The Tao of Gender

The concept of gender is one that is static for many and malleable for some. Many mistakenly interchange gender with sexuality. Some argue that it is cultural/environmental, while others say that it is genetic. What is gender? The answer continues to elude. Tarynn Whitten's introspective work seeks to explore the mystery of gender identity through an integration of various principles of Taoism. The Tao of Gender grew out of a personal need to provide peaceful reading for those who seek "The Way" on their journey through life, in a world where transgenderism and transsexuality are all too often misunderstood. The author hopes to help those on this journey to find balance by tapping into their infinite capacity for resourcefulness and wisdom within. What readers are saying This book is a gift of inspiration and insight for those who experience gender fluidity or want to explore the nature of trans-genderism. Tarynn artfully weaves the personal and the philosophical, creating a tapestry of gender and Taoism with threads of self-discovery and renewal.—Randi Ettner, Ph.D., author of Gender Loving Care; and Confessions of a Gender Defender

Real Power

The Tao Te Ching is the world's oldest leadership manual, written, according to legend, by the sage Lao-tzu in the sixth century B.C.E. In this book, premier business consultant James A. Autry and bestselling author and translator Stephen Mitchell present a modern-day guide to business leadership drawing on the age-old lessons of the Tao Te Ching. With simple, evocative essays, commenting on a selection from the Tao Te Ching, they show how its elegant wisdom can transform the workplace from a source of stress into a source of creativity and joy--and make work, at any level of the corporate ladder, more fulfilling than ever before.

The Process of Power

The Process of Power: Lao Tzu's Guide to Success, Politics, Governance, and Leadership is a new translation of the Chinese classic The Tao Te Ching. The purpose of this text is to do just what the title says, to provide advice for achieving social, governmental, and corporate success. What distinguishes this translation from all others is that this reading focuses on the meaning on the text rather than merely establishing a word-for-word translation. The result is that this translation of the Tao Te Ching is less vague than most, and thus, much more user friendly to the average reader. This translation is a necessary read for anyone who is in any type of leadership position who wants to be effective, successful, and popular. It is also an excellent resource for students, novices to Taoism, and anyone else who desires to understand the Tao on a deeper, more personal level.

The Way of Leading People

Prepare yourself for some pleasant surprises. Authors Patrick Warneka and Timothy H. Warneka?leadership experts and martial artists?have updated Lao Tzu?s classic leadership strategy, aligning it with today?s global realities. Tao-Te-Ching

"TAO-TE-CHING: The Way of Virtue in Leadership and Life," is a uniquely merged rendering of Taoism's classic, sacred text. Based upon five respected translations dating from 1944 through 2003, poet and theologian John Ross, Jr. has re-focused his own poetic version upon Taoism's intrinsic virtues critical for successful contemporary leadership. By preserving the deep wisdom natural to Lao-Tzu's ancient text, Ross has not only upheld the academic legacy and literary contributions of those translations preceding his, but also provides five appendices of helpful notes, theological scholarship, and reflective commentary. Each of the 81 chapters endeavors to instruct the reader toward acquiring a non-aggressive attitude toward all forms of leadership. For parents, educators, government officials, military leaders, clergy; and especially for those in today's business world, this new American version is one greatly welcomed. As you surrender to the principles of the Tao, may you embrace the spiritual invitation offered by the Reverend Gail Tapscott in her FORWARD to this inspiring book, one which reminds each of us that: "...as we assimilate and put the teachings of the Tao-Te-Ching and other Taoist wisdom to work in our personal, professional and spiritual life, we must all produce our own version in the end." In this comprehensive volume, Reverend Tapscott also offers a genuine and enlightening personal journey, which details her early encounters with Taoist principles beginning way back in the the nineteen sixties; and extending to this very decade. In her ministry as a Harvard trained theologian, college professor, and decades-long minister in the Unitarian Universalist tradition, she offers the reader practical insights highlighting the features of this unique version of Lao-Tzu's ancient text. Her commentary and theological insights serve as a spiritual guide to those who may be uninitiated in how to incorporate Taoist principles and teachings into their own busy 'digital-driven' lifestyles. This book is a must for those interested in contemporary spirituality, the relationship of Taoism to the world's great religions, Asian philosophy, the writings of Confucius, or simply Taoist teachings in general.

The Essential Classics for Leaders

Presenting The Essential Classics for Leaders: Tao Te Ching by Lao Tzu, The Art of War by Sun Tzu, Meditations by Marcus Aurelius, and The Prince by Niccolò Machiavelli with an introduction by Nicholas Tamblyn, and illustrations by Katherine Eglund. This collection is part of The Essential Series by Golding Books. There are certain books of antiquity that have risen to the status of required readings for those interested in effective leadership. The Tao Te Ching, The Art of War, Meditations, and The Prince have achieved this rare renown, influencing countless changemakers and leaders throughout history. A leader will be faced with all kinds of challenges, some unforeseen. These texts emphasize that the best way to command or sway others is through a prudence that does not always err on the side of leniency or severity, but rather on that of knowledge and flexibility. Along with strength of character, an effective leader also possesses the ability to adapt and therefore to take informed, needful, and decisive action. Both Taoism and Machiavellianism note that personal development and, by extension, business management are essentially careful thought followed by swift action. If you are focused on becoming a leader and seek words of wisdom and encouragement on how to lead, the teachings of classic Eastern philosophy (or Chinese philosophy), ancient Roman philosophy and more recent Italian philosophy each have something powerful to teach us. This inspirational collection is the perfect great leader gift for women and men, bosses and employees and the experienced as well as up and comers, rare among leadership books for young adults, ambitious teens, or those long in the workforce). Lao Tzu was an ancient Chinese philosopher and writer born in the 6th-5th century BCE, reputed author of the Tao Te Ching (published 6th Century BCE) and founder of the School of the Tao or Taoism. The main source of information on Lao Tzu's life is a biography written by the historian Sima Qian (145-86 BCE), where he referred to earlier accounts, such as one noting that Lao Tzu was a contemporary of Confucius. However, some scholars doubt the historicity of Lao Tzu, and so his life, if he existed, remains shrouded in mystery. Sun Tzu was an ancient Chinese military general, strategist, and philosopher, who is believed to have written the famous ancient book on military strategy, The Art of War. He lived in the Spring and Autumn period of ancient China, and his birth year is given by tradition as 544 BC. While the book has become immensely popular through to today, there is little to no certainty about Sun Tzu's claim to its authorship, or the veracity of details about his life. Marcus Aurelius was born in 121 in Rome. His original name was Marcus Annius Verus, and he was born into a wealthy and political family. A dedicated student, he became a Stoic, a philosophy which emphasized self-restraint, fate, and reason. He was chosen by Emperor Hadrian to be his eventual successor, and

in 161, Aurelius took control of the Roman Empire along with his brother Verus, assuming the name Caesar Marcus Aurelius Antoninus Augustus. His rule suffered the threat of war and disease, and, while Rome was held, his rule weakened after the death of his brother. His son Commodus became co-ruler in 177 (having been named Caesar in 166), and Aurelius died after a repeated bout of illness in 180. Niccolò Machiavelli was born in 1469 in Florence, Italy. He was a diplomat for fourteen years in the Florentine Republic during the Medici family's exile. When the Medicis returned to power in 1512, he was dismissed and jailed for three weeks, during which time he was subjected to the "strappado," or ropes used for hanging torture. He wrote *The Prince*, a political handbook for self-serving and ruthless leaders that became a philosophy classic on leadership, in 1532. He died in Florence in 1527.

The Tao of Personal Leadership

Lao Tzu, Marx, the Buddha, Ibsen, Machiavelli — these are just a few of the world's great thinkers who have weighed in on the subject of leadership over the centuries. Yet, the contemporary student of leadership often overlooks many of these names in favour of more recent theorists hailing from the social sciences. *Understanding Leadership: An Arts and Humanities Perspective* takes a different angle, employing the works of the great philosophers, authors and artists found in world civilization and presenting an arts and humanities perspective on the study of leadership. The authors build their conceptual framework using The Five Components of Leadership Model, which recognizes the leader, the followers, the goal, the environmental context, and the cultural values and norms that make up the leadership process. Supporting the text are a wealth of case studies which reflect on works such as Ayn Rand's novella *Anthem*, Eugène Delacroix's painting *Liberty Leading the People*, Charlie Chaplin's film *Modern Times*, Athol Fugard's play "Master Harold" . . . and the Boys, Lao Tzu's poetic work *Tao Te Ching*, and Antonín Dvořák's *New World Symphony*. The authors also introduce studies from various world cultures to particularly illustrate the role cultural values and norms play in leadership. This illuminating framework promotes the multidimensional thinking that is necessary for understanding and problem solving in a complex world. *Understanding Leadership: An Arts and Humanities Perspective* will be a valuable textbook for both undergraduate and postgraduate leadership students, while leadership professionals will also appreciate the book's unique liberal arts and cultural approach.

Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide. Simulation and skills centres have become established to integrate simulation into mainstream education in all medical, nursing, and paramedical fields. Borrowing from the experience and methodologies of industries that are using simulation, medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula. This book assists both novice and experienced workers in the field to learn from established practitioners in medical simulation. Simulation has been used to enhance the educational experience in a diverse range of fields; therefore a wide variety of disciplines are represented. The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding, equipment, staffing and course development, and promotion. Section two deals with simulators and related training devices that are required to equip a stand-alone or institution-based centre. The features, strengths, and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements. There

is a guide to producing scenarios and medical props that can enhance the training experience. The third section covers adult education and it reviews the steps required to develop courses that comply with 'best practice' in medical education. Teaching skills, facilitating problem-based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education. The manual concludes with guides for the major specialties that use simulation, including military, paediatrics, CPR and medical response teams, obstetrics, and anaesthesia.

We may not all be monarchs, emirs, presidents, prime ministers or bosses, but we have often experienced the difficulties of leadership in relationships and families, among friends, in clubs and societies, in expeditions, in sport. The ancient Chinese pondered the nature of leadership and wrote two classics of philosophy about them, the original Taoist document, *Tao Te Ching*, and the more ancient and mysterious oracle of advice, *I Ching*, or the *Book of Changes*. Keeping as close to the originals as possible, Kennedy has brilliantly re-worked both classic texts into an everyman's manual of natural leadership and enlightenment. This book will appeal both to those familiar with *I Ching* and Taoism and to those new to their ways of thought. Kennedy illuminates the original intentions of these briefings for leaders', challenging many preconceptions about their philosophy."
