## Shared Histories of Modernity

While pre-modernity is often considered to be the 'time' of non-European regions and modernity is seen as belonging to the West, this book seeks to transcend the temporal bifurcation of that world history into 'pre-modern' and 'modern', as well as question its geographical split into two irreconcilable trajectories: the European and the non-European. The book examines shared experiences of modern transformation or modernity in three regions -- China, India and the Ottoman Empire -- which conventional historiography identifies as non-European, and therefore, by implication, outside of modernity or only tangentially linked to it as its victim. In other words, this work looks at modernity without reference to any 'idealised' criteria of what qualifies as 'modern' or not, studying the negotiation and legacies of the early modern period for the modern nation state. It focuses on the experience of modernity of non-European regions for they play a crucial role in the new phase of transformational patterns may have deeper roots than are generally assumed. Rejecting European characterisations of 'eastern' states as Oriental despotisms, the volume conceives of the early modern state as a negotiated enterprise, one that questions the assumption that state centralisation must be a key metric of success in modernisation.

Among other topics, the book highlights: state formations in the three empires; legislation pertaining to taxation, property, police reform, the autonomy of legal sphere, the interaction of different types of law, law's role in governance, administrative practice, negotiated settlements and courts as sites of negotiation, the blurred boundaries between formal law and informal mediation; the ability of 18th century Qing and Ottoman imperial governments to accommodate diverse local particularities within an overreaching structure; and the pattern of regional development pointing to the accommodative institutional capacity of the Mughal empire.

## SHARED HISTORIES

This volume attempts to present a dialogue between Israeli and Palestinian scholars over competing narratives in the 19th and 20th century history of the Middle East to 1948, in the hopes of creating an appreciation, understanding, and respect for the "other."

## Bookish Histories

This ground-breaking collection of essays presents a new 'bookish' literary history, which situates questions about books at the intersection of a range of debates about the role of authors and readers, the organization of knowledge, the vogue for collecting, and the impact of overlapping technologies of writing and shifting generic boundaries.

## Rethinking World History

Is the history of the modern world the history of Europe writ large? Or is it possible to situate the history of modernity as a world historical process apart from its origins in Western Europe? In this posthumous collection of essays, Marshall G. S. Hodgson challenges adherents of both Eurocentrism and multiculturalism to rethink the place of Europe in world history. He argues that the line that connects Ancient Greeks to the Renaissance to modern times is an optical illusion, and that a global and Asia-centred history can better locate the European experience in the shared histories of humanity. Hodgson then shifts the historical focus and in a parallel move seeks to locate the history of Islamic civilisation in a world historical framework. In so doing he concludes that there is but one history - global history - and that all partial or privileged accounts must necessarily be resituated in a world historical context. The book also includes an introduction by the editor, Edmund Burke, contextualising Hodgson's work in world history and Islamic history.

## Max Weber

This authoritative collection of essays examines Weber's contribution to the contemporary debate about modernity and postmodernity.

## A Companion to World History

A Companion to World History presents over 30 essays from an international group of historians that both identify continuing areas of contention, disagreement, and divergence in world and global history, and point to directions for further debate. Features a diverse cast of contributors that include established world historians and emerging scholars Explores a wide range of topics and themes, including and the practice of world history, key ideas of world historians, the teaching of world history and how it has drawn upon and challenged "traditional" teaching approaches, and global approaches to writing world history Places an emphasis on non-Anglophone approaches to the topic Considers issues of both scholarship and pedagogy on a transnational, interregional, and world/global scale

## The Crisis of Global Modernity

Drawing on historical sociology, transnational histories and Asian traditions, Duara seeks answers to the pressing global issue of environmental sustainability.

## A Companion to the History of the Book

**A COMPANION TO THE HISTORY OF THE BOOK**  
Edited by Simon Eliot and Jonathan Rose "As a stimulating overview of the multidimensional present state of the field, the Companion has no peer." Choice "If you want to understand how cultures come into being, endure, and change, then you need to come to terms with the rich and often surprising history Of the book ... Eliot and Rose have done a fine job. Their volume can be heartily recommended." Adrian Johns, *Technology and Culture* From the early Sumerian clay tablet through to the emergence of the electronic text, this Companion provides a continuous and coherent account of the history of the book. A team of expert contributors draws on the latest research in order to offer a cogent, transcontinental narrative. Many of them use illustrative examples and case studies of well-known texts, conveying the excitement surrounding this rapidly developing field. The Companion is organized around four distinct approaches to the history of the book. First, it introduces the variety of methods used by book historians and allied specialists, from the long-established discipline of bibliography to newer IT-based approaches. Next, it provides a broad chronological survey of the forms and content of texts. The third section situates the book in the context of text culture as a whole, while the final section addresses broader issues, such as literacy, copyright, and the future of the book. ## Cosmopolitan Modernisms

Moments of crisis and innovation in modernism's cross-cultural past, from the reception of modernist art in colonial India to the experience of African American artists in the New York art world of the 1950s. This first book in the *Annotating Art's Histories* series revisits the period in which modernist attitudes took shape, examining the ways in which a shared history of art and ideas was experienced in different nations and cultures. Original essays by leading art historians and curators trace the dynamic interplay of cultures across the story of modern art, looking at moments of crisis and innovation in modernism's cross-cultural past. An account of colonialism and nationalism in Indian art from the 1890s to the 1920s, for example, suggests that cultural identities are constantly modifying one another in the very moment of their encounter and points to primitivism as a counter-discourse to modernism. A collision between modernism and colonialism in the design of a Bauhaus model housing project reveals the volatile conditions of European modernism in the 1930s. Discussions of the abstract painting of Norman Lewis and the collages of Romare Bearden illustrate the conflicted experiences and multiple affiliations of African American artists in the New York art world of the 1940s and 1950s. The first English translation of an influential essay in the Brazilian neoconcrete movement of the 1950s takes up concerns similar to those of North American minimalism in the 1960s. These and the other journeys into modernism's past described in *Cosmopolitan Modernisms* return to our contemporary moment with questions about modern art and modernity that we are only beginning to ask. ## Modernity and Self-Identity

This major study develops a new account of modernity and its relation to the self. Building upon the ideas set out in *The Consequences of Modernity*, Giddens argues that 'high' or 'late' modernity is a post traditional order characterised by a developed institutional reflexivity. In the current period, the globalising tendencies of modern institutions are accompanied by a transformation of day-to-day social life having profound implications for personal activities. The self becomes a 'reflexive project', sustained through a revisable narrative of self identity. The reflexive project of the self, the author seeks to show, is a form of control or mastery which parallels the overall orientation of modern institutions towards 'colonising the future'. Yet it also helps promote tendencies which place that orientation radically in question - and which provide the substance of a new political agenda for late modernity. In this book Giddens concerns himself with themes he has often been accused of unduly neglecting, including especially the psychology of self and self-identity. The volumes are a decisive step in the development

of his thinking, and will be essential reading for students and professionals in the areas of social and political theory, sociology, human geography and social psychology.

### Antinomies of Modernity

*Antinomies of Modernity* asserts that concepts of race, Orient, and nation have been crucial to efforts across the world to create a sense of place, belonging, and solidarity in the midst of the radical discontinuities wrought by global capitalism. Emphasizing the continued salience at the beginning of the twenty-first century of these supposedly nineteenth-century ideas, the essays in this volume stress the importance of tracking the dynamic ways that race, Orient, and nation have been reworked and used over time and in particular geographic locations. Drawing on archival sources and fieldwork, the contributors explore aspects of modernity within societies of South Asia, the Middle East, and Africa. Whether considering how European ideas of Orientalism became foundational myths of Indian nationalism; how racial caste systems between blacks, South Asians, and whites operate in post-apartheid South Africa; or how Indian immigrants to the United States negotiate their identities, these essays demonstrate that the contours of cultural and identity politics did not simply originate in metropolitan centers and get adopted wholesale in the colonies. Colonial and postcolonial modernisms have emerged via the active appropriation of, or resistance to, far-reaching European ideas. Over time, Orientalism and nationalist and racialized knowledges become indigenized and acquire, for all practical purposes, a completely "Third World" patina. *Antinomies of Modernity* shows that people do make history, constrained in part by political-economic realities and in part by the categories they marshal in doing so. ### Beyond Crisis

Through the essays in this volume, we see how the failure of the state becomes a moment to ruminate on the artificiality of this most modern construct, the failure of nationalism, an opportunity to dream of alternative modes of association, and the failure of sovereignty to consider the threats and possibilities of the realm of foreignness within the nation-state as within the self. The ambition of this volume is not only to complicate standing representations of Pakistan. It is take Pakistan out of the status of exceptionalism that its multiple crises have endowed upon it. By now, many scholars have written of how exile, migrancy, refugeedom, and other modes of displacement constitute modern subjectivities. The arguments made in the book say that Pakistan is no stranger to this condition of human immigrancy and therefore, can be pressed into service in helping us to understand our present condition.

### The Global Social Sciences

The European social sciences tend to absorb criticism that has been passed on the European approach and re-label it as a part of what the critique opposes; criticism of European social sciences by "subaltern" social sciences, their "talking back", has become a frequent line of reflection in European social sciences. The re-labelling of the critique of the European approach to social sciences towards a critique from "Southern" social sciences of "Western" social sciences has somehow turned "Southern" as well as "Western" social sciences into competing contributors to the same "globalizing" social sciences. Both are no longer arguing about the European approach to social sciences but about which social thought from which part of the globe prevails. If the critique becomes a part of what it opposes, one might conclude that the European social sciences are very adaptable and capable of learning. One might, however, also raise the question whether there is anything wrong with the criticism of the European social sciences; or, for that matter, whether there is anything wrong with the European social sciences themselves. The contributions in this book discuss these questions from different angles: They revisit the mainstream critique of the European social sciences, and they suggest new arguments criticizing social science theories that may be found as often in the "Western" as in the "Southern" discourse.

### Reframing Blackness and Black Solidarities through Anti-colonial and Decolonial Prisms

This book grounds particular struggles at the curious interface of skin, body, psyche, hegemonies and politics. Specifically, it adds to current [re]theorizations of Blackness, anti-Blackness and Black solidarities, through anti-colonial and decolonial prisms. The discussion challenges the reductionism of contemporary polity of Blackness in regards to capitalism/globalization, particularly when relegated to the colonial power and privileged experiences of settler. The book does so by arguing that this

practice perpetuates procedures of violence and social injustice upon Black and African peoples. The book brings critical readings to Black racial identity, representation and politics informed by pertinent questions: What are the tools/frameworks Black peoples in Euro-American/Canadian contexts can deploy to forge community and solidarity, and to resist anti-Black racism and other social oppressions? What critical analytical tools can be developed to account for Black lived experiences, agency and resistance? What are the limits of the tools or frameworks for anti-racist, anti-colonial work? How do such critical tools or frameworks of Blackness and anti-Blackness assist in anti-racist and anti-colonial practice? The book provides new coordinates for collective and global mobilization by troubling the politics of "decolonizing solidarity" as pointing to new ways for forging critical friends and political workers. The book concludes by offering some important lessons for teaching and learning about Blackness and anti-Blackness confronting some contemporary issues of schooling and education in Euro-American contexts, and suggesting ways to foster dialogic and generative forums for such critical discussions.

### The Human Being in History

The Human Being in History affirms the ontological dignity of the human being, arguing that the challenges posed by the twenty-first century are not just political, economic, and social, but existential and metaphysical. In the face of these challenges, philosophy must show how to confront issues in a new way: not as problems that admit technical resolution, but as questions which involve openness to meaning and which demand the exercise of freedom.

### The Early Modern in South Asia

Did modernity arrive in South Asia with British colonialism? Or was South Asia already modern by then? What might have that modernity looked like? The Early Modern in South Asia engages with these questions. It brings together ten chapters, which collectively trace the contours of South Asia's early modernity between the sixteenth and eighteenth centuries. They do this by examining the nature of historical change in various domains, including philosophy, warfare, law, environment, politics, violence, religion, and society. The chapters argue that in all these fields, there were noticeable developments during this period, marking a shift from the medieval to the early modern. The introductory chapter contextualizes this by analysing the politics of periodization in history-writing across the world. It discusses the meanings of the relatively new concept of early modernity and the implications of its use for how we understand historical change and continuity in South Asia.

### A History Shared and Divided

By and large, the histories of East and West Germany have been studied in relative isolation. And yet, for all their differences, the historical trajectories of both nations were interrelated in complex ways, shaped by economic crises, social and cultural changes, protest movements, and other phenomena so diffuse that they could hardly be contained by the Iron Curtain. Accordingly, A History Shared and Divided offers a collective portrait of the two Germanies that is both broad and deep. It brings together comprehensive thematic surveys by specialists in social history, media, education, the environment, and similar topics to assemble a monumental account of both nations from the crises of the 1970s to—and beyond—the reunification era.

### Overcome by Modernity

In the decades between the two World Wars, Japan made a dramatic entry into the modern age, expanding its capital industries and urbanizing so quickly as to rival many long-standing Western industrial societies. How the Japanese made sense of the sudden transformation and the subsequent rise of mass culture is the focus of Harry Harootunian's fascinating inquiry into the problems of modernity. Here he examines the work of a generation of Japanese intellectuals who, like their European counterparts, saw modernity as a spectacle of ceaseless change that uprooted the dominant historical culture from its fixed values and substituted a culture based on fantasy and desire. Harootunian not only explains why the Japanese valued philosophical understandings of these events, often over sociological or empirical explanations, but also locates Japan's experience of modernity within a larger global process marked by both modernism and fascism. What caught the attention of Japanese thinkers was how the production of desire actually threatened historical culture. These intellectuals sought to "overcome" the materialism and consumerism associated with the West, particularly the United States. They proposed versions of a modernity rooted in cultural authenticity and aimed at infusing meaning into everyday life, whether

through art, memory, or community. Harootunian traces these ideas in the works of Yanagita Kunio, Tosaka Jun, Gonda Yasunosuke, and Kon Wajiro, among others, and relates their arguments to those of such European writers as George Simmel, Siegfried Kracauer, Walter Benjamin, and Georges Bataille. Harootunian shows that Japanese and European intellectuals shared many of the same concerns, and also stresses that neither Japan's involvement with fascism nor its late entry into the capitalist, industrial scene should cause historians to view its experience of modernity as an oddity. The author argues that strains of fascism ran throughout most every country in Europe and in many ways resulted from modernizing trends in general. This book, written by a leading scholar of modern Japan, amounts to a major reinterpretation of the nature of Japan's modernity.

### History's Disquiet

Acclaimed historian Harry Harootunian calls attention to the boundaries, real and theoretical, that compartmentalize the world around us. In one of the first works to explore on equal footing European and Japanese conceptions of modernity—as imagined in the writings of Georg Simmel and Walter Benjamin, as well as ethnologist Yanagita Kunio and Marxist philosopher Tosaka Jun—Harootunian seeks to expose the problematic nature of scholarly categories. In doing so, *History's Disquiet* presents intellectual genealogies of such orthodox notions as "field" and "modernity" and other concepts intellectuals in the East and West have used to understand the changing world around them. Contrasting reflections on everyday life in Japan and Europe, Harootunian shows how responses to capitalist society were expressed in similar ways: social critics in both regions alleged a broad sense of alienation, particularly among the middle class. However, he also points out that Japanese critics viewed modernity as a condition in which Japan—without the lengthy period of capitalist modernization that characterized Europe and America—was either "catching up" with those regions or "copying" them. As elegantly written as it is controversial, this book is both an invitation for rethinking intellectual boundaries and an invigorating affirmation that such boundaries can indeed be broken down.

### The Cambridge History of Modernism

This *Cambridge History of Modernism* identifies a coherent understanding of 'modernism' within the 'modern' period. In forty-three chapters, prominent scholars provide analytical narratives of literature, music, visual arts, architecture, philosophy, and science, extending the consideration across pan-European and transatlantic locations.

### A Cultural History of Race in the Renaissance and Early Modern Age

The past is always an interpretive act from the lens of the present. Through the lens of critical race theory, the essays collected here explore new analytical models, theoretical frameworks, and methodological approaches in attempting to reimagine the European Renaissance and early modern periods in terms of global expansion, awareness, and participation. Centering race in these periods requires that we acknowledge the people against whom social hierarchies and differential treatment were directed. This collection takes Europe as its focus, but White Europeans are not centred in it and the experiences of Black Africans, Asians, Jews and Muslims are not relegated to the margins of a shared history. Situating Europe within a global context forces the reconsideration of the violence that attends the interaction of peoples both across cultures and enmeshed within them. The less we are attentive to the cultural interactions, cross-cultural migrations and global dimensions of the late medieval and early modern periods, the less we are forced to recognize the violence, intolerance, power struggles and enforced suppressions that attend them.

### Modernism Is the Literature of Celebrity

The phenomenon of celebrity burst upon the world scene about a century ago, as movies and modern media brought exceptional, larger-than-life personalities before the masses. During the same era, modernist authors were creating works that defined high culture in our society and set aesthetics apart from the middle- and low-brow culture in which celebrity supposedly resides. To challenge this ingrained dichotomy between modernism and celebrity, Jonathan Goldman offers a provocative new reading of early twentieth-century culture and the formal experiments that constitute modernist literature's unmistakable legacy. He argues that the literary innovations of the modernists are indeed best understood as a participant in the popular phenomenon of celebrity. Presenting a persuasive argument as well as a chronicle of modernism's and celebrity's shared history, *Modernism Is the Literature of Celebrity* begins by unraveling the uncanny syncretism between Oscar Wilde's writings and

his public life. Goldman explains that Wilde, in shaping his instantly identifiable public image, provided a model for both literary and celebrity cultures in the decades that followed. In subsequent chapters, Goldman traces this lineage through two luminaries of the modernist canon, James Joyce and Gertrude Stein, before turning to the cinema of mega-star Charlie Chaplin. He investigates how celebrity and modernism intertwine in the work of two less obvious modernist subjects, Jean Rhys and John Dos Passos. Turning previous criticism on its head, Goldman demonstrates that the authorial self-fashioning particular to modernism and generated by modernist technique helps create celebrity as we now know it.

### Futures of Modernity

Global risks, mobilities and interdependencies transnationalize local life and working worlds. These processes lead to an inner globalization of societies in which worldwide constellations of »reflexive« (Ulrich Beck), »multiple« (Shmuel N. Eisenstadt), »entangled« (Shalini Randeria) and »global« (Arjun Appadurai) modernities simultaneously and immediately clash in social action: a process of cosmopolitanization in which »the global« is localized and »the local« is globalized in radical new ways. In this book, an international selection of prominent critical thinkers address this premise and provide their interpretations of imminent challenges, concomitant social dynamics and political implications. With contributions by Arjun Appadurai, Zygmunt Bauman, Ulrich Beck, Elisabeth Beck-Gernsheim, Edgar Grande, Maarten Hajer, Ronald Hitzler, Wolf Lepenies, Anna Tsing, Angela McRobbie, Bruno Latour, Ted Nordhaus & Michael Shellenberger, Hans-Georg Soeffner, Natan Sznaider, Anja Weiß and Yunxiang Yan.

### Intoxication, Modernity, and Colonialism

This book depicts how Freud's cocaine and Benjamin's hashish illustrate two critiques of modernity and two messianic emancipations through the pleasures of intoxicating discourse. Freud discovered the "libido" and "unconscious" in the industrial mimetic scheme of cocaine, whereas Benjamin found an inspiration for his critique of phantasmagoria and its variant psychoanalysis in hashish's mimesis. In addition, as part of the history of colonialism, both drugs generated two distinct colonial discourses and, consequently, two different understandings of the emancipatory powers of pleasure, the unconscious, and dreams. After all, great ideas don't liberate; they intoxicate.

### Nationhood and Politicization of History in School Textbooks

This book explores how school history textbooks are used to perpetuate nationalistic policies within divided regions. Exploring the 'divide and rule' politics across ex-Yugoslav successor states, the editors and contributors draw upon a wide range of case studies from across the region. Textbooks and other educational media provide the foundations upon which the new generation build understanding about their own context and the events that are creating their present. By promoting nationalistic politics in such media, textbooks themselves can be used as tools to further promote and preserve ongoing hostility between ethnic groups following periods of conflict. This edited collection will appeal to scholars of educational media, history education and post-conflict societies.

### Re-Imaging Modernity

This is a book about Christianity in one particular region in Kenya. It walks into churches, listens to sermons, dances to music, and interviews the people sitting in the pews, all with the aim of understanding how spiritual power enables these churches to function as agents within their contemporary society. Ecclesiastical communities in Africa draw upon divine power in order to engage in modernity-related topics. Humans are not unresponsive to global flows of meaning; they are integrative agents who fashion their world by living in it. The kind of modernity arising from these churches does not blindly follow Western forms, but flows from its own internal logic in which spiritual power occupies central hermeneutical function. Theological resources contribute to the formation of sociological expressions. Divine power pertains directly to human constructs, which then allows the churches to actively "image" God for the development of unique forms of modernity arising on the continent.

### Habitations of Modernity

In *Habitations of Modernity*, Dipesh Chakrabarty explores the complexities of modernism in India and seeks principles of humaneness grounded in everyday life that may elude grand political theories. The

questions that motivate Chakrabarty are shared by all postcolonial historians and anthropologists: How do we think about the legacy of the European Enlightenment in lands far from Europe in geography or history? How can we envision ways of being modern that speak to what is shared around the world, as well as to cultural diversity? How do we resist the tendency to justify the violence accompanying triumphalist moments of modernity? Chakrabarty pursues these issues in a series of closely linked essays, ranging from a history of the influential Indian series *Subaltern Studies* to examinations of specific cultural practices in modern India, such as the use of khadi—Gandhian style of dress—by male politicians and the politics of civic consciousness in public spaces. He concludes with considerations of the ethical dilemmas that arise when one writes on behalf of social justice projects.

#### Archaeology and Modernity

This is the first book-length study to explore the relationship between archaeology and modern thought, showing how philosophical ideas that developed in the seventeenth to nineteenth centuries still dominate our approach to the material remains of ancient societies. Addressing current debates from a new viewpoint, *Archaeology and Modernity* discusses the modern emphasis on method rather than ethics or meaning, our understanding of change in history and nature, the role of the nation-state in forming our views of the past, and contemporary notions of human individuality, the mind, and materiality.

#### Rethinking Iranian Nationalism and Modernity

While recent books have explored Arab and Turkish nationalism, the nuances of Iran have received scant book-length study—until now. Capturing the significant changes in approach that have shaped this specialization, *Rethinking Iranian Nationalism and Modernity* shares innovative research and charts new areas of analysis from an array of scholars in the field. Delving into a wide range of theoretical and conceptual perspectives, the essays—all previously unpublished—encompass social history, literary theory, postcolonial studies, and comparative analysis to address such topics as: Ethnicity in the Islamic Republic of Iran Political Islam and religious nationalism The evolution of U.S.-Iranian relations before and after the Cold War Comparing Islamic and secular nationalism(s) in Egypt and Iran The German counterrevolution and its influence on Iranian political alliances The effects of Israel's image as a Euro-American space Sufism Geocultural concepts in Azar's *Atashkadeh* Interdisciplinary in essence, the essays also draw from sociology, gender studies, and art and architecture. Posing compelling questions while challenging the conventional historiographical traditions, the authors (many of whom represent a new generation of Iranian studies scholars) give voice to a research approach that embraces the modern era's complexity while emphasizing Iranian nationalism's contested, multifaceted, and continuously transformative possibilities.

#### Sites of Modernity

This book investigates, compares and contrasts the experience of entering into and engaging in modernity and the modern era in many parts of the Asian continent. It focuses on the coming into being, development, and transformation of major urban centers from Tokyo to Mumbai from the late 19th century to the present, providing a broad overview of this crucial period of transition in Asia, not only from diverse geographical and historical perspectives, but also incorporating a broad range of further disciplines.

#### Russian Modernity

*Russian Modernity* places Imperial and Soviet Russia in a European context. Russia shared in a larger European modernity marked by increased overlap and sometimes merger of realms that had previously been treated as discrete entities: the social and the political, state and society, government and economy, and private and public. These were attributes of Soviet dictatorship, but their origins can be located in a larger European context and in the emergence of modern forms of government in Imperial Russia.

## The Modernity of Others

The most prominent story of nineteenth-century German and French Jewry has focused on Jewish adoption of liberal middle-class values. *The Modernity of Others* points to an equally powerful but largely unexplored aspect of modern Jewish history: the extent to which German and French Jews sought to become modern by criticizing the anti-modern positions of the Catholic Church. Drawing attention to the pervasiveness of anti-Catholic anticlericalism among Jewish thinkers and activists from the late eighteenth to the early twentieth century, the book turns the master narrative of Western and Central European Jewish history on its head. From the moment in which Jews began to enter the fray of modern European politics, they found that Catholicism served as a convenient foil that helped them define what it meant to be a good citizen, to practice a respectable religion, and to have a healthy family life. Throughout the long nineteenth century, myriad Jewish intellectuals, politicians, and activists employed anti-Catholic tropes wherever questions of political and national belonging were at stake: in theoretical treatises, parliamentary speeches, newspaper debates, the founding moments of the Reform movement, and campaigns against antisemitism.

## Reason and Self-Enactment in History and Politics

*Reason and Self-Enactment in History and Politics* also offers a reappraisal of basic political principles and constructs. Barnard argues for bridging differences among a plurality of truths and forming practical judgments through cultivation of a sense of situational appropriateness.

## René Girard and Secular Modernity

In *René Girard and Secular Modernity: Christ, Culture, and Crisis*, Scott Cowdell provides the first systematic interpretation of René Girard's controversial approach to secular modernity. Cowdell identifies the scope, development, and implications of Girard's thought, the centrality of Christ in Girard's thinking, and, in particular, Girard's distinctive take on the uniqueness and finality of Christ in terms of his impact on Western culture. In Girard's singular vision, according to Cowdell, secular modernity has emerged thanks to the Bible's exposure of the cathartic violence that is at the root of religious prohibitions, myths, and rituals. In the literature, the psychology, and most recently the military history of modernity, Girard discerns a consistent slide into an apocalypse that challenges modern ideas of romanticism, individualism, and progressivism. In the first three chapters, Cowdell examines the three elements of Girard's basic intellectual vision (mimesis, sacrifice, biblical hermeneutics) and brings this vision to a constructive interpretation of "secularization" and "modernity," as these terms are understood in the broadest sense today. Chapter 4 focuses on modern institutions, chiefly the nation state and the market, that function to restrain the outbreak of violence. And finally, Cowdell discusses the apocalyptic dimension of Girard's theory in relation to modern warfare and terrorism. Here, Cowdell engages with the most recent writings of Girard (particularly his *Battling to the End*) and applies them to further conversations in cultural theology, political science, and philosophy. Cowdell takes up and extends Girard's own warning concerning an alternative to a future apocalypse: "What sort of conversion must humans undergo, before it is too late?"

## Histories of Technology, the Environment and Modern Britain

*Histories of Technology, the Environment and Modern Britain* brings together historians with a wide range of interests to take a uniquely wide-lens view of how technology and the environment have been intimately and irreversibly entangled in Britain over the last 300 years. It combines, for the first time, two perspectives with much to say about Britain since the industrial revolution: the history of technology and environmental history. Technologies are modified environments, just as nature is to varying extents engineered. Furthermore, technologies and our living and non-living environment are both predominant material forms of organisation – and self-organisation – that surround and make us. Both have changed over time, in intersecting ways. Technologies discussed in the collection include bulldozers, submarine cables, automobiles, flood barriers, medical devices, museum displays and biotechnologies. Environments investigated include bogs, cities, farms, places of natural beauty and pollution, land and sea. The book explores this diversity but also offers an integrated framework for understanding these intersections.

## The First Modern Society

Intended to celebrate the 70th birthday of the distinguished historian, Lawrence Stone, these essays owe much to his influence. There are also four appreciations by friends and colleagues from Oxford and Princeton and a little-known autobiographical piece by Lawrence Stone himself.

### Imaginarities of Modernity

This book offers a new perspective on the issue of modernity through a series of interconnected essays. Drawing centrally on the works of Castoriadis, Luhmann, Heller and Lefort, and in critical discussion with Weber, Durkheim, Simmel, Adorno, Habermas and Taylor, the author argues that modernity is not only a unique historical creation but also a multiple one. With a focus on five broad themes - the problem of understanding of modernity after the decline of grand narratives; the complexity of the modern condition; politics, especially with reference to freedom and totalitarian regimes; the variety and density of modern life; and the centrality of a concept of culture to social and critical theory - John Rundell advances the view that modernity is not the outcome of an evolutionary process or historical development, but is unique and indeterminate, as are the constitutive dimensions that can be identified as 'modern'. There are, then, different modernities. A rigorous engagement with a range of prominent and contemporary social theorists, *Imaginarities of Modernity* casts new light on the significance of understanding the multidimensional character of modernity and the plurality of its forms beyond the conventional paradigms associated with only the West. As such, it will appeal to scholars of social theory, critical theory, sociology and philosophy concerned with questions of culture, politics and modernity.

### Nationalism

"Nationalism, often the scourge, always the basis of modern world politics, is spreading. In a way, all nations are willed into being. But a simple declaration, such as Grouvelle's, is not enough. As historian Liah Greenfeld shows in her new book, a sense of nation--nationalism--is the product of the complex distillation of ideas and beliefs, and the struggles over them. Greenfeld takes the reader on an intellectual journey through the origins of the concept "nation" and how national consciousness has changed over the centuries. From its emergence in sixteenth century England, nationalism has been behind nearly every significant development in world affairs over succeeding centuries, including the American and French revolutions of the late eighteenth centuries and the authoritarian communism and fascism of the twentieth century. Now it has arrived as a mass phenomenon in China as well as gaining new life in the United States and much of Europe in the guise of populism"--

### The Modern History of Universalism

Excerpt from *The Modern History of Universalism: From the Era of the Reformation to the Present Time*  
The event of the Reformation is connected with the History of Universalism, inasmuch as it was the means of setting the human mind at liberty, of encouraging the love of truth and free inquiry, and thereby of bringing many to believe in the eventual salvation of the whole world. It taught men that they possessed the right of private judgment, and exhorted them most earnestly to exercise it. It pointed out the fallibility of the Pope and the Catholic Church, exposed their errors and contradictions, and thereby destroyed, in many minds, the reverence which had been long entertained for their decisions. It gave to the people the Bible, which, by authority, they had been forbidden to use and having translated it into the vernacular tongues of many nations, it urged them to study it in consideration of their duty, their happiness, and their salvation. These advantages and this advice, seconded by the desires and the rising zeal of the people, gave a new face to religion in Europe. With the authority of the Catholic Church the Reformers renounced many of her doctrinal errors. New communities of Christians arose, distinct from her in their doctrine and discipline. ### MODERN HISTORY OF UNIVERSALISM

Excerpt from Modern History of Universalism, Vol. 1: Extending From the Epoch of the Reformation to the Present Time; Consisting of Accounts of Individuals and Sects Who Have Believed That Doctrine; Sketches, Biographical and Literary, of Authors Who Have Written Both in Favor of and Against It I have the satisfaction to lay before the public the first volume of the second edition of the Modern History of Universalism. The first edition came out in 1830, and was favorably received. It was contained in one 12mo. Volume of 450 pages, large type. From the time named until the present, I have been upon the watch for facts. But I have not done all I should have been glad to do. During the whole time, I had my paper (the Trumpet) to take care of, which was my chief concern. I should not have undertaken the writing of this work now, had I not thought there was great danger, if I did not accomplish it soon, I should never do it. I did not think that any one could take my hints, memoranda, references, &c., &c., and bring them into form. A sense of duty to write out the work kept pressing upon me. I confess I had serious doubts whether I could get through the labor, if I begun it. My health was far from being perfect, and has not been made better by my toil in the preparation of this book. It has seemed, at times, after I had begun the writing, I must abandon the design, and give up the hope of completing the work. But I have been kept along until this time and the first volume, bearing many marks of imperfection, is now before the world. I do not believe it the best that could be written, but it was the best I could write under

my circumstances. I had to do the best I could, and leave it for those who came after me to do better. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. ### The Modern History of Universalism

Will all evil finally turn to good, or does some evil remain stubbornly opposed to God and God's goodness? Will even the devil be redeemed? Addressing a theological issue of perennial interest, this comprehensive book (in two volumes) surveys the history of Christian universalism from the second to the twenty-first century and offers an interpretation of how and why universalist belief arose. The author explores what the church has taught about universal salvation and hell and critiques universalism from a biblical, philosophical, and theological standpoint. He shows that the effort to extend grace to everyone undermines the principle of grace for anyone.

### The Modern History of Universalism

Now in its second edition, Tyler Stovall's *Transnational France* takes a transnational approach to the history of modern France that draws the reader into a key aspect of France's political culture: universalism. Beginning with the French Revolution and its aftermath, Stovall traces French history right up to the present day and examines France's relations with three other areas of the world: Europe, the United States, and France's colonial empire. The book shines a light onto both French identity and the history of the world more broadly, which allows the reader to engage with French history in a much wider context. This new edition features an additional chapter on France in the twenty-first century that offers an analysis of current events and issues as seen through historical perspective. Issues addressed include anti-Semitism, Islamophobia, and the gilets jaunes, as well as the impact of Brexit, the maturation of the National Front under Marine LePen, and the administration of Emmanuel Macron. Giving a global view of France's history, this is the perfect volume for students of modern France and French history courses.

### The Modern History of Universalism, From the Era of the Reformation to the Present Time

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

### Modern History of Universalism, Vol. 1

This book aims to uncover and explore the ideas of notable people in the story of Christian universalism from the time of the Reformation until the end of the nineteenth century. It is a story that is largely unknown in both the church and the academy, and the characters that populate it have for the most part passed into obscurity. With carefully located bore holes drilled to release the long-hidden theologies of key people and texts, the volume seeks to display and historically situate the roots, shapes, and diversity of Christian universalism. Here we discover a diverse and motley crew of mystics and scholars, social prophets and end-time sectarians, evangelicals and liberals, orthodox and heretics, Calvinists and Arminians, Puritans, Pietists, and a host of others. The story crisscrosses Continental Europe, Britain, and America, and its reverberations remain with us to this day.

### Modern Universalism Exposed

Excerpt from *Universalism as It Is: Or Text Book of Modern Universalism in America* It is worthy of remark, that, though the substance of this Treatise has been before the public several months, no reply has been attempted, and all allusion to the series itself, by any of their periodicals, has been most carefully avoided, as far as possible. Ordinarily, as has been remarked, every allusion to the sect is replied to at once, and ever such reply copied again and again by their periodicals. In the present case a most ominous silence has pervaded their whole ranks. They have not ventured to deny the truth of the allegations here made, nor can they. On the other hand, when, about a year since, the author presented, from his own pulpit, in the presence of two at least of their ministers, and a large number of the members of one of their societies, the leading features of the system, as they are detailed in this volume, they took occasion to congratulate themselves, and the Universalist public, that for once an orthodox preacher had told the truth. A zealous sister in the faith who was present Universalist Union, 'V. No. Thought him deserving of a vote of thanks for introducing so much Universalism into his desk. We think so too, said the editor of the Union, 'and hope he will not be weary in well doing. Let him buckle on his whole armor. ### History of Universalism

"Volk's impressive study rethinks the East-West binary often reiterated in discussions of Japanese modernism by reinserting local aspects into the universalizing tendencies of modernism itself. The book makes an important contribution to the growing literature on modern Japanese art history by providing an alternative comparative framework for understanding the global development of modernism that decenters Euro-America. Rigorously historical in her critique, Volk destabilizes our understanding of the Japanese experience of modernity through the prism of Yorozu's singular vision of the self, leaving us questioning conventional wisdom and contented to wobble."--Gennifer Weisenfeld, Duke University  
"In Volk's affectingly stunning and deeply reflective study of the Japanese artist Yorozu TetsugorM's work between 1910-1930, we have a profoundly historical reminder of how modernism everywhere struggled to meet the demands of the new with the readymades of received artistic practices. In this study of Yorozu's utopian universalist project, Volk has imaginatively broadened our understanding of the modernist moment and perceptively captured its global program to unify art and life, contemporary culture and history."--Harry Harootunian, author of *Overcome by Modernity: History, Culture and Community in Interwar Japan*

### Transnational France

This book contains Three books against Universalism. This doctrine became widely spread in the mid 1700s from America to England. So it became necessary to refute it. The *Doctrine of Universal Salvation Examined and Refuted* By Isaac Backus (1782) and *UNIVERSALISM: A Modern Invention, and Not According to Godliness* By Andrew Royce (1839) and *A Series of Letters to a Universalist*, by Philemon R. Russell, Pastor of the Christian Church in Fall River, Mass. (1842) Their response to the doctrine was first with sermons, then replied to by the universalist teachers, then their reply was also refuted by both of these books. Here is the first paragraph of Book One: SOLOMON, after a vast and extensive search into the nature of things, says, "this only have I found, that God made man upright; but they have sought out many inventions." How many he could not tell, nor any other man. Had the inhabitants of New-England been told, ten years ago, that said doctrine would soon be preached up, and have an extensive spread among them, who could have believed it? Yet this is now become a notorious fact, by the following means: Mr. John Murray, from England, having preached for some time in places south of New-York, came from thence into New-England in the fall of the year 1772; and has preached in these parts to the present time. For a while he concealed his design under many good words and fair speeches; and when he began plainly to preach general salvation, his greatest admirers rather wished than believed the doctrine to be true. At length they procured the re-printing

of a pamphlet from London, in 1779, which was privately dispersed in the country, and has entangled many souls. Since which Mr. Elhanan Winchester, who was born near Boston, and, by his itinerate preaching from thence to South-Carolina, had obtained an extensive fame for being a powerful and successful preacher of the gospel, has fallen in with said doctrine, under another form, which has caused its influence to extend much farther than it had before. And its advocates now glory in it as unanswerable, because a distinct answer thereto has not appeared among us. A sight of this, and not hearing that any others were engaged therein, has constrained me to offer my mite in the affair; hoping that it may encourage and excite others to step forward in the cause of truth to better purpose. Here is the first paragraph of Book Two: The history of the following work is briefly as follows: In the summer of 1837, I prepared and preached to my people two discourses, in which I attempted to prove that Universalism is entirely a modern invention, and in its tendencies entirely opposed to godliness. These discourses, by the unanimous advice of the Association to which I belong, were, in the summer of 1838, given to the public. Their favorable reception, the advice of several prudent and enlightened men, together with the necessity of publishing something in reply to certain "Reviews" by Universalists, have induced me to publish another edition in the present form-a form in which it was thought they would be more acceptable to readers in general. The Second Part, it will be seen, consists of an examination of certain reviews of the First. The First Part is, in substance, the same as when originally published. A few paragraphs, with some notes, have been added: two or three which were deemed unnecessary, have been expunged, and such other revision made as criticism required. Here is the Preface to Book 3: This series of Letters was first published in the Christian Herald. They are now presented to the Christian Public, in the present form, in compliance with the request of the Rockingham Christian Conference. This little volume is designed to be an antidote for the diffusive poison of Modern Universalism. The author professes to be thoroughly acquainted with this whole system of error. The folly, absurdity and infidelity of Modern Universalism, the sophistry and outrage

#### Universalism as It Is; Or, Text Book of Modern Universalism in America

The book provides a complete overview of Unitarian and Universalist history all over the world. While the emphasis is on North America, many listings provide an adequate background for the development of the Unitarian faith in Europe as far back as the 16th century. Other parts of the world are included as well with biographical, theological and geographical listings. Most of the book consists of alphabetical listings of all major leaders of the movements, many famous person associated with the movement, important events, and histories of institutions.
