Every Second Counts

The dramatic race to transplant the first human heart spanned two years, three continents and five cities against a backdrop of searing tension, scientific brilliance, ethical controversy, racial strife and emotional turmoil. It culminated in a terrifying moment in the early hours of 3 December 1967 when, in a cramped operating theatre in a Cape Town hospital, Professor Chris Barnard stared into an empty cavity from which he had just removed a heart. He knew that he had only minutes left to make history and save the life of a 55-year-old man by filling the gaping hole in his chest with a heart which had just been beating inside a 25-year-old woman. Every Second Counts is the story of this gripping race to conquer the greatest of medical challenges. It also reveals the truth about the man at the centre of it all, whose turbulent life story was just as gripping. The kind of true story that would be dismissed as far-fetched if presented as fiction, it combines an utterly compelling portrait of cutting-edge science with raw human drama, and shows how the course of medicine itself was changed for ever.

Success for Marc Ryder means riding out eight seconds on the back of an angry rodeo bull. She's exactly the type of wild and reckless person artist Bridgette LeRoy has avoided since the senseless death of her brother. But circumstances throw them together, and Bridgette is drawn into a tumultuous ride of attraction, passion, and denial. When she realizes it's the only way to protect her battered heart, Bridgette's desperate mission to stop Marc's suicidal return to the rodeo becomes a race in which every second counts.

Every Second

We are all familiar with names such as Roger Federer, Victoria Pendleton, Mo Farah, Donald Bradman, Lionel Messi, Mohammed Ali and Venus Williams, to name just a few, who have reached the pinnacle of success. *Every Second Counts* explores the stories of those whose names are not as well known, who have made huge sacrifices in pursuit of their goals but who have achieved little or nothing. Not for them a gold medal, entry in the record books, knighthood or best-selling biographies, but whose contribution to their sport should nevertheless be recognised. And since no one is perfect, there are accounts of famous sportsmen and sportswomen who have had extremely successful careers but who may have fallen short in one respect or another.

Martin Hines is the man who discovered the sensational and talented F1 World Champion Lewis Hamilton. He is the world's most successful kart driver with 17 major championships including three

world titles and five European, the last of which he won at the age of 56 after beating cancer. Along the way he discovered and nurtured F1 superstars like David Coulthard, Anthony Davidson and Lewis Hamilton, and future stars Gary Paffett and Oliver Rowland. He built Zip Karts into the industry's most influential company, at the forefront of sport-changing innovations like indoor karting. But his autobiography is far more than the story of a successful kart king. The action will leave you breathless and the anecdotes will make you laugh. This is a must read book for motorsport lovers and also for everyone who appreciates a life lived as though every split second counts.

This collection brings together new insights around current translation and interpreting practices in national and supranational settings. The book illustrates the importance of further reflection on issues around quality and assessment, given the increased development of resources for translators and interpreters. The first part of the volume focuses on these issues as embodied in case studies from a range of national and regional contexts, including Finland, Switzerland, Italy, Spain and the United States. The second part takes a broader perspective to look at best practices and questions of quality through the lens of international bodies and organizations and the shifting roles of translation and interpreting practitioners in working to manage these issues. Taken together, this collection demonstrates the relevance of critically examining processes, competences and products in current institutional translation and interpreting settings at the national and supranational levels, paving the way for further research and quality assurance strategies in the field. The Introduction, Chapter 7, and Conclusion of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

How a public-private partnership led to the largest emergency response system in the world Emergency medical response systems are a critical component of any nation's healthcare system. Minutes or even seconds can mean the difference between life or death. Every Second Counts tells the inspiring story of how the Indian government and a non-profit foundation, the Emergency Management and Research Institute (EMRI), partnered to create a world-class emergency response system that serves more than 700 million people and has saved more than 2 million lives. What the government of India achieved in partnership with EMRI is nothing short of groundbreaking. In Every Second Counts, William A. Haseltine describes the key factors behind the success of EMRI: the application of cutting-edge technologies, an outstanding medical education system, and a close working partnership between a well-intentioned government and a capable non-profit partner. Every Second Counts is an important book for policymakers, business leaders, and healthcare leaders who care about providing high-quality care at affordable costs to all those in need.

"I want to die at a hundred years old after screaming down an Alpine descent on a bicycle at 75 miles per hour. I don't do anything slow, not even breathe. I do everything at a fast cadence: eat fast, sleep fast." At twenty four, Lance Armstrong was already well on his way to becoming a sporting legend. Then, in October 1996, he was diagnosed with stage four testicular cancer. When lesions appeared on his brain and in his lungs, doctors gave him a 40% chance of survival. On that day Armstrong's life changed forever and in typical fashion he met the challenge head on - this was one fight he was determined not to lose. As he battled against the cancer invading his body and the chemotherapy

that threatened to sap his soul, a tremendous sense of commitment emerged, to his training and to the people around him who never gave up on him. Just sixteen months after he was discharged from hospital, Armstrong entered the Tour de France, a race famed for its gruelling intensity, and won, in the fastest ever time. Just a few months after that, he became a father. *It's Not About the Bike* is the story of one man's inspirational battle against the odds, charting his progress through triumph, tragedy and transformation. This is an awe-inspiring tale of immense courage and will.

Tom Clancy's The Division: New York Collapse

A five-time Moth GrandSLAM winner and bestselling novelist shows how to tell a great story — and why doing so matters. Whether we realize it or not, we are always telling stories. On a first date or job interview, at a sales presentation or therapy appointment, with family or friends, we are constantly narrating events and interpreting emotions and actions. In this compelling book, storyteller extraordinaire Matthew Dicks presents wonderfully straightforward and engaging tips and techniques for constructing, telling, and polishing stories that will hold the attention of your audience (no matter how big or small). He shows that anyone can learn to be an appealing storyteller, that everyone has something "story worthy" to express, and, perhaps most important, that the act of creating and telling a tale is a powerful way of understanding and enhancing your own life.

Language play includes many punctuation marks in this companion to the New York Times #1 bestseller *Eats, Shoots & Leaves!* Commas and apostrophes aren't the only punctuation marks that can cause big trouble if they're put in the wrong place. "Twenty-odd ducks" is an estimate of how many are waddling by, but "twenty odd ducks" would not only be a big group, but they'd look very strange! Imagine this without the middle period and the comma: "The king walked and talked. A half hour after, his head was cut off." Oh no—a beheaded king that can still walk and talk! Truss and Timmons put hyphens, parentheses, quotation marks, periods, and more in the spotlight, with silly scenes showing how which marks you choose and where you put them can cause hilarious mix-ups.

July 1940: A month after the evacuation of the defeated and battered Allied forces from Dunkirk, a German invasion of England threatens. In this thrilling historical "what-if," Prime Minister Winston Churchill has resigned without naming a successor and leaders of Parliament are calling for an armistice with Hitler. Meanwhile, the Deputy Director of Counter-Espionage at MI5, Adam Strachan, faces his own daunting task. During a botched burglary, the fugitive Billy Houston commits murder and discovers his victim was in possession of Britain's plans to thwart the German invasion. No patriot, Houston is determined to get the information to the right people and help bring about a Nazi-run Britain. Strachan soon finds himself pursuing Houston through England, from London's blacked-out streets and

seedy narrow lanes to the thinly guarded Channel coast and the Isle of Wight, in a desperate bid to stop the missing defense plans from falling into German hands. The clock is ticking, and Britain's immediate future is anything but secure.

Time rules our lives, but how much do we really understand it? In *Time Warped*, we meet the people willing to go to extreme lengths to find out. They travel to Costa Rica to find out if hummingbirds can sense the passage of time, they walk towards the edge of a stairwell blindfolded and one man spends two months in an ice cave in total darkness - all in an attempt to fathom the tricks time can play on our minds. Drawing on the latest research from psychology, neuroscience and biology, award-winning BBC Radio4 presenter Claudia Hammond delves into the mysteries of time perception. She shows us how to manage time more efficiently, why speeds up as you get older and, ultimately, how to use the warping of time to our own advantage.

Everything Counts! is an execution strategy for inspiring excellence and driving exceptional results. Too many people and organizations are mired in a mediocrity of their own making. They focus their attention and efforts on getting the big things right, but they ignore the little things that often make a big difference. As a result, reputations are damaged, brands diluted, and loyalty is lost by blatant disregard for the small stuff which negatively impacts the customer experience. For years, we've been taught not to sweat the small stuff, but in the real world of business, Everything Counts. Everything Counts is a call to greater awareness and with awareness comes a responsibility to raise the performance bar. It offers a powerful operating philosophy that will steer your organization to reach higher levels of growth, productivity, and performance. From the smallest customer contact to the most minute details of product quality, the little things add up to a pretty big deal. Serving as the definitive guide on organizational and personal mastery, this book gives you a foundation for unparalleled customer service, superior quality, and consistent performance. A proven system for organizing, aligning, and improving all your efforts in sales, service, and performance improvement Shows how concentrating on the small things leads to growth, productivity, personal success, and business greatness Helps you motivate your people and teams to achieve better results on both the personal and organizational level Everything Counts reminds us that seemingly small things can make tremendous differences. The purpose of this book is to help you internally define and take ownership of the most fundamental principle behind achieving results beyond your expectations-a single idea with an actionable focus-Everything Counts!

Forecasting is required in many situations. Stocking an inventory may require forecasts of demand months in advance. Telecommunication routing requires traffic forecasts a few minutes ahead. Whatever the circumstances or time horizons involved, forecasting is an important aid in effective and efficient planning. This textbook provides a comprehensive introduction to forecasting methods and presents enough information about each method for readers to use them sensibly.

'Intriguing, Funny, Prophetic' ran the New York Review of Books headline to an admiring survey of the poetry of Mark Ford by the American critic Helen Vendler. The same words could describe *Enter, Fleeing*, the fourth collection of poems from one of the UK's most distinctive poets. The work gathered here displays Ford's power to amuse and startle, to move and disconcert. A number of short poems recreate moments from the poet's peripatetic childhood, while others dramatise more general states of fear and desire, of excitement and anxiety. As Vendler noted, Ford's recent work frequently addresses post-colonial issues arising from the collapse of the British Empire, as well as the paradoxes and information loops of today's globalised economy. *Enter, Fleeing* is Ford's most exhilarating and powerful volume to date.
