installing a split air conditioner system
the wall mount
measure the distance between the holes of the wall
use a five millimeter masonry drill with a bosch hammer
prepare to drill the 65 millimeter hole in the wall
use a long masonry drill to pre-drill
start making the hole little by little
making sure the inner and outer holes are matching
connect all cables and wires to the indoor units
lay all the cables out
connecting the coolant lines to the inside unit
tighten the connections with the adapter and the torque
secure the insulation
hang the unit on the wall bracket plate
use some insulating foam
attached properly onto the wall the first 90 degree elbow
push the pipes over the bundle one after the other
cut a hole in the pipe
mark the holes for the bracket
put the outer unit on the bracket
run a separate wire from the house fuse box
close the wire terminal and the wall cord cover
hold the entire connector on the unit with a wrench
press onto the valve with a little piece of wire
turn the valve open
turn on the power with the separate fuse

How to refill air conditioner by R22 (video 32) - How to refill air conditioner by R22 (video 32) by Dahren Zana 5,176,559 views 6 years ago 8 minutes, 6 seconds - How to refill **air conditioner**, by R22.

Air conditioner (split)

Connect the blue here

Then connect the yellow hose

Close the red valve and open the blue valve

Now turn on the vacuum motor

Now connect yellow hose to the bottle

To expel the air in the yellow hose

Open the bottle gas (R22)

When the compressor starts then open the valve

Every 30 to 40 close the valve and open it

Then open the cover

This is the valve and this is the wires valve

Get out this wire from capacitor (after the compressor start)

the valve return to cool mode then you can start to put gas (R22)

I used refrigerator motor to put high pressure air to find the leak

started by hanging the drywall in the guest bedroom

removed the mounting bracket from the back of the unit

set the unit on top of the mounting bracket

drill a three and a half inch hole through the top

wrap both of these connections with the sound deadening pads

connect the included drainage hose to the drainage hose

added fire foam to all these penetrations through the top plates

get the line sets run to the outdoor unit

install the plastic sleeve

wired up the outdoor unit to my panel

open the refrigerant

run that communication wire into the little box on the outdoor unit

running in the cooling mode and heating mode at their maximum

tucked up some of the other line sets under the house

installing a split air conditioner system

the wall mount

measure the distance between the holes of the wall

use a five millimeter masonry drill with a bosch hammer

prepare to drill the 65 millimeter hole in the wall

use a long masonry drill to pre-drill

start making the hole little by little

making sure the inner and outer holes are matching

connect all cables and wires to the indoor units

lay all the cables out

connecting the coolant lines to the inside unit

tighten the connections with the adapter and the torque

secure the insulation

hang the unit on the wall bracket plate

use some insulating foam

attached properly onto the wall the first 90 degree elbow
push the pipes over the bundle one after the other
cut a hole in the pipe
mark the holes for the bracket
put the outer unit on the bracket
run a separate wire from the house fuse box
close the wire terminal and the wall cord cover
hold the entire connector on the unit with a wrench
press onto the valve with a little piece of wire
turn the valve open

turn on the power with the separate fuse
