Sudoku Guru: Traditional Puzzles

Become a sudoku-solving whiz! Sudoku guru Paul Stephens (Mastering Sudoku) has devised a skill-building workbook that can take you from average to confidently advanced in no time. His comprehensive how-to features a selection of foolproof techniques, along with 150 hand-picked puzzles (self-generated from his own computer program) specially chosen to provide practice in key strategies. Each puzzle has an introductory profile, expert tips for extra guidance, and a grade-yourself time score. On the solution pages, Stephens has highlighted many key solving patterns--an ingenious way to help newcomers master even difficult puzzles. A 10-page introduction covers all the major techniques from pairs and triples to X-wing, swordfish and non-unique rectangles. Sudoku has never been so much fun!

The Sudoku Addict's Workbook

Take the Sudoku challenge if you dare! Featuring five levels of difficulty, from very easy puzzles to the very hard, these beautifully and logically constructed grids offer solvers just the right amount of a challenge, allowing them to stay focused and fully enjoy the experience. The creators, Sudoku master Anthony Immanuel and puzzle guru Terry Stickels, know that if a puzzle becomes too stressful or frustrating, it's probably a flaw in the design--not the person doing it. Unlike lesser puzzles, these never have more than one possible answer, are pleasing to the eye, and involve no guesswork. They're a great way to keep the mind in tip-top shape! See if you can win this match!
