Gone, But Not Forgotten

· In Portland, Oregon, the wives of several prominent businessmen have disappeared without a trace, leaving behind only a black rose and a note with a simple message: "Gone, But Not Forgotten." · An identical series of disappearances occurred in Hunter's Point, New York, ten years ago—but the killer was caught, the case was closed and the special "rose killer" task force was disbanded. · Betsy Tannenbaum, a Portland wife and mother who has gained national recognition as a feminist defense attorney, is retained by multimillionaire Portland developer Martin Darius—for no apparent reason. · Nancy Gordon, a homicide detective for the Hunter's Point Police Department and an original member of the "rose killer" task force, hasn't slept a full night in ten years, haunted by nightmares of a sadistic killer who, she swears, is still out there. . . . Alan Page, the Portland district attorney, trying to make sense of the sudden series of disappearances, opens his front door one evening to find Nancy Gordon on his doorstep—determined to tell him a story he won't soon forget. · Across the country, in Washington, D.C., the President of the United States has just selected United States Senator Raymond Colby to be the next Chief Justice of the Supreme Court. In a private meeting, Colby assures the President there are no skeletons in his closet. Complex, utterly compelling, and brilliantly executed, GONE, BUT NOT FORGOTTEN is a book that truly lives up to its extraordinary advance praise: Once begun it simply cannot be put down.

Gone But Not Forgotten

Gone but Not Forgotten is the first of a historical fiction trilogy set in America and Europe from 1914 to 1918. It chronicles the tale of the Gilded Age of pageantry through the end of the Great War. It is the story of the Champions, the Wagners and the Sterns, an epic saga of their lives, trials, and tribulations. The story opens at an outdoor wedding in fashionable Newport, Rhode Island. The heroines

are beautiful twin sisters, Veda and Rose Champion. Veda is the spoiled American debutante with an iron will. Rose is the gentler beauty and is passively strong. Hans Wagner, the male protagonist, is a German immigrant who comes to America with the quest to live his dream. His best Jewish friend, Rudolph Stern, also arrives from Germany to study medicine. The toils of the Great War halt the hopes of both while ushering in a series of tragedies for the Champion family, including the sinking of the Lusitania, the death of the twins' brother, Marius Champion, on the battlefields of France, and the vicious murder of their grandparents in Verdon. The novel will be followed by two others, spanning 1918-2000. The trilogy is a portrait of the most significant events in the twentieth century.

There is also space throughout this book to write your own reflective thoughts.

Without giving too much away, I'll tell you a little about my book. Picture this: a young couple falls in love and marries. They experience a little heartache and soon start a family. Their love is strong, and life is wonderful until that fateful day that everything changes. Her fault? Maybe. His fault? Possibly. Does it matter? How do they cope? More tragedy befalls the couple. They endure it though, and eventually, life is great again until the unthinkable happens. How is it possible? Will there be peace? Will they have a happy ending or a new beginning? Perhaps . . . but then again, perhaps not.

Stories offering insight into the lives of 200 of the 72,000 men who went missing in action at the Battle of the Somme in France during WWI. The Thiepval Memorial commemorates over 72,000 men who have no known grave; all went missing in the Somme sector during the three years of conflict that finally ended on 20 March 1918. The book is not a military history of the Battle of the Somme, it is about personal remembrance, and features over 200 fascinating stories of the men who fought and died and whose final resting places have not been identified. Countries within the UK are all well represented, as are the men whose roots were in the far-flung reaches of the Empire and even foreigners. The stories that lie behind each of the names carved into the memorial panels illustrate the various backgrounds and differing lives of these men. The diverse social mix of the men young and old, gentry to laborers, actors, artists, clergy, poets, sportsmen, writers, and more is something that stands out in the book. Despite their social differences, what is most apparent is the wide impact of the loss for over fifty widows, around 100 children left fatherless and over thirty families mourning more than one son. Ranks from private to lieutenant colonel are expertly covered, as well as all seven winners of the Victoria Cross. These captivating stories stand as remembrance for each man and to all the others on the memorial. They are meticulously organized so the book can be of use to visitors as they walk around the memorial; as a name is viewed, the story behind that name can be read. Praise for *Missing but Not Forgotten* "This book specifically explores what is known about the lives and service of 200 of those men. The men selected aptly represent the wide variety of those who fought in the epic conflict, from laborers to gentry, from humble Tommies to VC recipients. Photographs, diary entries and other accounts bring at least a few of the sobering ranks of names to life." —Your Family History

The British airliners we see today in our airports are the result of numerous takeovers and mergers, involving large and small companies. This book covers some of these airlines that have ceased operating since 1946: some collapsed because of financial difficulties, some were taken over by larger airlines, and some ceased operating altogether. In post-war Britain, several small airlines were founded and equipped with surplus military aircraft, the most popular being the Douglas Dakota. The book is a guide to each airline, accompanied by a brief historical account, and interesting images of the aircraft in their distinctive colour schemes. The airlines covered are a selection of large and small aircraft, who flew international and regional routes, as well as airlines involved in inclusive tours business.

Gone but Not Forgotten

"This book examines the ways that Atlantans have remembered the Civil War since 1865. During the Civil War, Atlanta became the second most important city in the Confederacy, after Richmond. Since the end of the war, Atlanta's civic and business leaders promoted its image as a 'Phoenix City' rising from the ashes of General William T. Sherman's wartime destruction. According to this carefully constructed view, Atlanta respects its Confederate past while also moving forward with business growth and 'progress.' Yet in spite of its economic success since 1865, Atlanta is a city where the meaning of the Civil War continues to be debated and contested, where whites and blacks remember the war in different and conflicting ways. Periodically, racial tension has marred the city's reputation and its

progressive spirit. Today, Atlanta (and the South) have achieved reconciliation with the North but debate over Civil War memory is ongoing"--

With hundreds of rare pictures, this award-winning volume captures the many architectural gems that North Carolina's Port City has lost from the colonial period to the present day. Some were lost to natural disasters like fires and hurricanes. Others fell victim to the "progress" of Urban Renewal or the sometimes short-sightedness of private developers. Regardless of how or why these buildings were torn down and lost, they represent pages ripped from the community's collective history. Preservationist Beverly Tetterton has assembled a collection of lost places that serve as cautionary tales for modern planners and citizens.

Listening to the Bees is a collaborative exploration by two writers to illuminate the most profound human questions: Who are we? Who do we want to be in the world? Through the distinct but complementary lenses of science and poetry, Mark Winston and Renée Saklikar reflect on the tension of being an individual living in a society, and about the devastation wrought by overly intensive management of agricultural and urban habitats. *Listening to the Bees* takes readers into the laboratory and out to the field, into the worlds of scientists and beekeepers, and to meetings where the research community intersects with government policy and business. The result is an insiders' view of the way research

is conducted—its brilliant potential and its flaws—along with the personal insights and remarkable personalities experienced over a forty-year career that parallels the rise of industrial agriculture.
