111.M.285 Reel 1

PEACE TIME ACTIVITIES OF THE

The Chemical Warfare Service chemists are experts in toxicological studies and probably know more exactly the specific effects of highly poisonous compounds than any other organization in the world. They are applying this knowledge to the eradication or control of many economic pests whose annual destruction totals hundreds of millions

The boring head of the Teredo

The palette of the Teredo

At Edgewood Arsenal. Impregnating marine piling with toxic compounds to prevent Teredo attack

The estimated life of these piles when Impregnated with the poisonous compounds developed by the Chemical Warfare Service is thirty years

This piling, treated by a CHEMICAL WARFARE SERVICE process remains perfectly sound after 14 months exposure to the borers

Laying up ships to remove barnacles would be avoided if a satisfactory anti-fouling paint were available

Marine growth on U. S. Destroyer 116 after 13 months exposure.

Marine growth on hub of starboard propeller U. S. Destroyer 116

On request of the NAVY which provided funds for the research the Chemical Warfare Service has developed an anti-fouling paint for ship bottoms

During the war, the men in the gassed areas at the front, were practically immune from the "flu."

Summary of 1275 cases treated at Washington with chlorine gas.

Chlorine gas chamber.
