PARALEGAL Interview Questions & Answers

Q. Tell me about yourself and why you want to be a Paralegal?

Being naturally someone who has great attention to detail, an inquisitive mind and a totally dedicated approach to my work, I believe the role of a Paralegal is one I would excel in.

Q. Why do you want to be a Paralegal with our organization over our competitors?

There are obviously many organizations I could apply to in order to become a Paralegal. However, it is important to me that I work for an organization who sets very high standards, has a strong reputation

within the legal profession and also where I can learn and develop from some of the best lawyers and attorneys who work within the industry.

Q. We assume you have read the job description? What are the main responsibilities and duties of a Paralegal?

Q. As a Paralegal, how would you deal with a difficult client?

Q. Accuracy is a vital aspect of being a Paralegal? Describe a time when you demonstrated attention to detail at work?

Imaginación y escritura/ Imagination and writing

El presente libro ofrece un panorama crítico de estos problemas recordando la importancia de la imaginación para el desarrollo de la escritura y el acceso a nuevos conocimientos sobre la lengua y la literatura.

De la trama al relato. Teoría y práctica del taller de escritura

Existe una mitología muy extendida que entiende a la creación literaria como el resultado de la súbita inspiración del escritor. Esta concepción romántica del hecho creativo aleja a la obra de su productor, pues su origen queda oculto en la 'llamada de las musas'. Entender a la escritura como un proceso, por el contrario, permite situarla en el lugar del trabajo. Como señala Joyce, cada obra literaria es un "work in progress", en donde deben ponerse en juego diversas facetas que acompañan el proceso de escritura: la planificación, la corrección, la investigación. Identificar los mecanismos de construcción de los textos, reconocerlos y dominarlos es lo que le permite al escritor ser quien conduzca, efectivamente, su escritura en función de sus objetivos. De la trama al relato. Teoría y práctica del taller de escritura reúne y analiza experiencias de trabajo que van desde la crónica urbana hasta la entrevista, pasando por el cuento, la novela, la autobiografía y el diario de escritor. También aborda cuestiones fundamentales para la creación literaria: la observación, la construcción del verosímil, el extrañamiento, la creatividad. Fruto de una experiencia de muchos años, el libro reúne trabajos de investigación en torno a la enseñanza de la escritura en la Universidad, pero su utilidad no se limita a este ámbito. Los textos que forman parte de este libro son una herramienta fundamental para todo aquel que busque abordar la práctica del taller de escritura —en los claustros, pero también

en espacios informales, en otros niveles educativos, individualmente— de una manera integral: no solo a través de la práctica, sino también desde el fundamento de la teoría.

Teoría y práctica de un taller de escritura

Esta edición en 16 volúmenes del Curso de Teoría y Práctica del Relato pone en manos del lector los materiales necesarios para desarrollar y perfeccionar todos los aspectos que afectan a la creación literaria en el ámbito de la narración. Tras dos años editando esta obra volumen a volumen, que hasta ahora sólo se podía adquirir por suscripción, por fin podemos ofrecer su adquisición completa o por volúmenes sueltos. El Curso, que no se encuentra disponible en librerías, reúne tanto los contenidos y propuestas de trabajo relacionados con los distintos aspectos técnicos y estilísticos de la escritura, como la explicación de los mecanismos del arte de contar historias. Han sido necesarios más de diez años de trabajo para que el equipo del taller de Escritura Creativa a Distancia Fuentetaja desarrollara estos materiales. Quienes nunca participaron en nuestro taller podrán acceder a todo el arsenal técnico con el que se acompaña el trabajo de los participantes. Y quienes hayan participado, podrán completar los temas que nunca llegaron a trabajar.

Teoría y práctica de un taller de poesía

Se proponen numerosas de ideas, técnicas, experiencias y textos que ayudarán al profesorado a convertir las aulas en escenarios compartidos de escritura creativa.

Curso de teoría y práctica del relato (16 vol.)

En la promoción de la lectura, como en la animación a la lectura, sobre todo cuando los destinatarios de las mismas son niños o adolescentes, es muy importante la figura del mediador, papel que, en esas edades, suelen cumplir adultos con perfiles específicos (padres, maestros o bibliotecarios, aunque, en buena lógica, deberíamos considerar también como tales a los editores y a los libreros). El mediador es el puente o enlace entre los libros y esos primeros lectores que propicia y facilita el diálogo entre ambos. El Máster de Promoción de la Lectura y Literatura Infantil de la Universidad de Castilla-La Mancha que se puede cursar desde la red y a distancia, tiene como objetivo básico la formación de especialistas que puedan trabajar en los campos del desarrollo de hábitos lectores y en programas de animación a la lectura, es decir, la formación de mediadores. Los contenidos teóricos de referencia de dicho Máster que aquí se ofrecen los hemos agrupado en cinco partes, que se corresponden con los cinco módulos teóricos que los alumnos cursan durante el primero de los dos años de estudios: Literatura infantil y juvenil, Lenguaje literario y creatividad, Narración infantil y discurso, Evolución psicológica y maduración lectora y Lectura y sociedad. Bibliotecas.

La escritura creativa en las aulas

La permanente actualización, innovación e investigación que acompaña a la función docente es un claro indicador de calidad de cualquier institución educativa o equipo humano. Para el Departamento de Psicología Evolutiva y Didáctica, el apoyo a iniciativas de formación y actualización docente, de creación de recursos y proyectos de investigación es un objetivo prioritario y fundamental. Este material docente está diseñado para ser un material de referencia para el desarrollo de los créditos prácticos de la asignatura de Psicología Evolutiva de 3-6 años con el objetivo de aunar teoría con práctica y desarrollar las competencias laborales de los futuros profesionales del Grado de Maestro de Educación Infantil. Su enfoque eminentemente práctico pretende, por tanto, acercar los contenidos teóricos de la asignatura a los prácticos mediante propuestas de trabajo diseñadas utilizando referencias actuales y estudios de casos reales. Esto hace que su contenido esté abierto y sujeto a una constante actualización, revisión y evaluación para mantener este objetivo fundamental.

La formación de mediadores para la promoción de la lectura

Teoría y práctica de la lectura y la escritura en el bachillerato. Libro y cuaderno de trabajo forma parte del programa de Lectura y Redacción. Tiene como propósito preparar a los escolares en el manejo de su lengua materna y, por lo tanto, surge de una perspectiva integral que invita al estudiante a poner en práctica las cuatro competencias lingüísticas: escuchar, hablar, leer y escribir. En particular, propone estrategias pedagógicas que fomentan las microhabilidades relacionadas con la comunicación escrita. Para acceder al mundo que nos rodea, aprender a descifrar el código lingüístico es tan indispensable como comprender unidades discursivas complejas. En este sentido, quienes

participaron en la creación de este material reconocen la importancia de enfrentar cualquier tipo de texto, desde una carta informal hasta un poema. Cada apartado está diseñado para agilizar la evaluación y para que el alumno redacte los ejercicios correspondientes a cada sección temática. La selección de contenidos en este libro refuerza los conocimientos lingüísticos que el estudiante ha revisado en distintos momentos de su vida académica y aportará otros que serán indispensables en el bachillerato universitario.

Psicología evolutiva 3-6: de la teoría a la práctica

So that child education is the springboard on which equality of opportunities becomes opportunity for all, a detailed analysis is needed; for this, the authors of this book indicate some basic axis on which one can design and implement, without intending to cover all the detected needs in the area of "the child", proposing to achieve three objectives: offer service to the educators on themes of special relevance; provoke theoretical-practical reflection and fill the gap that has not been covered by other publications in a more specific and systematic way, trying to interrelate the contents with different fields. The book is structured in three parts where evolutionary, didactic and pedagogical-organizational aspects are not only developed vertically but they crisscross and relate among themselves. The conclusions to which each of the authors arrive, are opened up through their reflection and/or are developed for integration in others of greater importance.

Teoría y práctica de la lectura y la escritura en el bachillerato

Resúmenes realizados por los propios autores de los trabajos premiados en 1992, en las modalidades de investigación e innovación educativa y tesis doctorales sobre temas educativos.

Educación Infantil

Material de apoyo al profesorado de lengua castellana y literatura que empieza a impartir las nuevas enseñanzas.

Libros en venta en Hispanoamérica y España

En los últimos quince años, la Universidad española ha hecho un importante esfuerzo de incorporación de las TIC a la enseñanza. Consideradas como uno de los ejes que vertebran la llamada sociedad del conocimiento, se han constituido a su vez en un pilar fundamental del Espacio Europeo de Educación Superior. El área de «Teoría de la Literatura y Literatura Comparada» no ha sido ajena al impacto que las nuevas tecnologías han tenido en el proceso de enseñanza y aprendizaje. De hecho, en la Universidad de Almería la mayoría de las asignaturas adscritas a esta área de conocimiento en los nuevos grados de Filología Hispánica y Estudios Ingleses, implantados desde 2010, se han impartido en algún momento en modalidad semipresencial. Pues bien, precisamente los cursos virtuales de las asignaturas específicas de esos títulos, las Teorías literarias en España o las Teorías literarias en Gran Bretaña y Estados Unidos son los que voy a ofrecer aquí como muestra de la utilización de las TIC en la enseñanza de la Teoría de la Literatura.

Curso de teoría y práctica del relato

Una obra de referencia fundamental tanto para el escritor aficionado como para el profesional, en la que se incluyen las bases de más de 1600 premios y concursos de todos los géneros. Sus exhaustivos índices (por dotaciones, géneros, temas...) permiten seleccionar los concursos que mejor se ajustan a las obras y a la estrategia de cada autor, así como planificar con suficiente tiempo la elección de las convocatorias más interesantes.

Teoría y práctica en investigación educativa: una perspectiva internacional

Teoría y práctica: en primer lugar, porque no hay práctica sin teoría (implícita o explícita); en segundo lugar, porque se trata de una teoría que sirve a la práctica, no de manera inmediatista sino más profunda y de largo plazo: cambiando la mirada sobre el proceso de alfabetización y sobre los sujetos. Esta obra reúne una reflexión y una investigación sobre los procesos de alfabetización.

Entre Lineas Teorias y Enfoques Enla Enseñanza de la Escritura, la Gramatica y la Literatura

El taller educativo : una alternativa - Objetivos generales de los talleres - Principios pedagógicos del taller - Fundamentos epistemológicos del taller educativo - La pregunta : un enfoque esencial en el taller educativo - El taller ¿ una educación problémica? - Posibilidades y limitaciones del taller - Algunas ideas generales sobre la participación - Dinámica de grupo y trabajo en equipo en el taller - Los sujetos del taller educativo - Integralidad, creatividad y recreatividad en el taller - Clases o tipos de talleres - El taller y la disciplina - La planificación, organización, ejecución y evaluación del taller.

Curso de teoría y práctica del relato

Quienes fungimos como docentes siempre nos hemos preguntado cómo podríamos mejorar nuestras prácticas en las aulas para que los chicos y las chicas de la escuela sean más eficientes en el habla, la escucha, la lectura y la escritura. Este texto es un compendio que comparte una serie de reflexiones sobre estos asuntos urgentes en las voces de profesores de educación básica primaria y secundaria, bibliotecarios y promotores de la lectura. Cada reflexión revela una experiencia investigativa y formativa en el campo del lenguaje y la literatura y su relación con nuestras innumerables inquietudes.

Teoría y práctica de la redacción de instrumentos públicos

Este libro aborda diversas problemáticas que plantea la enseñanza de la lengua desde una perspectiva social y cultural. Las escenas de clase en las que se trabajaron distintos contenidos del área, los relatos de prácticas docentes en las que se utilizaron variados libros de texto, las producciones escritas de alumnos de diferentes escuelas públicas y privadas, las transcripciones de las voces de docentes y alumnos y el recorrido por múltiples consignas sobre temas propuestos en los diseños curriculares constituyen el material de análisis de esta obra. Con estos materiales, el libro busca distanciarse de aquellas ideas que suponen que las teorías sobre el lenguaje, por sí solas, pueden dar cuenta de los complejos procesos que se juegan en el leer, el escribir o el hablar en el aula. Más aun, de aquellas ideas que imaginan que las teorías pueden “aplicarse” sin mediaciones, olvidando la diversidad de prácticas y actores que la escuela manifiesta. Las experiencias de aula concretas que aquí se presentan ofrecen la posibilidad de reconocer y volver a pensar los conflictos y las incertidumbres que atraviesan las prácticas de enseñanza para, en función de los problemas, proponer otros modos de intervención y de trabajo en el área de Lengua.

Premios nacionales de investigación e innovación educativas 1992

Un libro pionero que ya en 1996 se proponía investigar en los innumerables usos que Internet y los ordenadores proporcionaban a los contadores de historias. Con el tiempo se ha convertido en un texto imprescindible para conocer cómo se comenzaba a entender la escritura y la lectura a partir de la llegada de las nuevas tecnologías y mantiene una frescura propia del enfoque a la vez lúdico y riguroso de los autores. Pura Arqueología impresa de la cultura digital.

Lengua castellana y literatura

Firmar un contrato de trabajo es cada día más complicado. Aunque no hay soluciones sencillas al problema del desempleo, es posible que si se recuperan alternativas que en un principio se habían descartado, las oportunidades de encontrar trabajo aumenten. Estar dispuesto a desplazarse a otra localidad para trabajar es una de las claves para obtener un empleo .Cada día, más ciudadanos están dispuestos a dejar su residencia para firmar un contrato laboral. En muchos casos, trabajar en otro país permite mejorar el currículum y la propia formación. Otras veces es solo una forma más de ganar un sueldo. En el mismo sentido, no descartar otros oficios puede mejorar las posibilidades de firmar un contrato. Las bajas por maternidad, por enfermedad o los contratos de relevo por una jubilación anticipada son una oportunidad para entrar en cualquier empresa. En las zonas turísticas de costa, el número de puestos vacantes se multiplica durante el verano. Muchas ofertas de empleo provienen de las amistades y de los colegas con quienes se ha compartido vida laboral. Es conveniente que quien busca trabajo se lo comunique a sus compañeros y les indique si está abierto a campos en los que no había estado empleado hasta ahora. Quienes están en activo suelen tener más información sobre los futuros movimientos que habrá en la empresa y podrán alertar a antiguos colegas de posibles vacantes, e incluso, recomendarles para el puesto. Fundar una sociedad o hacerse autónomo es otra manera de conseguir trabajo. Con una idea, un plan de negocio y un capital para sacarlo adelante, el emprendedor puede autoemplearse en un negocio que le guste. Es, eso sí, la más arriesgada de las opciones.

Las otras miradas

La escritura de una reseña es un acto cognitivo complejo, y no se posee un saber innato sobre en qué consiste este género textual, para qué sirve, a quién se dirige, cómo es su estructura, cómo se redacta; a menudo tampoco se reconocen las dificultades y exigencias que demanda su producción. Ello implica que estudiantes y docentes, al igual que todo aquel interesado en actuar como reseñador, deben adquirir conocimientos y desarrollar habilidades no solo para describir la estructura y los propósitos de un libro, sino también para valorar positiva o negativamente su importancia e impacto en un contexto determinado. La reseña como género académico-científico despliega esta modalidad discursiva en toda su complejidad y variedad, en cuanto elemento que circula en los ámbitos académico y cultural, y que cumple la importante función de evaluar críticamente los aportes de los libros que se publican. La obra aborda los aspectos teóricos, formales y taxonómicos de la reseña, y ofrece estrategias pedagógicas para su aprendizaje, con la intención de que tenga utilidad para todo tipo de usuario, sea experto o aprendiz, estudiante universitario o, incluso, de secundaria.

Las TIC en la enseñanza de la Teoría de la Literatura

La gran creación de la inteligencia es expresar, decir, comunicarnos, escribir. Es el momento de la gran síntesis, de la puesta en limpio. La gran creación de la inteligencia es la capacidad de expresar, decir, comunicarnos, escribir. Es el momento de la gran síntesis, de la puesta en limpio. Lo que sentimos confusamente, lo que sabemos en términos generales, lo que nos ronda por la cabeza como una sospecha, un deseo o una premonición adquiere precisión y firmeza al enunciarse. Este es también un libro de magia, como La magia de leer. Trata de la transfiguración de la realidad. Lo que eran cosas, acontecimientos, pasiones, se transforma en palabras. ¿Puede haber magia más grande? En La magia de escribir nos acercamos a la inteligencia que crea mediante palabras y nos preguntamos: ¿Cómo podemos enseñar a escribir en la escuela, en la educación secundaria? ¿Cómo podemos los adultos aprender a escribir? También hemos entrado en el cuarto de trabajo de muchos escritores para descubrir sus secretos, los ocultos mecanismos de la creatividad. Hemos hecho de cronistas de lo maravilloso. Y, por último, hemos intentado hacer una pedagogía de la creación literaria. No se nos puede acusar de ser excesivamente humildes... José Antonio Marina y María de la Válgoma

Guía de premios y concursos literarios en España 2006-2007

Escritura e invención en la escuela es la reunión de artículos, conferencias y reseñas de Maite Alvarado. A modo de homenaje a la lúcida y brillante autora e investigadora se presentan en este libro sus ideas y propuestas acerca de la práctica de la escritura en la escuela y en la universidad. Para Alvarado el trabajo con la escritura en los ámbitos educativos se aleja de las nociones clásicas de «composición» o «monografía», cuyo único lector es el docente y la finalidad de la lectura no es otra que la corrección, y se acerca a su vez al concepto de «taller», que no plantea la enseñanza de la lengua escrita como la puesta en práctica de temas abstractos sino como un espacio de aprendizaje y juego a partir de consignas, una oportunidad de inventar desde lo conocido y de conjurar el temor a la página en blanco. En este libro, el lector podrá apreciar la investigación histórica y la experiencia práctica de Alvarado en relación con el estudio de la lengua y su trabajo incansable para despertar el interés de docentes y alumnos en la propia escritura. Porque así, nos dice, «la tarea misma de la escritura lleva al deseo y la necesidad de adquirir saberes imprescindibles para el dominio del código. Las normas que hacen al discurso escrito no serán vividas entonces como imposición, sino como necesidad en función de la efectividad del mensaje».

Curso de teoría y práctica del relato

The Role of Ecological Chemistry in Pollution Research and Sustainable Development

Sustainable Development has become the leading concept of the 21 century. It describes a development, which agrees with the needs of the present generation but does not endanger the chances of the coming generations to satisfy also their needs. "Sustainable development" has become an important general goal for all fields of life like economy, ecology and social balance. The development and shaping of our future has been discussed internationally like on the summits of the Conferences in Rio and in Johannesburg. But this is also a topic on national base in various countries. Leading authorities

in various fields of economy and politics have also accepted this concept. Although the concept of sustainable development has been generally accepted, there are still problems how to achieve and evaluate these general goals. It is clear that the definitions about the prime needs vary from man to man, from country to country and from continent to continent. But pollution does not respect national borders. Therefore, it is necessary to develop the politics of economy, ecology and social demands by a synergistic way that they are strengthened by each other. If it is not possible to stop tendencies, which threaten the future quality of life, the cost demands of societies will dramatically increase and negative tendencies will become irreversible.

Research Handbook on Fundamental Concepts of Environmental Law

The quality and the strength of an environmental legal system is a reflection of the conceptual foundations upon which it is constructed. The Research Handbook on Fundamental Concepts of Environmental Law illuminates key aspects of environmental governance through the lens of their underlying dimensions: for example, the form, structure and language of international, regional and national instruments; the function of norms, objectives and standards; and the relevance of economic analysis and of integrated policy formulation.

Designing Bio-Formulations Based On Organic Amendments, Beneficial Microbes And Their Metabolites

Area Studies - Regional Sustainable Development Review: Africa is a component of Encyclopedia of Area Studies - Regional Sustainable Development Reviews in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on Area Studies - Regional Sustainable Development Review: Africa discusses matters of great relevance to our world in general and to the African Continent in particular as it deals with topics such as: International Cooperation for Sustainable Development in Africa; Food Security in Africa: Challenges and Prospects; Combating Poverty in Africa; Demographic Dynamics and Sustainability in Africa; Protection and Promotion of Human Health in Africa; Strategies for Promoting Human Development in Africa; Integrating Environment into Decision-Making in Africa; The Planning and Management of Land Resources in Africa; Combating Desertification and Drought in Africa; Conservation of Biological Diversity in Africa; Ecotoxicology of Stable Pollutants in African Marine Ecosystems; Safe and Environmentally Sound Management of Radioactive Waste; Strengthening Business and Industry for Sustainable Development in Africa; Concepts and Trends in Environmental Education for Sustainable Development; International Institutional Arrangements; International Legal Instruments and Mechanisms; Agreements: Forestry Principles: Focus on the Congo Basin Rainforests; The Rio Declaration on Environment and Development; Peace, Security, and Sustainable Development in Africa; Literature and Culture - The Sustainability Connection from an African Perspective; History and Civilizations: Impacts on Sustainable Development in Africa; The Sustainable Development of Tourism in Africa; Environmentally Displaced People These two volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

Area Studies (Regional Sustainable Development Review): Africa - Volume II

Introduction to Sustainable Development is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on "Introduction to Sustainable Development implies processes of fundamental change in our social systems and institutions. The thrust of this change [entails] ... addressing the ... new global awareness that the earth is finite, and all of the planet's life support systems – including social and economic systems – are globally interconnected and interdependent." This volume is aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

Introduction to Sustainable Development - Volume I

Cholesterol: New Insights for the Healthcare Professional: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Diagnosis and Screening. The editors have built Cholesterol: New Insights for the Healthcare Professional: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Diagnosis

and Screening in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Cholesterol: New Insights for the Healthcare Professional: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Our Common Future

Advances in Renewable Energy and Sustainable Development focuses on cutting-edge research areas including renewable energy and sustainable development. As a leader in the global megatrend of science and technology innovation, China has been creating an increasingly open environment for science and technology innovation, increasing the depth and breadth of academic cooperation, and building an innovation community that benefits all people. These efforts make a new contribution to globalization and the building of a community for a shared future. The proceedings feature the most cutting-edge research directions and achievements related to Renewable Energy and Sustainable Development. Subjects in the proceedings include: Hydraulic Engineering Environmental Science and Environmental Engineering Energy Engineering and Energy Technologies Green Manufacturing Energy Policy and Economics Energy Security and Clean Use Geothermal Energy

Cholesterol: New Insights for the Healthcare Professional: 2013 Edition

This book examines how macro-fiscal policy can lead to gender-aware human development in an emerging economy like India, with special reference to gender budgeting. Integrating gender lens in macro-fiscal policies has been widely recognized in international and national policy making and budgeting. The book highlights the gender diagnosis—the measurement issues relate to construction of gender outcome variables; the statistical invisibility of unpaid care economy sector and how deficiency in public infrastructure can accentuate the private costs; the analytical link between gender outcome variables and macro-fiscal policy frameworks; the role and impact of fiscal transfers on gender equality outcomes at subnational levels; time series of gender budgets in India across sectors and its fiscal marksmanship; gender disaggregated public expenditure benefit incidence analysis to understand the distributional impacts of public spending on women across income quintiles and suggest policy alternatives. The book uses unique database—time use survey data and the disaggregated demand for grants, expenditure budgets using gender lens. The book employs case study, simple statistical tools for the analysis and econometric methodology.

Advances in Renewable Energy and Sustainable Development

This is an open access book. The 3rd International Conference on Sustainable Agriculture for Rural Development (ICSARD) 2022, which will be held on August 23, 2022 using zoom online platform. The 3rd ICSARD 2022 is organised by Faculty of Agriculture, Universitas Jenderal Soedirman. The topic, “Strengthening Sustainable Agriculture in the New Normal and Disruptive Technology Era”, including: Agrotechnology: Agroecology, Soil Science, Agronomy, Horticulture, Plant Protection, Plant Breeding and Biotechnology Food Science and Technology: Food Processing Technology, Food Microbiology, Food Chemistry, Food Biochemistry, Agro-Industrial Management, Food and Nutrition Agricultural and Biosystem Engineering: Farm Machinery, Precision Farming, Food Engineering, Instrumentation and Control in Biosystem Engineering, Bio-Environment Control and Management Engineering, Post-Harvest Handling and Processing Engineering, Renewable Energy, Agricultural Management and Information System Socio-Economics of Agriculture and Agribusiness Other topics related to sustainable agriculture

Fiscal Policy for Sustainable Development in Asia-Pacific

This edited volume analyzes cases of higher education programs engaging with sustainable development. Offering cases from across the globe that focus on the role of universities in promoting societal transformations and building sustainable futures, the volume specifically discusses how higher education institutions can educate for the Sustainable Development Goals (SDGs). As critical spaces for research, development, and innovation, higher education institutions are fundamental change agents for societal transformations. Their role in disseminating sustainability through different paths is undeniable, and it is worth discussing the dimensions that surround the concept of sustainability within

universities. Considering the role of policy, curriculum, practice, teaching, research, and development paths in universities, this book looks at the contributions of higher education sector to our vision of sustainable development. This publication offers readers a chance to look at different higher education institutions' engagement with sustainable development through political, managerial, curricular and practical steps.

Proceedings of the 3rd International Conference on Sustainable Agriculture for Rural Development (ICSARD 2022)

Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

Engagement with Sustainable Development in Higher Education

This book introduces readers to the latest research and findings from projects focusing on teaching education for sustainable development at universities. In particular, it describes practical experiences, outline courses, training schemes and other initiatives aimed at promoting better teaching on matters related to sustainable development at institutions of higher education. In order to meet the pressing need for publications to support sustainable development education, the book places special emphasis on state-of-the art descriptions of approaches, methods, initiatives and projects from around the world, illustrating how teaching education for sustainable development can be implemented at the international scale. The book represents a timely contribution to the dissemination of approaches and methods that may improve the way we perceive the importance of teaching education for sustainable development, as well as how we implement it.

The SAGE Encyclopedia of Communication Research Methods

Online education has become a prevalent means of program and course delivery, especially within teacher education programs. However, the lack of preparation in online design is concerning, especially in the field of teacher education where the focus is preparing preservice and practicing teachers to implement effective, evidence-based instructional strategies. *Effective Practices in Online Teacher Preparation for Literacy Educators* is an essential scholarly resource that shares innovative ideas for translating face-to-face reading/literacy specialist preparation into effective online instruction for courses in literacy education. Highlighting various topics such as instructional design, teacher education, and literacy assessment, this book is ideal for instructors, curriculum developers, instructional designers, IT specialists, education professionals, instructors, administrators, academicians, and researchers.

Teaching Education for Sustainable Development at University Level

Nanotechnology for Abiotic Stress Tolerance and Management in Crop Plants reviews the most recent literature on the role of nanomaterials in achieving sustainability in crop production in stressful environments. This book explores the adverse conditions caused by abiotic stress to crop plants, and the methods by which these conditions can be potentially overcome through developments in nanoscience and nanotechnology. Abiotic stresses such as drought, salinity, temperature stress, excessive water, heavy metal stress, UV stress etc. are major factors which may adversely affect the growth, development, and yield of crops. While recent research for ways of overcoming the physiological and biochemical changes brought on by these stresses has focused on genetic engineering of plants, additional research continues into alternative strategies to develop stress tolerant crops, including the use of nanoscience and nanotechnology. Providing an in-depth summary of research on nanomaterials and nano-based devices for field monitoring of crops, this book will serve as an ideal reference for academics, professionals, researchers, and students working in the field of agriculture, nanotechnology, plant science, material science, and crop production. Presents advancements in our understanding of molecular and physiological interactions between nanoparticles and crop plants Includes figures and illustrations to help readers visualize and easily understand the role of nanomaterials Serves as an ideal reference for those studying smart nanomaterials, biosensors, and nanodevices for real-time plant stress measurement

Effective Practices in Online Teacher Preparation for Literacy Educators

Sustainable development is a highly topical issue and is of critical importance to tourism as the environment is of utmost importance for the continued development and prosperity of the industry. There have been numerous texts written on sustainable tourism and the measures to mitigate and manage this but none which acknowledges Information and Communication Technologies (ICT) as a mechanism of doing so despite being an emerging area of research. ICT in this context refers to innovative tools which form an integrated system of software and networked equipment that facilitates data processing information sharing communication and the ability to search and select from an existing range of products and services for an organisation's benefits. Despite the symbiotic relationship, which exists between ICT and sustainable tourism, there has been little research, which has considered how the use of such technology can be used to make sustainable tourism development a more workable reality. This opportune book is the first to provide a focus on the interrelationship of these two important topics demonstrating their synergies and providing insight into a new and innovative approach to managing sustainable tourism development. It considers the use of technology to reduce the negative impacts of tourism from both the demand and supply side perspectives. A critical review of a range of cutting edge technologies used by tourists and businesses to assess their usefulness in managing sustainable tourism development from the macro to the micro level is also discussed. It further integrates examples and practical applications to show how ICT can be an invaluable mechanism in the management of sustainable tourism development. This cutting-edge volume provides a wealth of information on an important yet neglected subject. This book will be invaluable reading for students, researchers, academics and members of the tourism industry looking for new and innovative ways of fostering a more sustainable tourism industry.

Nanotechnology for Abiotic Stress Tolerance and Management in Crop Plants

This book gathers the proceedings of the 7th International Conference, with the theme "Culture and Tourism in a Smart, Globalized and Sustainable World," held on Hydra Island, Greece, on June 17–19, 2020, published with the support of the International Association of Cultural and Digital Tourism. Highlighting the contributions made by numerous writers to the advancement of tourism research, this book presents a critical academic discourse on sustainable practices in the smart tourism context, improving readers' understanding of, and stimulating future debates in, this critical area. In addition to the knowledge economy and the concept of smart destinations, the book addresses new modes of tourism management and development, as well as emerging technologies, including location-based services, the Internet of things, smart cities, mobile services, gamification, digital collections and the virtual visitor, social media, social networking, and augmented reality.

Information and Communication Technologies for Sustainable Tourism

Presentations at the workshop organized by the Indian Institute of Forest Management, Bhopal.

Culture and Tourism in a Smart, Globalized, and Sustainable World

This book presents a systematic view of the cooperative sector of the economy from the standpoint of sustainable development. On the one hand, the book reveals the consequences of business cooperation for the implementation of global sustainable development goals, primarily in terms of environmental protection and food security. On the other hand, the book defines the essence of sustainable development of the cooperative sector of the economy as a demonstrative economic practice that reflects the general state of socio-economic systems. Scientific, methodological, and applied recommendations for the systemic optimization of the management of the cooperative sector of the economy in the interests of simultaneously achieving its maximum positive impact on the implementation of sustainable development goals, as well as maintaining its stability are proposed. The book contains the best works based on the results of the International Scientific and Practical Conference "Cooperation and Sustainable Development", which was held on December 15-16, 2020. Its target audience is scientists studying processes of business structures cooperation, business entities carrying out cooperation, as well as public authorities, which will find guidelines for improving state regulation of the cooperative sector of the economy in this book.

Public People Private Partnership for Sustainable Forest Development

Environment, Energy and Sustainable Development brings together 242 peer-reviewed papers presented at the 2013 International Conference on Frontiers of Energy and Environment Engineering, held in Xiamen, China, November 28-29, 2013. The main objective of this proceedings set is to take the environment-energydevelopments discussion a step further. Volume 1 of the set is devoted to Energy, power and environmental engineering, and volume 2 to Control, information and applications. Environment, Energy and Sustainable Development is intended to serve as resource material for scientists working on related topics in many disciplines, including environmental science, management science, and energy science and policy analysis, as well as for industry professionals in the wide field of energy and environmental engineering.

Cooperation and Sustainable Development

Publisher Description

Environment, Energy and Sustainable Development

This volume contains the papers of the 1st Workshop IFToMM for Sustainable Development Goals (I4SDG), held online on November 25-26, 2021. The main topics of the workshop include the aspects of theory, design and practice of mechanism and machine science which are instrumental in reaching a sustainable development, such as: biomechanical engineering, sustainable energy systems, robotics and mechatronics, green tribology, computational kinematics, dynamics of machinery, industrial applications of mechanism design, gearing and transmissions, multibody dynamics rotor dynamics, vibrations, humanitarian engineering, and socio-technical systems for sustainable and inclusive development. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists, demonstrating that medical and service robotics will drive the technological and societal change in the coming decades.

Compendium of Land Use Laws for Sustainable Development

Accounting literature has viewed sustainability in terms of social, economic and environmental performances. There have been concerns that the relationship between sustainability, accounting and organizational performance cannot be explained unless we can deduce patterns of administrative behaviour that chronicle management practices. Ecology, Sustainable Development and Accounting argues that, despite the broader social and economic development dimensions of sustainability and the limitations of its extension to corporate and organizational behaviour; an ecological framework is capable of providing the overall societal and community chronologies that describe corporate sustainable operations. Drawing examples from international development and federal government organizations, this book documents the link between ecology, corporate sustainable development, and sustainability accounting and reporting. It draws together the literature from several disciplines to elaborate the contribution of the ecological approach to sustainable development in the accounting literature. This book will be of particular interest to students, academics and practitioners in the areas of environmental studies, ecological economics, sustainable development studies, and social and

environmental accounting. The sociological and anthropological perspectives make this book the first of its kind to apply the population ecology of sociology to both the sustainability and accounting literature.

Proceedings of I4SDG Workshop 2021

This book is based on the authors' significant practical experience partnering with scientists to develop strategies to accelerate the formulation (mixtures) development process. The authors not only explain the most important methods used to design and analyze formulation experiments, but they also present overall strategies to enhance both the efficiency and effectiveness of the development process.

Ecology, Sustainable Development and Accounting

This volume provides a framework for the doctrinal foundation of sustainable development as a principle of integration in international law.

Development, Livelihood and Empowerment: Towards a Sustainable Paradigm based on Micro-level Reflections of Decentralisation and People's Planning in Kerala

This book is reflective of a science-based vision of the future development paradigm of economic and social systems. It deals with the digitization as the technological basis for the future development of economic and social systems and presents a review of groundbreaking technologies and prospects for their application. The specific character of the industry and prospects for the application of digital technologies in business are analyzed. A rationale is provided for future prospects for the sustainable development of economic and social systems in a digital economy. The authors determine the process of the formation and development of the information-oriented society, social and educational aspects of the digitization, as well as the institutional framework of the digital future of social and economic systems. The book combines the best works following the results of the 12th International Research-to-Practice Conference "Artificial Intelligence: Anthropogenic Nature vs. Social Origin" that was held by the Institute of Scientific Communications (ISC) in cooperation with the Siberian Federal University and the Krasnoyarsk Regional Fund of support of scientific and scientific-technical activities on 5–7 December 2019, in Krasnoyarsk, Russia, as well as following the results of the 3rd International Research-to-Practice Conference "Economic and Social Systems: Paradigms for the Future" that was held by the ISC in cooperation with the Pyatigorsk State University on 5–6 February 2020. The target audience of the book consists of representatives of the academic community concerned with the future prospects for the development of economic and social systems, as well as economic agents engaged in the digitization of business processes, and representatives of public agencies regulating the development of business systems for their progressivity, sustainability and competitiveness.

Strategies for Formulations Development

The subjects of green energy and sustainability have never been more important, as governments around the world wrestle with the problem of how to protect the planet from the damage being caused to the environment by climate change. This book presents the proceedings of GEESD2023, the 4th International Conference on Green Energy, Environment and Sustainable Development, held in Mianyang, China from 15-17 June 2023 and online via Zoom. The conference aims to gather innovative academicians and industry experts in the fields of green energy, environment, and sustainable development in a common forum, providing a platform for the exchange of the latest research developments in related fields. This year, the call for papers attracted more than 280 submissions, 138 of which were accepted for inclusion in this collection. The process of evaluation and peer-review took place over six months and involved more than 100 TPC members and reviewers. The book is divided into 7 sections: green energy and systems; computer methods in the environment; chemistry and the environment; ecology and the rural environment; energy, environment and economy; environment and pollution; and water and mineral resources. Papers deal with the most up-to-date findings and technologies. The book provides a valuable overview of the latest research and developments and will be of interest to all those working in the fields of green energy and sustainable development.

Sustainable Development as a Principle of International Law

This book examines the international experience with sustainable development since the concept was brought to world-wide attention in Our Common Future, the 1987 report of the World Commission on Environment and Development. Scholars from a variety of disciplinary backgrounds engage with three

critical themes: negotiating environmental limits; equity, environment and development; and transitions and transformations. In light of the 2030 Sustainable Development Goals recently adopted by the United Nations General Assembly, they ask what lies ahead for sustainable development.

Socio-economic Systems: Paradigms for the Future

In recent years, much work has been done in formulating and clarifying the concept of sustainable development and related theoretical and research issues. Now, the challenge has shifted to designing and stimulating processes of effective planning and decision-making, at all levels of human activity, in such a way as to achieve local and global sustainable development. Information technology can help a great deal in achieving sustainable development by providing well-designed and useful tools for decision makers. One such tool is the decision support system, or DSS. This book explores the area of DSS in the context of sustainable development. As DSS is a very new technique, especially in the developing world, this book will serve as a reference text, primarily for managers, government officials, and information professionals in developing countries. It covers the concept of sustainable development, defines DSS and how it can be used in the planning and management of sustainable development, and examines the state of the art in DSS use. Other interested readers will include students, teachers, and analysts in information sciences; DSS designers, developers, and implementors; and international development agencies.

Green Energy, Environment and Sustainable Development

This book presents papers from the 10th Applied Research Conference in Africa (ARCA), showcasing the latest research on education and inclusive, safe, resilient, and sustainable communities. The conference is focused on applied research discussion and its dissemination, developing understanding about the role of research and researchers in the development of the continent. Education is a key driver to transform lives, build peace, eradicate poverty and drive sustainable development in Africa. Researchers face large challenges to making a meaningful contribution to the development of Africa. It is a continent where research can at time be not viewed directly related to development. The aim of the Applied Research Conference in Africa is to provide a platform for capacity building and networking among researchers in Africa. The proceedings is focussed on applied research, its discussion and dissemination and will be of interest to researchers, professors, graduate students, policymakers and professionals in industry.

Hydrology, Water Resources, and Ecosystem Sustainable Development

Today, the pressure on healthcare costs and resources is increasing, and especially for biopharmaceuticals that require parenteral administration, the inherent complex and invasive dosing procedure adds to the demand for efficient medical management. In light of the COVID-19 pandemic the value of drug delivery technologies in enabling a flexible care setting is broadly recognized. In such a setting, patients and their caregivers can choose the place of drug administration based on individual preferences and capabilities. This includes not only dosing in the clinic but also supervised at-home dosing and self-administration for eligible patients. *Formulation and Device Lifecycle Management of Biotherapeutics: A Guidance for Researchers and Drug Developers* covers the various aspects of improving drug delivery of biological medicines with the ultimate goal to reduce dosing complexity associated with parenteral administration and, thus, enhance patient experience and drug administration-related healthcare capacity. The target audience are multidisciplinary researchers and drug developers in the pharmaceutical industry, biotech companies, and academia involved in formulation and device development. This includes pharmacology and medical experts in charge of generating nonclinical and clinical data to support approval of novel dosing regimens, and drug delivery scientists and engineers responsible for technical particulars of product optimizations. Moreover, professionals in market access and commercial functions are expected to benefit from the discussions about the impact of patient and healthcare provider needs and country-specific reimbursement models on realizing a truly convenient and cost and resource efficient drug delivery solution. Summarizes formulation and device lifecycle management activities that enable customer-centric and sustainable drug delivery for biotherapeutics Describes the pharmacokinetic-based clinical development pathway for subcutaneous dosing alternatives to established intravenous formulations for monoclonal antibodies Details established clinical development pathways supporting the approval of automated subcutaneous injection devices and proposes novel concepts Discusses how to realize home- and self-administration of biotherapeutics in cancer care Highlights aspects of multidisciplinary formulation and device lifecycle management that

can be leveraged across different disease areas and introduces a decision architecture on when and how drug developers should embark into related development activities

What Next for Sustainable Development?

This volume deals with land degradation, which is occurring in almost all terrestrial biomes and agro-ecologies, in both low and high income countries and is stretching to about 30% of the total global land area. About three billion people reside in these degraded lands. However, the impact of land degradation is especially severe on livelihoods of the poor who heavily depend on natural resources. The annual global cost of land degradation due to land use and cover change (LUCC) and lower cropland and rangeland productivity is estimated to be about 300 billion USD. Sub-Saharan Africa (SSA) accounts for the largest share (22%) of the total global cost of land degradation. Only about 38% of the cost of land degradation due to LUCC - which accounts for 78% of the US\$300 billion loss – is borne by land users and the remaining share (62%) is borne by consumers of ecosystem services off the farm. The results in this volume indicate that reversing land degradation trends makes both economic sense, and has multiple social and environmental benefits. On average, one US dollar investment into restoration of degraded land returns five US dollars. The findings of the country case studies call for increased investments into the rehabilitation and restoration of degraded lands, including through such institutional and policy measures as strengthening community participation for sustainable land management, enhancing government effectiveness and rule of law, improving access to markets and rural services, and securing land tenure. The assessment in this volume has been conducted at a time when there is an elevated interest in private land investments and when global efforts to achieve sustainable development objectives have intensified. In this regard, the results of this volume can contribute significantly to the ongoing policy debate and efforts to design strategies for achieving sustainable development goals and related efforts to address land degradation and halt biodiversity loss.

Decision Support Systems for Sustainable Development

Endorsed by The International Ecotourism Society, Sustainable Tourism & The Millennium Development Goals: Effecting Positive Change demonstrates how ecotourism and sustainable tourism can assist in supporting and meeting the goals set forward by the Millennium Development Goals (MDG) and how it can foster a global partnership for development. The text discusses how ecotourism and sustainable tourism can assist in supporting and meeting the MDG by drawing on case studies and examples. The final summary chapter discusses how ecotourism and sustainable tourism can assist in supporting and meeting the MDG by 2015 and identifies the challenges and goals that need to be considered in the future. In this edition you will find: - Historical perspective of the development of ecotourism and sustainable tourism - The Millennium Development Goals defined - Overview of how ecotourism and sustainable tourism can assist in meeting the goals of the MDG - Engaging case studies and examples to reinforce the concept

Sustainable Education and Development – Making Cities and Human Settlements Inclusive, Safe, Resilient, and Sustainable

International Sustainable Development Law is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on International Sustainable Development Law reflects on the rights and duties of states and other actors in the development process. The chapters range from International Development Law standard applications of economic theory to more radical approaches. These three volumes are aimed at the following five major target audiences: University and College Students Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers, NGOs and GOs.

Formulation and Device Lifecycle Management of Biotherapeutics

Systems Engineering and Management for Sustainable Development is a component of Encyclopedia of Technology, Information, and Systems Management Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. This theme discusses: basic principles of systems engineering and management for sustainable development, including: cost effectiveness assessment; decision assessment, tradeoffs, conflict resolution and negotiation; research and development policy; industrial ecology; and risk management strategies

for sustainability. The emphasis throughout will be upon the development of appropriate life-cycles for processes that assist in the attainment of sustainable development, and in the use of appropriate policies and systems management approaches to ensure successful application of these processes. The general objectives of these chapters is to illustrate the way in which one specific issue, such as the need to bring about sustainable development, necessarily grows in scope such that it becomes only feasible to consider the engineering and architecting of appropriate systems when the specific issue is imbedded into a wealth of other issues. The discussions provide an illustration of the many attributes and needs associated with the important task of utilizing information and knowledge, enabled through systems engineering and management, to engineer systems involving humans, organizations, and technology, in the support of sustainability. These two volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

Economics of Land Degradation and Improvement – A Global Assessment for Sustainable Development

The Enhancing Resources and Increasing Capacities of Poor Households Towards Elimination of their Poverty (the ENRICH) programme is being implemented by Palli Karma-Sahayak Foundation (PKSF), which is a government-established Foundation and implements its programmes through Partner NGOs. The efforts are concerned with the perspective of eradicating poverty, aiming at enabling individuals to live a life that is humanly dignified. In doing so, the ENRICH programme focuses on creating opportunities for them to exercise freedom in determining their choices. The approach based on this understanding, i.e. poverty reduction/elimination and economic improvement strategies, coupled with interventions that ensure access to universal human rights, should promote freedom of choice leading to a dignified life and has shaped the programme contents and implementation framework. The ENRICH programme has been conceptualized and promoted by the current Chairman of PKSF, Dr. Qazi Kholiquzzaman Ahmad, who was appointed to the position in November 2009. In essence, the ENRICH programme is innovative, integrated, human-centred, taking into consideration the multidimensionality of human life and living, involving socio-economic and environmental dimensions. It focuses on human capability, both individual and collective and social capital formation to facilitate the way forward, the ultimate goal being humanly dignified living of all those who are deprived of this fundamental call of humanity.

Sustainable Tourism & the Millennium Development Goals

Sustaining University Program Research
