

The Information Society And Development

[#Information Society](#) [#Development](#) [#ICT](#) [#Digital Divide](#) [#Sustainable Development](#)

The Information Society and Development explores the crucial role of information and communication technologies (ICTs) in fostering economic and social progress. It examines the opportunities and challenges presented by the digital age, including bridging the digital divide, promoting equitable access to information, and leveraging technology for sustainable development goals. Understanding the dynamics of the Information Society is essential for policymakers, researchers, and practitioners seeking to harness the power of ICTs for positive societal transformation and improved quality of life for all.

Civil society, NGOs, and development in Ethiopia : a snapshot view

This study examines the relations between Southern and Northern Non-Governmental Organizations based on patterns that the author observed in Ethiopia. The study demonstrates that these relationships range from very poor to that of fairly satisfactory along a continuum, and will be of interest to those working in the field of international development.

Non-governmental Organizations in Ethiopia

Research Paper (undergraduate) from the year 2010 in the subject Politics - International Politics - Region: Africa, grade: BA degree, , language: English, abstract: Although a relative better political environment had been created with the coming of EPRDF, many NGOs have not yet shifted their policy objective towards advocacy. Majority of local NGOs are still either relief or development oriented regarding their policy objectives. They are fear of taking up policy advocacy, rule of law, human rights, criticism and opposition to state policies and practices. This is partly explained by the fact that many NGOs resorted to opportunism or subservience to the government. That is, they make political calculations deemed necessary to ensure survival. In other words, most NGOs pretend not to engage in sensitive issues that may antagonize with the government. In simple terms, they rather conform to center of power and prefer to maintain personal and institutional interests (Kassahun, 2002:124). However, after 1991 a few local NGOs emerged and centered their objective on promoting the respect for the rule of law, protecting and monitoring human rights and enhancing civil awareness through various strategies. The Ethiopian Human Rights Council (EHRCO), Ethiopian Women Lawyers Association (EWLA), Society for the Advancement of Human Rights Education (EAHRE) are some the examples, which entertain such objectives. Nevertheless, the relation of these human right NGOs and the government (EPRDF) is characterized by great friction and antagonism. Government sometimes intervened in their activities to extent of closing their offices (Sisay, 2001:29). In light of this background, the study is going to investigate this problem of advocacy NGOs by taking EHRCO as case and will also try to assess other impediments of its effective operation.

Role of NGOs in promoting Human Rights in Ethiopia: A Case Study on Ethiopian Human Rights Council (EHRCO)

Includes bibliographical references and index.

The Two Faces of Civil Society

A complete overview of the composition and types of NGOs that have emerged in recent years. Julie Fisher describes in detail the influence these organizations have had on political systems throughout the world and the hope their existence holds for the realization of sustainable development.

Civil Society at the Crossroads

This publication focuses on the challenges faced by civil society to remain sustainable in response to major changes in the global political, economic and social environment. Academics and practitioners from all over the world have contributed original articles, practical notes and viewpoints which critically examine the ways in which civil society organisations are affected by and are responding to political and financial dynamics. These include reductions in traditional external aid for civil society activities, but also the growth of new forms of funding through social enterprise, philanthropy, fundraising and

contractual relationships with national government. The operating environment for civil society is a central theme, with authors exploring the legitimacy and credibility of different types of civil society organisation, as well as the effects of legislative and regulatory restrictions on their sustainability. The contributions finally examine new opportunities for civil society and the prospects for organisations to emerge that are less dependent on foreign aid funding, that are more embedded in local communities, and that can bring about lasting and sustained social and economic change. This book was originally published as a special issue of *Development in Practice*.

Nongovernments

The book investigates the intersection of citizenship, civil society, and development in today's global world. The multi-disciplinary collection considers the notion of citizenship in connection with the neoliberal development agendas, participation, security discourses and legal environments. The contributions analyse the development-citizenship nexus grounded in empirical work in African, Latin American, European and global contexts. The book opens exciting avenues to reflect on the notion of citizenship and explores the following pertinent questions: Does citizenship matter for development research? Do international development policy and practice promote certain normative registers for how people should make sense of their social relations and, in particular, how they relate to public authorities? What are their responses? Contributors from various academic backgrounds, such as anthropology, law, and political science, affirm the importance of citizenship for the study of contemporary development processes. Chapters provide empirical analysis of the processes of water privatization in Ghana, the promulgation of new 'NGO Law' in Ethiopia, environmental politics in former Yugoslavia, and the global interconnections between the Arab Spring and the Occupy Wall Street movement. The book is relevant for students and scholars of political science and development studies as well as development practitioners globally. This book was published as a special issue of the *Journal of Civil Society*.

Civil Society Sustainability

governments and the public at large. --Book Jacket.

Citizenship, Civil Society and Development

The rise of neo-liberalism and the so-called Washington Consensus have generated a powerful international ideology concerning what constitutes good governance, democratization, and the proper roles of the State and civil society in advancing development. As public spending has declined, the nongovernment sector has benefited very significantly from taking on a service-delivery role. At the same time, NGOs, as representatives of civil society, are a convenient channel through which official agencies can promote political pluralism. But can NGOs simultaneously facilitate governments' withdrawal from providing basic services for all and also claim to represent and speak for the poor and the disenfranchised? The chapters describe some of the tensions inherent in the roles being played by NGOs, and asks whether these organizations truly stand for anything fundamentally different from the agencies on whose largesse they increasingly depend.

Good Governance and Civil Society Participation in Africa

The experience of many South Asian and Latin American countries demonstrates that the power of local NGOs can contribute to improving the quality of development services throughout the developing world. Are local NGOs in Africa able to wield power in development? Local NGOs in Africa are lagging behind their counterparts in South Asia and Latin America in terms of developing power. How can African NGOs remedy their absence of power? Local NGOs will have to create their own development space, achieve a degree of financial independence from donors, build solid links to the international development community and have a willingness to engage with the political aspects of development work. Why should donors and international NGOs promote local NGO power? Local NGO power aids NGO sustainability, a common goal of donors, NGOs and beneficiary communities alike. North America: Indiana U Press

Development, NGOS, and Civil Society

Free market policies have been in operation across Africa for the past 25 years, yet they have failed to reverse deepening poverty. This book explores, with case studies, why such policies continue to

be implemented and the ways in which they have been reinvented by socialization, depoliticization, regionalization and securitization.

Undermining Development

Is the world witnessing a global associational revolution spearheaded by development non-governmental organizations (NGOs)? Is the relationship between states and societies being more fundamentally redefined, even in remote, rural corners of the world? What role does the mushrooming of development NGOs play in this political-ideological process? What about NGO staff? Are they angels of mercy, government-paid development diplomats, propagandists for a triumphant West, or instruments in a coming clash between civilizations? Presented here are cases from Zimbabwe, Ethiopia, Eritrea, Sudan, Bangladesh and Nicaragua that shed light on these complex questions. The text puts forward a critique of central theories and concepts which have dominated research and discourse on development NGOs. It also proposes and demonstrates some different analytical approaches. -- Publisher description.

Between State and Civil Society in Africa

Support for civil society has become a major concern for development agencies. However, there has been confusion about the role of non-governmental development organizations (NGOs) in civil society. Sometimes, the funding of NGOs has simply been re-phased as support for civil society. Yet NGOs form only one group of organizations within civil society. Often they are funded from external sources and lack local legitimacy and accountability. This book contains papers by practitioners and researchers that examine the role of NGOs in civil society. It includes general thematic papers on civil society, case studies from Africa, Asia and Latin America and Eastern Europe, and papers that analyze initiatives undertaken by Northern NGOs and donors in democratization programmes in the South. The stimulus for this book was an INTRAC workshop to reflect on the implications of the new civil society policy agenda for NGOs, especially for countries undergoing major political transition.

Neoliberalism, Civil Society and Security in Africa

One of the most articulate critics of the destructive effects of neoliberal policies in Africa, and in particular of the ways in which they have eroded the gains of independence, Issa Shivji shows in two extensive essays in this book that the role of NGOs in Africa cannot be understood without placing them in their political and historical context. As structural adjustment programs were imposed across Africa in the 1980s and 1990s, the international financial institutions and development agencies began giving money to NGOs for programs to minimize the more glaring inequalities perpetuated by their policies. As a result, NGOs have flourished?and played an unwitting role in consolidating the neoliberal hegemony in Africa. Shivji argues that if social policy is to be determined by citizens rather than the donors, African NGOs must become catalysts for change rather than the catechists of aid that they are today.

Angels of Mercy Or Development Diplomats?

This book provides an account of issues facing NGO's today. Each chapter, a case study based on fieldwork, seeks to identify and analyse the roots of problems, past and present, which have led to the current dilemma facing charitable organisations.

NGOs, Civil Society, and the State

Written to provide guidance for civil society organizations and their client groups, this book examines the role of NGOs in the development processes on the African continent. It raises questions about the influence of funding agencies over the NGOs they support and explores the challenges NGOs face. The book argues that increased knowledge and cooperation on all parts is essential to achieve sustainable development. This book also concludes that sustainable development activities are not beneficial to every community in Africa. Taking into consideration globalization and studies of sub-Saharan countries, this book concludes that new models of leadership are necessary for the success of Africa, and NGOs are a vital part of achieving that development.

Silences in NGO Discourse

* Uses an instructive historical event to show how NGOs with good intentions are sometimes capable of supporting harmful government policies * A fascinating picture of the players involved in misguided development program In *Surrogates of the State* Jennings explores the delicate relationship between development NGOs and the states they work in using his exhaustive and illuminating case study of Tanzania in the 1960s and 70s. During that time Tanzania instituted the rural socialist Ujamaa program, resulting in the forced resettlement of 6 million people to villages, transforming the map of the country. Rather than questioning this policy, NGOs working in the area (as typified by Oxfam) became surrogates of the state, helping to carry out the program. Jennings argues that the NGO community was seduced by its own interpretations of what Ujamaa represented, and was consequently blinded to the dark realities of resettlement. Bound by ideological chains of their own forging, organizations that in other contexts have criticized over-mighty states and the use of overt force, NGOs committed themselves fully to Tanzania and its development policy. Through this study, the book uncovers not just the story of development in Tanzania in this critical period, but the history of the NGO itself. And in doing so, raises questions about the future direction of this institution which has become so prominent in international development.

The Charitable Impulse

* Examines the new roles and challenges NGOs confront as they grow beyond service delivery and advocacy * Argues for engagement and more effective learning strategies at both global and local levels Written by a dynamic combination of key researchers and practitioners, *New Roles and Relevance* examines the large range of critical challenges facing development NGOs as they struggle to maintain their integrity and independence, while simultaneously assuming an expanding role in the fight against global poverty. This authoritative book calls for an overall improvement in theory and practice by challenging NGOs to search for greater relevance, improved accountability, and better performance in the globalized world.

Non-governmental Organizations (NGOs) and Sustainable Development in Sub-Saharan Africa

This book tests many of the assumptions, hypotheses, and conclusions connected with the presumed role of civil society organizations in the democratization of African countries. Taking a comparative approach, it looks at countries that have successfully democratized, those that are stuck between progress and regression, those that have regressed into dictatorship, and those that are currently in transitional flux and evaluates what role, if any, civil society has played in each instance. The countries discussed—South Africa, Ghana, Nigeria, Ethiopia, Egypt and Tunisia—represent a diverse set of social and political circumstances and different levels of democratic achievement, providing a rich set of case studies. Each sample state also offers an internal comparison, as each has historically experienced different stages of democratization. Along the course of each case study, the book also considers the effect that other traditionally studied factors, such as culture, colonization, economic development and foreign aid, may have had on individual attempts at democratization. The first extensive work on civil society and democratization in Africa, the book adds new insights to the applicability of democratization theory in a non-Western context, both filling a gap in and adding to the existing universal scholarship. This book will be useful for scholars of political science, economics, sociology and African studies, as well as human rights activists and policy makers in the relevant geographical areas.

Surrogates of the State

Selected by Choice magazine as an Outstanding Academic Book for 1996 Since the 1950s, sub-Saharan Africa has been the site of profound political changes initiated by ascendant nationalism and rapid decolonization. With this new beginning came fresh challenges involving many crucial aspects of human rights: self-determination; civil and political rights, including government legitimacy; military involvement in African politics; and unfulfilled basic needs that have cried out for economic and social development. *Protecting Human Rights in Africa* is the first major comparative study of the way human rights NGOs have brought revolutionary change south of the Sahara. Governments are both the most important protectors and abusers of human rights, while NGOs have become the most effective detectives in discovering abuses and the most active advocates in seeking solutions.

Civil Society and Democratic Development in Africa

Non-Governmental Organisations: Structure, Relevance And Function, Evaluates Contemporary Ngos In Most Of Their Dimensions, Including Their Successes And Failures. It Also Reflects On Modern Global Phenomenon, Such As Globalisation And How In Present Day Civil Society, Ngos Have Emerged As A Force To Reckon With No Doubt, The 21st Century Witnessed A Surge In Ngo Activities Both In The Developed And Developing World. Their Role In Society Has Grown Many Folds Which Is Also Evident From The Fact That Ngos Have Started Setting Priorities While Mobilising Financial Resources For Their Uninterrupted Functioning And Have Maintained Relations Both With Donor Agencies And Clients Towards Successful Accomplishment Of Assigned Tasks.

Development, Ngos And Civil Society

This book offers a critical insight into how the study of NGOs can be more theoretically grounded and methodologically creative. The role of NGOs in global development has been the focus of considerable research and scholarship for the last four decades. More recently, scholars and NGO practitioners have begun to explore their relationships and how research can better inform practice and vice versa. This book addresses questions arising from such research, including: how different theoretical perspectives can be applied to the study of NGOs; what kinds of data can be used when trying to better understand NGOs; and what methods can be used in studying NGOs. Rather than evaluating the impact of NGO work, this is a book about how researchers and practitioners can better understand what NGOs do and how they operate. Bringing together work from a range of NGO researchers working across diverse disciplines and at varied stages of their academic careers, the collection is supported by recent case studies in the field as well as 'dilemma boxes' and discussion questions in every chapter. As such, *Researching Development NGOs* is an essential resource for postgraduate students of Research Methods in Development Studies, NGOs and Development Management as well as practitioners wanting to find out more about the sector.

New Roles and Relevance

A collection of twenty-four research papers presented at a regional conference convened by OSSREA on good governance and the roles of civil society, higher education, the media and culture, in promoting progressive governments and societies. The papers cover six African countries: Botswana, Ethiopia, Lesotho, Sudan, Uganda and Zimbabwe. The subjects include: plural politics in Botswana; indigenous institutions and good governance in Ethiopia; the contribution of the University of Lesotho to civil society through community service; crises in politics and governance in Sudan; Uganda's 'movementocracy' experiment; and the role of the legal disciplines in promoting good governance in Zimbabwe.

The Role of Civil Society in Africa's Quest for Democratization

This book provides an insight into the historical changes and present-day circumstances that have influenced, and continue to influence, the development and future of civil society. Civil society organisations (CSOs) play a crucial role in international development, however their impact on policy and practice is limited by a range of shifts across their political, social and financial landscapes. *Barriers to Effective Civil Society Organisations* is divided into three parts addressing each of these shifts in turn, and places particular emphasis on civil society actors linked not only by political constraints, but also by ethnic and cultural diversities that are crucial markers of political and social identity. This book draws on case studies from across Latin America, Africa, MENA and Ireland to highlight how CSOs in these countries are shaped by, and react to, shifting challenges. Reflecting on solutions for the sector, the authors provide an understanding of the various 'self-accommodation' policies and techniques employed by CSOs in order to continue their services and increase their credibility across global contexts. Aimed at researchers, policy makers and CSO/NGO workers looking to better understand the current state and future of the sector from the perspective of emerging scholars working in these regions, and in the Global South in particular, this innovative book is a celebration of the important work of CSOs and a reaffirmation of their right to sit at the policy table.

Protecting Human Rights in Africa

This study illustrates that assistance to human rights has been instrumental in the emergence of a voluntary sector in Ethiopia. Humanitarian assistance and socio-economic development have been notable too; however assistance to democratisation has been limited, in part due to the failure of political parties to broaden their power base. In contrast, there have been some notable local achievements in areas such as elections and press freedom.

Civil Society, the State & African Development in the 1990s

This report presents the findings of a collaborative Learning Project between CARE USA and Oxfam America, who compared RBA projects with non-RBA projects and identified best practices; and lessons that could be used to improve the application of rights-based approaches in programming.

Non-governmental Organisations

A study of Africa's current strides towards democracy, good governance and the interposition of the civil society in the process. The authors identify and delineates the phases of these processes and examine key theoretical and methodological issues of the governance project. Also includes analysis of hitherto neglected issues such as gender, pastoralism, ethnicity, constitutionalism, local governance, the economy and the African Union. Reviews six country case studies on progress so far: Botswana, Nigeria, Kenya, Ghana, Zambia and Ethiopia.
