The Wild Muir

Here is an entertaining collection of John Muir's most exciting adventures, representing some of his finest writing. From the famous avalanche ride off the rim of Yosemite Valley to his night spent weathering a windstorm at the top of a tree to death-defying falls on Alaskan glaciers, the renowned outdoorsman's exploits are related in passages that are by turns exhilarating, unnerving, dizzying, and outrageous.

Meditations of John Muir

Editor Chris Highland pairs 60 insightful Muir quotes with selections from other celebrated thinkers and spiritual texts. Take this pocket-size guide with you on backpacks, nature hikes, and camping trips.

Our National Parks

John Muir (1838–1914) ranks among America's most important and influential environmentalists and nature writers. Devoted to the preservation of wilderness areas, Muir founded the Sierra Club and was active in the establishment of Yosemite National Park. *Our National Parks*, originally published in 1901, includes ten articles that previously appeared in *The Atlantic Monthly*. Muir wrote them in hopes of exciting interest in the parks, certain that visitors would fall in love with the scenic grandeur as he had—and that their enthusiasm would ensure the parks' preservation. Six of this volume's ten chapters are devoted to Muir's beloved Yosemite, exploring the forests, fountains, streams, and animals of the Sierra Nevada. The great naturalist also visits the meadows, geysers, waterfalls, and lakes of other parks, including Yellowstone, Sequoia, and General Grant. Muir's warmth and humor brighten every page, and vintage photographs provide atmospheric accompaniment to his words. These essays are essential reading for anyone wishing to visit (or revisit) the national parks of the Western United States as well as those who want to help protect America's wilderness areas.

Books In Print 2004-2005

"I am now writing up some notes, but when they will be ready for publication I do not know... It will be a long time before anything is arranged in book form." These words of John Muir, written in June 1912 to a friend, proved prophetic. The journals and notes to which the great naturalist and environmental figure was referring have languished, unpublished and virtually untouched, for nearly a century. Until now. Here edited and published for the first time, John Muir's travel journals from 1911-12, along with his associated correspondence, finally allow us to read in his own words the remarkable story of John Muir's last great journey. Leaving from Brooklyn, New York, in August 1911, John Muir, at the age of seventy-three and traveling alone, embarked on an eight-month, 40,000-mile voyage to South America and Africa. The 1911-12 journals and correspondence reproduced in this volume allow us to travel with him up the great Amazon, into the jungles of southern Brazil, to snowline in the Andes, through southern and central Africa to the headwaters of the Nile, and across six oceans and seas in order to reach the rare forests he had so long wished to study. Although this epic journey has received almost no attention from the many commentators on Muir's work, Muir himself considered it among the most important of his life and the fulfillment of a decades-long dream. *John Muir's Last Journey* provides a rare glimpse of a Muir whose interests as a naturalist, traveler, and conservationist extended well beyond the mountains of California. It also helps us to see John Muir as a different kind of hero, one whose endurance and intellectual curiosity carried him into far fields of adventure even as he aged, and as a private person and family man with genuine affections, ambitions, and fears, not just an iconic representative of American wilderness. With an introduction that sets Muir's trip in the context of his life and work, along with chapter introductions and a wealth of explanatory notes, the book adds important dimensions to our appreciation of one of America's greatest environmentalists. *John Muir's Last Journey* is a must reading for students and scholars of environmental history, American literature, natural history, and related fields, as well as for naturalists and armchair travelers everywhere.

John Muir's Last Journey

Here is the adventure that started John Muir on a lifetime of discovery. Taken from his earliest journals, this book records Muir's walk in 1867 from Indiana across Kentucky, Tennessee, North Carolina, Georgia, and Florida to the Gulf Coast. In his distinct and wonderful style, Muir shows us the wilderness, as well as the towns and people, of the South immediately after the Civil War

A Thousand-Mile Walk to the Gulf

John Muir is regarded as the 'father of America's national parks' and is a towering figure in the history of that country's involvement with ecology. Born into a harsh home in Dunbar, Scotland he would often escape to revel in the birds and wildlife of the area. When his father suddenly uprooted the family and moved to the United States, the oppression he associated with his childhood continued - and so did his involvement with the natural world. Despite the difficulty of his formative years Muir grew up to be a man of great joy - first an inventor and then an explorer, he found his haven in the mountains of Sierra Nevada. He was a fascinating character: on the one hand a recluse, who sought solitude, and on the other a passionate activist, determined to save the places he loved. A strong believer in both God and the essential goodness of humanity, he was the founder and first president of the Sierra Club.

This wonderful memoir pays tribute to a giant of ecology and is essential reading for lovers of natural history.

The Mountains of California

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

John Muir

Although Sierra Club founder and important early environmentalist John Muir was born in Scotland, he spent much of his life traipsing through the wonders of the American wilderness -- and fighting to protect what he regarded as the country's greatest resource. This engaging autobiography tells the tale of how Muir made his way to the United States to find his true calling.

Backpacker

'102 missions that challenge you to (re)discover our world. Become a guerrilla explorer and extreme missionary with missions that defy gravity, see the invisible and test your mental agility. Each illustrated mission will challenge you in daring new ways. Draw, rub, smear, write, scrape and print your findings and achievements as you complete each mission. (Back cover)

The Story of my Boyhood and Youth

The new edition of this Sierra classic has been completely updated, and meticulously describes the entire trail. The book includes GPS coordinates for every junction, has separate descriptions for northbound and southbound hikers, and shows elevations and distance.

Mission Explore

Gathered from John Muir's own writings, this fascinating compilation recounts his historic, first walk from the San Francisco bay to Yosemite.

Outdoor Highlights

Caldecott medalist Mordicai Gerstein captures the majestic redwoods of Yosemite in this little-known but important story from our nation's history. In 1903, President Theodore Roosevelt joined naturalist John Muir on a trip to Yosemite. Camping by themselves in the uncharted woods, the two men saw sights and held discussions that would ultimately lead to the establishment of our National Parks.

John Muir Trail

The name of John Muir has come to stand for the protection of wild land and wilderness in both America and Britain. Born in Dunbar in the east of Scotland in 1838, Muir is famed as the father of American conservation, and as the first person to promote the idea of National Parks. Combining acute observation with a sense of inner discovery, Muir's writings of his travels through some of the greatest landscapes on Earth, including the Carolinas, Florida, Alaska and those lands which were to become the great National Parks of Yosemite and the Sierra Valley, raise an awareness of nature to a spiritual dimension. These journals provide a unique marriage of scientific survey of natural history with lyrical and often amusing anecdotes, retaining a freshness, intensity and brutal honesty which will amaze the modern reader. This collection, including the never-before-published Stickeen, presents the finest of Muir's writings, and imparts a rounded portrait of a man whose generosity, passion, discipline and vision are an inspiration to this day.

Better Homes and Gardens

Considered one of the patron saints of twentieth-century environmental activity, John Muir's appeal to modern readers is that he not only explored the American West but also fought for its preservation. Travels in Alaska is part of a series that celebrates the tradition of literary naturalists—writers who

embrace the natural world. In this collection, originally published in 1915, John Muir captures the beauty and intensity of Alaskan wilderness and its people from his travels between 1879 and 1890. John Muir's strength lies in delicately mapping the intimate connection between the person and natural world, and awakening his readers to that reality. With an increasing global focus on the environment, and humans' role in protecting it, there's never been a finer time to reacquaint oneself with John Muir's writings. John Muir was a Scottish-born American naturalist, author, early advocate of preservation of wilderness in the United States, and founder of The Sierra Club. His letters, essays, and books of his adventures in nature have been read by millions.

Anywhere That Is Wild

Reproduction of the original: Letters to a Friend by John Muir

The Camping Trip that Changed America

My First Summer in the Sierra describes two years period of Muir's life during which he lived in a cabin in Californian mountains. When he came to California and finally settled in San Francisco, John Muir immediately left for a visit to Yosemite, a place he had only read about. Seeing it for the first time, Muir noted that "He was overwhelmed by the landscape, scrambling down steep cliff faces to get a closer look at the waterfalls, whooping and howling at the vistas, jumping tirelessly from flower to flower." He climbed a number of mountains, including Cathedral Peak and Mount Dana, and hiked the old Indian trail down Bloody Canyon to Mono Lake.

Illinois Outdoor Highlights

THE OFFICIAL NORTH AMERICAN EDITION "Beguiling, audacious... rises to its own challenges in engaging intellectually as well as wholeheartedly with its questions about gender, genre and the concept of wilderness. The novel displays wide reading, clever writing and amusing dialogue." —The Guardian This is a new kind of nature writing — one that crosses fiction with science writing and puts gender politics at the center of the landscape. Erin, a 19-year-old girl from middle England, is travelling to Alaska on a journey that takes her through Iceland, Greenland, and across Canada. She is making a documentary about how men are allowed to express this kind of individualism and personal freedom more than women are, based on masculinist ideas of survivalism and the shunning of society: the "Mountain Man." She plans to culminate her journey with an experiment: living in a cabin in the Alaskan wilderness, à la Thoreau, to explore it from a feminist perspective. The book is a fictional time capsule curated by Erin, comprising of personal narrative, fact, anecdote, images and maps, on subjects as diverse as The Golden Records, Voyager 1, the moon landings, the appropriation of Native land and culture, Rachel Carson, The Order of The Dolphin, The Doomsday Clock, Ted Kaczynski, Valentina Tereshkova, Jack London, Thoreau, Darwin, Nuclear war, The Letters of Last Resort and the pill, amongst many other topics. "Refreshingly outward-looking in a literary culture that turns ever inward to the self, although it still has profound moments of introspection. Uplifting, with a thirsty curiosity, the writing is playful and exuberant. Riffing on feminist ideas but unlimited in scope, Andrews focuses our attention on our beautiful, doomed planet, and the astonishing things we have yet to discover." —Ruth McKee, The Irish Times

The Academy and Literature

The papers brought together in this volume have, in a general way, been arranged in chronological sequence. They span a period of twenty-nine years of Muir's life, during which they appeared as letters and articles, for the most part in publications of limited and local circulation. The Utah and Nevada sketches, and the two San Gabriel papers, were contributed, in the form of letters, to the San Francisco

Evening Bulletin toward the end of the seventies. Written in the field, they preserve the freshness of the author's first impressions of those regions.

The academy

Renowned naturalist John Muir is widely credited as being one of the important early figures in the conservation movement. In this series of essays, Muir introduces readers to the wonders of the majestic Yosemite region, a place he visited as soon as he arrived in America in 1868. The beauty of the area's mountains, lakes, and vistas inspired Muir to devote himself to nature and its preservation.

Travels in Alaska

"In this remarkable journey, Mark Woods captures the essence of our National Parks: their serenity and majesty, complexity and vitality--and their power to heal." --Ken Burns Many childhood summers, Mark Woods piled into a station wagon with his parents and two sisters and headed to America's national parks. Mark's most vivid childhood memories are set against a backdrop of mountains, woods, and fireflies in places like Redwood, Yosemite, and Grand Canyon national parks. On the eve of turning fifty and a little burned-out, Mark decided to reconnect with the great outdoors. He'd spend a year visiting the national parks. He planned to take his mother to a park she'd not yet visited and to re-create his childhood trips with his wife and their iPad-generation daughter. But then the unthinkable happened: his mother was diagnosed with cancer, given just months to live. Mark had initially intended to write a book about the future of the national parks, but *Lassoing the Sun* grew into something more: a book about family, the parks, the legacies we inherit and the ones we leave behind.

The Saturday Review of Politics, Literature, Science and Art

Imagine a U.S. president on a camping trip! It seems unlikely today, but in May 1903, President Theodore Roosevelt dismissed his Secret Service men to go camping with John Muir, the world-famous naturalist. For three glorious nights and four days in California's Yosemite National Park, the two men talked about birds, giant sequoia trees, glaciers, as well as the importance of preserving wilderness for future generations. They slept under the stars, built blazing campfires, and enjoyed the beauty and the uniqueness of the area. Setting aside new national parks and monuments became one of the cornerstones of Roosevelt's presidency and was a direct result of this camping trip. Author Ginger Wadsworth and illustrator Karen Dugan carefully researched this true story, relying on primary documents and working closely with experts in the field.

Letters to a Friend

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

My First Summer in the Sierra (Illustrated Edition)

In 1995 the National Trust for Scotland acquired Mar Lodge Estate in the heart of the Cairngorms. Home to over 5,000 species, this vast expanse of Caledonian woodlands, subarctic mountains, bogs, moors, roaring burns and frozen lochs could be a place where environmental conservation and Highland field sports would exist in harmony. The only problem was that due to centuries of abuse by human hands, the ancient Caledonian pinewoods were dying, and it would take radical measures to save them. After 25 years of extremely hard work, the pinewoods, bogs, moors and mountains are returning to their former glory. Regeneration is the story of this success, featuring not only the people who are protecting the land and quietly working to undo the wrongs of the past, but also the myriad creatures which inspire them to do so. In addition, it also tackles current controversies such as raptor persecution, deer

management and rewilding and asks bigger questions about the nature of conservation itself: what do we see when we look at our wild places? What should we see?
