Lines in the Sand - Scholar's Choice Edition

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no

entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Line in the Sand

"Dean Yates was the ideal warzone correspondent: courageous, compassionate, dedicated. After years of facing the worst, though, including the Bali bombings and the Boxing Day tsunami, one final incident undid him. In July 2007, two of his staff members were brutally gunned down by an American helicopter in Iraq. What followed was an unravelling of everything Dean thought he knew of himself. His PTSD was compounded by his moral wound - the devastation of what he thought he knew of the world and his own character and beliefs. After years of treatment, including several stints inside a psychiatric facility, Dean has reshaped his view of the true meaning of life. Here, in all its guts and glory, is that journey to a better way of being. Dean has been to the blackest heart of humanity and come out with strength and hope. *Line in the Sand* is a memoir that is going to resonate for generations to come. It tackles the most important topic of our age in an unforgettable way"--Publisher's description.

Line in the Sand

Line in the Sand details the dramatic transformation of the western U.S.-Mexico border from its creation at the end of the Mexican-American War in 1848 to the emergence of the modern boundary line in the first decades of the twentieth century. In this sweeping narrative, Rachel St. John explores how this boundary changed from a mere line on a map to a clearly marked and heavily regulated divide between the United States and Mexico. Focusing on the desert border to the west of the Rio Grande, this book explains the origins of the modern border and places the line at the center of a transnational history of expanding capitalism and state power in the late nineteenth and early twentieth centuries. Moving across local, regional, and national scales, St. John shows how government officials, Native American raiders, ranchers, railroad builders, miners, investors, immigrants, and smugglers contributed to the rise of state power on the border and developed strategies to navigate the increasingly regulated landscape. Over the border's history, the U.S. and Mexican states gradually developed an expanding array of official laws, ad hoc arrangements, government agents, and physical barriers that did not close the line, but made it a flexible barrier that restricted the movement of some people, goods, and animals without impeding others. By the 1930s, their efforts had created the foundations of the modern border control apparatus. Drawing on extensive research in U.S. and Mexican archives, *Line in the Sand* weaves together a transnational history of how an undistinguished strip of land became the significant and symbolic space of state power and national definition that we know today.

A Line in the Sand

In 1916, in the middle of the First World War, two men secretly agreed to divide the Middle East between them. Sir Mark Sykes was a visionary politician; François Georges-Picot a diplomat with a grudge. The deal they struck, which was designed to relieve tensions that threatened to engulf the Entente Cordiale, drew a line in the sand from the Mediterranean to the Persian frontier. Territory north of that stark line would go to France; land south of it, to Britain. Against the odds their pact survived the war to form the basis for the post-war division of the region into five new countries Britain and France would rule. The creation of Britain's 'mandates' of Palestine, Transjordan and Iraq, and France's in Lebanon and Syria, made the two powers uneasy neighbours for the following thirty years. Through a stellar cast of politicians, diplomats, spies and soldiers, including T. E. Lawrence, Winston Churchill and Charles de Gaulle, *A Line in the Sand* vividly tells the story of the short but crucial era when Britain and France ruled the Middle East. It explains exactly how the old antagonism between these two powers inflamed the more familiar modern rivalry between the Arabs and the Jews, and ultimately led to war between the British and the French in 1941 and between the Arabs and the Jews in 1948. In 1946, after many years of intrigue and espionage, Britain finally succeeded in ousting France from Lebanon and Syria, and hoped that, having done so, it would be able to cling on to Palestine. Using newly declassified papers from the British and French archives, James Barr brings this overlooked clandestine struggle back to life, and reveals, for the first time, the stunning way in which the French finally got their revenge.

Negotiating at an Uneven Table

In the second edition of her landmark book *Negotiating at an Uneven Table*, Phyllis Beck Kritek explores the process of resolving conflicts in situations where unacknowledged inequity influences disputes and their outcomes. Substantially revised and expanded, this new edition will help open minds and balance the negotiation process. Throughout the book, Kritek challenges traditional approaches to dealing with inequities at the negotiation table and offers alternatives for reframing the process.

Ex Auditu - Volume 16

In *The Presidential Road Show: Public Leadership in an Era of Party Polarization and Media Fragmentation*, Diane J. Heith evaluates presidential leadership by critically examining a fundamental tenet of the presidency: the national nature of the office. The fact that the entire nation votes for the office seemingly imbues the presidency with leadership opportunities that rest on appeals to the mass public. Yet, presidents earn the office not by appealing to the nation but rather by assembling a coalition of supporters, predominantly partisans. Moreover, once in office, recent presidents have had trouble controlling their message in the fragmented media environment. The combined constraints of the electoral coalition and media environment influence the nature of public leadership presidents can exercise. Using a data set containing not only speech content but also the classification of the audience, Diane J. Heith finds that rhetorical leadership is constituency driven and targets audiences differently. Comparing tone, content, and tactics of national and local speeches reveals that presidents are abandoning national strategies in favor of local leadership efforts that may be tailored to the variety of political contexts a president must confront.

Presidential Road Show

How does coding change the way we think about architecture? This question opens up an important research perspective. In this book, Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information. They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an “infinite flow” of real books. Focusing on the intersection of information technology and architectural formulation, the authors create an evolving intellectual reflection on digital architecture and computer science.

Play Among Books

This book describes the second phase of the Qinghai–Tibetan railway construction project and is the first technological book discussing the geological routing of the Qinghai–Tibetan railway project on the “roof of the world.” Based on practical experience of railway construction work, it provides a substantial number of examples with detailed descriptions and conclusions. The complex geological environment of the Qinghai–Tibetan railway as well as the selection and optimization of the route are illustrated vividly and clearly with quotes, figures, photos, and tables. Connecting Golmud and Lhasa, it has a total length of 1142 km and at the Tanggula Pass has an altitude of 5072m—higher than any other in the world. A 960 km section is on a plateau at altitudes above 4000 m, and 550 km are in the permafrost region, making it the world’s longest and highest railway in the permafrost plateau region. The book is a model for the integration of theory and practice, making it a valuable reference source for civil engineering professionals working in geological routing in permafrost plateau regions, active fault zones, meizoseismal areas, nature reserves, and regions with geohazards such as steep slopes, sand and snow drifts and geothermal hazards.

Geological Line Selection for the Qinghai-Tibet Railway Engineering

This volume contains contributions from twenty-four scholars concerning the significance and implications of the world’s borderlands in economic, political, and socio-cultural contexts. Together these essays explore the changing role of borders in a global world. Are borders increasingly irrelevant under conditions of globalization, or can a case be made to demonstrate their continuing importance at various levels of spatial activity? Situating itself within a growing border literature, *Holding the Line* argues that contemporary borders facilitate parallel processes of globalization and localization of political activity. As such, the essays adopt a holistic approach to understanding the impact of boundaries on both society and space. They demonstrate that any attempt to create a methodological and conceptual framework for the understanding of boundaries must be concerned with the process of bounding, rather than simply the means through which the physical lines of separation are delimited and demarcated. This approach renders the notion of a “borderless world” highly problematic, because

the latter ignores the important and ongoing relationship between the functional role of borders in the bounding process, and the symbolic role of borders as imagined social, political, and economic constructions embedded within a geographical text. The changing characteristics of political boundaries during an era of globalization has become a great focus of interdisciplinary study, and this book will appeal to scholars of political geography, border studies, and international relations.

Holding the Line

Changing our minds isn't easy. Even when we recognize our views are disputed by intelligent and informed people, we rarely doubt our rightness. Why is this so? How can we become more open-minded, putting ourselves in a better position to tolerate conflict, advance collective inquiry, and learn from differing perspectives in a complex world? Nathan Ballantyne defends the indispensable role of epistemology in tackling these issues. For early modern philosophers, the point of reflecting on inquiry was to understand how our beliefs are often distorted by prejudice and self-interest, and to improve the foundations of human knowledge. Ballantyne seeks to recover and modernize this classical tradition by vigorously defending an interdisciplinary approach to epistemology, blending philosophical theorizing with insights from the social and cognitive sciences. Many of us need tools to help us think more circumspectly about our controversial views. Ballantyne develops a method for distinguishing between our reasonable and unreasonable opinions, in light of evidence about bias, information overload, and rival experts. This method guides us to greater intellectual openness--in the spirit of skeptics from Socrates to Montaigne to Bertrand Russell--making us more inclined to admit that sometimes we don't have the right answers. With vibrant prose and fascinating examples from science and history, Ballantyne shows how epistemology can help us know our limits.

HNAI Medals and Tokens Long Beach Auction Catalog #1100

Multi-owned properties make up an ever-increasing proportion of commercial, tourist and residential development, in both urban and rural landscapes around the world. This book critically analyses the legal, social and economic complexities of strata or community title schemes. At a time when countries such as Australia and the United States turn ever larger areas into strata title/condominiums and community title/homeowner associations, this book shows how governments, the judiciary and citizens need to better understand the ramifications of these private communities. Whilst most strata title analysis has been technical, focusing on specific sections of legislation, this book provides higher level analysis, discussing the wider economic, social and political implications of Australia's strata and community title law. In particular, the book argues that private by-laws, however desirable to initial parties, are often economically inefficient and socially regressive when enforced against an ever-changing group of owners. The book will be of particular interest to scholars and legal practitioners of property law in Australia, but as the Australian strata title model has formed the basis for legislation in many countries, the book draws out lessons and analysis that will be of use to those studying privately-owned communities across the world.

Knowing Our Limits

The International Politics of Logos provides the first systematic analysis of logos and the role they play in international politics. Whilst there is growing scholarly interest in visual politics, logos have largely remained hidden in plain sight despite being the most important symbol of a variety of organizations. Visual artefacts, such as logos, play an increasingly central role in politics. Candidates running for office carefully choose the images they share on social media, political parties devise effective brands, and NGOs use visual artefacts for advocacy and advertisement. Visual artefacts are also vital for violent non-state actors, ranging from private military and security companies (PMSCs) to terrorists. This book provides a wealth of data on the logos chosen by a variety of organizations, examining how they vary between actors, across types of organizations, and over time. It offers methodological innovations to the study of logos and visual politics, highlighting the potential of combining quantitative and qualitative methodologies to study the colours, symbols, and types of logos and other visual artefacts. The book examines the role of colours as cues and the causal connection between chromatic choices and ideology, the influence of socialization and norm diffusion dynamics in the choice to showcase (or scrap) specific symbols, and the relationship between branding decisions and the structure and strategies of specific organizations. This book will appeal to students and scholars of visual politics and visual communication, as well as those researching political parties, PMSCs, and terrorist groups. It will also be of interest to political, security, and marketing professionals.

Strata Title Property Rights

Is travel inherently beneficial to human character? Does it automatically educate and enlighten while also promoting tolerance, peace, and understanding? In this challenging book, Dean MacCannell identifies and overcomes common obstacles to ethical sightseeing. Through his unique combination of personal observation and in-depth scholarship, MacCannell ventures into specific tourist destinations and attractions: "picturesque" rural and natural landscapes, "hip" urban scenes, historic locations of tragic events, Disney theme parks, beaches, and travel poster ideals. He shows how strategies intended to attract tourists carry unintended consequences when they migrate to other domains of life and reappear as "staged authenticity." Demonstrating each act of sightseeing as an ethical test, the book shows how tourists can realize the productive potential of their travel desires, penetrate the collective unconscious, and gain character, insight, and connection to the world.

The International Politics of Logos

"What Nature Suffers to Groe" explores the mutually transforming relationship between environment and human culture on the Georgia coastal plain between 1680 and 1920. Each of the successive communities on the coast--the philanthropic and imperialistic experiment of the Georgia Trustees, the plantation culture of rice and sea island cotton planters and their slaves, and the postbellum society of wage-earning freedmen, lumbermen, vacationing industrialists, truck farmers, river engineers, and New South promoters--developed unique relationships with the environment, which in turn created unique landscapes. The core landscape of this long history was the plantation landscape, which persisted long after its economic foundation had begun to erode. The heart of this study examines the connection between power relations and different perceptions and uses of the environment by masters and slaves on lowcountry plantations--and how these differing habits of land use created different but interlocking landscapes. Nature also has agency in this story; some landscapes worked and some did not. Mart A. Stewart argues that the creation of both individual and collective livelihoods was the consequence not only of economic and social interactions but also of changing environmental ones, and that even the best adaptations required constant negotiation between culture and nature. In response to a question of perennial interest to historians of the South, Stewart also argues that a "sense of place" grew out of these negotiations and that, at least on the coastal plain, the "South" as a place changed in meaning several times.

The Ethics of Sightseeing

GOOD AND EVIL... She defeated a demon and imprisoned a mad druid in a crystal serpent's egg. She changed the course of history, and never doubted which side she was on. Now the rules have changed. In the shifting landscapes Celts call the otherworld, friends may be foes, good deeds yield evil results, and childhood fantasies become adult nightmares. Braving pillaging Vikings on the Loire, battling a crazy sorcerer in the Broceliande forest, and confronting the nine Gallicenae, druidesses who rule the Isle of the Dead, the only friend Pierrette can trust may be the Evil one himself, the Eater of Gods. And now the last battle looms, a battle in which Pierrette, she who would save the Past and the Future, can trust no one and nothing, not even the devil she thought she knew. At the publisher's request, this title is sold without DRM (Digital Rights Management). [The Sacred Pool, first of Pierrette's adventures is] "Immensely readable and elegantly simple in execution . . . this vivid reimagining of Western humanity's turbid adolescence engages, enchants and enthralls." ¾Publishers Weekly [starred review] "[Simply Human is] highly entertaining and full of action ... a divertingly strange future, one that should appeal equally to fans of sf and fantasy adventure." ¾Locus

What Nature Suffers to Groe

American historians such as Frederick Jackson Turner have argued that the West has been the region that most clearly defines American democracy and the national ethos. Throughout the twentieth century, the "frontier thesis" influenced film and television producers who used the West as a backdrop for an array of dramatic explorations of America's history and the evolution of its culture and values. The common themes found in Westerns distinguish the genre as a quintessentially American form of dramatic art. In Hollywood's West, Peter C. Rollins, John E. O'Connor, and the nation's leading film scholars analyze popular conceptions of the frontier as a fundamental element of American history and culture. This volume examines classic Western films and programs that span nearly a century, from Cimarron (1931) to Turner Network Television's recent made-for-TV movies. Many of the films discussed here are considered among the greatest cinematic landmarks of all time. The essays highlight the ways in which Westerns have both shaped and reflected the dominant social and

political concerns of their respective eras. While Cimarron challenged audiences with an innovative, complex narrative, other Westerns of the early sound era such as *The Great Meadow* (1931) frequently presented nostalgic visions of a simpler frontier era as a temporary diversion from the hardships of the Great Depression. Westerns of the 1950s reveal the profound uncertainty cast by the cold war, whereas later Westerns display heightened violence and cynicism, products of a society marred by wars, assassinations, riots, and political scandals. The volume concludes with a comprehensive filmography and an informative bibliography of scholarly writings on the Western genre. This collection will prove useful to film scholars, historians, and both devoted and casual fans of the Western genre. *Hollywood's West* makes a significant contribution to the understanding of both the historic American frontier and its innumerable popular representations.

The Isle Beyond Time

This book describes strategic culture and its value as a methodological approach to the study of International Relations. In particular, the book uses strategic culture to illuminate a number of case studies on countries that have made decisions regarding the acquisition, proliferation or use of weapons of mass destruction.

Hollywood's West

The absence of effective government, one of the most important issues in current international law, became prominent with the failed state concept at the beginning of the 1990s. Public international law, however, lacked sufficient legal means to deal with the phenomenon. Neither attempts at state reconstruction in countries such as Afghanistan and Somalia on the legal basis of Chapter VII of the UN Charter nor economic liberalisation have addressed fundamental social and economic problems. This work investigates the weaknesses of the failed state paradigm as a long-term solution for international peace and security, arguing that the solution to the absence of effective government can be found only in an economic and social approach and a true universalisation of international law.

Strategic Culture and Weapons of Mass Destruction

A longtime CNN columnist astutely combines history and global politics to help us better understanding the exploding number of military, political, and diplomatic crises around the globe. The riveting and illuminating behind-the-scenes stories of the world's most intense "red lines," from diplomatic and military challenges at particular turning points in history to the ones that set the tone of geopolitics today. Whether it was the red line in Munich that led to the start of the Second World War, to the red lines in the South China Sea, the Korean Peninsula, Syria and the Middle East. As we traverse the globe, Andelman uses original documentary research, previously classified material, and interviews with key players, to help us understand the growth, the successes and frequent failures that have shaped our world today. Andelman provides not just vivid historical context, but a political anatomy of these red lines. How might their failures be prevented going forward? When and how can such lines in the sand help preserve peace rather than tempt conflict? *A Red Line in the Sand* is a vital examination of our present and the future—where does diplomacy end and war begin? It is an object lesson of tantamount importance to every leader, diplomat, citizen, and voter. As America establishes more red lines than it has pledged to defend, every American should understand the volatile atmosphere and the existential stakes of the red web that encompasses the globe.

The Fragility of the 'Failed State' Paradigm

A Hundred Flowers Blossoming is a collection of literary essays written by faculty members of Xi'an International Studies University, China with two distinctive features. The first one is a Chinese perspective on Western literary works, which is normally not found in the scholarship in the West. The second is the feministic stance demonstrated in most articles, as most of the contributors are female. There are four parts in this collection. Part One is titled 'A Room of Her Own' and shows the feminist approach to literary works. Part Two is titled 'Through the Chinese Lens,' as it presents a Chinese perspective in the analysis of the literary works. 'Form Is Meaning' is the title of Part Three, which approaches literary works from a structuralist perspective. Part Four includes two articles: one exploring the theme of death in Joyce's *Dubliners* and the other reexamining the images of Faulkner's *Trio of Hunting Tales*.

A Red Line in the Sand

With the intrigue of a psychological thriller, *The Stranger*—Camus's masterpiece—gives us the story of an ordinary man unwittingly drawn into a senseless murder on an Algerian beach. With an Introduction by Peter Dunwoodie; translated by Matthew Ward. Behind the subterfuge, Camus explores what he termed "the nakedness of man faced with the absurd" and describes the condition of reckless alienation and spiritual exhaustion that characterized so much of twentieth-century life. "The Stranger is a strikingly modern text and Matthew Ward's translation will enable readers to appreciate why Camus's stoical anti-hero and -devious narrator remains one of the key expressions of a postwar Western malaise, and one of the cleverest exponents of a literature of ambiguity."—from the Introduction by Peter Dunwoodie First published in 1946; now in translation by Matthew Ward

A Hundred Flowers Blossoming

Five Works presents a much broader look at the American artist's oeuvre than its name suggests. This first major exhibition of Jonas's work in a New York museum includes a selection of the artist's works in installation and video, drawings, photographs and sketchbooks. Curated by Valerie Smith, QMA Director of Exhibitions, the show brings together five key works (aha) from Jonas's career including *Organic Honey's Visual Telepathy*, *Organic Honey: Vertical Roll* (1972-1994), *The Juniper Tree* (1976-1978), *Volcano Saga* (1985-1994), *Revolted by the Thought of Known Places...* (1992-2003), and *Lines in the Sand* (2002) . Also included are her portable *My New Theater* series (1997-1999), drawings and sketches. All of the works in the exhibition are presented in color and this catalogue which also includes an interview with Jonas and poet/scholars Susan Howe and Jeanne Heuving.

The Stranger

What happens when global systems are viewed from an Indigenous perspective? How does it affect the way we see history, money, power and learning? Could it change the world?

Excel Revise in a Month Years 4-5 Opportunity Class Scholarship Tests: includes an introduction to the NSW Opportunity Class Placement Class and the Primary Scholarship Program (PSP) Test covers the essential areas of these tests: reading comprehension, general ability, maths and, for the PSP, writing provides a balanced four-day-a-week program that tells your child exactly what to study on each day provides a variety of exercises, real test practice, sample Opportunity Class and Scholarship test papers includes fully explained answers to all questions. Excel Revise in a Month Years 4-5 Opportunity Class Scholarship Tests will help your child revise for success with the following features: key Points - provides a detailed summary of each topic, as well as helpful hints and tips sample - supplies model questions and responses to all question types practice tasks - develops the necessary skills to answer questions correctly real test - allows your child to practise questions like those in the real test sample test papers - allows your child to become familiar with the format of the Opportunity Class and Scholarship Tests suggested time - helps prepare your child to answer questions under the time constraints of the Opportunity Class and Scholarship Tests

Congressional Record

The Routledge International Handbook of Sandplay Therapy provides a comprehensive overview of this therapeutic method, developed to provide a means of helping clients of all ages with mental suffering. The contributors, from a range of therapeutic and cultural backgrounds, demonstrate core theory and practice, and explore the implications of current neuroscientific research. The chapters illustrate the effectiveness of this seemingly simple psychotherapeutic tool in its contemporary applications. Split into six parts, this handbook considers: Sandplay therapy in medicine Sandplay with special populations Sandplay in analysis and general practice Adaptions of the Sandplay method in education Sandplay and the spirit Non-Jungian uses of the sand tray in therapeutic applications Unique in scope and breadth, this handbook will appeal to academics and students of Jungian psychotherapy, as well as occupational therapists, art and play therapists, and all clinicians using Sandplay therapy as part of their professional practice.
