New England Historical and Genealogical Register,

National Historic Landmarks are touchstones of our collective past that still resonate with our present. The six New England states have nearly 400 such places. However, important doesn't always translate into interesting and so we have *Historic New England: A Tour of the Region's Top 100 National Historic Landmarks*—those with the most intriguing and rewarding history. In addition to historic houses, tall ships, and such quirky spots as one of the country's oldest weather stations, carousels, and sandy beaches. The book appeals to the historical enthusiast, the armchair traveler, and both local visitors and tourists alike.

The New England Historical and Genealogical Register,

A photographic guide to historical homes and dwellings across New England The one hundred sites in this guide are in all six New England States, dating from the early 17th century to the threshold of our time and the architectural styles reflect those popular over a period of four centuries. The sites are varied and were the homes of leaders and literati, merchants and millionaires, poets and Pilgrims, philosophers and farmers, and seafarers and Shakers. Each chapter lists the museum's location, web address, and telephone number and provide a description of the historical occupants as well as an in-depth look at the house's place in national and architectural history. Sites include: Harriet Beecher Stowe Center, Hartford CT Sarah Orne Jewett House, Souther Berwick ME Emily Dickinson Museum, Amherst MA Robert Frost Farm, Derry NH The Breakers, Newport RI

The New England Historical and Genealogical Register , Volume 34, 1880

In the turbulent history of colonial New England, more than two hundred powder houses were built to store gunpowder, guns and armaments. Even the spark from a metal shoe nail could ignite their contents, so they often sat in remote sections of town. These volatile storehouses played a vital role in earning and preserving American independence. It was, after all, to a powder house in Concord, Massachusetts, that the British army marched in April 1775 to seize colonists' gunpowder. The British were thwarted, and the colonists' defense of the powder house ignited the Revolutionary War. Add to this the duels, murders, public hangings and tragic explosions that checkered the history of these structures, and the reader will discover a fascinating and forgotten aspect of our New England heritage. Using meticulous research, Matthew Thomas narrates the colorful histories of New England's powder houses as he resurrects their historical significance in early American history.

"Herein, we bring you to sites that have been central to the lives of 'the people' of Greater Boston over four centuries. You'll visit sites associated with the area's indigenous inhabitants and with the individuals and movements who sought to abolish slavery, to end war, challenge militarism, and bring about a more peaceful world, to achieve racial equity, gender justice, and sexual liberation, and to secure the rights of workers. We take you to some well-known sites, but more often to ones far off the well-beaten path of the Freedom Trail, to places in Boston's outlying neighborhoods. We also visit sites in numerous other municipalities that make up the Greater Boston region--from places such as Lawrence, Lowell and Lynn to Concord and Plymouth. The sites to which we do 'travel' include homes given that people's struggles, activism, and organizing sometimes unfold, or are even birthed in many cases in living rooms and kitchens. Trying to capture a place as diverse and dynamic as Boston is highly challenging. (One could say that about any 'big' place.) We thus want to make clear that our goal is not to be comprehensive, or to 'do justice' to the region. Given the constraints of space and time as well as the limitations of knowledge--both our own and what is available in published form--there are many important sites, cities, and towns that we have not included. Thus, in exploring scores of sites across Boston and numerous municipalities, our modest goal is to paint a suggestive portrait of the greater urban area that highlights its long-contested nature. In many ways, we merely scratch the region's surface--or many surfaces--given the multiple layers that any one place embodies. In writing about Greater Boston as a place, we run the risk of suggesting that the city writ-large has some sort of essence. Indeed, the very notion of a particular place assumes intrinsic characteristics and an associated delimited space. After all, how can one distinguish one place from another if it has no uniqueness and is not geographically differentiated? Nonetheless, geographer Doreen Massey insists that we conceive of places as progressive, as flowing over the boundaries of any particular space, time, or society; in other words, we should see places as processual or ever-changing, as unbounded in that they shape and are shaped by other places and forces from without, and as having multiple identities. In exploring Greater Boston from many venues over 400 years, we embrace this approach. That said, we have to reconcile this with the need to delimit Greater Boston--for among other reasons, simply to be in a position to name it and thus distinguish it from elsewhere"--

Q. What is the most-watched TV format in history, seen by about 100 million people weekly around the world? A. Wheel of Fortune, a game show. Without putdowns or pandering, the author looks at 260 such shows, concluding that culture has triumphed over technology. For despite our capacity to transmit the same content world-wide, McLuhan's global village has not come to pass. Technology has, however, encouraged already-existing "cultural continents" to coalesce. About one-third of the world's game shows have been licensed or adapted from another country, especially from the United States. Conversely, a single program can cross borders unchanged, such as Sabado Gigante, which appeals to Spanish speakers in 18 countries. The first truly global study of TV entertainment, this book includes interviews with producers, contestants, and licensors. With its tables, illustrations and appendices, the text provides details on content and audiences, as well as explanatory overviews.

A Building History of Northern New England

Few American cities possess a history as long, rich, and fascinating as Boston's. A site of momentous national political events from the Revolutionary War through the civil rights movement, Boston has also been an influential literary and cultural capital. From ancient glaciers to landmaking schemes and modern infrastructure projects, the city's terrain has been transformed almost constantly over the centuries. The Atlas of Boston History traces the city's history and geography from the last ice age to the present with beautifully rendered maps. Edited by historian Nancy S. Seasholes, this landmark volume captures all aspects of Boston's past in a series of fifty-seven stunning full-color spreads. Each section features newly created thematic maps that focus on moments and topics in that history. These maps are accompanied by hundreds of historical and contemporary illustrations and explanatory text from historians and other expert contributors. They illuminate a wide range of topics including Boston's physical and economic development, changing demography, and social and cultural life. In lavishly produced detail, The Atlas of Boston History offers a vivid, refreshing perspective on the development

of this iconic American city. Contributors Robert J. Allison, Robert Charles Anderson, John Avault, Joseph Bagley, Charles Bahne, Laurie Baise, J. L. Bell, Rebekah Bryer, Aubrey Butts, Benjamin L.
