From Socrates to Sartre

A challenging new look at the great thinkers whose ideas have shaped our civilization. From Socrates to Sartre presents a rousing and readable introduction to the lives, and times of the great philosophers. This thought-provoking book takes us from the inception of Western society in Plato's Athens to today when the commanding power of Marxism has captured one third of the world. T. Z. Lavine, Elton Professor of Philosophy at George Washington University, makes philosophy come alive with astonishing clarity to give us a deeper, more meaningful understanding of ourselves and our times. From Socrates to Sartre discusses Western philosophers in terms of the historical and intellectual environment which influenced them, and it connects their lasting ideas to the public and private choices we face in America today. From Socrates to Sartre formed the basis of the PBS television series of the same name.

From Socrates to Sartre

Essays In Existentialism By Jean -Paul Sartre

Socrates to Sartre

This comprehensive, historically organized introduction to philosophy communicates the richness of the discipline and provides the student with a working knowledge of the development of Western philosophy. New co-author James Fieser has brought this classic text up-to-date both chronologically and stylistically while preserving the thoughtful, conceptual characteristics that have made it so successful. The text covers all periods of philosophy, lists philosophers alphabetically and chronologically on the end-papers, and features an exceptional glossary of key concepts.

Essays in Existentialism

Conversations with 15 contemporary writers and philosophers provide an accessible and exciting account of Western philosophy and its greatest thinkers. Includes contributions from A.J. Ayer, Bernard Williams, Martha Nussbaum, Peter Singer, and John Searle. 28 halftones.

Socrates to Sartre and Beyond

The Passion of the Western Mind is a complete guide to Western civilisation and the philosophical ideas that have shaped our world view. From Plato to Hegel, from Augustine to Nietzsche, from Copernicus to Freud, Richard Tarnas described profound philosophical concepts simply, but without simplifying them. Ten years in the making, The Passion of the Western Mind was hailed as an instant classic on publication. In it, Tarnas provides a compelling account of the evolution of the Western mind and its changing conception of reality. Advances on several fronts - in philosophy, psychology, religious studies and the history of science - have shed new light on this remarkable evolution and Tarnas draws together these advances to set forth a new perspective for understanding out culture's intellectual and spiritual history. The result is a complete liberal education in a single volume.

Great Philosophers

History comes alive in this fascinating story of opposing views that continue to play a fundamental role in today's politics and economics. The Big Three in Economics traces the turbulent lives and battle of ideas of the three most influential economists in world history: Adam Smith, representing laissez faire; Karl Marx, reflecting the radical socialist model; and John Maynard Keynes, symbolizing big government and the welfare state.

The Passion Of The Western Mind

Introducing the fundamentals of ethical theory, Ethics in Criminal Justice: In Search of the Truth, Seventh Edition, exposes the reader to the ways and means of making moral judgments by exploring the teachings of the great philosophers, sources of criminal justice ethics, and ethical issues in the criminal justice system. It is presented from two perspectives: a thematic perspective that addresses ethical principles common to all components of the discipline, and an area-specific perspective that addresses the state of ethics in criminal justice in the fields of policing, corrections, and probation and parole. The seventh edition features discussion of current critical issues in criminal justice: accusations of racism, police shootings, stop and frisk policy, marijuana laws, mass incarceration, life sentences, prison privatization, the swift and certain deterrence model of probation, excessive probation fees, and the Good Lives Model in corrections. The seventh edition also offers completely revised coverage of capital punishment and the rehabilitation debate, and a discussion of how juvenile justice often fails to live up to its ideals. Finally, the book features new case studies of recent ethical dilemmas in criminal justice to enhance students' understanding of real-life ethics decision-making. Suitable for advanced undergraduates or graduate students in criminal justice programs in the US and globally, this text offers a classical view of ethical decision-making and is well-grounded in specific case examples.

The Big Three in Economics

The phrase "American exceptionalism" is used in many ways and for many purposes, but its original meaning involved a statement of fact: for the first century after the Constitution went into effect, European observers and Americans alike saw the United States as exceptional, with political and civic cultures that had no counterparts anywhere else. In American Exceptionalism: An Experiment in History, Charles Murray describes how America's geography, ideology, politics, and daily life set the new nation apart from Europe in the 18th and 19th centuries. He then discusses the ways that exceptionalism changed during America's evolution over the course of the 20th century. Which changes are gains to be applauded? Which are losses to be mourned? Answering these questions is the essential first step in discovering what you want for America's future.

Ethics in Criminal Justice

This book introduces the reader to dialectical reasoning, a kind of thinking found in ancient East Asia and Greece as well as modern Europe and elsewhere in the contemporary world. Here, we focus on Zeno, Socrates, Kant, and Marx, with appendices on Karl Popper and the Frankfurt School. Studying these sources from different regions and periods, we see that the thinking is essentially the same. A similar formal pattern recurs: dialectical thought is always oppositional and self-relational. This book is written in the belief that dialectical thought is understandable and relevant to many kinds of persons. One does need to have a degree in philosophy to be moved by the great dialecticians. One may even be a dialectician without academic training.

American Exceptionalism

Critical Literacy and Urban Youth offers an interrogation of critical theory developed from the author's work with young people in classrooms, neighborhoods, and institutions of power. Through cases, an articulated process, and a theory of literacy education and social change, Morrell extends the conversation among literacy educators about what constitutes critical literacy while also examining implications for practice in secondary and postsecondary American educational contexts. This book is distinguished by its weaving together of theory and practice. Morrell begins by arguing for a broader definition of the "critical" in critical literacy – one that encapsulates the entire Western philosophical tradition as well as several important "Othered" traditions ranging from postcolonialism to the African-American tradition. Next, he looks at four cases of critical literacy pedagogy with urban youth: teaching popular culture in a high school English classroom; conducting community-based critical research; engaging in cyber-activism; and doing critical media literacy education. Lastly, he returns to theory, first considering two areas of critical literacy pedagogy that are still relatively unexplored: the importance of critical reading and writing in constituting and reconstituting the self, and critical writing that is not just about coming to a critical understanding of the world but that plays an explicit and self-referential role in changing the world. Morrell concludes by outlining a grounded theory of critical literacy pedagogy and considering its implications for literacy research, teacher education, classroom practice, and advocacy work for social change.

Dialectical Thinking

A clear, simple, graphic-led introduction to philosophy. Are you short of time but hungry for knowledge? This philosophy book proves that sometimes less is more. Bold graphics and easy-to-understand explanations make it the most accessible guide to philosophy on the market. Organized by major philosophical themes, each pared-back, single-page entry demystifies the groundbreaking theories of famous philosophers. The essential ideas of the major philosophical schools and traditions, such as empiricism, rationalism, dualism, and materialism, can be grasped in seconds. Understanding Philosophy Has Never Been Easier This smart but powerful guide cuts through the jargon and gives you the facts in a clear, visual way. Unlock the mysteries of more than 90 key philosophical ideas, from "I think, therefore I am" and Jean-Paul Sartre's existential angst to Nietzsche's Übermensch and Plato's ideal forms. Whether you're a philosophy student or just a deep thinker with questions about the world, this indispensable guide is packed with everything you need to quickly and easily understand the basics. Complete the Series: Part of DK Book's exciting, brand-new reference series for those who are time-poor but keen to learn more. Discover the strange and fascinating world of physics in Simply Quantum Physics.

Critical Literacy and Urban Youth

This is the first of three volumes on Aging conceived for the International Library of Ethics, Law, and the New Medicine. Leading scholars from a range of disciplines contest some of the predominant paradigms on aging, and critically assess modern trends in social health policy.

Simply Philosophy

Unlike most texts in critical thinking, Reason in the Balance focuses broadly on the practice of critical inquiry, the process of carefully examining an issue in order to come to a reasoned judgment. Although analysis and critique of individual arguments have an important role to play, this text goes beyond that dimension to emphasize the various aspects that go into the practice of inquiry, including identifying issues and relevant contexts, understanding competing cases, and making a comparative judgment. Distinctive Features of the Text: Emphasis on applying critical thinking to complex issues with competing arguments Inclusion of chapters on inquiry in specific contexts Attention to the dialogical aspects of inquiry, including sample dialogues Emphasis on the spirit of inquiry The Second Edition Features: Updated examples and items of current interest New dialogues on vaccination, prostitution, and climate change New material on biases in reasoning, including emotional, psychological, social, and cognitive The Reason in the Balance Website includes: An Appendix on Logic Exercises Quizzes

Aging: Culture, Health, and Social Change

Literary Criticism from Plato to the Present provides a concise and authoritative overview of the development of Western literary criticism and theory from the Classical period to the present day An indispensable and intellectually stimulating introduction to the history of literary criticism and theory Introduces the major movements, figures, and texts of literary criticism Provides historical context and

shows the interconnections between various theories An ideal text for all students of literature and criticism

Reason in the Balance

Sound, practical exposition of Ecclesiastes The John Phillips Commentary Series is designed to provide pastors, Sunday school teachers, and students of the Scripture with doctrinally sound interpretation that emphasizes hands-on application of Bible truth. Working from the familiar King James Version, Dr. Phillips not only provides helpful observation on the text but also includes detailed outlines and numerous illustrations and quotations. Anyone wanting to explore the meaning of God's Word in greater depth - for personal spiritual growth or as a resource for preaching and teaching - will welcome the guidance and insights of this respected series. Dr. Phillips wrote most of this volume before his death and the manuscript was later completed for publication.

Literary Criticism from Plato to the Present

We think the way we do because Socrates thought the way he did. His aphorism 'The unexamined life is not worth living' may have originated twenty-five centuries ago, but it is a founding principle of modern life. For seventy years Socrates was a vigorous citizen of Golden Age Athens, philosophising in the squares and public arenas rather than in the courts of kings, before his beloved city turned on him, condemning him to death by poison. Socrates lived in and contributed to a city that nurtured key ingredients of contemporary civilisation - democracy, liberty, science, drama, rational thought - yet, as he wrote almost nothing down, he himself is an enigmatic figure. In *The Hemlock Cup*, acclaimed historian Bettany Hughes gives Socrates the biography he deserves, painstakingly piecing together Socrates' life and using fresh evidence to get closer to the man who asked 'how should we live?' - a question as relevant now as it has ever been.

Exploring Ecclesiastes

Fragments of wisdom from the ancient world In the sixth century b.c.-twenty-five hundred years before Einstein--Heraclitus of Ephesus declared that energy is the essence of matter, that everything becomes energy in flux, in relativity. His great book, *On Nature*, the world's first coherent philosophical treatise and touchstone for Plato, Aristotle, and Marcus Aurelius, has long been lost to history--but its surviving fragments have for thousands of years tantalized our greatest thinkers, from Montaigne to Nietzsche, Heidegger to Jung. Now, acclaimed poet Brooks Haxton presents a powerful free-verse translation of all 130 surviving fragments of the teachings of Heraclitus, with the ancient Greek originals beautifully reproduced en face. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

The Hemlock Cup

The Story of Philosophy sees philosophy for what it is: a passionate, exhilarating quest for human understanding that cannot be reduced to dry categories or simple definitions. It's a story with plot twists, a murder, accidental discoveries, disastrous love affairs, geniuses, idiots, monks, and vagabonds. At the heart of it all are the ideas and obsessions that have captured great thinkers from the very beginning. Packed with intriguing anecdotes and fascinating detail, James Garvey and Jeremy Stangroom bring us face to face with the most important philosophers in western history. Rigorous, refreshingly free of academic jargon, and highly accessible, this is the ideal introduction for anyone who wants to gain a new perspective on philosophy's biggest thoughts.

Fragments

Documents the story of maverick pharmaceutical company Vertex and a small team of entrepreneurial scientists who after dissociating themselves from Merck endeavored to create breakthrough medicines and transform the pharmaceutical industry. By the award-winning author of *The Billion-Dollar Molecule*.

The Story of Philosophy

"A bracing, rollicking read about the spark that ignites when people start asking meaningful questions." —O Magazine Christopher Phillips is a man on a mission: to revive the love of questions that Socrates inspired long ago in ancient Athens. "Like a Johnny Appleseed with a master's degree, Phillips has gallivanted back and forth across America, to cafés and coffee shops, senior centers, assisted-living complexes, prisons, libraries, day-care centers, elementary and high schools, and churches, forming lasting communities of inquiry" (Utne Reader). Phillips not only presents the fundamentals of philosophical thought in this "charming, Philosophy for Dummies-type guide" (USA Today); he also recalls what led him to start his itinerant program and re-creates some of the most invigorating sessions, which come to reveal sometimes surprising, often profound reflections on the meaning of love, friendship, work, growing old, and others among Life's Big Questions. "How to Start Your Own Socrates Café" guide included.

The Antidote

Winner of the Christianity Today Book of the Year Award (1995) "The scandal of the evangelical mind is that there is not much of an evangelical mind." So begins this award-winning intellectual history and critique of the evangelical movement by one of evangelicalism's most respected historians. Unsparing in his indictment, Mark Noll asks why the largest single group of religious Americans—who enjoy increasing wealth, status, and political influence—have contributed so little to rigorous intellectual scholarship. While nourishing believers in the simple truths of the gospel, why have so many evangelicals failed to sustain a serious intellectual life and abandoned the universities, the arts, and other realms of "high" culture? Over twenty-five years since its original publication, *The Scandal of the Evangelical Mind* has turned out to be prescient and perennially relevant. In a new preface, Noll lays out his ongoing personal frustrations with this situation, and in a new afterword he assesses the state of the scandal—showing how white evangelicals' embrace of Trumpism, their deepening distrust of science, and their frequent forays into conspiratorial thinking have coexisted with surprisingly robust scholarship from many with strong evangelical connections.

Socrates Cafe: A Fresh Taste of Philosophy

This vivid and haunting short-story collection flows smoothly together to create a masterful portrait of contemporary Sri Lanka; a country of teeming natural beauty, with a society in turmoil. A married couple, living in London, find their marriage strained by fighting in their far-off homeland. A man mourns his brother's death. A woman regrets the lover she left behind. Between exile and loss, Gunesequera's characters struggle for the elusive and divided place that they call home. Re-printed by Granta in a beautiful new edition.

The Scandal of the Evangelical Mind

A fictionalized account of the post-colonial period of Ugandan history. Spanning the decades of successive regimes of thinly disguised presidents, Opolo, Duduma, Polle and Kazi. Weaving together the strands of political and gender concerns this is humorous and somber work full of unforgettable episodes.

Monkfish Moon

Presents a selection of full-color photographs from across Africa, covering topics including sense of place, the joy of being, inner journeys, patterns of beauty, rhythm from within, and capacity to endure.

The Invisible Weevil

Long understudied, Plato's *Laws* has been the object of renewed attention in the past decade and is now considered to be his major work of political philosophy besides the *Republic*. In his last dialogue, Plato returns to the project of describing the foundation of a just city and sketches in considerable detail its constitution, laws and other social institutions. Written by leading Platonists, the essays in this volume cover a wide range of topics central for understanding the *Laws*, such as the aim of the *Laws* as a whole, the ethical psychology of the *Laws*, especially its views of pleasure and non-rational motivations, and whether and, if so, how the strict law code of the *Laws* can encourage genuine virtue. They make an important contribution to ongoing debates and will open up fresh lines of inquiry for further research.

Faces of Africa

Can God create a stone too heavy for him to lift? Can time have a beginning? Which came first, the chicken or the egg? Riddles, paradoxes, conundrums—for millennia the human mind has found such knotty logical problems both perplexing and irresistible. Now Roy Sorensen offers the first narrative history of paradoxes, a fascinating and eye-opening account that extends from the ancient Greeks, through the Middle Ages, the Enlightenment, and into the twentieth century. When Augustine asked what God was doing before He made the world, he was told: "Preparing hell for people who ask questions like that." A Brief History of the Paradox takes a close look at "questions like that" and the philosophers who have asked them, beginning with the folk riddles that inspired Anaximander to erect the first metaphysical system and ending with such thinkers as Lewis Carroll, Ludwig Wittgenstein, and W.V. Quine. Organized chronologically, the book is divided into twenty-four chapters, each of which pairs a philosopher with a major paradox, allowing for extended consideration and putting a human face on the strategies that have been taken toward these puzzles. Readers get to follow the minds of Zeno, Socrates, Aquinas, Ockham, Pascal, Kant, Hegel, and many other major philosophers deep inside the tangles of paradox, looking for, and sometimes finding, a way out. Filled with illuminating anecdotes and vividly written, A Brief History of the Paradox will appeal to anyone who finds trying to answer unanswerable questions a paradoxically pleasant endeavor.

Plato's 'Laws'

Explores the history of theories of selfhood, from the Classical era to the present, and demonstrates how those theories can be applied in literary and cultural criticism. Donald E. Hall: * examines all of the major methodologies and theoretical emphases of the twentieth and twenty-first centuries, including psychoanalytic criticism, materialism, feminism and queer theory * applies the theories discussed in detailed readings of literary and cultural texts, from novels and poetry to film and the visual arts * offers a unique perspective on our current obsession with perfecting our selves * looks to the future of selfhood given the new identity possibilities arising out of developing technologies. Examining some of the most exciting issues confronting cultural critics and readers today, Subjectivity is the essential introduction to a fraught but crucial critical term and a challenge to the way we define our selves.

A Brief History of the Paradox

Masonry is much more than a social organisation of fraternal benefit to its members. It inculcates self-control, honesty, justice, mercy, morality, personal integrity and brotherhood as the necessary foundation for spiritual growth. Indeed the goal of every Mason is growth in understanding of spiritual values.

Subjectivity

Science is fantastic. It tells us about the infinite reaches of space, the tiniest living organism, the human body, the history of Earth. People have always been doing science because they have always wanted to make sense of the world and harness its power. From ancient Greek philosophers through Einstein and Watson and Crick to the computer-assisted scientists of today, men and women have wondered, examined, experimented, calculated, and sometimes made discoveries so earthshaking that people understood the world—or themselves—in an entirely new way. This inviting book tells a great adventure story: the history of science. It takes readers to the stars through the telescope, as the sun replaces the earth at the center of our universe. It delves beneath the surface of the planet, charts the evolution of chemistry's periodic table, introduces the physics that explain electricity, gravity, and the structure of atoms. It recounts the scientific quest that revealed the DNA molecule and opened unimagined new vistas for exploration. Emphasizing surprising and personal stories of scientists both famous and unsung, A Little History of Science traces the march of science through the centuries. The book opens a window on the exciting and unpredictable nature of scientific activity and describes the uproar that may ensue when scientific findings challenge established ideas. With delightful illustrations and a warm, accessible style, this is a volume for young and old to treasure together.

The Spirit of Masonry

Exploring how neoliberalism has discovered the productive force of the psyche Byung-Chul Han, a star of German philosophy, continues his passionate critique of neoliberalism, trenchantly describing a regime of technological domination that, in contrast to Foucault's biopower, has discovered the

productive force of the psyche. In the course of discussing all the facets of neoliberal psychopolitics fueling our contemporary crisis of freedom, Han elaborates an analytical framework that provides an original theory of Big Data and a lucid phenomenology of emotion. But this provocative essay proposes counter models too, presenting a wealth of ideas and surprising alternatives at every turn.

A Little History of Science

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Psychopolitics

This unique and expertly annotated collection of the classic accounts of Socrates left by Plato, Aristophanes, and Xenophon features new translations of Euthyphro, Apology, Crito, and the death scene from Phaedo by C. D. C. Reeve, Peter Meineck's translation of Clouds, and James Doyle's translation of Apology of Socrates.

Knowing and the Known

The object of this book is to provide a simple introduction to the Indian systems of philosophy. Each one of these systems has had a vast and varied development. An attempt has been made to introduce the reader to the spirit and outlook of Indian philosophy and help him to grasp thoroughly the central ideas rather than acquaint him with minute details. Modern students of philosophy feel many difficulties in understanding the Indian problems and theories. Their long experience with university students has helped the authors to realise these, and they have tried to remove them as far as possible. This accounts for most of the critical discussions which could otherwise have been dispensed with. The book has been primarily written for beginners. The first chapter which contains the general principles and basic features of Indian philosophy, as well as a brief sketch of each system, gives the student a bird's-eye view of the entire field and prepares him for a more intensive study of the systems which are contained in the following chapters. It is hoped, therefore, that the book will suit the needs of university students at different stages, as well as of general readers interested in Indian Philosophy.

The Trials of Socrates

In *Dionysus on the Other Shore*, Letizia Fusini re-examines Gao Xingjian's post-1987 theatre as a form of tragedy.

An Introduction to Indian Philosophy

Discover the world's greatest thinkers and their groundbreaking notions! Too often, textbooks turn the noteworthy theories, principles, and figures of philosophy into tedious discourse that even Plato would reject. *Philosophy 101* cuts out the boring details and exhausting philosophical methodology, and instead, gives you a lesson in philosophy that keeps you engaged as you explore the fascinating history of human thought and inquiry. From Aristotle and Heidegger to free will and metaphysics, *Philosophy 101* is packed with hundreds of entertaining philosophical tidbits, illustrations, and thought puzzles that you won't be able to find anywhere else. So whether you're looking to unravel the mysteries of existentialism, or just want to find out what made Voltaire tick, *Philosophy 101* has all the answers--even the ones you didn't know you were looking for.

Dionysus on the Other Shore

This book reflects upon the political philosophy of Muhammad Iqbal, a towering intellectual figure in South Asian history, revered by many for his poetry and his thought. He lived in India in the twilight years of the British Empire and, apart from a short but significant period studying in the West, he remained in Punjab until his death in 1938. The book studies Iqbal's critique of nationalist ideology and his attempts

to chart a path for the development of the 'nation' by liberating it from the centralizing and homogenizing tendencies of the modern state structure. Iqbal frequently clashed with his contemporaries over his view of nationalism as 'the greatest enemy of Islam'. He constructed his own particular interpretation of Islam – forged through an interaction with Muslim thinkers and Western intellectual traditions – that was ahead of its time, and since his death both modernists and Islamists have continued to champion his legacy.

Philosophy 101

This comprehensive, historically organized introduction to philosophy communicates the richness of the discipline and provides the student with a working knowledge of the development of Western philosophy. With a lively and approachable style it covers the principal contributions of Western civilization's most influential philosophers. It provides ample detail without complicating minutiae. The text covers all periods of philosophy, lists philosophers alphabetically and chronologically on the end-papers, and features an exceptional glossary of key concepts.

The Political Philosophy of Muhammad Iqbal

Jack Welch turned General Electric around, making it a healthy global giant of 12 businesses. This book of excerpts from his speeches and writing distills the essence of his wisdom and shows how his ideas worked for General Electric.

Socrates to Sartre and Beyond
