You Only Have to Be Right Once

THE ULTIMATE INSIDER LOOK AT THE NEWEST TITANS OF TECH— AND WHAT YOU CAN LEARN FROM THEIR SUCCESS. Silicon Valley's newest billionaires represent a unique and unconventional breed of entrepreneur: young, bold, and taking the world by storm with their extreme speed, insatiable hunger, and progressive leadership. They are all turning just one brilliant insight or hook into money at a rate never before seen in human history—creating companies that, even with no revenue, garner insane valuations. With unique insider access to the world's most influential and wealthy entrepreneurs, Forbes has dug in to find what these superentrepreneurs say about their own success. This book, introduced, edited, and updated by Forbes editor Randall Lane, is the first comprehensive look at who these instant tech billion-aires are and how they achieved their quick wins. With sixteen illuminating pieces, we get behind-the-scenes examinations of the founders of Tesla, Spotify, Airbnb, Tumblr, Twitter, and more, including: ·ELON MUSK: The billionaire founder of Paypal, electric carmaker Tesla, and private space company SpaceX. His extreme ambition is matched by his preternatural engineering mind; no wonder he was the model for Robert Downey Jr.'s portrayal of Iron Man. ·EVAN SPIEGEL: In 2013, the twenty-three year-old founder of Snapchat declined a \$3 billion cash offer from Mark Zuckerberg. Today, Snapchat is valued at \$16 billion. The story of Snapchat's origin is even wilder than Facebook's, but Spiegel's ability to parlay infamy and popularity into revenue is still up in the air. ·ALEX KARP: An eccentric philosopher with almost no tech background turned a Peter Thiel-backed venture, Palantir, into a data-mining champion, with clients like the NSA, the FBI, and the CIA. Amid heated privacy concerns, Karp continues to grow Palantir like crazy, to over \$1.5 billion in funding and an estimated \$1 billion in contracts in 2014. You Only Have to Be Right Once

The ultimate insider look at the newest titans of tech - and what you can learn from their success. In 2007, twenty-one-year old David Karp launched Tumblr on a whim. By 2012, it had become one of the top ten online destinations, drawing 170 million visitors. By 2013, Yahoo had acquired it for over \$1 billion. Just like that, a kid without a high school diploma was worth over a quarter billion dollars. And he's not the only one . . . Silicon Valley's newest billionaires are a unique and unconventional breed of entrepreneur- young, bold, and taking the world by storm with their extreme speed, insatiable hunger, and progressive leadership. These whiz kids (and, to be fair, a few adults) turn just one brilliant insight into money at a rate never before seen - creating companies that, even with no revenue, garner insane valuations. With unique insider access, Forbes has dug in to find what these super-entrepreneurs say about their own success. This book, introduced, edited, and updated by Forbes editor Randall Lane, is the first comprehensive look at who these instant tech billionaires are and how they achieved their quick wins. With sixteen illuminating pieces, including two never-before published features, we get behind-the-scenes examinations of the founders of Tumblr, Twitter, and Spotify; of Paypal's Elon Musk, Palantir's Alex Karp and Snapchat's Evan Spiegel. You Only Have to Be Right Once is the definitive collection of everything we can learn from these incredible game changers and what their next moves spell for the future of business. 'Wedged into a corner, Sean Parker sported the removed look of someone at a crowded party who doesn't know many people. Which, at a media soiree at New York's clubby Monkey Bar on October 4, 2011, happened to be the case. Given that two weeks prior, Parker became the first person to adorn the cover of Forbes since I returned as the editor, it seemed right to introduce myself. It's not that the Forbes cover had been a valentine- it revealed the polymath who had helped shape Napster, Facebook and Spotify for all his quirks and faults. But until that story, the world equated him with the villainous character portrayed by Justin Timberlake in David Fincher's movie The Social Network. Now Parker stood before me as a brash actor in a story that has only a little to do with Facebook and feels a hundred times bigger- how a handful of young digital swashbucklers shrugged off the Great Recession to transform how industries operate and fortunes get made. The day after my conversation with Parker, Steve Jobs passed away. Jobs had epitomized the old new guard, one of a trinity of tech entrepreneurs - with Bill Gates and Michael Dell - who two generations earlier, while themselves in their twenties, proved the disruptive power of technology. This narrative isn't new. In this round, however, the underlying drivers have accelerated exponentially. This new model of Young Turk isn't merely comfortable with technology - he can't remember a world without the Internet. Accordingly, he's no longer content merely conquering the technology space - every industry is now the technology space, whether hotels or music or transportation. And thus ripe for the pillaging . . .'

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Why I Write, the first in the Orwell's Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' – 'sheer egoism', 'aesthetic enthusiasm', 'historical impulse' and 'political purpose' – and considers the importance of keeping these in balance. Why I Write is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

This is the time to live your dreams. If there is something that you need to do or accomplish. Just do it! You only live once!"We have been gifted with this one life that we have to live. A fading silhouette amongst all that exists in this limitless universe. We are fleeting roses, quickly fading. We are evanescent. We are here today and we are gone tomorrow. Yet! We possess the dexterity to attain anything, and sincerely anything we desire. If only we would utilize our time wisely. The most vital aspects of life that we need to draw our utmost attention to is our Creator, our purpose, our passion, our health, our loved ones and our dreams. This is the decade to live your dreams. This is the decade to do everything that you've ever wanted to do. Whether it's getting in shape, living your dreams and drawing yourself closer to your Creator or even fixing broken relationships. This is your season of greatness. Never give up on what really matters to you. It is difficult to wait, but it is worse to live with regrets of what you could have done. Everything takes time, but quitting will not speed things up. It's times to stop saying 'you gonna!' and start saying, 'I can, I will and I must do it!' Think, executive and never give up. You only live once, but if you do it right, once is enough my friend. You Only Have to Be Right Once

THE ULTIMATE INSIDER LOOK AT THE NEWEST TITANS OF TECH— AND WHAT YOU CAN LEARN FROM THEIR SUCCESS. Silicon Valley's newest billionaires represent a unique and unconventional breed of entrepreneur: young, bold, and taking the world by storm with their extreme speed, insatiable hunger, and progressive leadership. They are all turning just one brilliant insight or hook into money at a rate never before seen in human history—creating companies that, even with no revenue, garner insane valuations. With unique insider access to the world's most influential and wealthy entrepreneurs, Forbes has dug in to find what these superentrepreneurs say about their own success. This book, introduced, edited, and updated by Forbes editor Randall Lane, is the first comprehensive look at who these instant tech billion-aires are and how they achieved their quick wins. With sixteen illuminating pieces, we get behind-the-scenes examinations of the founders of Tesla, Spotify, Airbnb, Tumblr, Twitter, and more, including: ·ELON MUSK: The billionaire founder of Paypal, electric carmaker Tesla, and private space company SpaceX. His extreme ambition is matched by his preternatural engineering mind; no wonder he was the model for Robert Downey Jr.'s portrayal of Iron Man. ·EVAN SPIEGEL: In 2013, the twenty-three year-old founder of Snapchat declined a \$3 billion cash offer from Mark Zuckerberg. Today, Snapchat is valued at \$16 billion. The story of Snapchat's origin is even wilder than Facebook's, but Spiegel's ability to parlay infamy and popularity into revenue is still up in the air. ·ALEX KARP: An eccentric philosopher with almost no tech background turned a Peter Thiel-backed venture, Palantir, into a data-mining champion, with clients like the NSA, the FBI, and the CIA. Amid heated privacy concerns, Karp continues to grow Palantir like crazy, to over \$1.5 billion in funding and an estimated \$1 billion in contracts in 2014. You Only Have to Be Right Once is the definitive collection of everything we can learn from these incredible game changers and what their next moves spell for the future of business

You Only Have to Be Right Once

The ultimate insider look at the newest titans of tech - and what you can learn from their success. In 2007, twenty-one-year old David Karp launched Tumblr on a whim. By 2012, it had become one of the top ten online destinations, drawing 170 million visitors. By 2013, Yahoo had acquired it for over \$1 billion. Just like that, a kid without a high school diploma was worth over a quarter billion dollars. And he's not the only one . . . Silicon Valley's newest billionaires are a unique and unconventional breed of entrepreneur- young, bold, and taking the world by storm with their extreme speed, insatiable hunger, and progressive leadership. These whiz kids (and, to be fair, a few adults) turn just one brilliant insight into money at a rate never before seen - creating companies that, even with no revenue, garner insane valuations. With unique insider access, Forbes has dug in to find what these super-entrepreneurs say about their own success. This book, introduced, edited, and updated by Forbes editor Randall Lane, is the first comprehensive look at who these instant tech billionaires are and how they achieved their quick wins. With sixteen illuminating pieces, including two never-before published features, we get behind-the-scenes examinations of the founders of Tumblr, Twitter, and Spotify; of Paypal's Elon Musk, Palantir's Alex Karp and Snapchat's Evan Spiegel. You Only Have to Be Right Once is the definitive collection of everything we can learn from these incredible game changers and what their next moves spell for the future of business. 'Wedged into a corner, Sean Parker sported the removed look of someone at a crowded party who doesn't know many people. Which, at a media soiree at New York's clubby Monkey Bar on October 4, 2011, happened to be the case. Given that two weeks prior, Parker became the first person to adorn the cover of Forbes since I returned as the editor, it seemed right to introduce myself. It's not that the Forbes cover had been a valentine- it revealed the polymath who had helped shape Napster, Facebook and Spotify for all his quirks and faults. But until that story, the world equated him with the villainous character portrayed by Justin Timberlake in David Fincher's movie The Social Network. Now Parker stood before me as a brash actor in a story that has only a little to do with Facebook and feels a hundred times bigger- how a handful of young digital swashbucklers shrugged off the Great Recession to transform how industries operate and fortunes get made. The day after my conversation with Parker, Steve Jobs passed away. Jobs had epitomized the old new guard, one of a trinity of tech entrepreneurs - with Bill Gates and Michael Dell - who two generations earlier, while themselves in their twenties, proved the disruptive power of technology. This narrative isn't new. In this round, however, the underlying drivers have accelerated exponentially. This new model of Young Turk isn't merely comfortable with technology - he can't remember a world without the Internet. Accordingly, he's no longer content merely conquering the technology space - every industry is now the technology space, whether hotels or music or transportation. And thus ripe for the pillaging . . . '

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Why I Write, the first in the Orwell's Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' – 'sheer egoism', 'aesthetic enthusiasm', 'historical impulse' and 'political purpose' – and considers the importance of keeping these in balance. Why I Write is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

"90% of the reads bring me to tears. I just can't believe the love this world truly has when all we see is hate. This is so uplifting." —Shelsea Where do you go when you want to feel inspired? When you want to forget about the divisiveness and the anger? For over five million people, that place is Love What Matters, a digital platform dedicated to finding and sharing the daily moments of kindness, compassion, and love that so often go overlooked. This curated collection of powerful stories features first person accounts and photographs that perfectly capture each moment: A husband learning he's about to be a dad. A new mom embracing her body. A cashier inadvertently teaching a young girl a lesson about patience. A bagel from a stranger that saved a homeless man's life. From long overdue adoptions to military heroes returning home; from a fireman's touching 9/11 tribute to what an old dinner plate found at a bake sale can teach us all about life—these are the moments that matter. They are genuine. Authentic. Raw. And they are perfect in their imperfection—just like all of us. You will no doubt experience goosebumps and tears, but this mosaic of life's moments will leave you with something even more profound: a reminder that, in the end, love always wins. "This really is the best page on Facebook. It renews your love of humanity. There are still good people. We need more reports of acts of kindness." —Johnny
