International Politics, Asia Pacific Politics, Politics in Asia, Post-War Politics, Asian Political History
Explore the complex landscape of international politics in the Asia Pacific region since 1945. This region has experienced significant transformations, from post-colonial nation-building to economic booms and geopolitical shifts. Understanding the dynamics of power, alliances, and conflicts is crucial to comprehending contemporary Asia.

Politics and International Law

Teaches how and why states make, break, and uphold international law using accessible explanations and contemporary international issues.

The Politics of International Law

Politics and law appear deeply entwined in contemporary international relations. Yet existing perspectives struggle to understand the complex interplay between these aspects of international life. In this path-breaking volume, a group of leading international relations scholars and legal theorists advance a new constructivist perspective on the politics of international law. They reconceive politics as a field of human action that stands at the intersection of issues of identity, purpose, ethics, and strategy, and define law as an historically contingent institutional expression of such politics. They explain how liberal politics has conditioned modern international law and how law 'feeds back' to constitute international relations and world politics. This new perspective on the politics of international law is illustrated through detailed case-studies of the use of force, climate change, landmines, migrant rights, the International Criminal Court, the Kosovo bombing campaign, international financial institutions, and global governance.

The Politics of International Law

Today international law is everywhere. Wars are fought and opposed in its name. It is invoked to claim rights and to challenge them, to indict or support political leaders, to distribute resources and to expand or limit the powers of domestic and international institutions. International law is part of the way political (and economic) power is used, critiqued, and sometimes limited. Despite its claim for neutrality and impartiality, it is implicit in what is just, as well as what is unjust in the world. To understand its operation requires shedding its ideological spell and examining it with a.

International Law and the Politics of History

Explores the ideological, political, and economic stakes of struggles over international law's history and its relation to empire and capitalism.

The Politics of International Law

Today international law is everywhere. Wars are fought and opposed in its name. It is invoked to claim rights and to challenge them, to indict or support political leaders, to distribute resources and to expand or limit the powers of domestic and international institutions. International law is part of the way political (and economic) power is used, critiqued, and sometimes limited. Despite its claim for neutrality and impartiality, it is implicit in what is just, as well as what is unjust in the world. To understand its operation requires shedding its ideological spell and examining it with a cold eye. Who are its winners, and who are its losers? How - if at all - can it be used to make a better or a less unjust world? In this collection of essays Professor Martti Koskenniemi, a well-known practitioner and a leading theorist and historian of international law, examines the recent debates on humanitarian intervention, collective security, protection of human rights and the 'fight against impunity' and reflects on the use of the professional techniques of international law to intervene politically. The essays both illustrate and expand his influential theory of the role of international law in international politics. The book is prefaced with an introduction by Professor Emmanuelle Jouannet (Sorbonne Law School), which locates the texts in the overall thought and work of Martti Koskenniemi.

Research Handbook on the Politics of International Law

What is the relationship between politics and international law? Inspired by comparative politics and socio-legal studies, this Research Handbook develops a novel framework for comparative analysis of politics and international law at different stages of governance and in different governance systems. It applies the framework in a wide range of fields—from human rights and environmental standards, to cyber conflict and intellectual property—to show how the relationship between politics and international law varies depending on the sites where it unfolds.

Politics International Law

The Politics of International Law offers an introduction to the role of law in contemporary international affairs. Through a case study-driven analysis of topics such as human rights, the use of force, international environmental law, international trade law, international criminal justice and the right to self-determination, the book explains the interaction between law and politics in the world today, demonstrating that one cannot be understood without the other. The book is divided into two parts. Part I introduces contemporary international law with a focus on constitutive legal principles such as sovereignty, territorial integrity and the legal equality of states. Through these introductory chapters, students are encouraged to take a holistic view of the processes and actors that drive international affairs, and explore the fascinating paradox that while international law is largely created through political processes, it also constitutes the environment in which international politics is practiced. Part II builds on the foundations laid in Part I to analyze contemporary controversies in international law and politics. Chapters focus on a number of substantive issue areas, including international environmental law, international economic law, human rights law, self-determination and secession, the law governing the use of force, and international criminal justice. This book is written to impart on readers a deepened understanding of both the possibilities and limits of international law as a tool for structuring relations in the world. Digital Formats and Resources Also available as an e-book with functionality, navigation features, and links that offer extra learning support

Strategically Created Treaty Conflicts and the Politics of International Law

A richly textured account of the making, implementing, and changing of international legal regimes, which encompasses law, politics and economics.

Politics of International Law and International Justice

An introduction to international law for politics and IR students This textbook introduction to international law and justice is specially written for students studying law in other departments, such as politics and IR. Written by a lawyer and a political theorist, it shows how international politics has influenced international law. Edwin Egede and Peter Sutch show that neglected questions of justice and ethics are essential to any understanding of the institutions of international society. They walk students through the most crucial questions and critical debates in international law today: sovereignty and global governance, sovereign and diplomatic immunity, human rights, the use of force, sanctions and the domestic impact of international law.

The Politics of International Law

Leading the debate on the domestic effect of the growing influence of international adjudication, this invaluable text examines Serbia and Croatia's erratic record of compliance with the International Criminal Tribunal for the Former Yugoslavia (ICTY). Since the demise of the Milosevic and Tudjman regimes, Serbian and Croatian governments have been inconsistent in cooperating with the ICTY, despite the conditions of EU membership and US financial incentives. This study reconstructs events before, during and after extradition to build up a picture of the complex politics involved in ICTY relations, and provides a conceptual framework to study compliance in international relations and law. Through this analysis, a historical tracing of varied factors of political influence and a conceptualization of compliance is provided, resulting in a rich interdisciplinary work embracing political science, international relations and social theory. By scrutinizing the social meanings and political practices which become attached to prescribed norms in compliance processes, this book provides a highly-relevant insight into contemporary meanings of 'compliance'. Politics of International Law and Compliance will be of interest to students and scholars of politics, international relations and international law, and European politics.

The Politics of International Law and Compliance

This book brings together 18 contributions by authors from different legal systems and backgrounds. They address the political implications of the writing of the history of legal issues ranging from slavery over the use of force and extraterritorial jurisdiction to Eurocentrism.

Politics and the Histories of International Law

In this concise introduction to international law, students gain a clear appreciation for how politics shapes the development of international law, and how international law shapes political relations between states. Throughout the book, Rochester takes this complex subject and makes it accessible with his vibrant, easy-to-read prose.

Between Peril and Promise

This illuminating book explores a multitude of areas in which law and politics intersect on the international plane, providing a comprehensive analysis of the foundations on which both international law and politics rest. The book examines both disciplines' mutual interaction in more specific areas such as public authority, global space, and peace.

International Law and International Politics

This volume examines the role of League of Nations committees, particularly the Advisory Committee of Jurists (ACJ) in shaping the statute of the Permanent Court of International Justice (PCIJ). The authors explore the contributions of individual jurists and unofficial members in shaping the League's international legal machinery. It is a companion book to *The League of Nations and the Development of International Law: A New Intellectual History of the Advisory Committee of Jurists* (Routledge, 2021). One of the guiding principles of the book is that the development of international law was a project of politics where the idea and notion of an international society must contend with the political visions of each state represented on the different legal committees in the League of Nations during the drafting of the Covenant. The book constitutes a major contribution to the literature in that it shows the inner workings of some of the legal committees of the League and how the political role of unofficial members was influential for the development of international law in the early twentieth century and how they influenced the political and legal process of the ACJ. The book will be an essential reference for those working in the areas of International Law, Legal History, International Relations, Political History, and European History.

Transforming the Politics of International Law

A runner-up for the 2018 Chadwick Alger Prize, International Studies Association's International Organization Section, this provocative reassessment of the rule of law in world politics examines how and why governments use and manipulate international law in foreign policy.

How to Do Things with International Law

A compelling new look at the role of today's international courts In 1989, when the Cold War ended, there were six permanent international courts. Today there are more than two dozen that have collectively issued over thirty-seven thousand binding legal rulings. *The New Terrain of International Law* charts the developments and trends in the creation and role of international courts, and explains how the delegation of authority to international judicial institutions influences global and domestic politics. *The New Terrain of International Law* presents an in-depth look at the scope and powers of international courts operating around the world. Focusing on dispute resolution, enforcement, administrative review, and constitutional review, Karen Alter argues that international courts alter politics by providing legal, symbolic, and leverage resources that shift the political balance in favor of domestic and international actors who prefer policies more consistent with international law objectives. International courts name violations of the law and perhaps specify remedies. Alter explains how this limited power--the power to speak the law--translates into political influence, and she considers eighteen case studies, showing how international courts change state behavior. The case studies, spanning issue areas and regions of the world, collectively elucidate the political factors that often intervene to limit whether or not international courts are invoked and whether international judges dare to demand significant changes in state practices.

The New Terrain of International Law

Offers the first analysis of international courts' archives and of how these constitute the international community as a particular reality.

The Archival Politics of International Courts

The universal promise of contemporary international law has long inspired countries of the Global South to use it as an important field of contestation over global inequality. Taking three central examples, Sundhya Pahuja argues that this promise has been subsumed within a universal claim for a particular way of life by the idea of 'development'. As the horizon of the promised transformation and concomitant equality has receded ever further, international law has legitimised an ever-increasing sphere of intervention in the Third World. The post-war wave of decolonisation ended in the creation of the developmental nation-state, the claim to permanent sovereignty over natural resources in the 1950s and 1960s was transformed into the protection of foreign investors, and the promotion of the rule of international law in the early 1990s has brought about the rise of the rule of law as a development strategy in the present day.

Politics of International Law and International Justice

The potential engagement of British forces in military action often leads to intense public debate. This book assesses the public legal justifications for such operations. It critiques the idea that using international legal norms to justify decisions on the use of force will necessarily result in fewer instances of military intervention.

Decolonising International Law

This study proposes a new basis for international law. The author rejects a moral basis for international law, advocating instead the substitution of a functional one. Philosophy, sociology and legal theory are all brought to bear on the question, what law best suits the modern world.

The Politics of Justifying Force

This title is a compilation of materials designed to bridge the gap between the disciplines of international law and international relations. It could be used as a companion to case books for a course in international law, as a reader in an advanced seminar in international law, or in a political science class on international relations of globalization.

Law Without Force

How do politics and international economic law interact with each other? Financial crises and shifts in global economic patterns have refocused our attention on how the fingerprints of the 'visible hand' can be seen all over the institutions that underpin the rules of globalization. From trade and investment to finance, governments are under pressure to enforce, resist and rewrite international economic law. Lawyers have seldom given enough attention to the influence of politics on law, whereas political scientists have had an on-again, off-again fascination with how the law influences relations among states. This book leads the way toward filling this interdisciplinary gap, through a series of important studies written by leaders in the field on specific problems in international economic relations. The book demonstrates a variety of ways in which the international political-economic nexus may be researched and understood.

Foundations of International Law and Politics

The Politics of International Criminal Law is an interdisciplinary collection of original research that examines the often noted but understudied political dimensions of International Criminal Law, and the challenges this nascent legal regime faces to its legitimacy in world affairs.

The Politics of International Economic Law

This title was first published in 2002: The purpose of this volume is to provide a map of some of the great theoretical debates within the discipline of international law. The essays included are structured as dialogues between international legal theorists on concrete subjects such as democracy, gender, compliance, sovereignty and justice. They represent the most interesting theoretical work undertaken in international law.

The Politics of International Criminal Law

The second edition of *International Law in World Politics*--thoroughly updated and now including a full chapter on the use of force--introduces the concepts, the rules, and the functioning of international law in a way that is accessible to students of political science. Shirley Scott covers such core topics as the nature of legal argument, the negotiation and implementation of multilateral treaties, and the place of both intergovernmental organizations and nonstate actors in the international legal system. Equally important, she connects the content of laws to current issues and problems, using case studies to bring the subject to life. The result is a rare text that effectively explains the role that international law plays in the changing arena of world politics.

The Nature of International Law

Influential writers on international law and international relations explore the making, interpretation and enforcement of international law.

International Law in World Politics

This book shows how changing diplomatic practices are central in explaining key dimensions of world politics, from law to war.

Interdisciplinary Perspectives on International Law and International Relations

This work tries to bridge the gap between international lawyers and those political scientists who write about international politics. In the first part, the author discusses the influence of Professor Morgenthau's realist school on the current thinking of political scientists and the abandonment of this school by its originator in the last years of his life. The author concludes that the best way to test the validity of different approaches is to discuss various international crises in the light of contrasting theories and to analyze each situation from both the legal and political points of view. In particular, he tries to ascertain to what extent vital national interests could be accommodated within an international legal framework, or could require a distortion of international rules in order to achieve national objectives. In the second part, the author dissects the Entebbe raid, where Israeli forces rescued a group of hostages being detained by hijackers at a Ugandan airport. His analysis shows the deficiencies of the international system in dealing with such a complex issue, where several contradictory principles of international law could be applied and were defended by various protagonists. The third part starts with a parallel problem--the Iranian hostages crisis, where a group of U.S. officials found themselves in an unprecedented situation of being captured by a band of students. A critical analysis of the handling of this problem by the Carter Administration is followed by vignettes of other crises faced by the Administration and by its successor, the Reagan Administration. This part is less analytical and more prescriptive. The author is no longer satisfied with pointing out what went wrong; instead, he departs from the usual hands-off policy of political scientists and tries to indicate how much better each situation could have been handled if the decision makers had been paying more attention to international law and international organizations. The theme is slowly developed that in the long run national interest is better served not by practicing power politics and relying on the use of threat of force but by strengthening those international institutions that can provide a neutral environment for first slowing down a crisis and then finding an equitable solution acceptable to most of the parties in conflict. The value of this book lies primarily in giving the reader a real insight into several important issues of today that are familiar to most people only from newspaper headlines and television news. While not everybody can agree with all his criticisms of the mistakes of various governments, there is an honest attempt by the author to present issues impartially and to let the blame fall where it may. Being both an international lawyer and a political scientist, the author has had the advantage of combining the methodology of these two social sciences into a rich tapestry with some startling shades and tones.

Diplomacy and the Making of World Politics

The dispute over genetically modified organisms has brought the US and the EU into conflict. This book examines the dynamic interactions of domestic law and politics, transnational networks, international regimes, and global markets, through a theoretically grounded and empirically comprehensive analysis of the governance of GM foods and crops.

World Politics and International Law

The book offers insights on whether international law can shape the politics of the Security Council and conversely, the extent to which the latter contribute to the development of international law. By providing a systematic analysis of the quantity and quality of international legal instruments referred to in the text of resolutions, the book reconstructs patterns of the Security Council's behavioural regularities and assesses them against the provisions of the United Nations Charter, which establishes its mandate. The analysis is divided into three periods – the origins and Cold War period, post-Cold War period and the twenty-first century – and assesses the resolutions passed in each period by thematic category. The book argues that while international law plays an important role in shaping the politics of the Security Council, the Council's resolutions do not contribute significantly to the development of international law.

When Cooperation Fails

This interdisciplinary volume examines the highly topical issue of the role international law plays in international politics today.

The Strategic Use of International Law by the United Nations Security Council

Foucault's challenging view of power and knowledge as the basis for interpreting the international system forms the central themes of this book. As the application of international law expands and develops this book considers how Foucault's approach may create a viable framework that is not beset by ontological issues. With International law essentially stuck within an older framework of outmoded statist approaches, and overly broad understanding of the significance of external actors such as international organizations; current interpretations are either rooted in a narrow attempt to demonstrate a functioning normative structure or interpret developments as reflective of some emerging and somewhat unwieldy ethical order. This book therefore aims to ameliorate the approaches of a number of different 'schools' within the disciplines of international law and international relations, without being wedded to a single concept. Current scholarship in international law tends to favour an unresolved critique, a utopian vision, or to refer to other disciplines like international relations without fully explaining the significance or importance of taking such a step. This book analyses a variety of problems and issues that have surfaced within the international system and provides a framework for consideration of these issues, with a view towards accounting for ongoing developments in the international arena.

The Development of International Law Through the Political Organs of the United Nations

Set in the context of growing interdisciplinarity in legal research, *The Political Economy of International Law: A European Perspective* provides a much-needed systematic and coherent review of the interactions between Political Economy and International Law. The book reflects the need felt by international lawyers to open their traditional frontiers to insights from other disciplines - and political economy in particular. The methodological approach of the book is to take the traditional list of topics for a general treatise of international law, and to systematically incorporate insights from political economy to each.

The Role of Law in International Politics

When studying international law there is often a risk of focusing entirely on the content of international rules (i.e. regimes), and ignoring why these regimes exist and to what extent the rules affect state behavior. Similarly, international relations studies can focus so much on theories based on the distribution of power among states that it overlooks the existence and relevance of the rules of international law. Both approaches hold their dangers. The overlooking of international relations risk assuming that states actually follow international law, and discounting the specific rules of international law makes it difficult for readers to understand the impact of the rules in more than a superficial manner. This book unifies international law and international relations by exploring how international law and its institutions may be relevant and influence the course of international relations in international trade, protection of the environment, human rights, international criminal justice and the use of force. As a study on the

intersection of power and law, this book will be of great interest and use to scholars and students of international law, international relations, political science, international trade, and conflict resolution.

A Foucauldian Approach to International Law

The Sentimental Life of International Law is about our age-old longing for a decent international society and the ways of seeing, being, and speaking that might help us achieve that aim. This book asks how international lawyers might engage in a professional practice that has become, to adapt a title of Janet Malcolm's, both difficult and impossible. It suggests that international lawyers are disabled by the governing idioms of international lawyering, and proposes that they may be re-enabled by speaking different sorts of international law, or by speaking international law in different sorts of ways. In this methodologically diverse and unusually personal account, Gerry Simpson brings to the surface international law's hidden literary prose and offers a critical and redemptive account of the field. He does so in a series of chapters on international law's bathetic underpinnings, its friendly relations, the neurotic foundations of its underlying social order, its screened-off comic dispositions, its anti-method, and the life-worlds of its practitioners. Finally, the book closes with a chapter in which international law is re-envisioned through the practice of gardening. All of this is put forward as a contribution to the project of making international law, again, a compelling language for our times.

The Political Economy of International Law

A critical history of European sovereignty and property rights as the foundation of the international order in 1300-1870.

Power and Law in International Society

"This book investigates one of the most controversial forms of secret statecraft in international politics: the use of covert action to overthrow foreign regimes. The central question it asks is why leaders sometimes turn to the so-called quiet option when conducting regime change rather than using overt means. Whereas existing works prioritize the desire to control escalation or avoid domestic-political constraints to explain this variation, this book highlights the surprising role that international law plays in these decisions. When states cannot locate a legal exemption from the nonintervention principle—the prohibition on unwanted violations of another state's sovereignty, codified in the United Nations Charter and elsewhere—they are more likely to opt for covert action. Concealing brazen violations of nonintervention helps states evade hypocrisy costs and avoid damaging their credibility. These claims are tested against four regime change operations carried out by the United States in Latin America during the Cold War using declassified government documents, interviews with former government officials, and historical accounts. The theory and findings presented in this book expose the secret underpinnings of the liberal international order and speak to longstanding debates about the conduct of foreign-imposed regime change as well as the impact of international law on state behavior. This book also has important policy implications, including what might follow if America abandons its role as the steward of the postwar order as well as the promise and peril of promoting new rules and norms in cyberspace"--

African Agency in International Politics

This book analyses the rapidly increasing role of African states, leaders and other political actors in international politics in the 21st Century. In contrast to the conventional approach of studying how external actors impacted on Africa's international relations, this book seeks to open up a new approach, focusing on the impact of African political actors on international politics. It does this by analysing African agency – the degree to which African political actors have room to manoeuvre within the international system and exert influence internationally, and the uses they make of that room for manoeuvre. Bringing together leading scholars from Africa and Europe to explore the role and conception of African Agency, this book addresses a wide range of issues, from relations with western and non-western donors, Africa's role in the UN and World Trade Organisation, negotiations over climate change, trade agreements with the European Union, regional diplomatic strategies, the character and extent of African state agency, and agency within corporate social responsibility initiatives. African Agency in International Politics will be of interest to scholars and students of Africa's international relations, African politics, development, geography, diplomacy, trade, the environment, political science and security studies.

The African Union and African Agency in International Politics

This book examines the role of the African Union in relation to African agency in international politics. It examines the manner and extent to which the African Union exercises two forms of agency-shirking and slippage in its strategic and collaborative partnerships. The author focuses on four major AU partnerships with the European Union, NATO, the United Nations and US AFRICOM. The book examines African agency in each partnership by exploring the politics and dynamics of each partnership in different aspects: the multilevel engagement, institutionalization, resource contribution and disbursement, as well as preference linkage. It specifically does that by examining African ownership and leadership in all of these aspects. The book highlights the role of agency slack as a survival strategy to escape from the AU's subaltern position in international politics. It designates the partnership with the European Union as emblematic of African agency; while the others exhibit different forms of agency slack. Partnerships with NATO and the United Nations exhibit shirking, while that with the US AFRICOM exhibits slippage. Tshepo Gwatiwa is Lecturer in the Department of International Relations at the University of the Witwatersrand in Johannesburg, South Africa. He is also a Research Associate at the African Centre for the Study of the United States (ACSUS) at the same university.

Beyond History

Moving beyond a self-indulgent attitude about Africa's historical victimhood, the book seeks to capture how African states individually and Africa's collective institutions (the AU) are providing agency in Africa's international relations. While African states have been trailblazers in such ideas as 'The Responsibility to Protect', as conceived in the African Union Constitutive Act (2001) which preceded the United Nations (UN) Secretary General's report "In Larger Freedom" (2005) in which the UN adopted the concept, African agency in international relations has not always been captured proactively. This volume seeks to document Africa (and African states) in a state of proactivity as opposed to a reactionary mode of international relations which has long been the case due to the discipline's heavy concentration on the West. The main themes explored are: African agency in international relations and commerce, agency in Africa's balancing of big and regional powers, reshaping Africa-EU relations beyond the Cotonou Agreements, Africa and international human rights institutions, African efforts in elections and conflicts in Africa and relationship building among African leaders.

Africa in Global International Relations

Recent scholarship in International Relations (IR) has started to study the meaning and implications of a non-Western world. With this comes the need for a new paradigm of IR theory that is more global, open, inclusive, and able to capture the voices and experiences of both Western and non-Western worlds. This book investigates why Africa has been marginalised in IR discipline and theory and how this issue can be addressed in the context of the emerging Global IR paradigm. To have relevance for Africa, a new IR theory needs to be more inclusive, intellectually negotiated and holistically steeped in the African context. In this innovative volume, each author takes a critical look at existing IR paradigms and offers a unique perspective based on the African experience. Following on from Amitav Acharya and Barry Buzan's work, *Non-Western International Relations Theory*, it develops and advances non-Western IR theory and the idea of Global IR. This volume will be of key interest to scholars and students of African politics, international relations, IR theory and comparative politics.

The African Union and African Agency in International Politics

This book examines the role of the African Union in relation to African agency in international politics. It examines the manner and extent to which the African Union exercises two forms of agency—shirking and slippage—in its strategic and collaborative partnerships. The author focuses on four major AU partnerships with the European Union, NATO, the United Nations and US AFRICOM. The book examines African agency in each partnership by exploring the politics and dynamics of each partnership in different aspects: the multilevel engagement, institutionalization, resource contribution and disbursement, as well as preference linkage. It specifically does that by examining African ownership and leadership in all of these aspects. The book highlights the role of agency slack as a survival strategy to escape from the AU's subaltern position in international politics. It designates the partnership with the European Union as emblematic of African agency; while the others exhibit different forms of agency slack. Partnerships with NATO and the United Nations exhibit shirking, while that with the US AFRICOM exhibits slippage.

African Foreign Policies

This book explores, at a time when several powers have become serious players on the continent, aspects of African agency, past and present, by African writers on foreign policy, representative of geography, language and state size. In the past, African foreign policy has largely been considered within the context of reactions to the international or global "external factor". This groundbreaking book, however, looks at how foreign policy has been crafted and used in response not just to external, but also, mainly, domestic imperatives or (theoretical) signifiers. As such, it narrates individual and changing foreign policy orientations over time—and as far back as independence—with mainly African-based scholars who present their own constructs of what is a useful theoretical narrative regarding foreign policy on the continent—how theory is adapted to local circumstance or substituted for continentally based ontologies. The book therefore contends that the African experience carries valuable import for expanding general understandings of foreign policy in general. This book will be of key interest to scholars and students of Foreign Policy Analysis, Foreign Policy Studies, African International Relations/Politics/Studies, Diplomacy and more broadly to International Relations.

Diplomacy and Borderlands

This book examines Africa's internal and external relations by focusing on three core concepts: orders, diplomacy and borderlands. The contributors examine traditional and non-traditional diplomatic actors, and domestic, regional, continental, and global orders. They argue that African diplomats profoundly shape these orders by situating themselves within in-between-spaces of geographical and functional orders. It is in these borderlands that agency, despite all kinds of constraints, flourishes. Chapters in the book compare domestic orders to regional ones, and then continental African orders to global ones. They deal with a range of functional orders, including development, international trade, human rights, migration, nuclear arms control, peacekeeping, public administration, and territorial change. By focusing on these topics, the volume contributes to a better understanding of African international relations, sharpens analyses of ordering processes in world politics, and adds to our comprehension of how diplomacy shapes orders and vice versa. The studies collected here show a much more nuanced picture of African agency in African and international affairs and suggest that African diplomacy is far more extensive than is often assumed. This book will be of much interest to students of diplomacy studies, African politics and International Relations.

Africa and the Formation of the New System of International Relations

This book discusses the prospects for the development of the African continent as part of the emerging system of international relations in the twenty-first century. African countries are playing an increasingly important part in the current system of international relations. Nevertheless, even 60 years after gaining their independence, most of them are confronted with regional and global issues that are directly related to their colonial past and its influence. Due to Africa's wealth of natural and geopolitical resources, the possibility of interference in the internal affairs of African countries on the part of new and traditional global actors remains very real. Leading Africanists, together with international scholars from both international relations and African studies, examine the experience of decolonization, the impact of the emergence of a unipolar world on the African continent, and the growing influence of new international actors on the African continent in the twenty-first century. In addition, the importance of African countries' foreign policy concepts and ideological attitudes in the post-bipolar period is revealed. "This volume strengthens the intellectual bridge between Russian, African and Western scholars of international relations. Strongly recommended!" Vladimir G. Shubin, Institute for African Studies, Russian Academy of Sciences "This book presents a wide range of prominent global scholars who bring a wealth of knowledge on the subject of Africa and the world." Gilbert Khadiagala, Jan Smuts Professor of International Relations and Director of the African Centre for the Study of the USA (ACSUS) at the University of the Witwatersrand, Johannesburg, South Africa. "As a genuine contribution to the field of international relations and Global South Agency, this book should be in every institution of higher education's library." Lembe Tiky, Director of Academic Development, International Studies Association.

Africa in International Politics

Locating Africa on the global stage, this book examines and compares external involvement in the continent, exploring the foreign policies of major states and international organizations towards Africa. The contributors work within a political economy framework in order to study how these powers have attempted to stimulate democracy, peace and prosperity in the context of neo-liberal hegemony and ask whom these attempts have benefited and failed.

Africa and the Formation of the New System of International Relations—Vol. II

In light of the growing number of African summits and a new awareness of international interdependence during the COVID-19 pandemic, this book provides a comprehensive analysis of the current state of Africa's international relations (IR). Leading IR scholars from Africa and around the world examine international cooperation with African countries in areas such as health care, education, and peacekeeping and explore how Africa's role in the system of international relations has changed during the COVID-19 pandemic. The book is divided into four parts, the first of which explores analyzes the various actors that constitute African agency in the post-pandemic world, while the second focuses on the summits of the major powers regarding cooperation with Africa. The third part covers public health cooperation and regional initiatives in Africa, including issues such as vaccine diplomacy, while the fourth and final part discusses conflicts & political process despite COVID Pandemics.

The Changing Global Order

This volume offers a comprehensive evaluation of the concept of global order, with a particular emphasis on the role of regional organisations within global governance institutions such as the United Nations. Building from a solid theoretical base it draws upon the expertise of numerous leading international scholars offering a broad array of timely and relevant case studies. These all take into consideration the historical setting, before analysing the contemporary situation and offering suggestions for potential realignments and readjustments that may be witnessed in the future. The volume adopts an interdisciplinary approach when addressing some of the most pressing issues of global governance which our global community must tackle. This presents the readers an opportunity to understand related topics such as political economy, international law, institutions of global governance, in conjunction with the academic field of International Relations (IR). It further helps students and interested readers understand the theoretical and practical foundations to the changing nature of global affairs.

Special focus: Exploring Africa's agency in international politics

Strong states and strong civil societies are now increasingly hailed as the twin drivers of a 'rising Africa'. Current attempts to support growth and democracy are part of a longer history of promoting projects of disciplinary, regulatory and liberal rule and values beyond 'the West'. Yet this is not simply Western domination of a passive continent. Such an interpretation misses out on the complexities and nuances of the politics of state-building and civil society promotion, and the central role of African agency. Drawing upon critical theory, including postcolonial and governmentality approaches, this book interrogates international practices of state-building and civil society support in Africa. It seeks to develop a theoretically informed critical approach to discourses and interventions such as those associated with broadly 'Western' initiatives in Africa. In doing so, the book highlights the power relations, inequalities, coercion and violence that are deeply implicated within contemporary international interventions on the African continent. Providing a range of empirical cases and theoretical approaches, the chapters are united by their critical treatment of political dynamics in Africa. This book will be of interest to students and scholars of African politics, development studies, postcolonial theory, International Relations, international political economy and peacekeeping/making.

Critical Perspectives on African Politics

China's engagement in Africa is generally portrayed simply as African countries being exploited for their mineral wealth by a wealthy political and economic superpower. Is this always the case? Certain African countries have been able to use China's involvement in the region to grow their economies and solicit renewed interest from previously disengaged foreign powers by using their relationship with China to bolster their political capital. In this thought provoking and original work Lucy Corkin demonstrates how Angola has been amongst the most successful of African nations in this role. The concept of 'African agency' covers a wide range of different countries with very different capabilities and experiences of engaging with China. In each individual country there are a myriad of actors all with increasingly discernible agencies. *Uncovering African Agency; Angola's Management of China's Credit Lines* casts a fascinating new light on China's involvement with her largest African trading partner and through this shows how different African states and the governmental actors within them are able to exploit the relationship to their best advantage.

Uncovering African Agency

Decolonisation has lost its way. Originally a struggle to escape the West's direct political and economic control, it has become a catch-all idea, often for performing 'morality' or 'authenticity'; it suffocates African thought and denies African agency. Olúfí mi Táíwò fiercely rejects the indiscriminate application of 'decolonisation' to everything from literature, language and philosophy to sociology, psychology and medicine. He argues that the decolonisation industry, obsessed with cataloguing wrongs, is seriously harming scholarship on and in Africa. He finds 'decolonisation' of culture intellectually unsound and wholly unrealistic, conflating modernity with coloniality, and groundlessly advocating an open-ended undoing of global society's foundations. Worst of all, today's movement attacks its own cause: 'de-colonisers' themselves are disregarding, infantilising and imposing values on contemporary African thinkers. This powerful, much-needed intervention questions whether today's 'decolonisation' truly serves African empowerment. Táíwò's is a bold challenge to respect African intellectuals as innovative adapters, appropriators and synthesisers of ideas they have always seen as universally relevant.

Against Decolonisation

African Affairs is the top journal in African Studies and has been for some time. This book draws together some of the most influential, important, and thought provoking articles published in its pages over the last decade. In doing so, it collates essential cutting-edge research on Africa and makes it easily available for students, teachers, and researchers alike. The African Affairs Reader is broken down into four sections that cover some of the biggest themes and questions facing the continent today, including: the African State, the Political Economy of Development, Africa's Relationship with the World, and Elections, Representation & Democracy. Within each section, articles deal with some of the most significant recent trends and events, such as the prospects for democratization in Ghana and Nigeria, the factors underpinning Rwanda's economic success, the rise of political corruption in South Africa, the spread of the drugs trade, the struggle against gender based violence, and the growing influence of China. Each section is introduced by a new purpose-written essay by the journal's editors that explains the evolution of the wider debate, highlights key contributions, and suggests new ways in which the discussion can be taken forward. Taken together, the essays and articles included in the volume provide both a coherent introduction to the study of Africa and a compelling commentary on the current state of play on the continent.

The African Affairs Reader

This book offers a rich perspective on Africa's agency in the changing global order marked by intense geopolitical contestations. It discusses ways in which the African continent has been on the margins of the global economic system because of the actions of major powers and Africa's own leaders, and how this legacy can be overcome. The book covers an uncharted ground in analyzing the intersection between geopolitical rivalry, digital futures, and Africa's place in the world. This text makes a clarion call for African leaders and citizens to define better development pathways for the continent through insisting on ethical and transformation leadership as well as building credible institutions that are inclusive. This, according to the author, will ensure a sounder basis for Africa's positive agency. Further, the book makes a strong case for structural transformation that is innovation-led, and that African decision-makers should leverage US-China rivalries to achieve Africa's own development interests.

The Political Economy of China—US Relations

This book focuses on marginal actors in the global order. Such a perspective is often missing as global order analysis is often biased towards exploring large powerful actors and equating their relations with global order. Such an approach is not only dated but also analytically incomplete. It is because of the increasingly decentred nature of global order, that marginal actors and their relations, tactics, strategies and approaches matter for global order as they matter for these actors. The book starts by providing an analytical framework exploring different policy options for African agency which are located along a nexus of choices ranging from accommodation, engagement to system transformation. The selection of a particular interaction type is argued to be dependent on external opportunity structures in the form of different global orders reaching from competitive polarity to dispersed forms of authority or even non-polarity. In addition to these external conditions, the ability to generate meaningful African agency facilitates a greater role in global order. Empirically, the book covers four policy fields which are peace and security, international criminal justice, economics and trade and COVID-19.

Africa in a Changing Global Order

Examines the variety of mostly unorganized and informal ways in which Africans exercise agency and resist state power in the 21st century, through citizen action and popular culture, and how the relationship between ruler and ruled is being reframed.

African International Relations

"This book focuses on the ECOWAS Commission, both as an autonomous actor, as well as a policy-making nexus for its member states in Africa, and external actors. Drawing from a variety of never-before analyzed sources, unpublished internal documents and over 120 interviews with staff from the ECOWAS Commission, its member states, and external actors supporting the organization, this book presents a comprehensive portrait of ECOWAS's institutional capabilities, challenges, and reforms. It utilizes a policy studies approach focusing on the areas of political affairs, peace, and regional security, as well as trade and customs to illustrate concrete cases of policy making by the

Commission, its member states, and external actors. In doing so, the book provides practice-oriented insights into the policy-making agency within the organization, arguing for the significance of the ECOWAS Commission as an actor. This book will be of key interest to scholars and students of West Africa and its international relations, comparative regionalism, international organization studies, development studies, policy-making, peace and conflict studies, governance and more broadly to African politics and international relations"--

Civic Agency in Africa

This innovative book responds to an existing demand for taking Africa out of a place of exception and marginality, and placing it at the center of international relations and world politics. Bringing together a number of scholars from various disciplinary backgrounds to stage a critical intervention into the problematic ways Africa is accounted for in the dominant discourses of international relations and global politics, it challenges the structural and epistemic biases of IR that render the contributions of the continent invisible, and situates the continent as a global region that exists beyond notions of lack, disorder, and failure. Through these interventions, the volume contributes to a rethinking of IR, and the conditions of possibility for imagining a world otherwise beyond frames that fetishize Africa paradoxically as transparent and invisible.

The Rise of a Regional Institution in Africa

The agent-structure problem is a much discussed issue in the field of international relations. In his comprehensive 2006 analysis of this problem, Colin Wight deconstructs the accounts of structure and agency embedded within differing IR theories and, on the basis of this analysis, explores the implications of ontology - the metaphysical study of existence and reality. Wight argues that there are many gaps in IR theory that can only be understood by focusing on the ontological differences that construct the theoretical landscape. By integrating the treatment of the agent-structure problem in IR theory with that in social theory, Wight makes a positive contribution to the problem as an issue of concern to the wider human sciences. At the most fundamental level politics is concerned with competing visions of how the world is and how it should be, thus politics is ontology.

Recentring Africa in International Relations

Providing a comprehensive and cutting edge examination of this important continent, Routledge Handbook of African Politics surveys the key debates and controversies, dealing with each of the major issues to be found in Africa's politics today. Structured into 6 broad areas, the handbook features over 30 contributions focused around: The State Identity Conflict Democracy and Electoral Politics Political Economy & Development International Relations Each chapter deals with a specific topic, providing an overview of the main arguments and theories and explaining the empirical evidence that they are based on, drawing on high-profile cases such as the Democratic Republic of Congo, Kenya, Nigeria, Somalia, South Africa, Rwanda and Zimbabwe. The Handbook also contains new contributions on a wide range of topical issues, including terrorism, the growing influence of China, civil war, and transitional justice, making it required reading for non-specialists and experts alike. Featuring both established scholars and emerging researchers, this is a vital resource for all students of African Studies, democratization, conflict resolution and Third World politics.

Agents, Structures and International Relations

Although developing countries far outnumber fully industrialized states, they are often neglected in the study of international relations, especially with respect to the development of foreign policy theory. International Relations in Contemporary Africa attempts to fill this void in the literature on comparative international relations while at the same time providing a detailed analysis of the economic development and integration of West African countries. Michael Anda specifically focuses on the members of the Economic Community of West African States (ECOWAS) and their policies, which encourage coordination on issues ranging from science and technology to diplomacy and mutual defense. Tracing the diplomatic history of West Africa from independence to the present, he assesses the various dimensions of cooperation among the smaller and less developed states of West Africa while revealing the precarious nature of the economy and security in the region. Both detailed and comprehensive, International Relations in Contemporary Africa represents a significant contribution to African studies that appeal to those with an interest in the foreign policy of smaller states.

Routledge Handbook of African Politics

This empirically and theoretically grounded book provides insights into the ascendance of powers such as Turkey, South Korea and Indonesia and their relationship with Africa. Leading scholars present case studies from the BRICS and beyond to demonstrate the constantly evolving and complex character of these ties and their place in the global capitalist order. They also offer new theoretical insights, as well as theorisation of the spatio-temporal dynamics involved in processes of accumulation within the African space. Their contention is that, despite their supposed anti-imperialism, these emerging powers have become agents for continued uneven development. This innovative edited collection will appeal to students and scholars of international relations, political science, development studies, area studies, geography and economics.

International Relations in Contemporary Africa

"Mixing Afro-optimism with heavy doses of Afro-reality and Afro-responsibility, this book calls for a new political narrative about Africa that captures the multi-disciplinary dimensions of Africa's "transition" and critically examining its ramifications. The author discusses the origins of the "Problem" perception held about Africa and explains how things are turning around and how the continent is now becoming a voice to be heard rather than a problem to be solved. He then goes on to interrogate some of the key manifestations of this new "voice" and identifies how the world is responding to the new "voice" of Africa before finally examining some of the contradictions that have been embedded in the transition. The book is strategically multi-disciplinary - emphasizing key disciplines of African studies in different chapters - for example: anthropology, ethnography, and philosophy in Chapter 1; history, in Chapter 2; economics, in Chapter 3; politics, in Chapter 4; arts, literature, and aesthetics, in Chapter 5; religion, in Chapter 6; and globalization, in Chapter 7. Through this, A New Narrative for Africa explores and analyses several of the various strands of the African studies discipline, examining the transformation of African on the global stage over the course of its history."

Emerging Powers in Africa

Africa's international relations have often been defined and oriented by the dominant international and geopolitical agendas of the day. In the aftermath of colonialism the Cold War became a dominant paradigm that defined the nature of the continent's relationship with the rest of the world. The contemporary forces of globalization are now exerting an undue influence and impact upon Africa's international relations. Increasingly, the African continent is emerging as a vocal, and in some respects an influential, actor in international relations. There is a paucity of analysis and research on this emerging trend. This timely book proposes to fill this analytical gap by engaging with a wide range of issues, with chapters written by experts on a variety of themes. The emerging political prominence of the African continent on the world stage is predicated on an evolving internal process of continental integration. In particular, there are normative and policy efforts to revive the spirit of Pan-Africanism: the 21st century is witnessing the evolution of Pan-Africanism, notably through the constitution and establishment of the African Union (AU). Given the fact that there is a dearth of analysis on this phenomenon, this volume will also interrogate the notion of Pan-Africanism through various lenses – notably peace and security, development, the environment and trade. The volume will also engage with the emerging role of the AU as an international actor, e.g. with regard to its role in the reform of the United Nations Security Council, climate change, the International Criminal Court (ICC), the treaty establishing Africa as a nuclear-free zone, Internally Displaced Persons, the Millennium Development Goals (MDGs), international trade, the environment, public health issues, security, and development issues. This book will assess how the AU's role as an international actor is complicated by the difficulty of promoting consensus among African states and then maintaining that consensus in the face of often divergent national interests. This book will in part assess the role of the AU in articulating collective and joint policies and in making interventions in international decision and policy-making circles. The Handbook will also assess the role of African social movements and their relationship with global actors. The role of African citizens in ameliorating their own conditions is often underplayed in the international relations discourse, and this volume will seek to redress this oversight. Throughout the book the various chapters will also assess the role that these citizen linkages have contributed towards continental integration and in confronting the challenges of globalization.

A New Narrative for Africa

Home to more than 1.2 billion people, living in 54 recognized states, speaking around 3,000 languages, Africa is a diverse and complex continent made up of states which differ in regard to their colonial history, political system, socio-economic development, economic policies and their experience with crises and conflicts. This introduction and overview of African history and politics since decolonization emphasises throughout, the diversity of the continent. Organised thematically to include chapters on decolonization and its legacies, external influences, economics, political systems, inter-African relations, crises, conflicts and conflict management, and Africa's external relations, Martin Welz strikes a fine balance between the use of contextual information, analysis, case studies and examples with theoretical debates in development, politics and global policy. Accessible to students at all levels, it counters histories which offer reductive explanations of complex issues, and offers new insights into the role African actors have played in influencing international affairs beyond the continent.

Handbook of Africa's International Relations

Drawing on qualitative research with African actors and global health institutions, the authors explore the politics of how performance funding modalities and participation are used to shape health reform in African countries as well as the role of African actors, global policy elites and international donors within these processes.

Africa since Decolonization

Comprehensive and engaging, this timely introduction to Africa's international relations explores how power, interests, and ideas influence interactions both among the continent's states and between African states and other actors in the global arena. How has history shaped the international relations of African states and peoples? What role does identity play? How are foreign policies linked to domestic political dynamics, and especially to the pursuit of regime security? How are states grappling with the tensions between sovereignty and external pressures? These are among the questions answered as the authors address a wide range of ongoing and emerging challenges, all in historical and theoretical context. In addition, a case study at the end of each chapter illustrates key concepts and reflects an ongoing debate. The result is an ideal text for students, as well as an invaluable resource for researchers and policymakers. -- £c From publisher's description.

Global Politics of Health Reform in Africa

This book examines the role of the Economic Community of West African States (ECOWAS) practitioners in coordinating, creating, and managing regional governance practices in the areas of public health, peace and security, and microfinancial integration. Since 1975, there have been many failed and successful attempts at unconstitutional government changes in West Africa. During this same period, numerous instruments have been designed to promote peace and security in the region. This book examines the role of bureaucratic actors in the ECOWAS in harmonizing regional integration policy in West Africa. Using data from fieldwork in several countries in West Africa, Balogun observes how ECOWAS practitioners network and strategically engage regional stakeholders in health, peace and security, and finance as a means to deepen harmonization between ECOWAS Member States and build a connection with civil society. Balogun argues that the founding conditions of ECOWAS set the organization on an institutional path to adapt its approaches to regional governance. Region-Building in West Africa challenges the idea that self-interested leaders limit regional cooperation. The book also challenges the idea that the bureaucrats in the organization are glorified servants to their governments. Region-Building in West Africa instead focuses on the influence that bureaucrats have in shaping the international policy agenda of ECOWAS. This book will be useful to scholars, students, and practitioners in Africa and beyond who want to better understand the inner workings of African regional organizations, and the processes that drive cooperation across West Africa.

Africa's International Relations

This volume includes a selection of papers dedicated to the problems of the contemporary international relations and foreign policies of the African states. Most of these papers were presented at the panels, held within the framework of the 13th International Conference of Africanists "Society and Politics in Africa: Traditional, Transitional and New" (Moscow, Russia, May 27-30, 2014). The book contains many articles devoted to the Western countries' policies in Africa. On the background of the ongoing competition between Washington and Beijing, the US Administration has recently increased the amount of attention it pays to the continent. The European Union is also actively developing its strategic

partnership with Africa. The authors thoroughly analyse the ongoing cooperation between African states and China, a great "emerging donor" and investor. They particularly address the question about possible implications of China's African policy for the countries of the continent. Major attention is given to Sudan and South Sudan. One of the urgent problems addressed is the situation with African IDPs and refugees, their life conditions in camps and the measures for their transition to normal life.

Region-Building in West Africa

This book examines how Africa can secure a 'just transition' to low-carbon, climate-resilient economies.

Africa's Growing Role in World Politics

This edited volume discusses infrastructural cooperation and industrial cooperation between China and several countries in Africa. In contributions by academics and practitioners alike, the book distils the conceptual implications of empirical and ethnographic findings and explores probable future developments in the Africa-China relationship. The chapters deal with numerous countries across the African continent, covering nearly all regions, showcasing the dynamics of China's relations with different countries while highlighting African agency over major infrastructure projects and industrial activity. Providing an in-depth look at the evolving economic cooperation across these two regions, this volume will appeal to researchers and students of African politics, international relations, area studies, and comparative politics. The book will be of relevance to policymakers in governments, international organizations, and non-governmental organizations involved in policy formulation particularly regarding the Africa-China/China-Africa relationship.

Africa's Right to Development in a Climate-Constrained World

The China-Africa relationship has so far largely been depicted as one in which the Chinese state and Chinese entrepreneurs control the agenda, with Africans and their governments as passive actors exercising little or no agency. This volume examines the African side of the relation, to show how African state and non-state actors increasingly influence the China-Africa partnership and, in so doing, begin to shape their economic and political futures. The influx of public and private sector Chinese actors across the African continent has led to a rise of opportunities and challenges, which the volume sets out to examine. With case studies from Nigeria, Angola, Kenya, South Africa, Ethiopia, and Zambia, and across the technology, natural resource, manufacturing, and financial sectors, it shows not only how African realities shape Chinese actions, but also how African governments and entrepreneurs are learning to leverage their competitive advantages and to negotiate the growing Chinese presence across the continent.

Perspectives on Africa-China Infrastructural and Industrial Cooperation

"African agency in moderating China-US competition to advance peace and prosperity on the continent, with mutual benefit for the two global powers, is well-served by this concise and compelling book. This book should be required reading for policymakers and concerned publics throughout Africa and abroad." -- John Stremlau, Head of Peace Programmes, Carter Center, USA. This book offers a rich perspective on Africa's agency in the changing global order marked by intense geopolitical contestations. It discusses ways in which the African continent has been on the margins of the global economic system because of the actions of major powers and Africa's own leaders, and how this legacy can be overcome. The book covers an uncharted ground in analyzing the intersection between geopolitical rivalry, digital futures, and Africa's place in the world. This text makes a clarion call for African leaders and citizens to define better development pathways for the continent through insisting on ethical and transformation leadership as well as building credible institutions that are inclusive. This, according to the author, will ensure a sounder basis for Africa's positive agency. Further, the book makes a strong case for structural transformation that is innovation-led, and that African decision-makers should leverage US-China rivalries to achieve Africa's own development interests. Mzukisi Qobo is Head, Wits School of Governance, University of the Witwatersrand. He serves on President Cyril Ramaphosa's Economic Advisory Council. He has in the past served in a senior role in government as Chief Director responsible for trade policy in the Department of Trade and Industry, South Africa. His areas of expertise are governance, political economy, and geopolitics. He obtained his Ph.D. from the University of Warwick, UK.

Africa and China

This volume should be of great value to all readers interested in the study of cultural globalization from the perspectives of anthropology, philosophy, cultural studies, political science and international relations."--Jacket.

The Political Economy of China-US Relations

This book investigates the ways in which soft power is used by African countries to help drive global influence. Selecting four of the countries most associated with soft power across the continent, this book delves into the currencies of soft power across the region: from South Africa's progressive constitution and expanding multinational corporations, to Nigeria's Nollywood film industry and Technical Aid Corps (TAC) scheme, Kenya's sport diplomacy, fashion and tourism industries, and finally Egypt's Pan-Arabism and its reputation as the cradle of civilisation. The book asks how soft power is wielded by these countries and what constraints and contradictions they encounter. Understandings of soft power have typically been driven by Western scholars, but throughout this book, Oluwaseun Tella aims to Africanise our understanding of soft power, drawing on prominent African philosophies, including Nigeria's Omolúwàbí, South Africa's Ubuntu, Kenya's Harambee, and Egypt's Pharaonism. This book will be of interest to researchers from across political science, international relations, cultural studies, foreign policy and African Studies.
