Intro

The primary focus of data quality management is to meet the data quality requirements of its data consumers.

Leaders at all levels convey the same purpose and direction and create conditions whereby the entire organization is committed to achieving its data quality objectives.

Competent, empowered and committed stakeholders across the organization are critical to build sustainable data quality management

DATA QUALITY IS EVERYONE'S RESPONSIBILITY

Good data quality is achieved more effectively and efficiently by understanding and managing all business and technical activities as interconnected processes that function as a coherent ecosystem.

Successful data quality management has an ongoing focus on improvement.

Decisions based on data and information analysis will generate the desired results more often.

For sustained success, the organization manages its relationships with its data management tools vendors, data producers, suppliers and consumers.

Get Oversubscribed with Dream Clients with Daniel Priestley - Get Oversubscribed with Dream Clients with Daniel Priestley by KeyPersonOfInfluence 5,788 views 3 days ago 19 minutes - Want to become Oversubscribed with ideal clients? Join my FREE, online workshop - <https://bit.ly/workshop-03-24> Here are the 12 ...

1. Only Oversubscribed Businesses Make a Profit: This principle highlights the importance of being in demand to achieve a profitable business, much like how the stock market works.
2. Your People Are the Only Ones That Matter: Treat buyers as individuals with unique needs and values, moving them from being part of the market to being part of your market.
3. First, You Make Your Market; Then, Make Your Sales: This means building an audience of people who are interested in solving a particular problem. You can do this using a waitlist and showcasing your products or services through innovative marketing strategies and campaigns before focusing on sales.
4. Meeting People Where They Are: This principle is about connecting with potential customers by understanding their values and aligning your products or services accordingly.
5. People Buy When The Conditions Are Right: Combine logic, emotion, and the fear of missing out to create compelling reasons for customers to buy.
6. People Buy What Others Want to Buy: Show that your product is in demand. Social proof and transparency about your product's demand will increase its appeal.
7. People Don't Spend Big Money on Small Problems: Position your business as a solution to significant problems to highlight why you charge a higher fee.
8. People Are Not Proactive: It's not your audience's responsibility to buy from you. It's yours. Take ownership of the sales process as customers are unlikely to take the first step on their own.
9. The Power Is In The Ecosystems: Develop complementary products or services that solve customer problems and create an ecosystem around your offering.
10. Remarkable budgets beat marketing budgets: Allocating budgets to make your product or service significantly stand out in its market.
11. Set Your own rules: Establish a unique selling proposition and set clear rules for your customers that align with your company's values. Don't be afraid to be different.
12. Business is a Team Sport: Business success is a team effort, and it's important to have people to come along for the ride. You cannot do this alone.

Intro

... Assurance Outline the Main/Basic **Principles of TQM**, ...

TQM is a process which tries to ensure quality in all aspects of a firm's operations.

Quality Assurance is a system that guarantees customers that detailed systems are in place to govern quality at every stage in production from design right through to sales

Employee Empowerment . Employees are given real power, responsibility and authority.

Teamwork . Employees are placed in teams, this motivates them as they don't want to let their teammates down. It also satisfies employees social needs as defined by Maslow.

Continuous Improvement • The business strives for 100% perfection

Improved Quality • There should be an improvement in the quality of products produced.

Reduction in Cost • There will be less waste in production costs.

Meet the requirements of Legislation • All legal requirements of producing goods/services are met by the firm

Workers are better motivated • Workers are more motivated because they see management are committed to quality.

Job Satisfaction • Workers feel a sense of achievement as the products they produce are of a high quality.

Outline the Main/Basic **Principles of TQM**, . Outline the ...
