Intro

Separate the case from the back of the tablet using a prying tool

Don't remove the case yet, as first you need to disconnect 3 ribbon cables connecting the screen to the motherboard

Now you can disconnect the 3 screen assembly ribbon cables

Disconnect these 2 sensor cables

Remove the screw holding in the I/O to motherboard ribbon cable, and then disconnect and remove the ribbon cable

Disconnect this small cable next to the windows button
Disconnect the red, blue, grey and 2 black antenna wires
Disconnect this VO to motherboard cable
Disconnect the 2 small pen detector and speaker cables
Disconnect the camera connector from the motherboard and remove the camera board
Disconnect the cable we disconnected earlier from the motherboard along with the DC jack connector
Remove the screw holding in the DC jack
Lift up the bracket and disconnect the small circuit board next to the DC jack, then remove the DC jack itself
Remove the motherboard screws in blue and battery screws in red
You should now be able to remove the motherboard
Disconnect the right side speaker cable
screws from the I/O board
Remove the single screw to take out the solid state hard drive
Remove the single screw to remove the LAN (wifi) card
screw to take of the heatsink and fan
Use a prying tool to separate the bottom from the top
First, disconnect the battery cable
screws and then the battery
Disconnect the 2 keyboard and I trackpad ribbon cables
Disconnect these 2 docking data cables
Remove these 2 board screws
After removing the LED wire from the right side, you should be able to remove the board
