The main purpose of nutrition screening is to identify individuals who may: a. Be at risk for malnutrition b. Need to lose weight c. Not be getting enough calcium d. Not be drinking enough fluids

Enteral products are generally commercially prepared products that are provided either orally or through a tube. Sometimes facilities prepare their own enteral products. These are typically used for patients who are not able to meet nutritional requirements on their own.

The document that lists the job responsibilities and duties as well as the skills required for a particular position is called a job: a. Specification b. Analysis c. Description d. Title

ANSWER b. US Grades A, B, or C The United States Department of Agriculture inspects and grades meat, poultry, eggs, fruits, vegetables, and dairy products. The grades are based on the amount of fat and skin and the presence of defects.

Where is the most appropriate initial place to report an outbreak of a Salmonella infection? a. Local health department b. Centers for Disease Control c. Food and Drug Administration d. The local health clinic

Any time a certain disease is discovered, the local health department should be notified either by the physician who has diagnosed it or the laboratory where the test was conducted.

ANSWER b. Capital The capital account is the account from which money for expensive items is taken. This type of account covers long-term needs, such as replacement of worn out equipment and remodeling projects.
