness

Essays from leaders in the emerging field of integral medicine and consciousness research promote a model of healing in which personal relationships, emotions, meaning, and belief systems are viewed as fundamental points of connection between body, mind, spirit, society, and nature.

Self-consciousness in Public

In this accessible overview of current knowledge, an expert team of editors and authors describe experimental approaches to consciousness. These approaches are shedding light on some of the hitherto unknown aspects of the distinct states of human consciousness, including the waking state, different states of sleep and dreaming, meditation and more. The book presents the latest research studies by the contributing authors, whose specialities span neuroscience, neurology, biomedical engineering, clinical psychology and psychophysiology, psychosocial medicine and anthropology. Overall this anthology provides the reader with a clear picture of how different states of consciousness can be defined, experimentally measured and analysed. A future byproduct of this knowledge may be anticipated in the development of systematic corrective treatments for many disorders and pathological problems of consciousness.

The Persistence of Consciousness

Cosmic Consciousness The Work Cosmic Consciousness is a tetralogy of books: 1) The Awakening 2) The Understanding 3) The Cure 4) The Integral Being, psychographically transmitted by the Blessings and Light Spiritual Team from 2008 to 2016. This work is a way to evolve within a broader awareness of the integrality of Being. In every evolution, several paths appear, and each being will be prepared to follow the most appropriate to its own mission. The following of a certain path will be given by the free will and the preparation of each one. The work is not limited to the threedimensional, it is not limited to the here and now. It has in its essence what is necessary for each dimension, and it will be understood by each being, according to the energetic level in which it is, determined by its own evolution. A work is often not prepared for the present moment of many people, but you can be sure that this work is prepared for these times and for times to come. The divine spark that gave you birth has cosmic integrity, but today it is limited by each individuality. There is no cure if we do not treat the Being in its entirety. Healing is the return of the Being to its own balance in each energetic state of

its divine essence, from which it moved away by free will in its multiple existences, transforming its society, its world, the atmosphere where it breathes and thus determining its past, present and future as a multidimensional being. Trace your passage through the extraordinary adventure of life. Eternal journey...

States of Consciousness

In *One Mind*, New York Times best-selling author Larry Dossey, M.D., proposes an inspiring view of consciousness that may reshape our destiny. Dossey's premise is that all individual minds are part of an infinite, collective dimension of consciousness he calls the One Mind. This state—which we can all access—explains phenomena as diverse as epiphanies, creative breakthroughs, premonitions of danger or disaster, near-death experiences, communication with other species and with the dead, reincarnation, the movement of herds, flocks, and schools, and remote healing. Dossey presents his theory in easily digestible, bite-sized vignettes. Through engaging stories, fascinating research, and brilliant insights from great thinkers throughout history, readers will explore the outer reaches of human consciousness, discover a new way to interpret the great mysteries of our experience, and learn how to develop the empathy necessary to engender more love, peace, and collective awareness. The result is a rich new understanding of what it means to be human and a renewed hope that we can successfully confront the challenges we face at this crossroads in human history. Even before publication *One Mind* drew praise from the finest minds of our time. It has been heralded as "landmark," "a brilliant synthesis," a "magnum opus," a "feast" of ideas, "compelling," "gripping," and "a major shift in our understanding of consciousness."

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 edition. Excerpt: ... CHAPTER VI. THE FEAR OF A CROWD. SECTION THIRTY-SIX. THE CURE OF FEARS THAT ATTACK THE SELF-CONSCIOUS. Before I proceed to discuss the means of cure of each particular fear included in this section, a few words of explanation are necessary. From my analysis of the various forms of fear, it will be apparent to you that none of these forms exists in a pure state; each is a complex, i.e., each type of fear is closely related to some other type of fear, and also involves some of the factors discussed under "secondary Causes Of Self-consciousness" and "special Causes Of Self-consciousness." Thus, for instance, the fear of self has a close relationship to the fear of failure, fear of criticism, fear of the unexpected; also with timidity, shyness, ridicule, nervousness. In treating the cure of each type of fear, I shall deal with the broad features or outstanding characteristics of each type, and leave you yourself to link up the minor features. Thus, if you are conscious that timidity plays an important role in your fear of yourself, after reading my instructions for the cure of the fear of self, you will then turn to the section treating of The Cure Of Timidity, and so link up the two sections. You are advised to read in Part Two the analysis of each type of fear in conjunction with the cure of each type, so as to get a good grasp of the situation. SECTION THIRTY-SEVEN. HOW TO CURE THE FEAR OF SELF. We found the signs of the fear of self to be (1) Depreciation of self, and (2) underestimating one's abilities. If you have the fear of self, you will recognize it by these signs in yourself. Now, if by some magic aid you could make these signs disappear in an instant, you would find their place taken by a new sign symptomatic of a brighter state, ...

Cosmic Consciousness

A pioneering physicist and a renowned spiritual healer combine modern scientific evidence with ancient Eastern teachings to explain the process of spiritual healing and to prove what metaphysicians have been teaching for thousands of years.

Self-Consciousness in Public

Trauma, pain, stress, and problems are an unfortunate part of life, but suffering from it is our choice. Without taking back our control, negative experiences have been proven to degrade the functioning of the brain and body, causing a domino effect of mental, physical, emotional, spiritual, and even financial disorders in life. In this book you'll come to realize why everything in life is the way it is, and how to turn it into what you want it to be with just breathing. - * Clear trauma out of your mind and body
- * Create intense peace
- * Find divine purpose
- * Cure and heal diseases and cancers
- * Manifest millions of dollars

Transpersonal Medicine chronicles the pioneering efforts to apply a transpersonal orientation to the field of medicine. Broken into three parts, it reviews the underlying principles of transpersonal medicine. Part one focuses on ritual as a means of cross-personal empowerment. Part two is devoted to the personal ritual, the process of empowering one's inner strengths and wisdoms. Part three is dedicated to direct experiences and issues involved in medicine. The book includes interviews with leading researchers in each field of topics.

Just Breathe

Within each of us there is a core discovery that needs to be made if we are going to become well. In a direct yet compassionate style, Misa Hopkins reveals the reason so many of us don't get well—even though we have tried a variety of treatments and solutions. There is a growing acknowledgement in contemporary spiritual thought that we are the creators of our own reality, including our health. Hopkins shares real-life stories demonstrating that healing is not just the result of finding the right cure, but rather a personal opportunity to create wellness by engaging the sacred flow of Divine consciousness. Without promoting any particular healing methodology or spiritual practice, she provides us with simple steps—a guidebook—for accessing the healing power and wisdom that already lives inside. Hopkins candidly takes us into the successes of her own healing as she uncovered and transformed secret needs being met through her life-challenging illnesses. She shows us how illness can actually meet profound subconscious emotional needs, causing us to remain sick, and then she teaches us how to invite our subconscious worlds into alignment with our conscious desires. The result of this alignment

is the ultimate root of all healing—a new level of our own Divine awareness and power awakened. "If everyone seeking medical and holistic help read this and addressed the hidden barriers to healing, they would get healthier faster and with less struggle. I want all my patients to have this book!" -Valerie Olmsted, NMD, Host of The Enlightened Medicine Show "Misa, after witnessing the results of your healing steps several times in my life and in the lives of clients you've helped, I know miracles can be created." -Kevin Hooey, Transformational Coach "This book is absolutely brilliant! Misa puts important concepts together in a way that makes you go... 'Oh I get it!' It's a first aid handbook for the new 21st century consciousness." -Cheryl McDaniel, LPN "The 7 steps provide practical ways any of us can develop grass roots self-mastery in our journey of Divine awareness and healing." -John Brown, Minister "I have fewer migraines, less back pain, and sleep better! I am so much more upbeat and happy; trusting myself and my process, and enjoying ordinary life now!" -Arleahna, Spiritual Healer

The Subconscious & The Superconscious Planes of Mind (Unabridged)

Consciousness is our gateway to experience: it enables us to recognize Van Gogh's starry skies, be enraptured by Beethoven's Fifth, and stand in awe of a snowcapped mountain. Yet consciousness is subjective, personal, and famously difficult to examine: philosophers have for centuries declared this mental entity so mysterious as to be impenetrable to science. In *The Ravenous Brain*, neuroscientist Daniel Bor departs sharply from this historical view, and builds on the latest research to propose a new model for how consciousness works. Bor argues that this brain-based faculty evolved as an accelerated knowledge gathering tool. Consciousness is effectively an idea factory -- that choice mental space dedicated to innovation, a key component of which is the discovery of deep structures within the contents of our awareness. This model explains our brains' ravenous appetite for information -- and in particular, its constant search for patterns. Why, for instance, after all our physical needs have been met, do we recreationally solve crossword or Sudoku puzzles? Such behavior may appear biologically wasteful, but, according to Bor, this search for structure can yield immense evolutionary benefits -- it led our ancestors to discover fire and farming, pushed modern society to forge ahead in science and technology, and guides each one of us to understand and control the world around us. But the sheer innovative power of human consciousness carries with it the heavy cost of mental fragility. Bor discusses the medical implications of his theory of consciousness, and what it means for the origins and treatment of psychiatric ailments, including attention-deficit disorder, schizophrenia, manic depression, and autism. All mental illnesses, he argues, can be reformulated as disorders of consciousness -- a perspective that opens up new avenues of treatment for alleviating mental suffering. A controversial view of consciousness, *The Ravenous Brain* links cognition to creativity in an ingenious solution to one of science's biggest mysteries.

THE SUBCONSCIOUS & THE SUPERCONSCIOUS PLANES OF MIND

Despite dramatic outer advances, medicine -- like many other disciplines -- has become prone to materialistic tendencies, viewing the human being as little more than a machine. Can a new science of healing, which takes into account soul and spirit realities, be developed in our time? In this collection of challenging lectures, Michaela Glockler speaks on themes related to the inner path of spiritual development, and its therapeutic task for the individual and the community. She discusses the application of such inner work in outer action, reflecting on modern social and ethical issues such as organ transplants and the termination of pregnancy. In her considerations she gives a broad picture of human evolution and the development of the ancient mysteries, and their relation to medicine.

Transpersonal Medicine

Energy Medicine in CFQ Healing describes holistic energy medicine focused on our inherent healing powers as revealed by an experiential study of traditional Eastern medicine, ancient Qigong meridian healing and Buddhist meditation practices. It clarifies the true nature of healing and recovery. To be free of suffering and pain requires the body to become relaxed with a healthy energy flow, and the mind's conflicts replaced by peace and a harmonious consciousness. Health providers, therapists and their clients have personally benefited from CFQ training-in-healing. Fred P. Gallo, Ph.D. (author of *Energy Psychology in Psychotherapy*) says: "Energy Medicine in CFQ Healing is the most thorough statement of this dynamic approach to emotional and physical healing. Written by Master Yap with Dr. Chok C. Hiew, psychologist and devoted student of CFQ, this text and workbook shares the spiritual healing journey of Master Yap and provides detailed instruction in the application of the energy-consciousness approach through specific Qigong exercises that promote freeing your mind and healing the body." The

spirit behind this book is: To be well is a basic birthright. To lay claim to health and wellness, simply move in to unload the energy burden.

Who would not want that?" -Russell Targ, author of Limitless Mind: A Guide to Remote Viewing and Transformation of Consciousness (www.espresearch.com)

Medicine at the Threshold of a New Consciousness

Modern medicine enables us to keep many people alive after they have suffered severe brain damage and show no reliable outward signs of consciousness. Many such patients are misdiagnosed as being in a permanent vegetative state when they are actually in a minimally conscious state. This mistake has far-reaching implications for treatment and prognosis. To alleviate this problem, neuroscientists have recently developed new brain-scanning methods to detect consciousness in some of these patients and even to ask them questions, including "Do you want to stay alive?" Finding Consciousness: The Neuroscience, Ethics, and Law of Severe Brain Damage addresses many questions regarding these recent neuroscientific methods: Is what these methods detect really consciousness? Do patients feel

pain? Should we decide whether or not to let them die or are they competent to decide for themselves? And which kinds of treatment should governments and hospitals make available? This edited volume provides contextual information, surveys the issues and positions, and takes controversial stands from a wide variety of prominent contributors in fields ranging from neuroscience and neurology to law and policy to philosophy and ethics. Finding Consciousness should interest not only neuroscientists, clinicians, and ethicists but anyone who might suffer brain damage, which includes us all.

Energy Medicine in CFQ Healing

Are we able to say that life is governed by a group of conscious people? Where are they? Who are they? We see exactly the opposite: that life is governed by those who are the least conscious, by those who are most asleep. Provocative ideas such as these have attracted generations of thoughtful people to the methods of self-study and inner work devised by Gurdjieff, one of the most radical spiritual teachers of modern times. According to Gurdjieff, the wars raging at this very moment are nothing more than millions of sleeping people trying to annihilate millions of other sleeping people. Contrary to popular belief, there is no such thing as progress and evolution as long as humanity remains asleep. Two hundred conscious people could change the whole of life on the earth, Gurdjieff says. If we want to become those conscious people, we must learn how to change ourselves. With the help of self-knowledge and an understanding of our relation to the universe, we can awaken to a higher level of being--if we wish to change ourselves. All of Gurdjieff's fundamental principles and methods of transforming the intellect, emotions, and body, in the system known as the Fourth Way, are presented in this book in his own clear, precise words preserved by his closest pupils. Arranged in an orderly sequence of passages drawn from two primary source books--P. D. Ouspensky's *In Search of the Miraculous*, and *Views from the Real World*, recorded and arranged by Mme. Jeanne de Salzmann--this material is an indispensable introduction for those determined to undertake the efforts and practices necessary for awakening consciousness. All the basic concepts and methods are covered, including: * man is "asleep" * we have no unified "I" * the need for self-knowledge * functions of the human "machine" * states of consciousness * levels of being * three centers: moving, emotional, and thinking * personality and essence * the possibility of self-development * self-observation * remembering oneself * conscious evolution * the law of three forces * the ray of creation * the law of octaves * the Enneagram, a universal symbol * the variety of spiritual ways * esoteric Christianity * working in groups * the necessity of schools

Instructions into the Realms of Consciousness

The Guilt Cure addresses spiritual and psychological means to treat and expiate guilt and its neurotic counterparts. One of the great paradoxes of guilt is that despite its useful contributions to our lives, it can also be potentially dangerous. It is a major cause of anxiety and depression, and if untreated or expiated in some way, guilt can be deadly. This seminal body of work about the psychological implications of guilt reaches deep into humanity's collective experience of guilt and finds persuasive psychological reasons for guilt's role and purpose that go far beyond conventionally held religious explanations. The conventional view is that guilt's primary function is the protection and maintenance of morals. While guilt admittedly contributes to the protection and maintenance of morals, this is by no means its only role. Nor is it even its most important role. Guilt is complicated and paradoxical. It serves the psyche, and life itself, in a number of ways beyond its role in the protection of conventional morality. The Guilt Cure examines the many faces of guilt, including its more important function in the creation and maintenance of consciousness, its place in the self-regulatory system of the psyche, its effects on our psychological development, and its impact on our mental health and wellbeing.

Intentional Revelations

Two weeks before his death, Oliver Sacks outlined the contents of *The River of Consciousness*, the last book he would oversee . . . The bestselling author of *On the Move*, *Musicophilia*, and *The Man Who Mistook His Wife for a Hat*, Sacks is known for his illuminating case histories about people living with neurological conditions at the far borderlands of human experience. But his grasp of science was not restricted to neuroscience or medicine; he was fascinated by the issues, ideas, and questions of all the sciences. That wide-ranging expertise and passion informs the perspective of this book, in which he interrogates the nature not only of human experience but of all life. In *The River of Consciousness*, Dr. Sacks takes on evolution, botany, chemistry, medicine, neuroscience, and the arts, and calls upon his great scientific and creative heroes – above all, Darwin, Freud, and William James. For Sacks, these

thinkers were constant companions from an early age; the questions they explored – the meaning of evolution, the roots of creativity, and the nature of consciousness – lie at the heart of science and of this book. The River of Consciousness demonstrates Sacks's unparalleled ability to make unexpected connections, his sheer joy in knowledge, and his unceasing, timeless endeavor to understand what makes us human.

Active Consciousness

This volume presents the first organized study of Jung's ethics. Drawing on direct quotes from all of his collected works, interviews, and seminars, psychoanalyst and religious scholar Dan Merkur provides a compendium of Jung's thoughts on various topics and themes that comprise his theoretical corpus—from the personal unconscious, repression, dreams, good and evil, and the shadow, to collective phenomena such as the archetypes, synchronicity, the psychoid, the paranormal, God, and the Self, as well as his contributions to clinical method and technique including active imagination, inner dialogue, and the process of individuation and consciousness expansion. The interconnecting thread in Merkur's approach to the subject matter is to read Jung's work through an ethical lens. What comes to light is how Merkur systematically portrays Jung as a moralist, but also as a complex thinker who situates the human being as an instinctual animal struggling with internal conflict and naturalized sin. Merkur exposes the tension and development in Jung's thinking by exploring his innovative clinical-technical methods and experimentation, such as through active imagination, inner dialogue, and expressive therapies, hence underscoring unconscious creativity in dreaming, symbol formation, engaging the paranormal, and artistic productions leading to expansions of consciousness, which becomes a necessary part of individuation or the working through process in pursuit of self-actualization and wholeness. In the end, we are offered a unique presentation of Jung's core theoretical and clinical ideas centering on an ethical fulcrum, whereby his moral psychology leads to a cure of souls. Jung's Ethics will be of interest to academics, scholars, researchers, and practitioners in the fields of Jungian studies and analytical psychology, ethics, moral psychology, philosophy, religious studies, and mental health professionals focusing on the integration of humanities and psychoanalysis.

Finding Consciousness

Unleashing the power of consciousness, matter and miracles It has been ten years since the publication of *The Biology of Belief*, Bruce Lipton's seminal book on the relationship between mind and body that changed the way we think about our lives, our health, and our planet. During that time, research in this field has grown exponentially – Lipton's groundbreaking experiments have now been endorsed by more than a decade of rigorous scientific study. In this greatly expanded edition, Lipton, a former medical school professor and research scientist, explores his own experiments and those of other leading-edge scientists that have unraveled in ever greater detail how truly connected the mind, body, and spirit are. It is now widely recognized that genes and DNA do not control our biology. Instead, they are controlled by signals from outside the cell, including energetic messages emanating from our thoughts. This profoundly hopeful synthesis of the latest and best research in cell biology and quantum physics puts the power to create a healthy, joyous life back in our own hands. When we transform our conscious and subconscious thoughts, we transform our lives, and in the process help humanity evolve to a new level of understanding and peace.

In Search of Being

On an unsuspecting Friday night, Liyla lost her son to an accident. Lost and disillusioned, all she wanted was a chance to speak to her son again, tell him she loved him and missed him. But death is the end, isn't it? In a mind bending journey through the many planes we humans exist in, Liyla's life changes as she encounters people who help reach across the veil of life and connect her to her son. This event opens a door in her life through which she discovers the meaning of life and beyond. Her studies ranging from contemporary Western sciences to ancient Indian wisdom lead her to understanding what it means to live, and our purpose on this planet along with a clear realization that the universe is just energy. This book will take you on a journey that answers many questions that have plagued humanity. What exactly is the mind? What is Consciousness? What is destiny? And the biggest one of all-- What happens after our physical forms pass from this life? Liyla looks at these questions with a scientific lens, hoping to bridge the gaps between science and spirituality — for each one of us looks for answers for these same questions within this cosmos. In this book, the spiritual aspects of life are explained with reference to the Panchakosha (five layer) theory of Indian spirituality which is elucidated in the Upanishads and

other ancient Indian books. This gives a strong logical basis to understand Consciousness, and life in the physical and subtle planes.

The Guilt Cure

Breakthroughs in Understanding the Biology of Consciousness This textbook covers fundamental discoveries about the biological basis for spiritual and shamanic states, transpersonal experiences, and consciousness itself. Derived from explorations into the very earliest prenatal development, this book describes how consciousness is based on biology inside the cell. **Developmental Events:** Spiritual and shamanic states are a legacy of our earliest prenatal growth stages. **The Primary Cell:** Consciousness extends from just one cell of the body. **Triune Brains:** The cell organelles are the basis of the 'subconscious' triune brains. **Transpersonal Biology:** Spiritual, shamanic, and psychic phenomena are based on access or perception of biological structures inside the cell. **Inherent Dangers:** Triggering certain prenatal traumas may cause serious or life-threatening problems. With this theoretical foundation, we can now understand what traditional spiritual and shamanic practices do at a biological level, as well as understand what makes different healing therapies effective. More important are the very practical applications - entirely new techniques for spiritual growth and healing become possible, through a synthesis of traditional concepts with modern microbiology. This textbook on the theory of peak states and the biology of consciousness is used in our therapist training classes. Although it is written for professionals, we've made it available for laypeople that are interested in the cutting edge of consciousness research and its applications to psychology and medicine.

The River of Consciousness

People are struggling like never before with pain, allergies, cancer and degenerative disease. We can turn this around. In these pages are self-healing revelations from 40 years of study, research, and clinical experience with chronic pain and self-healing power. Physics describes our universe as an infinite quantum field; an interconnected energy web of possibility in which everything already exists. Epigenetics reveals that emotions shape our DNA. Neuroplasticity is natural. Our brains change and grow throughout our lives according to our habits and beliefs. The new paradigm of medicine begins here. Conscious self-healing is not only possible; it's written into our DNA, waiting to be activated by our minds and hearts. This book shows the science and points the way...

The Biology of Belief 10th Anniversary Edition

1990; Oxford, England, and the respectable facade of the City of Dreaming Spires is being shattered by a series of brutal murders. Police chief Neil Lowe needs a quick result, especially if it allows him more time in the cafe. Rookie constable May Pearce is left disillusioned by what appears to be an orchestrated cover-up at the highest level; this is not why she joined the force. Radio reporter Verity Hunter has noticed that the choice of victim suggests a far deeper motive than that of a straight psycho-killer - a particular breed of retribution is at play - and she stumbles upon another aspect of Oxford hidden from view - the world of "elite" secret-societies. Her boyfriend Keith is on the same page, and his consulting of the direct-talking consciousness guru Max Zeall makes him realise that there are spiritual components dictating the way things are playing out. It's these very same forces which provide the opportunity to restore justice and balance. A crime thriller set during a time of great cultural change, (the last days of Thatcherism, the Poll Tax riots, the fall of Communism, the first Gulf War, Acid House and Rave culture,) gets taken to uncharted territories through allegory and metaphor, and the narrative's interplay with spiritual teachings. As such, *The Cause & The Cure* can be read on many different levels, according to the reader's own consciousness.

Reading Beyond the Lines: A Treatise on Consciousness, Energy, Spirituality and Healing

Silently orienting us to the world are traditions embedded in our language. These traditions shape how we understand the necessities and possibilities of life and truth. Dualism, a metaphysical theory, is such a tradition, and, in Keen's view, the separate discourses of science and morality create double meanings in our experience. Psychopharmacology is a critical intersection of these two worlds, where physical compounds are used to change mental life. Increasingly, the language of neurochemistry formulates that treatment. To control ennui with chemicals is to direct our attention away from what is wrong in our lives and to focus instead on what we can control easily, by taking a pill. Mental life has become marginal in biologically reductionistic discourse. While the demystification of human consciousness is surely a cornerstone of modernity, in excess it indulges a world design where nothing is sacred and everything becomes just another phenomenon to which we owe nothing. Our practice of manipulating consciousness as an object surrenders the complex reflections of moral ambiguity and struggle. Following the example of our doctors, Keen asserts, we the population neglect what is wrong in our lives. Like the rest of nature, our minds become exploitable. And properties of consciousness become commodities sold by prescription in drug stores. A provocative analysis of psychopharmacology this will be of interest to treatment professionals, from psychologists, psychiatrists, and nurses to social workers, as well as the interested public.

Peak States of Consciousness

Interuniversalism is a science-based mystical practice based upon direct experience. It is the purpose and the ultimate goal of this practice to raise our collective consciousness to heal humanity at every level, answer basic questions about creation, and help humanity walk the path to inner completion. The Higher Consciousness is the intelligence running the universe. It is possible to receive visions, knowledge, and certain abilities through connecting with the Higher Consciousness. Connection with the Higher Consciousness through Interuniversalism is very practical. The first step taken in this practice is to manifest the ability to heal. The Higher Consciousness will help prevent, control, or completely cure the physical, mental, or psychological problem of the recipients. A Practical Guide to Interuniversalism is a handbook and guide for students of this unique practice. It is also a teaching guide for those who are already masters in this tradition. This book is a translation of the original version of Interuniversalism/*Erfan-Halgheh*. For the general public, this is a book of knowledge. However, registration for a class with a master is required. Further, the links shared in this book may only be activated after initiation by a master. While many people have experienced excellent results in personal healing in the use of this practice, no guarantees can be made that everyone will have the same dramatic experience of healing. Rather, each individual will experience this teaching in their own unique way.

Quantum Reality, Consciousness, and Medicine Today

WHAT is Cosmic Consciousness? The present volume is an attempt to answer this question; but notwithstanding it seems well to make a short prefatory statement in as plain language as possible so as to open the door, as it were, for the more elaborate exposition to be attempted in the body of the work. Cosmic Consciousness, then, is a higher form of consciousness than that possessed by the ordinary man. This last is called Self Consciousness and is that faculty upon which rests all of our life

(both subjective and objective) which is not common to us and the higher animals, except that small part of it which is derived from the few individuals who have had the higher consciousness above named. To make the matter clear it must be understood that there are three forms or grades of consciousness. (1) Simple Consciousness, which is possessed by say the upper half of the animal kingdom. By means of this faculty a dog or a horse is just as conscious of the things about him as a man is; he is also conscious of his own limbs and body and he knows that these are a part of himself. (2) Over and above this Simple Consciousness, which is possessed by man as by animals, man has another which is called Self Consciousness. By virtue of this faculty man is not only conscious of trees, rocks, waters, his own limbs and body, but he becomes conscious of himself as a distinct entity apart from all the rest of the universe. It is as good as certain that no animal can realize himself in that way. Further, by means of self consciousness, man (who knows as the animal knows) becomes capable of treating his own mental states as objects of consciousness. The animal is, as it were, immersed in his consciousness as a fish in the sea; he cannot, even in imagination, get outside of it. or one moment so as to realize it. But man by virtue of self consciousness can step aside, as it were, from himself and think: "Yes, that thought that I had about that matter is true; I know it is true and I know that I know it is true." The writer has been asked: "How do you know that animals cannot think in the same manner?" The answer is simple and conclusive—it is: There is no evidence that any animal can so think, but if they could we should soon know it. Between two creatures living together, as dogs or horses and men, and each self conscious, it would be the simplest matter in the world to open up communication. Even as it is, diverse as is our psychology, we do, by watching his acts, enter into the dog's mind pretty freely—we see what is going on there—we know that the dog sees and hears, smells and tastes—we know that he has intelligence—adapts means to ends—that he reasons. If he was self conscious we must have learned it long ago. We have not learned it and it is as good as certain that no dog, horse, elephant or ape ever was self conscious. Another thing: on man's self consciousness is built everything in and about us distinctively human. Language is the objective of which self consciousness is the subjective. Self consciousness and language (two in one, for they are two halves of the same thing) are the sine qua non of human social life, of manners, of institutions, of industries of all kinds, of all arts useful and fine. If any animal possessed self consciousness it seems certain that it would upon that master faculty build (as man has done) a superstructure of language; of reasoned out customs, industries, art. But no animal has done this, therefore we infer that no animal has self consciousness.

YOUR CONSCIOUS BRAIN

THE LANDMARK BESTSELLER—NOW COMPLETELY REVISED AND UPDATED More than twenty-five years ago, Quantum Healing helped transform Deepak Chopra into a cultural phenomenon. Now Dr. Chopra, hailed by Time as "the poet-prophet of alternative medicine," returns to this groundbreaking exploration of consciousness and the power of mindfulness, adding the latest scientific research as well as expanded thoughts on the connection between body and mind. Inspired by the unexplained recovery of patients in his own practice who had been given just a few months to live, Dr. Chopra began his search for answers. After returning to his native India to explore humanity's most ancient healing tradition, Ayurveda, he combined those insights with Western medicine, neuroscience, and physics. What he discovered—a "network of intelligence" in the human body with the potential to defeat cancer, heart disease, even aging itself—forms the basis of Quantum Healing. In this new edition, Dr. Chopra once again offers a fascinating intellectual journey and a deeply moving chronicle of hope and healing. Praise for Quantum Healing "Quantum Healing didn't set out to cure cancer or Alzheimer's or any other intractable disease. It set out to see the human body, and human existence in general, through wiser eyes. As a scientist I'm passionate about genes and the brain; as a person I'm totally fascinated by the origins of consciousness. Quantum Healing galvanized my intuition that these areas do not have to be separated."—Dr. Rudolph Tanzi, from the new foreword "Deepak Chopra illuminates our true innate capacity for healing, growth, and evolution. With the wisdom of an experienced doctor, girded by science, he guides us to reclaim our natural power towards thriving. Chopra's work is paradigm-changing for medicine and helpful beyond measure for every human being seeking to evolve, flourish, and know our true nature."—Lisa Miller, Ph.D., author of The Spiritual Child and director of clinical psychology, Teachers College, Columbia University
