That phenomenal world has been at the center of EON Productions' iconic film franchise, the long-running big screen series in history, since the release of Dr. No in 1962, and continuing later this year with No Time to Die.

The SAGE Guide to Key Issues in Mass Media Ethics and Law

The SAGE Guide to Key Issues in Mass Media Ethics and Law is an authoritative and rigorous two-volume, issues-based reference set that surveys varied views on many of the most contentious issues involving mass media ethics and the law. Divided into six thematic sections covering information from contrasting ethical responsibly and legal rights for both speech and press, newsgathering and access, and privacy to libelous reporting, business considerations, and changing rules with social media and the Internet, the information in this guide is extremely relevant to a variety of audiences. This guide specifically focuses on matters that are likely to be regular front-page headlines concerning topics such as technological threats to privacy, sensationalism in media coverage of high-profile trials, cameras in the courtroom, use of confidential sources, national security concerns and the press, digital duplication and deception, rights of celebrities, plagiarism, and more. Collectively, this guide assesses key contentious issues and legal precedents, noting current ethical and legal trends and likely future directions. Features: Six thematic sections consist of approximately a dozen chapters each written by eminent scholars and practitioners active in the field. Sections open with a general Introduction by the volume editors and conclude with a wrap-up "Outlook" section to highlight likely future trends. Chapters follow a common organizational outline of a brief overview of the issue at hand, historical background and precedent, and presentation of various perspectives (pro, con, mixed) to the issue. "See also" cross references guide readers to related chapters and references and further readings guide users to more in-depth resources for follow-up. This reference guide is an excellent source for the general public, students, and researchers who are interested in expanding their knowledge in mass media and the ethics and law surrounding it.

Guide to Applying Human Factors Methods

Human error plays a significant role in many accidents involving safety-critical systems, and it is now a standard requirement in both the US and Europe for Human Factors (HF) to be taken into account in system design and safety assessment. This book will be an essential guide for anyone who uses HF in their everyday work, providing them with consistent and ready-to-use procedures and methods that can be applied to real-life problems. The first part of the book looks at the theoretical framework, methods and techniques that the engineer or safety analyst needs to use when working on a HF-related project. The second part presents four case studies that show the reader how the above framework and guidelines work in practice. The case studies are based on real-life projects carried out by the author for a major European railway system, and in collaboration with international companies such as the International Civil Aviation Organisation, Volvo, Daimler-Chrysler and FIAT.

Translating Texts

Clear and accessible, this textbook provides a step-by-step guide to textual analysis for beginning translators and translation students. Covering a variety of text types, including business letters, recipes, and museum guides in six languages (Chinese, English, French, German, Russian, and Spanish),

this book presents authentic, research-based materials to support translation among any of these languages. Translating Texts will provide beginning translators with greater text awareness, a critical skill for professional translators. Including discussions of the key theoretical texts underlying this text-centred approach to translation and sample rubrics for (self) assessment, this coursebook also provides easy instructions for creating additional corpora for other text types and in other languages. Ideal for both language-neutral and language-specific classroom settings, this is an essential text for undergraduate and graduate-level programs in modern languages and translation. Additional resources are available on the Routledge Translation Studies Portal: <http://routledgetranslationstudiesportal.com>

Advances in Embedded Computer Vision

This illuminating collection offers a fresh look at the very latest advances in the field of embedded computer vision. Emerging areas covered by this comprehensive text/reference include the embedded realization of 3D vision technologies for a variety of applications, such as stereo cameras on mobile devices. Recent trends towards the development of small unmanned aerial vehicles (UAVs) with embedded image and video processing algorithms are also examined. Topics and features: discusses in detail three major success stories – the development of the optical mouse, vision for consumer robotics, and vision for automotive safety; reviews state-of-the-art research on embedded 3D vision, UAVs, automotive vision, mobile vision apps, and augmented reality; examines the potential of embedded computer vision in such cutting-edge areas as the Internet of Things, the mining of large data streams, and in computational sensing; describes historical successes, current implementations, and future challenges.

Multimodal Biometric and Machine Learning Technologies

MULTIMODAL BIOMETRIC AND MACHINE LEARNING TECHNOLOGIES With an increasing demand for biometric systems in various industries, this book on multimodal biometric systems, answers the call for increased resources to help researchers, developers, and practitioners. Multimodal biometric and machine learning technologies have revolutionized the field of security and authentication. These technologies utilize multiple sources of information, such as facial recognition, voice recognition, and fingerprint scanning, to verify an individual's identity. The need for enhanced security and authentication has become increasingly important, and with the rise of digital technologies, cyber-attacks and identity theft have increased exponentially. Traditional authentication methods, such as passwords and PINs, have become less secure as hackers devise new ways to bypass them. In this context, multimodal biometric and machine learning technologies offer a more secure and reliable approach to authentication. This book provides relevant information on multimodal biometric and machine learning technologies and focuses on how humans and computers interact to ever-increasing levels of complexity and simplicity. The book provides content on the theory of multimodal biometric design, evaluation, and user diversity, and explains the underlying causes of the social and organizational problems that are typically devoted to descriptions of rehabilitation methods for specific processes. Furthermore, the book describes new algorithms for modeling accessible to scientists of all varieties. Audience Researchers in computer science and biometrics, developers who are designing and implementing biometric systems, and practitioners who are using biometric systems in their work, such as law enforcement personnel or healthcare professionals.

A User's Guide to Engineering

Engineering careers. Engineering disciplines. Engineering problem solving. Engineering problem-solving tools. Technical communications.

Principles of Infrared Technology

This book is about general infrared (IR) engineering, technology, practices, and principles as they apply to modern imaging systems. An alternative title to this book with appeal to managers and marketing personnel might be "Everything You Always Wanted to Know about Infrared Sensors, but Couldn't Get Answers on from Engineers." This book is not meant to be a comprehensive compendium of IR (like the Infrared and Electro Optical Systems Handbook). Rather, it is intended to complement such texts by providing up to date information and pragmatic knowledge that is difficult to locate outside of periodicals. The information contained in this book is critical in the day-to-day life of engineering practitioners, proposal writers, and those on the periphery of an IR program. It serves as a guide for engineers

wishing to "catch up," engineers new to the field, managers, students, administrators, and technicians. It is also useful for seasoned IR engineers who want to review recent technological developments.

Family Guide Italy

The book is divided into three parts: theory, method and implementation. Starting with a summary of the state-of-the-art in mobile technologies, the first part analyses their impacts on cartography and pinpoints the missing theories concerned with the development of map-based mobile services. A conceptual framework of mobile cartography is then introduced with the emphasis on mobile usage context. The second part is devoted to the design methodology under the constraints defined in the theoretical framework. A core issue deals with personalised mobile map services. The final part demonstrates the feasibility of the methods by using application scenarios. The accompanying CD-ROM contains the PDF-Files in colour.

Love in Colour

THE SUNDAY TIMES BESTSELLER As seen on BBC2 Between the Covers 'Beautifully written and full of joy. Bolu Babalola is a star.' Meg Cabot 'Here is love as freedom, love as deep joy. Romance will never be dead, as long as Bolu is writing it.' Jessie Burton Bolu Babalola finds the most beautiful love stories from history and mythology and rewrites them with incredible new detail and vivacity in this debut collection. Focusing on the magical folktales of West Africa, Babalola also reimagines iconic Greek myths, ancient legends from the Middle East, and stories from countries that no longer exist in our world. A high-born Nigerian goddess feels beaten down and unappreciated by her gregarious lover and longs to be truly seen. A young businesswoman attempts to make a great leap in her company, and an even greater one in her love life. A powerful Ghanaian spokeswoman is forced to decide whether to uphold her family's politics, or to be true to her heart. Whether captured in the passion of love at first sight, or realising that self-love takes precedent over the latter, the characters in these vibrant stories try to navigate this most complex human emotion and understand why it holds them hostage. Moving exhilaratingly across perspectives, continents and genres, from the historic to the vividly current, Love in Colour is a celebration of romance in all of its forms. 'Captivating.' Vice

How the Light Gets In

A teenager yearns to escape her roots—but feels like an outsider with the wealthy family that takes her in—in this novel from a Booker Prize finalist. “Sixteen-year-old Australian exchange student Louise (Lou) is ecstatic that she has left behind her rough family, who mock her for using big words, and their tiny flat choked with cigarette smoke. Placed in a wealthy Chicago suburb, in a pristine McMansion with the Harding family, Lou is stunned by the glossy perfection: ‘There are so many healthy, good-looking teenagers that a few crooked teeth, or short, fat fingers, suddenly take on the proportions of deformities.’ The Hardings are earnest and warm, but Lou’s high-strung insecurity and wary independence begin to widen the cracks in her host family’s strained domesticity, particularly when Lou turns increasingly to booze and drugs . . . Lou’s furious, first-person voice is filled with piercing observations that beautifully balance Lou’s teenage detachment and aching, intelligence and self-absorption, yearning and recklessness. And like Holden Caulfield, with whom she invites inevitable comparison, Lou is unmerciful toward those satisfied with easy answers.” —Booklist

Recent Trends and Advances in Artificial Intelligence and Internet of Things

This book covers all the emerging trends in artificial intelligence (AI) and the Internet of Things (IoT). The Internet of Things is a term that has been introduced in recent years to define devices that are able to connect and transfer data to other devices via the Internet. While IoT and sensors have the ability to harness large volumes of data, AI can learn patterns in the data and quickly extract insights in order to automate tasks for a variety of business benefits. Machine learning, an AI technology, brings the ability to automatically identify patterns and detect anomalies in the data that smart sensors and devices generate, and it can have significant advantages over traditional business intelligence tools for analyzing IoT data, including being able to make operational predictions up to 20 times earlier and with greater accuracy than threshold-based monitoring systems. Further, other AI technologies, such as speech recognition and computer vision can help extract insights from data that used to require human review. The powerful combination of AI and IoT technology is helping to avoid unplanned downtime, increase operating efficiency, enable new products and services, and enhance risk management.

Buddhist philosophy of Anicca (impermanence), Dukkha (suffering), and

Phenomenology of Perception

In 1789 the West Indian colony of San Domingo supplied two-thirds of the overseas trade of France. The entire structure of what was arguably the most profitable colony in the world rested on the labour of half a million slaves. In 1791 the waves of unrest inspired by the French Revolution reached across the Atlantic dividing the loyalties of the white population of the island. The brutally treated slaves of Saint Domingo seized at this confusion and rose up in rebellion against masters. In this classic work, CLR James chronicles the only successful slave revolt in history and provides a critical portrait of their leader, Toussaint L'Ouverture, 'one of the most remarkable men of a period rich in remarkable men'.

In a new approach to philosophical anthropology, Bruno Latour offers answers to questions raised in We Have Never Been Modern: If not modern, what have we been, and what values should we inherit? An Inquiry into Modes of Existence offers a new basis for diplomatic encounters with other societies at a time of ecological crisis.

Haute Brides and Honeymoons

An evocative and richly illustrated exploration of flowers and how, over the centuries, they have given us so much sustenance, meaning, and pleasureThe bright yellow of a marigold and the cheerful red of a geranium, the evocative fragrance of a lotus or a saffron-infused paella—there is no end of reasons to love flowers. Ranging through the centuries and across the globe, Kasia Boddy looks at the wealth of floral associations that has been passed down in perfumes, poems, and paintings; in the design of buildings, clothes, and jewelry; in songs, TV shows, and children's names; and in nearly every religious, social, and political ritual.Exploring the first daffodils of spring and the last chrysanthemums of autumn, this is also a book about seasons. In vibrant detail and drawing on a rich array of illustrations, Boddy considers how the sunflower, poppy, rose, lily—and many others—have given rise to meaning, value, and inspiration throughout history, and why they are integral to so many different cultures.

An Inquiry Into Modes of Existence

Despite the advancements made by Information and Communication Technologies in several international development sectors, further evidence is needed on how mobile phone technology is reaching women, improving their learning, and providing them with new opportunities and better living conditions. Can mobile phones develop womens literacy and strengthen their capability to choose and benefit from wider educational, social and decent work opportunities that can improve their lives? Based on a cross-analysis of nine mobile learning projects in three world regions, this publication sheds light on the extent to which mobile phones can enhance womens literacy and lead to their empowerment. The challenges encountered among the nine projects reviewed and the recommendations derived from these experiences provide a way forward for policy-makers and practitioners in the conceptualization and implementation of quality mobile learning as part of womens human development.

Blooming Flowers

A commemoration of brave yet largely forgotten women who served in the First World War. In time for the 2014 centennial of the start of the Great War, this book brings to life the brave and often surprising exploits of 16 fascinating women from around the world who served their countries at a time when most of them didn't even have the right to vote. Readers meet 17-year-old Frenchwoman Emilienne Moreau, who assisted the Allies as a guide and set up a first-aid post in her home to attend to the wounded; Russian peasant Maria Bochkareva, who joined the Imperial Russian Army by securing the personal permission of Tsar Nicholas II, was twice wounded in battle and decorated for bravery, and created and led the all-women combat unit the "Women's Battalion of Death" on the eastern front; and American journalist Madeleine Zabriskie Doty, who risked her life to travel twice to Germany during the war in order to report back the truth, whatever the cost. These and other suspense-filled stories of brave girls and women are told through the use of engaging narrative, dialogue, direct quotes, and document and diary excerpts to lend authenticity and immediacy. Introductory material opens each section to provide solid historical context, and each profile includes informative sidebars and "Learn More" lists of relevant books and websites, making this a fabulous resource for students, teachers, parents, libraries, and homeschoolers.

Harriet Martineau's Autobiography

In this book, the authors explore and discuss the development of one of the most interesting and dynamic of photographic genres. Hailed as a landmark work when it was first published in 1994, *Bystander* is widely regarded by street photographers as the "bible" of street photography. It covers an incredible array of talent, from the unknowns of the late 19th century to the acknowledged masters of the 20th, such as Atget, Stieglitz, Strand, Cartier-Bresson, Brassai, Kertesz, Frank, Arbus, Winogrand, and Levitt to name just a few. In this new and fully revised edition, the story of street photography is brought up to date with a re-evaluation of some historical material, the inclusion of more contemporary photographers, and a discussion of the ongoing rise of digital photography.

Mobile phones & literacy: empowerment in women's hands

Cleo is back at Yasiro Academy, recovering from the tragic events that occurred on planet Hykosis. She feels responsible for the death of her friend Zaid, and trains nonstop. And when she learns that the Golden Lion -- a star with immeasurable energy that could destroy them all if weaponized -- has been located, she goes alone to the snowy, icy planet Cada'duun to find it. There, she faces off with a new enemy who has been instructed to destroy the Golden Lion... and her.

I gotta keep hold of my Mojo He keeps me bouncing up and down like a yo-yo When I'm on a low low He makes me ho ho Gets me flying out of black holes like Chewbacca and Han Solo Melody is in the care system and is out of control . . . the only thing that is constant in Melody's life is her toy monster, Mojo. Blessing has come from Nigeria to stay with an 'Aunty', but when the relationship breaks down, she is trapped in the care system and longs to be back with her Nana in Lagos. Rizla has just left the care system. He has been taken in by some older guys in the local hostel and has found his new 'family'. Melody Loses Her Mojo is a bold, gritty and challenging story aimed at young people. It fuses Hip-hop theatre, dance, puppetry and street art to follow the amazing journeys of three remarkable young people, whose stories intertwine in a world full of magical and surreal moments.

The Indecisive Memento

In the time of a devastating pandemic, seven women and three men withdraw to a country estate outside Florence to give themselves a diversion from the death around them. Once there, they decide to spend some time each day telling stories, each of the ten to tell one story each day. They do this for ten days, with a few other days of rest in between, resulting in the 100 stories of the Decameron. The Decameron was written after the Black Plague spread through Italy in 1348. Most of the tales did not originate with Boccaccio; some of them were centuries old already in his time, but Boccaccio imbued them all with his distinctive style. The stories run the gamut from tragedy to comedy, from lewd to inspiring, and sometimes all of those at once. They also provide a detailed picture of daily life in fourteenth-century Italy.

Virginia Woolf and the World of Books

There is no more trusted mentor of preachers in North American Christianity today than William H. Willimon. The author of over sixty books, a frequent preacher and teacher in pastors' schools and events, Willimon has earned a following as one of the people to whom preachers turn more often than any other. Turner and Malambri make Willimon's role as a mentor to preachers more available than ever. Both former students of Willimon's, they provide detailed and practical tools for learning from this "peculiar prophet." They offer samples of Willimon's sermons, and commentary on them by other leading preachers and homilists such as Tom Long and Peter Gomes. The point of this examination of Willimon's work is not simply to praise it, but to assess both its strengths and its weaknesses, and to help readers learn in the process how Willimon can be a model of what to do and--at times--what not to do in the pulpit. Written with the needs of practicing preachers in mind, this book will make a significant contribution, not only to understanding a great preacher, but also to preaching itself.

LIC Assistant Prelims Exam 2023 (English Edition) - 10 Practice Tests and 6 Sectional Tests (1200 Solved Objective Questions)

Born was a child of the rain forest that covered Midworld, part of the primitive society that the peaceful jungle planet had sustained for hundreds of years. He was wise in the ways of his world, and he knew well the precarious natural balance that governed all things. Then one day the aliens came. Giants. They knew nothing of the Upper or Lower Hell ? and they cared less. Born had risked his life to save them, to guide them through the myriad tangled boughs, past unseen, unsuspected dangers lurking in the underbrush. But worse than their ignorance of how to survive, the aliens had plans for Midworld, plans that could utterly destroy the globe-spanning forest that his people called home. As the days passed, Born realized his mistake. And as he had once hunted only to live, he knew now that he would be forced to live only to kill...

The Decameron

The most authoritative illustrated book on flying reptiles available For 150 million years, the skies didn't belong to birds—they belonged to the pterosaurs. These flying reptiles, which include the pterodactyls, shared the world with the nonavian dinosaurs until their extinction 65 million years ago. Some pterosaurs, such as the giant azhdarchids, were the largest flying animals of all time, with wingspans exceeding thirty feet and standing heights comparable to modern giraffes. This richly illustrated book takes an unprecedented look at these astonishing creatures, presenting the latest findings on their anatomy, ecology, and extinction. Pterosaurs features some 200 stunning illustrations, including original paintings by Mark Witton and photos of rarely seen fossils. After decades of mystery, paleontologists have finally begun to understand how pterosaurs are related to other reptiles, how they functioned as living animals, and, despite dwarfing all other flying animals, how they managed to become airborne. Here you can explore the fossil evidence of pterosaur behavior and ecology, learn about the skeletal and soft-tissue anatomy of pterosaurs, and consider the newest theories about their cryptic origins. This one-of-a-kind book covers the discovery history, paleobiogeography, anatomy, and behaviors of more than 130 species of pterosaur, and also discusses their demise at the end of the Mesozoic. The most comprehensive book on pterosaurs ever published Features some 200

illustrations, including original paintings by the author Covers every known species and major group of pterosaurs Describes pterosaur anatomy, ecology, behaviors, diversity, and more Encourages further study with 500 references to primary pterosaur literature

A Peculiar Prophet

Living in Digital Worlds investigates the relationship between human society and technology, as our private and particularly our public lives are increasingly undertaken in spaces that are inherently digital: digital public spaces. The book unpicks why digital technology is such an inextricable part of modern society, first by examining the historical relationship between technological development and the early progression of human sociality. This is then followed by an examination of the ways in which modern life is currently being impacted by the expansion of digital information and devices into multiple aspects of our lives, including focuses on privacy, bias and ownership in digital spaces. Finally, it explores potential future developments and their implications, and proposes that it is crucial to consider the design of technology and systems in order to support a positive and beneficial direction of change. Each chapter includes case studies, primarily drawn from The Creative Exchange, a fiveyear programme which ran from 2012 to 2016 to explore the notion of the digital public space through collaborative cross-sector research.

This book presents a broad overview of the challenges posed by COVID-19 in India and its neighboring countries. It studies the differing responses to COVID-19 infections across South Asia, the variegated impact of the pandemic on its societies, communities and economies, and emerging challenges which require an interdisciplinary understanding and analysis. With a range of case studies from India, Bangladesh, Myanmar, Pakistan, Nepal, Bhutan, and Sri Lanka, this book, Analyses the socio-economic impact of the pandemic, including the structural challenges faced by farmers in the agricultural production and migrant workers in the informal sectors; Examines the shifting trends in migration and displacement during the pandemic; Explores the precarity faced by LGBTQ+, transgender, Dalit, tribal, senior citizens, and other marginalized communities during the pandemic; Discusses the gendered impact of the pandemic on women and girls, combining with multiple and intersecting inequalities like race, ethnicity, socio-economic status, age, geographical location, and sexual orientation; Sheds light on the position of health infrastructure and healthcare services across different countries, and the transitions experienced in their education sectors as well, in response to COVID-19. A holistic read on the pandemic, this book will be of interest to scholars and researchers of sociology, medical anthropology, sociology of health, pandemic and health studies, political studies, social anthropology, public policy, and South Asian studies.

An extraordinary masterpiece written from personal experience, Middlemarch is a deep psychological observation of human nature that revolves around the issues of love, jealousy, and obligation. Eliot's feminist views are apparent through the novel: she stresses the fact that women should control their own lives....

A Richard and Judy Book Club selection. Noah is four and wants to go home. The only trouble is he's already there. Noah is a little boy who knows things he shouldn't and remembers things he should have forgotten. Because as well as being a four-year-old called Noah, he remembers being a nine-year-old called Tommy. He remembers his house. His family. His mother. And now he wants to go home. Two boys. Two mothers. One unforgettable story . . . 'When I wasn't reading Sharon Guskin's The Forgetting Time, I was itching to return to it' – Jodi Picoult, author of Small Great Things.

Middlemarch

Wuthering Heights is the name of Mr. Heathcliff's dwelling. Wuthering being a significant provincial adjective, descriptive of the atmospheric tumult to which its station is exposed in stormy weather. Pure,

bracing ventilation they must have up there at all times, indeed: one may guess the power of the north wind blowing over the edge, by the excessive slant of a few stunted firs at the end of the house; and by a range of gaunt thorns all stretching their limbs one way, as if craving alms of the sun. Happily, the architect had foresight to build it strong: the narrow windows are deeply set in the wall, and the corners defended with large jutting stones. Before passing the threshold, I paused to admire a quantity of grotesque carving lavished over the front, and especially about the principal door; above which, among a wilderness of crumbling griffins and shameless little boys, I detected the date 1500, and the name Hareton Earnshaw. I would have made a few comments, and requested a short history of the place from the surly owner; but his attitude at the door appeared to demand my speedy entrance, or complete departure, and I had no desire to aggravate his impatience previous to inspecting the penetralium. One stop brought us into the family sitting-room, without any introductory lobby or passage: they call it here the house pre-eminently. It includes kitchen and parlour, generally; but I believe at Wuthering Heights the kitchen is forced to retreat altogether into another quarter: at least I distinguished a chatter of tongues, and a clatter of culinary utensils, deep within; and I observed no signs of roasting, boiling, or baking, about the huge fireplace; nor any glitter of copper saucepans and tin cullenders on the walls. One end, indeed, reflected splendidly both light and heat from ranks of immense pewter dishes, interspersed with silver jugs and tankards, towering row after row, on a vast oak dresser, to the very roof. The latter had never been under-drawn: its entire anatomy lay bare to an inquiring eye, except where a frame of wood laden with oatcakes and clusters of legs of beef, mutton, and ham, concealed it. Above the chimney were sundry villainous old guns, and a couple of horse-pistols: and, by way of ornament, three gaudily-painted canisters disposed along its ledge. The floor was of smooth, white stone; the chairs, high-backed, primitive structures, painted green: one or two heavy black ones lurking in the shade. In an arch under the dresser reposed a huge, liver-coloured bitch pointer, surrounded by a swarm of squealing puppies; and other dogs haunted other recesses.

Wives and Daughters

This lively and erudite cultural history examines how Scottish identity was experienced and represented in novel ways.

The Forgetting Time

Irish houses have a character and personality quite different from that found anywhere else. Quixotic, often whimsical and definitely quirky, they provide a sanctuary from the Irish climate, which is frequently gray, cold, and damp. No wonder, therefore, that over the centuries Ireland's domestic architecture and interior design have developed a distinctive personality in which color and vivacity are highly prized. Romantic Irish Homes presents 15 of the finest examples of these traits, each one of them distinctive and yet sharing the same native spirit. From vast ancient castles through sturdy Georgian manors to small farmhouses, the majority of them never previously photographed, the homes featured here offer a unique insight into the Irish temperament and an exploration of a style of decoration that, while adapted to meet 21st-century demands, still retains an historic integrity. Photographed by Simon Brown, Romantic Irish Homes is every bit as charming and memorable as the Irish people themselves.
