Beyond Alterity

A sweeping look at the complicated concept and history of Indigeneity in Mexico--Provided by publisher.

Beyond Alterity: Contemporary Indian Fiction and the Neoliberal Script

Beyond Alterity contests a core tendency in postcolonial studies as well as emerging critiques of neoliberalism—to assume that nations of the Global South are categorically distinct from their counterparts in the North and that they provide an alternative, or even an antidote, to the competitive and individualistic cultures of the advanced capitalist world. Through a textured analysis of cultural production from contemporary India, Shakti Jaising argues that neoliberal capitalism has produced significant continuities in class dynamics and subjective experience across the North-South divide—continuities that are at least as worthy of our consideration as differences arising from colonialism and its aftereffects. The book engages an array of political, economic, and cultural narratives, while focusing in particular on widely circulating Indian English-language novels and their audio-visual adaptations that demonstrate the growing currency of a neoliberal script extolling values like privatization and deregulation as conduits to both individual growth and national development, as well as freedom from poverty. With their potent enactments of personal and national maturation, contemporary Indian novels and films offer striking illustrations of the imaginative means by which the neoliberal script proliferates— even as economic precarity and inequality worsen in India, much like elsewhere in the world. Whereas literary scholars tend to approach the Indian English novel as an exemplar of resistance from the formerly colonized world, Beyond Alterity contends that far from inevitably modelling resistance, this genre's contemporary examples instead encapsulate the challenges of disentangling literature from the all-pervasive logics and narratives of neoliberal capitalism.

Beyond Alterity, Us

We don't want to write about us with the writer's logic. We want to write about us with emotion. Without rules, without looks from the outside, without formal judgements, without expectations. We want our words to be like a shower, an immersion letting go anything that isn't needed but to caress the soul,

a cleaning emotional flow bringing out the truth, simple, untouched. We wish only little droplets to be caught on our readers, changing their tissues and making their hearts permeable, leaving a nice scent. We want words to be ethereal, warm, fluent, generous, clean. Authentic, like water. We want to make everything available. Our silences, waves, words, dreams that have guided and supported us. Poems, our own and those we acknowledge. Somersaults and jumps, setbacks, ghosts, leaps. Hugs, rest, joy, enthusiasm and laughter. Mutual understanding. Intimacy. Bond. Life. We want to write about how we live each other, in the only possible way when we touch the truth of what we are, with love.

Beyond Alterity

With the economic and political rise of East Asia in the second half of the twentieth century, many Western countries have re-evaluated their links to their Eastern counterparts. Thus, in recent years, Asian German Studies has emerged as a promising branch within interdisciplinary German Studies. This collection of essays examines German-language cultural production pertaining to modern China and Japan, and explicitly challenges orientalist notions by proposing a conception of East and West not as opposites, but as complementary elements of global culture, thereby urging a move beyond national paradigms in cultural studies. Essays focus on the mid-century German-Japanese alliance, Chinese-German Leftist collaborations, global capitalism, travel, identity, and cultural hybridity. The authors include historians and scholars of film and literature, and employ a wide array of approaches from postcolonial, globalization, media, and gender studies. The collection sheds new light on a complex and ambivalent set of international relationships, while also testifying to the potential of Asian German Studies.

Being and Learning

"Education is not an art of putting sight into the eye that can already see, but one of turning the eye towards the proper gaze of Being. That's what must be managed!" Plato insists. This claim is the take-off point for Eduardo Duarte's meditations on the metaphysics and ontology of teaching and learning. In *Being and Learning* he offers an account of learning as an attunement with Being's dynamic presencing and unconcealment, which Duarte explores as the capacity to respond and attend to the matter that stands before us, or, in Arendtian terms, to love the world, and to be with others in this world. This book of 'poetic thinking' is a chronicle of Duarte's ongoing exploration of the question of Being, a philosophical journey that has been guided primarily through a conversation with Heidegger, and which also includes the voices of Plato, Aristotle, Heraclitus, Nietzsche, as well as Lao Tzu and the Buddha, among others. In *Being and Learning*, Duarte undertakes a 'phenomenology of the original': a writing that consciously and conspicuously interrupts the discursive field of work in philosophy of education. As the late Reiner Schurmann described this method: "it recalls the ancient beginnings and it anticipates a new beginning, the possible rise of a new economy among things, words and actions." *Being and Learning* is a work of parrhesia: a composition of free thought that disrupts the conventional practice of philosophy of education, and thereby opens up gaps and spaces of possibility in the arrangement of words, concepts, and ideas in the field. With this work Eduardo Duarte is initiating new pathways of thinking about education.

Cultures of Mobility and Alterity

Advancing public dialogue surrounding the issues of migrants and refugees, the volume explores the dynamic representations of the recent movement of people from and through the Balkans. It investigates how people within the Balkans view their others, how the West regards the Balkans, and how emigrants from the Balkans reflect upon their experiences as members of cosmopolitan diasporic communities. Highlighting latent tensions between center and periphery and furthering the discussion of racialization related to the Balkans, the collection exposes contradictions in social values, which give rise to national anxieties. Approaching mobility from multiple disciplines, the volume examines several instances of border flows in media, literature, and culture in general, flows of ideas and people. To analyze mobility to, from, and in the Balkans requires one to address the issue of difference, otherness, and race as it relates to South East Europe and as it is understood and reproduced in both transnational and local forms. The racialized category of "migrant" necessitates an understanding of how transnational concepts of race translate into constructs of whiteness and blackness and inform subject positions of the individual and motivate discourses of racialization within communities.

Poetic Obligation

Since at least the time of Plato's Republic, the relationship between poetry and ethics has been troubled. Through the prism of what has been called the "new" ethical criticism, inspired by the work of Emmanuel Levinas, G. Matthew Jenkins considers the works of Objectivists, Black Mountain poets, and Language poets in light of their full potential to reshape this ancient relationship. American experimental poetry is usually read in either political or moral terms. Poetic Obligation, by contrast, considers the poems of Louis Zukofsky, Charles Reznikoff, George Oppen, Edward Dorn, Robert Duncan, Susan Howe, and Lyn Hejinian in terms of the philosophical notion of ethical obligation to the Other in language. Jenkins's historical trajectory enables him to consider the full breadth of ethical topics that have driven theoretical debate since the end of World War II. This original approach establishes an ethical lineage in the works of twentieth-century experimental poets, creating a way to reconcile the breach between poetry and the issue of ethics in literature at large. With implications for a host of social issues, including ethnicity and immigration, economic inequities, and human rights, Jenkins's imaginative reconciliation of poetry and ethics will provide stimulating reading for teachers and scholars of American literature as well as advocates and devotees of poetry in general. Poetic Obligation marshals ample evidence that poetry matters and continues to speak to the important issues of our day.

Beyond Words

This is a book about reading, or rather about the moment when the usual frames of interpretation no longer apply. That is where the Othering Excursion begins. Through disruptive forms of rhetoric, writers discard the structures and norms of the cultural system and use the disorders thus created to suggest what lies beyond it. Cultivating distortion, conceptual blocks and chaotic constructions, their texts flout normal processes of interpretation. Whereas traditional approaches often overlook these disorders or treat them as a form of informational noise, in this study they become the basis of critical reflection. Harding and Martin elaborate a critical concept and a range of reading methods to deal with what seem to be zones of obscurity in literary texts. Cutting across boundaries of race, ethnicity and gender, they treat a wide range of poetry and short fiction that challenges traditional interpretations. Giving new readings of canonical texts, the book examines works by American authors that are widely read and taught, like Elizabeth Bishop, A.R. Ammons, Don DeLillo, Leslie Marmon Silko, or Sandra Cisneros. At the same time, it includes studies of emerging writers like Kate Braverman, Dan Chaon, or Chase Twichell. "There is something deeply moving in witnessing the birth of a new concept. And indeed Wendy Harding and Jacky Martin's concept of "Othering" is a welcome addition to an already crowded field, where concepts like "difference", "alterity" or "hybridity" are firmly established. But the new concept is more than an addition, it is more in the nature of a substitution, as it aims to replace the now exhausted concepts, allows the authors to avoid the trivialities of a criticism based on gender and race, and, by focusing on form and language (or style), to recapture the now largely lost intuitions of close reading. This combination of close reading and a firm grasp of theory is one of the attractions of the book. I am impressed by their mastery of the intricacies of theory and the range of their literary corpus (in terms both of genres and texts). I have no doubt that their book will be a major contribution to the renewal of the study of contemporary American literature." —Professor Jean-Jacques Lecercle, University of Nanterre, Paris In Beyond Words, Wendy Harding and Jacky Martin offer "a new attitude to reading" that approaches true diversity by ignoring trends toward traditional groupings of authors by race and gender and instead examining, democratically, recent American literature in terms of its unique and peculiar achievements. In choosing texts that employ "the rhetoric of the inexpressible," the authors have identified "Othering" as the common thread running through short fiction and poetry by authors as varied as Allen Ginsberg, Raymond Carver, Sandra Cisneros, Adrienne Rich, and Li-Young Lee. In transliterating the language of the ineffable and unspoken, Beyond Words employs its superbly original methodology toward unfolding previously inaccessible layers of meaning and provoking a fuller understanding of the creative process and its cultural milieu. —Michael Waters, Professor of English at Salisbury University, USA "A germinal study from an "other" (in this case, European) perspective of an at once idiosyncratic and indicative range of American texts with a view of how they, themselves, encounter the unexamined and unexpected." —Marilyn Hacker, Professor at City College of New York and CUNY Graduate Center "Invigorating and original, Beyond Words: The Othering Excursion in Contemporary American Literature challenges conventional ways of approaching literary texts. Eschewing binaries, Wendy Harding and Jacky Martin propose a new approach to reading

and analyzing the heterogeneity of recent American literature. By juxtaposing both well-known and less-familiar poetry and short fiction by authors as various as Gayl Jones, John Ashbery, Russell Banks, and Marilyn Nelson, Harding and Martin consider a stimulating variety of texts that cross aesthetic, generic, canonical and political boundaries. Harding and Martin's polysemous approach to literary texts, a procedure they call "othering," is groundbreaking and enlightening. *Beyond Words* provides rich insights for scholars and general readers alike. Harding and Martin's new mapping of American literature is a remarkable achievement, certain to provoke dialogue for decades to come." —Sue Standing, Jane Ruby Professor of English, Wheaton College, Norton, Massachusetts "In this new book with the apt title *Beyond Words: the Othering Excursion in Contemporary American Literature*, Wendy Harding and Jacky Martin promise to generate intense conversation about their conceptual approach to reading canonical, as well as newer texts in late twentieth century American literature. *Beyond Words* favors a shift in thinking about all texts that defy conventional analysis, and it resists the cleavages that it finds in unsatisfactory terms like "alterity" and "hybridity" conceived to account for differences in gender-racial, ethnic, and class contexts. Re-conceiving Othering as a corroborative and complementary methodology rather than a splintered one, *Beyond Words* invites an illuminating, comprehensive analysis of literary production in late twentieth century American texts." —Helena Woodard, Associate Professor of English, Department of English, University of Texas at Austin, USA

Beyond Scotland

Scottish creative writing in the twentieth century was notable for its willingness to explore and absorb the literatures of other times and other nations. From the engagement with Russian literature of Hugh MacDiarmid and Edwin Morgan, through to the interplay with continental literary theory, Scottish writers have proved active participants in a diverse international literary practice. Scottish criticism has, arguably, often been slow in appreciating the full extent of this exchange. Preoccupied with marking out its territory, with identifying an independent and distinctive tradition, Scottish criticism has occasionally blinded itself to the diversity and range of its writers. In stressing the importance of cultural independence, it has tended to overlook the many virtues of interdependence. The essays in this book aim to offer a corrective view. They celebrate the achievement of Scottish writing in the twentieth century by offering a wider basis for appreciation than a narrow idea of 'Scottishness'. Each essay explores an aspect of Scottish writing in an individual foreign perspective; together they provide an enriching account of a national literary practice that has deep, and often surprisingly complex, roots in international culture.

Gender, Alterity and Human Rights

Human rights are axiomatic with liberal freedom. Yet more rights for women, sexual and religious minorities, has had disempowering and exclusionary effects. Revisiting campaigns for same-sex marriage, violence against women, and Islamic veil bans, *Gender, Alterity and Human Rights* lays bare

how human rights emerge as a project of containment and unfreedom rather than meaningful freedom. Kapur provocatively argues that the futurity of human rights rests in turning away from liberal freedom -and towards non-liberal registers of freedom

Lost Beyond Telling

In seeking to give voice to absent things or lost experiences, Richard Stamelman says, modern poetry attempts to give absence a shape. Loss, in his view, is both the cause and the subject of the modern poem. Fittingly, in *Lost beyond Telling* he formulates and develops what he calls a poetics of loss, with which he frames his treatment of modern French poetry.

Beyond the Living Dead

In 1968, George Romero's film *Night of the Living Dead* premiered, launching a growing preoccupation with zombies within mass and literary fiction, film, television, and video games. Romero's creativity and enduring influence make him a worthy object of inquiry in his own right, and his long career helps us take stock of the shifting interest in zombies since the 1960s. Examining his work promotes a better understanding of the current state of the zombie and where it is going amidst the political and social turmoil of the twenty-first century. These new essays document, interpret, and explain the meaning of the still-budding Romero legacy, drawing cross-disciplinary perspectives from such fields as literature, political science, philosophy, and comparative film studies. Essays consider some of the sources of Romero's inspiration (including comics, science fiction, and Westerns), chart his influence as a storyteller and a social critic, and consider the legacy he leaves for viewers, artists, and those studying the living dead.

Ethics, Politics, and Difference in Julia Kristeva's Writing

A valuable intervention in Kristevan scholarship and a significant and exciting contribution in its own right to post-structuralist discussions of ethical and political agency and practice. Contributors: Judith Butler, Tina Chanter, Marilyn Edelstein, Jean Graybeal, Suzanne Guerlac, Alice Jardine, Lisa Lowe, Noelle McAfee, Norma Claire Moruzzi, Kelly Oliver, Tilottma Rajan, Jacqueline Rose, Allison Weir, Mary Bittner Wiseman, Ewa Ziarek

In-visibility

The content of the book reconsiders the relation between visibility and transcendence. The focus is especially on the contribution to this issue from the theological tradition in protestant Europe between the 16th and the 21st Centuries. In the book a thematically broad field is covered embracing more than five centuries and a plurality of methods drawn from theology, philosophy, and the history and theory of art. The book is divided into five sub-themes: In the first and more fundamental part, 'The phenomenology of in-visibility', questions underlying the other four themes are sought defined or narrowed down. Here the modes of appearing/revealing or hiding of phenomena are reflected. In the second section of the book dealing with 'Language as a mode of revealing and hiding' the specific role of verbal expressions understood in a very broad sense is at the core: What is the fundamental understanding and use of language, when speaking of the ineffable? The third section about 'Human existence between visibility and invisibility' focuses on theological anthropology: its features and norms. The ambiguity of anthropological categories such as faith, rationality, imagination, memory and emotion play a prominent role in this context. The fourth section concerning 'The manifestation of a 'beyond' in the arts' investigates transcendence in the arts. What are the theological discourses behind the religious uses of the different artistic media (i.e. images, music, liturgical inventory, architecture)? Finally in the fifth section concerning 'Visible community and invisible transcendence' one finds contributions working with the idea of 'vicarious representation'.

Beyond Imperial Aesthetics

Observing that the division between theory and empiricism remains inextricably linked to imperial modernity, manifest at the most basic level in the binary between "the West" and "Asia," the authors of this volume re-examine art and aesthetics to challenge these oppositions in order to reconceptualize

politics and knowledge production in East Asia. Current understandings of fundamental ideas like race, nation, colonizer and the colonized, and the concept of Asia in the region are seeped with imperial aesthetics that originated from competing imperialisms operating in the twentieth and twenty-first centuries. Such aesthetics has sustained both colonial and local modes of perception in the formation of nation-states and expanded the reach of regulatory powers in East Asia since 1945. The twelve thought-provoking essays in this collection tackle the problematics that arise at the nexus of aesthetics and politics in four areas: theoretical issues of aesthetics and politics in East Asia, aesthetics of affect and sexuality, the productive tension between critical aesthetics and political movements, and aesthetic critiques of sovereignty and neoliberalism in East Asia today. If the seemingly universal operation of capital and militarism in East Asia requires locally specific definitions of biopolitical concepts to function smoothly, this book critiques the circuit of power between the universalism of capital and particularism of nation and culture. Treating aesthetic experiences in art at large as the bases for going beyond imperial categories, the contributors present new modes of sensing, thinking, and living that have been unimaginable within the mainstream modality of Asian studies, a discipline that has reproduced the colonial regime of knowledge production. By doing so, *Beyond Imperial Aesthetics* illuminates the aesthetic underside of critical theory to uncover alternative forms of political life in East Asia. "This much needed volume takes readers on an erudite and challenging journey. Along the way, its theoretically-minded authors explore what a future liberated from the Cold War shackles of securitized institutions and capitalist exploitation as well as concomitant epistemologies of aestheticized domination might look like in East Asia." —Todd Henry, UC San Diego "Beyond Imperial Aesthetics is an impressive intervention between art, politics, and theoretical reflection in contemporary East Asia. The project convincingly articulates various sites of resistance to the postwar US hegemon throughout East Asia. The editors are to be congratulated for putting together such a timely and compelling work." —Richard Calichman, City College of New York

Sexuality Beyond Consent

Radical alternatives to consent and trauma Arguing that we have become culturally obsessed with healing trauma, *Sexuality Beyond Consent* calls attention to what traumatized subjects do with their pain. The erotics of racism offers a paradigmatic example of how what is proximal to violation may become an unexpected site of flourishing. Central to the transformational possibilities of trauma is a queer form of consent, limit consent, that is not about guarding the self but about risking experience. Saketopoulou thereby shows why sexualities beyond consent may be worth risking-and how risk can solicit the future. Moving between clinical and cultural case studies, Saketopoulou takes up theatrical and cinematic works such as *Slave Play* and *The Night Porter*, to chart how trauma and sexuality join forces to surge through the aesthetic domain. Putting the psychoanalytic theory of Jean Laplanche in conversation with queer of color critique, performance studies, and philosophy, *Sexuality Beyond Consent* proposes that enduring the strange in ourselves, not to master trauma but to rub up against it, can open us up to encounters with opacity. The book concludes by theorizing currents of sadism that, when pursued ethically, can animate unique forms of interpersonal and social care.

Beyond Solidarity

In this text Giles Gunn asks how human solidarity can be reconceived when its expressions have become increasingly exceptionalist and outmoded, and when the pressures of globalization divide as much as they unify. Drawing on the work of Williams and Henry James, John Dewey, Primo Levi, Richard Rorty and others, as well as postcolonial writings, Jewish literature of the holocaust and the cultural and religious experience of African Americans in slavery, Gunn points pragmatism in a transnational direction and shows how it can better account for the consequences of diversity.

Emmanuel Levinas: Beyond Levinas

Emmanuel Levinas (1905-1995) was one of the foremost thinkers of the twentieth century. His work influencing a wide range of intellectuals such as Maurice Blanchot, Jacques Derrida, Luce Irigaray and Jean-Luc Marion.

Visual Alterity

Reconsidering the dynamics of perception Using cinema to explore the visual aspects of alterity, Randall Halle analyzes how we become cognizant of each other and how we perceive and judge another person in a visual field. Halle draws on insights from philosophy and recent developments in

cognitive and neuroscience to argue that there is no pure "natural" sight. We always see in a particular way, from a particular vantage point, and through a specific apparatus, and Halle shows how human beings have used cinema to experiment with the apparatus of seeing for over a century. Visual alterity goes beyond seeing difference to being conscious of how one sees difference. Investigating the process allows us to move from mere perception to apperception, or conscious perception. Innovative and insightful, *Visual Alterity* merges film theory with philosophy and cutting-edge science to propose new ways of perceiving and knowing.

Postcolonial America

Scholars from a wide array of disciplines describe and debate postcolonialism as it applies to America in this authoritative and timely collection. Investigating topics such as law and public policy, immigration and tourism, narratives and discourses, race relations, and virtual communities, *Postcolonial America* clarifies and challenges prevailing conceptualizations of postcolonialism and accepted understandings of American culture. Advancing multiple, even conflicted visions of postcolonial America, this important volume interrogates postcolonial theory and traces the emergence and significance of postcolonial practices and precepts in the United States. Contributors discuss how the unique status of the United States as the colony that became a superpower has shaped its sense of itself. They assess the global networks of inequality that have displaced neocolonial systems of conquest, exploitation, and occupation. They also examine how individuals and groups use music, the Internet, and other media to reconfigure, reinvent, and resist postcoloniality in American culture. Candidly facing the inherent contradictions of "the American experience," this collection demonstrates the patterns, connections, and histories characteristic of postcoloniality in America and initiates important discussions about how these conditions might be changed.

Beyond Description

Beyond Description brings anthropologists and other social scientists together to examine the problem of explanation. What is "an explanation?" What can it add? What makes it authoritative, clarifying, or misleading? Whom does it serve and how is it produced? These questions lie at the heart of recent public crises of confidence in expertise, political representation, and classic liberal visions of whom we can rely on for true and trustworthy accounts. In a world beset by events and processes that seem to defy expert predictions of their impossibility, and in which post-hoc accounts can often feel more like rationalizations than explanations, competing voices vie for public presence and seek to silence one another. Anthropology and the social sciences face such questions too, making contemporary explanatory practice both an empirical and a reflexive challenge. By combining ethnographic studies of practices of explanation in a range of contemporary political, medical, artistic, religious, and bureaucratic settings, the essays in *Beyond Description* offer critical examinations of changing norms and forms of explanation in the world and within anthropology itself.

The Oxford Handbook of Global Modernisms

The Oxford Handbook of Global Modernisms expands the scope of modernism beyond its traditional focus on English and Irish literature to explore the contributions of artists from countries like the US, Cuba, Spain, the Balkans, China, Japan, India, Vietnam, and Nigeria.

Occupy Management

It can be said that our times are characterized both by the omnipresence of organizations and by the destabilization of organized social life, caused by the erosion of its structural and moral foundations such as long-term employment, social trust or an actual observance of the proclaimed codes of ethics. At the same time there is a huge and growing potential for organized change due to the amount of students and graduates of different types of management studies and programmes all over the world. The role of the state may become atrophied and corporations seem all too eager to seize ever more power while renouncing responsibility towards the environment and the employees, but a huge and unprecedented number of people from all walks of life, all social classes and all countries now have the qualifications to take over the responsibility for social organizations. The objective of *Occupy Management: Inspirations and Ideas for Self-Organization and Self-Management* is to make it evident to the student why and how he or she can manage without becoming part of corporate power structures. Aimed at postgraduate students studying organizational and management theory as well as social

entrepreneurship, this book is not a simple repetition of essential knowledge in these areas, but a re-direction of such knowledge towards self-management and self-organization.

Pilgrims

Values-rich journeys can be described as pilgrimage, spiritual travel, personal heritage tourism, holistic tourism, and valuistic journeys. There are many motivations for undertaking these journeys; the most important being personal values, life experience, personal and social identity, lifestyle, social and cultural influence. This book presents contributions that address pilgrim motivation, identity and values as they are shaped by the broader sociological, psychological, cultural and environmental perspectives. The focus of the book is the travellers themselves and their inner world through the lens of their pilgrimage. The research presented focuses on the typology of pilgrim journeys as ways in which identity and values are presented to a post-modern consumer society, providing interesting and challenging perspectives on the identity of pilgrims in the 21st century.

Indigeneity: Before and Beyond the Law

Examining contested notions of indigeneity, and the positioning of the Indigenous subject before and beyond the law, this book focuses upon the animation of indigeneities within textual imaginaries, both literary and juridical. Engaging the philosophy of Jacques Derrida and Walter Benjamin, as well as other continental philosophy and critical legal theory, the book uniquely addresses the troubled juxtaposition of law and justice in the context of Indigenous legal claims and literary expressions, discourses of rights and recognition, postcolonialism and resistance in settler nation states, and the mutually constitutive relation between law and literature. Ultimately, the book suggests no less than a literary revolution, and the reassertion of Indigenous Law. To date, the oppressive specificity with which Indigenous peoples have been defined in international and domestic law has not been subject to the scrutiny undertaken in this book. As an interdisciplinary engagement with a variety of scholarly approaches, this book will appeal to a broad variety of legal and humanist scholars concerned with the intersections between Indigenous peoples and law, including those engaged in critical legal studies and legal philosophy, sociolegal studies, human rights and native title law.

Routledge Handbook of Latin American Security

This new Handbook is a comprehensive collection of cutting-edge essays on all aspects of Latin American Security by a mix of established and emerging scholars. The Routledge Handbook of Latin American Security identifies the key contemporary topics of research and debate, taking into account that the study of Latin America's comparative and international politics has undergone dramatic changes since the end of the Cold War, the return of democracy and the re-legitimization and re-armament of the military against the background of low-level uses of force short of war. Latin America's security issues have become an important topic in international relations and Latin American studies. This Handbook sets a rigorous agenda for future research and is organised into five key parts:

- The Evolution of Security in Latin America
- Theoretical Approaches to Security in Latin America
- Different 'Securities'
- Contemporary Regional Security Challenges
- Latin America and Contemporary International Security Challenges

With a focus on contemporary challenges and the failures of regional institutions to eliminate the threat of the use of force among Latin Americans, this Handbook will be of great interest to students of Latin American politics, security studies, war and conflict studies and International Relations in general.

Translation Studies beyond the Postcolony

This edited volume explores the role of (postcolonial) translation studies in addressing issues of the postcolony. It investigates the retention of the notion of postcolonial translation studies and whether one could reconsider or adapt the assumptions and methodologies of postcolonial translation studies to a new understanding of the postcolony to question the impact of postcolonial translation studies in Africa to address pertinent issues. The book also places the postcolony in historical perspective, and takes a critical look at the failures of postcolonial approaches to translation studies. The book brings together 12 chapters, which are divided into three sections: namely, Africa, the Global South, and the Global North. As such, the volume is able to consider the postcolony (and even conceptualisations beyond the postcolony) in a variety of settings worldwide.

Derrida and Feminism

The first-ever compilation of articles that highlights the intersection of Derridean and feminist theories--a work that represents the extensive and diverse response feminist theorists have had to Derrida, particularly to the issues of gender, identity, and the construction of the subject.

Beyond Secular Faith

Attempts to reach an understanding of how to live a Christian life in the contemporary context have never been more necessary. This is the aim of the International Symposium: Beyond Secular Faith, an annual conference held in Granada, Spain. This volume represents the fruits of over seven years of scholarship. The title Beyond Secular Faith suggests we are interested in (re)discovering and reflectively elaborating ways to overcome the limits imposed by the dominant contemporary culture. We are convinced that only a faith liberated from the conceptual restrictions and reductions (put forward by secular philosophy and theology) and centered radically on Christ can flourish in the dimension that is proper to faith; that is, in all spheres of human life. Featuring contributions from internationally recognized philosophers and theologians such as Tracey Rowland, Jarosław Jagiello, Rocco Buttiglione, Alison Milbank, Massimo Borghesi, John Milbank, and others, we will explore a diversity of questions from this common perspective: the light of revelation illuminates how Christians should live in the modern world, leading to a new beginning.

Going beyond the Pairs

Argues that German Romanticism, Zen Buddhism, and deconstruction, for all their cultural differences, are three expressions of a universal vision.

Witnessing beyond the Human

Provides an innovative and theoretically rigorous approach to the subject of testimony in Latin America. This book rethinks the nature of testimony beyond the ground of the human in works produced in Chile and Argentina from the 1970s to the present. Focusing on literature by Juan Gelman, Sergio Chejfec, and Roberto Bolaño, as well as art by Eugenio Dittborn, Kate Jenckes argues that these works represent life, death, and the relation between self and other "beyond the human," that is beyond the sense that we can know and represent ourselves and others, with powerful implications for our understanding of history, community, and politics. Jenckes engages with the work of Jacques Derrida together with the intellectually rigorous field of Chilean aesthetic theory to explore issues related to the nature of testimony.

Interrogating Alterity

Alternative ways of thinking, analysing and performing economic geographies have become increasingly significant in recent years, partly due to the recent financial crisis, which has had social and political consequences throughout the world. Yet there is a danger that the debate about alternatives may become simply a way of fixing global capitalism in its present crisis-ridden form. Instead, the analysis of alternative economic spaces must continue to offer a critique of the very notion of capitalism as a universal, if variable, set of social relations. This important book brings together critical analyses of alterity from across the social sciences and humanities, refining and advancing what alternative economies and polities are, how they are formed, what difficulties and problems they face, and how they might be sustained. A central theme is the need to examine critically both the material contexts and the conceptual categories deployed in the making of alternative economies.

American Studies as Transnational Practice

This wide-ranging collection brings together an eclectic group of scholars to reflect upon the transnational configurations of the field of American studies and how these have affected its localizations, epistemological perspectives, ecological imaginaries, and politics of translation. The volume elaborates on the causes of the transnational paradigm shift in American studies and describes the material changes that this new paradigm has effected during the past two decades. The contributors hail from a variety of postcolonial, transoceanic, hemispheric, and post-national positions and sensibilities, enabling them to theorize a "crossroads of cultures" explanation of transnational American studies that moves beyond the multicultural studies model. Offering a rich and rewarding mix of essays and case studies, this collection will satisfy a broad range of students and scholars.

Beyond the Cheers

Focusing on half-time performances, commercialized stagings, media coverage, public panics, and political protests, *Beyond the Cheers* offers an ethnography, history, and social critique of racial spectacles in college sport. King and Springwood argue that collegiate revenue producing sports are created as a spectacle, driven by a range of contradictory meanings and exploitative practices. While Native Americans are viewed largely as empty or distorted images and African Americans are seen as both shining stars and 'troubled delinquents,' White Americans remain constant as spectators, coaches, administrators, journalists, and athletes, producing and consuming college sport, performing and policing, but seemingly unmarked as racial subjects. In consuming these spectacles, American sports fans learn to embrace inflated, contradictory, and distorted renderings of racial difference and the history of race relations in America.

Developmental Perspectives on Embodiment and Consciousness

Until recently, the body has been largely ignored in theories and empirical research in psychology, particularly in developmental psychology. Recently however, several conceptions of the relation between body and mind have been developed. Common among these conceptions is the idea that the body plays an important role in our emotional, social, and cognitive lives. This latest volume in the Jean Piaget Society Symposia Series illustrates different ways in which the concept of embodiment can be used in developmental psychology and related disciplines. It explores the role of the body in the development of meaning, consciousness, and psychological functioning. The overall goal is to demonstrate how the concept of embodiment can deepen our understanding of developmental psychology by suggesting new possibilities of integrating biological, psychological, and socio-cultural approaches. *Developmental Perspective on Embodiment and Consciousness* explores embodiment in two ways. First, embodiment is examined as a condition of and influencing the particular shape of psychological experience. This sense of embodiment reflects the effort to put the mind back into the body. Second, embodiment is examined as a reflective experience in the sense that the mind forms particular images about the body. This sense of embodiment reflects the effort to put the body into the mind. The book opens with a discussion of embodiment from a meta-theoretical perspective. Then the role of embodiment in grounding conceptual meaning is examined. This is followed by discussions of the role of embodiment in strengthening our understanding of emotions, cognitive development, religious experiences, and social development. Then the role of the body in spatial cognition and the role of language in the development of complex forms of consciousness are explored. The final chapters examine the impact of culture on the conceptualization of the embodied self. The book concludes with an overview of the historical context of the mind-body dualism and a discussion of how the idea of embodiment transcends this dualism. Intended for researchers and advanced students in developmental, cognitive, and social psychology, neuroscience, philosophy, anthropology, biology, and sociology, this new book also serves as a reference for advanced courses on cognition and development.

Kantian Imperatives and Phenomenology's Original Forces

How do we approach the rich field of nineteenth-century American literature? How might we recalibrate the coordinates of critical vision and open up new areas of investigation? To answer such questions, this volume brings together 23 original essays written by leading scholars in American literary studies. By examining specific novels, poems, essays, diaries and other literary examples, the authors confront head-on the implications, scope, and scale of their analysis. The chapters foreground methodological concerns to assess the challenges of transnational perspectives, disability studies, environmental criticism, affect studies, gender analysis, and other cutting-edge approaches. *The Oxford Handbook of Nineteenth-Century American Literature* is thus both critically incisive and sharply practical, inviting attention to how readers read, how critics critique, and how interpreters interpret. It offers forceful strategies for rethinking protest novels, women's writing, urban literature, slave narratives, and popular fiction, just to name a few of the wide array of topics and genres covered. This volume, rather than surveying established ideas in studies of nineteenth-century American literature, registers what is happening now and anticipates what will shape the field's future.
