A "hair-raising . . . devilishly complicated mystery" from the Scottish crime master. "Don't even try to guess the outcome" (The New York Times Book Review). Diana Jager is clever, strong, and successful, a skilled surgeon and fierce campaigner via her blog about sexism in medicine. Yet it takes only hours for her life to crumble when her personal details are released on the internet as revenge for her writing. Then Diana meets Peter. He is kind, generous, and knows nothing about her past—the second

chance she's been waiting for. Within six months, they are married. Within six more, Peter is dead in a road accident, a nightmare end to their fairy-tale romance. But Peter's sister doesn't believe in fairy tales, and tasks rogue reporter Jack Parlabane with discovering the dark truth behind the woman the media is calling the Black Widow. Still on the mend from a turbulent divorce, Jack's investigation into matters of the heart takes him to hidden places no one should ever have to go. Winner of the 2017 Theakson Old Peculier Crime Novel of the Year Award and the 2016 McIlvanney Prize for Scottish Crime Book of the Year "Brookmyre excels at melding the true chills of a psychological thriller with rollicking—if dark—humor. A witty and wild page-turner, Black Widow shines in showcasing this winning combination." —The Boston Globe "Exceptionally good—a knotty mystery that's . . . one of the most perceptive excavations of a dysfunctional marriage I can remember reading." —The Guardian (UK) "A tense and provocative read." —Entertainment Weekly

Avoiding Common Errors in the Emergency Department

The past twenty years have seen a number of breakthroughs in astrophysics and cosmology, some of which have been awarded Nobel prizes. These physics triumphs highlight the fact that while students need a solid grounding in the fundamentals of astrophysics and cosmology, sight of the basics of the fundamental interactions in physics must not be lost. This book presents papers based on lectures given at the 200th Course of the International School of Physics "Enrico Fermi", on Gravitation and Cosmology, held in Varenna, Italy, from 3 - 12 July 2017. The aim of the school was to expose students to state-of-the-art research in the field of gravitational waves and cosmology, from both a theoretical and experimental point of view. Lectures were organized in such a way as to foster interaction between the two communities, and a wide range of topics was addressed. In the gravitational waves section, topics covered include experimental issues connected with gravitational wave detection and the new field of multi-messenger astronomy, as well as more astrophysical aspects. In the section on cosmology,

there are contributions on the early universe, on the cosmic microwave background (CMB) and on redshift surveys. Other areas covered include a review of inflationary scenarios; the non-Gaussian features of primordial density fluctuations; and the physical mechanisms responsible for the spectral distortions of the blackbody spectrum of the CMB. The book provides an overview of important research developments and will be of interest to all students of gravitation and cosmology.

An instant #1 New York Times bestseller! Pacific Rim meets The Handmaid's Tale in this blend of Chinese history and mecha science fiction for YA readers. The boys of Huaxia dream of pairing up with girls to pilot Chrysalises, giant transforming robots that can battle the mecha aliens that lurk beyond the Great Wall. It doesn't matter that the girls often die from the mental strain. When 18-year-old Zetian offers herself up as a concubine-pilot, it's to assassinate the ace male pilot responsible for her sister's death. But she gets her vengeance in a way nobody expected—she kills him through the psychic link between pilots and emerges from the cockpit unscathed. She is labeled an Iron Widow, a much-feared and much-silenced kind of female pilot who can sacrifice boys to power up Chrysalises instead. To tame her unnerving yet invaluable mental strength, she is paired up with Li Shimin, the strongest and most controversial male pilot in Huaxia. But now that Zetian has had a taste of power, she will not cower so easily. She will miss no opportunity to leverage their combined might and infamy to survive attempt after attempt on her life, until she can figure out exactly why the pilot system works in its misogynist way—and stop more girls from being sacrificed.
