My Neighbor the Witch - When Cats Become Frogs

To do magic, you only really need one thing—a magic wand. However, there is one secret that only real magic-wielders know when it comes to using magic. Do you know what that is? One day, Ellie is sitting in her yard intent on turning her cat, Bingo, into a frog with the power of her toy wand and her "magic" words. By chance, the dog across the street frightens Bingo away and into the yard of Ellie's neighbour, Mrs. Spelling. Little does Ellie know that Mrs. Spelling is a REAL witch! Ellie ends up mistaking Mrs. Spelling's wand for her own and returns home with newfound powers. Magic is all fun and games at first but eventually, everything seems to go wrong—she suffers a tummy ache, ends up having to clean up her room just to find her toys, and turns her cat into one that has a case of the "Ribbits." Ellie soon realizes that with great power comes great responsibility!

A ruthless new crime syndicate holds Los Angeles in a grip of terror. Anyone who opposes it suffers a horrible death . . . but not at human hands. Bizarre accidents, sudden illnesses, inexplicable and gruesome deaths: the mobsters will stop at nothing to eliminate their enemies. Every bloody step of the way, their companions are four mysterious women, witches who wield more power than the gangsters could ever dream of. With the help of his mysteriously gifted neighbor, Annie Conjure, Detective Dan Fisher must fight both the LAPD's skepticism and this chilling new power. And at the heart of the nightmare lies the final puzzle, the secret of . . . The 5th Witch. For readers of Angela Clarke, Peter James and Stephen King, this gripping novel from the legendary Graham Masterton will leave you reeling. Praise for the writing of Graham Masterton "The living inheritor to the realm of Edgar Allan Poe." —San Francisco Chronicle "Masterton is a crowd-pleaser, filling his pages with sparky, appealing dialogue and visceral gore." —Time Out "One of the most original and frightening storytellers of our time." —Peter James, #1 bestselling author of Dead Simple "A true master of the horror genre." —James Herbert, bestselling author of The Rats

The 5th Witch

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed

through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Albion's Seed

Only upon publication do I realise this book's genre: Horror! The first part of this book Am is only a fragment of a book I wrote largely in the eighties about my search for my mind after a serious mental breakdown after leaving Oxford University in 1976, my subsequent conversion to Christianity and the development of a personal relationship with Jesus. It also describes some of the relationships in my life, my mother, my father, my ex wife and my brothers and sisters, plus a few friends, and associates. Their names are disguised! It is written in broken language to evoke my mentality at the time. Please forgive some of the errors in text, because I haven't had the time or patience(!) to work any more on it because it belongs in the past. However some of the 'errors' are deliberate, I was thinking very much of James Joyce's style in Ulysses. The second half, Regime in the Head, written before AM, is about my life in the mental health system and the Church of England, and is largely a diary.

He calls himself "De Fawg Pin," and he's about to turn pond life topsy-turvy! "The frog prince motif has inspired many books, but few as original as this novel."—Booklist "An animal fantasy that fairy tale readers will relish."—Bulletin of the Center for Children's Books, starred review

The Youth's Companion

In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. The Humane Gardener fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.

How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.

This open access book analyzes the evidence linking *Toxoplasma gondii* to the increasing incidence of schizophrenia and bipolar disorder in the United States. Initially establishing that infectious agents are regularly transmitted from animals to humans, lead to human disease, and that infectious agents can cause psychosis, it then examines the protozoan parasite *Toxoplasma gondii* in detail. Infecting 40 million Americans, *Toxoplasma gondii* is known to cause congenital infections, eye disease, and encephalitis for individuals who are immunosuppressed. It has also been shown to change the behavior of nonhuman mammals, as well as to alter some personality traits in humans. After discussing the clinical evidence linking *Toxoplasma gondii* to human psychosis, the book elucidates the epidemiological evidence further supporting this linkage; including the proportional increase in incidence of human psychosis as cats transitioned to domestication over 800 years. Finally, the book assesses the magnitude of the problem and suggests solutions. *Parasites, Pussycats and Psychosis: The Unknown Dangers of Human Toxoplasmosis* provides a comprehensive review of the evidence linking human psychosis in the United States to infections of *Toxoplasma gondii*. It will be of interest to infectious disease specialists, general practitioners, scientists, historians, and cat-lovers.

WINNER OF THE THURBER PRIZE The compelling, inspiring, (often comic) coming-of-age story of Trevor Noah, set during the twilight of apartheid and the tumultuous days of freedom that followed. One of the comedy world's brightest new voices, Trevor Noah is a light-footed but sharp-minded observer of the absurdities of politics, race and identity, sharing jokes and insights drawn from the wealth of experience acquired in his relatively young life. As host of the US hit show *The Daily Show with Trevor Noah*, he provides viewers around the globe with their nightly dose of biting satire, but here Noah turns his focus inward, giving readers a deeply personal, heartfelt and humorous look at the world that shaped him. Noah was born a crime, son of a white Swiss father and a black Xhosa mother, at a time when

such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the first years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, take him away. A collection of eighteen personal stories, *Born a Crime* tells the story of a mischievous young boy growing into a restless young man as he struggles to find his place in a world where he was never supposed to exist. *Born a Crime* is equally the story of that young man's fearless, rebellious and fervently religious mother - a woman determined to save her son from the cycle of poverty, violence and abuse that ultimately threatens her own life. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Noah illuminates his curious world with an incisive wit and an unflinching honesty. His stories weave together to form a personal portrait of an unlikely childhood in a dangerous time, as moving and unforgettable as the very best memoirs and as funny as Noah's own hilarious stand-up. *Born a Crime* is a must read.

While drawing in class to avoid listening to a story from his painfully boring teacher at Stagwood School, 12-year old Cal sees a frog staring at him through the window. Odder than that is the fact that this frog happens to be wearing glasses. Cal and his best friend, the tactless but loyal Soy, learn that the frog (who prefers the name Deli) has sought them out for a reason. When a school administrator named Ream reveals himself to be a dragon, the boys discover that fairytales are real, and that there is magic afoot in Stagwood. With Ream on their tail, the trio must unearth a powerful tool protected by riddles and rife (the magic that fuels nightmares) to save the fate of all fairytales past. Their only means of conveyance, Cal's now-flying bed, takes them on a journey beyond the home of the fairies (a cloud floating somewhere over Iceland) to set things right. But, before Cal can defeat Ream and his kidnapped army of fairies, he has to deal with Soy's knack for arguing with magical creatures, discover the truth about Deli's identity, and earn his place as the hero of the story. *The Guardians of Lore* is a middle grade novel that centers around two life-long friends, infusing humor and fantasy-based riddles into a modern fairytale. This is an exceptionally written intriguing piece of work that enthralls and imbues curiosity in young readers to discover the unknown with a spirit of adventure. Ideally, this is a book for children who enjoy folklore, mythical creatures and fairy tales.
