Buying Guide 2007 Canadian Edition

This new book is more than a simple engine repair manual. Designed for the beginner with little or no mechanical experience, Small Engines & Outdoor Power Equipment is a graphically appealing, step-by-step guide that covers all of the most important engine maintenance and repair skills you'll need to keep your equipment running at peak performance. It also shows exactly how to perform mechanical upkeep and repairs on the most common outdoor power implements, including lawn mowers, snow blowers, chain saws, power washers, generators, leaf blowers, rototillers, wood splitters, lawn edgers, and weed whips. With clear how-to photos and detailed diagrams, you'll see exactly what needs to be done. A comprehensive troubleshooting guide helps you define problems and enact solutions. With Small Engines & Outdoor Power Equipment in your library, you won't need to haul the lawn mower off to the repair center and wait a few weeks just because a filter is plugged or the old gas needs to be replaced. Among the many skills you'll learn are seasonal tune-ups, changing oil, servicing spark plugs, cleaning filters, replacing a muffler, servicing the fuel tank, overhauling a carburetor, servicing brakes, inspecting a flywheel, replacing a fuel pump, and replacing a rewind cord.

Crime, Shame and Reintegration is a contribution to general criminological theory. Its approach is as relevant to professional burglary as to episodic delinquency or white collar crime. Braithwaite argues

that some societies have higher crime rates than others because of their different processes of shaming wrongdoing. Shaming can be counterproductive, making crime problems worse. But when shaming is done within a cultural context of respect for the offender, it can be an extraordinarily powerful, efficient and just form of social control. Braithwaite identifies the social conditions for such successful shaming. If his theory is right, radically different criminal justice policies are needed - a shift away from punitive social control toward greater emphasis on moralizing social control. This book will be of interest not only to criminologists and sociologists, but to those in law, public administration and politics who are concerned with social policy and social issues.

Somebody was in there. Somebody - or some thing . . . There is no room thirteen in the creepy Crow's Nest Hotel, where Fliss and her friends are staying on a school trip. Or is there? For at the stroke of midnight, something peculiar happens to the door of the linen cupboard next to room 12. And something is happening to Ellie-May Sunderland, too - something very sinister . . . A gripping page-turner from a master of spooky suspense, award-winning Robert Swindells. Don't read this under the covers at midnight!

A myth-shattering investigation of the true cost of America's passion for finding a better bargain From the shuttered factories of the Rust Belt to the strip malls of the Sun Belt-and almost everywhere in between-America has been transformed by its relentless fixation on low price. This pervasive yet little-examined obsession with bargains is arguably the most powerful and devastating market force of our time, having fueled an excess of consumerism that blights our land-scapes, escalates personal debt, lowers our standard of living, and even skews of our concept of time. Spotlighting the peculiar forces that drove Americans away from quality, durability, and craftsmanship and towards quantity, quantity, and more quantity, Ellen Ruppel Shell traces the rise of the bargain through our current big-box profusion to expose the astronomically high cost of cheap

This textbook is targetted to undergraduate students in chemical engineering, chemical technology, and biochemical engineering for courses in mass transfer, separation processes, transport processes, and unit operations. The principles of mass transfer, both diffusional and convective have been comprehensively discussed. The application of these principles to separation processes is explained. The more common separation processes used in the chemical industries are individually described in separate chapters. The book also provides a good understanding of the construction, the operating principles, and the selection criteria of separation equipment. Recent developments in equipment have been included as far as possible. The procedure of equipment design and sizing has been illustrated by simple examples. An overview of different applications and aspects of membrane separation has also been provided. 'Humidification and water cooling', necessary in every process indus-try, is also described. Finally, elementary principles of 'unsteady state diffusion' and mass transfer accompanied by a chemical reaction are covered. SALIENT FEATURES : • A balanced coverage of theoretical principles and applications. • Important recent developments in mass transfer equipment and practice are included. • A large number of solved problems of varying levels of complexities showing the applications of the theory are included. • Many end-chapter exercises. • Chapter-wise multiple choice questions. • An Instructors manual for the teachers.
