The Dovekeepers

An ambitious and mesmerizing novel from the bestselling author of Rules of Magic. The Dovekeepers is "striking....Hoffman grounds her expansive, intricately woven, and deepest new novel in biblical history, with a devotion and seriousness of purpose" (Entertainment Weekly). Nearly two thousand years ago, nine hundred Jews held out for months against armies of Romans on Masada, a mountain in the Judean desert. According to the ancient historian Josephus, two women and five children survived. Based on this tragic and iconic event, Hoffman's novel is a spellbinding tale of four extraordinarily bold, resourceful, and sensuous women, each of whom has come to Masada by a different path. Yael's mother died in childbirth, and her father, an expert assassin, never forgave her for that death. Revka, a village baker's wife, watched the murder of her daughter by Roman soldiers; she brings to Masada her young grandsons, rendered mute by what they have witnessed. Aziza is a warrior's daughter, raised as a boy, a fearless rider and expert marksman who finds passion with a fellow soldier. Shirah, born in Alexandria, is wise in the ways of ancient magic and medicine, a woman with uncanny insight and

power. The lives of these four complex and fiercely independent women intersect in the desperate days of the siege. All are dovekeepers, and all are also keeping secrets—about who they are, where they come from, who fathered them, and whom they love.

Hunger Games: Study Guide and Student Workbook

An international bestseller and the inspiration for a blockbuster film series, Suzanne Collins's dystopian, young adult trilogy *The Hunger Games* has also attracted attention from literary scholars. While much of the criticism has focused on traditional literary readings, this innovative collection explores the phenomena of place and space in the novels--how places define people, how they wield power to create social hierarchies, and how they can be conceptualized, carved out, imagined and used. The essays consider wide-ranging topics: the problem of the trilogy's Epilogue; the purpose of the love triangle between Katniss, Gale and Peeta; Katniss's role as "mother"; and the trilogy as a textual "safe space" to explore dangerous topics. Presenting the trilogy as a place and space for multiple discourses--political, social and literary--this work assertively places *The Hunger Games* in conversation with the world in which it was written, read, and adapted.

Space and Place in The Hunger Games

This collection of fresh essays on Suzanne Collins's epic trilogy spans multiple disciplines. The contributors probe the trilogy's meaning using theories grounded in historicism, feminism, humanism, queer theory, as well as cultural, political, and media studies. The essayists demonstrate diverse perspectives regarding Collins's novels but their works have three elements in common: an appreciation of the trilogy as literature, a belief in its permanent value, and a need to share both appreciation and belief with fellow readers. The 21 essays that follow the context-setting introduction are grouped into four parts: Part I "History, Politics, Economics, and Culture," Part II "Ethics, Aesthetics, and Identity," Part III "Resistance, Surveillance, and Simulacra," and Part IV "Thematic Parallels and Literary Traditions." A core bibliography of dystopian and postapocalyptic works is included, with emphasis on the young adult category--itself an increasingly crucial part of postmodern culture. Decades of research have demonstrated that the parent-child dyad and the environment of the family--which includes all primary caregivers--are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of

emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The Inheritance Games

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations

of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Teaching with Dystopian Text propounds an exchange of spatial to pedagogical practices centered around "Orwellian Spaces," signaling a new utility for teaching with dystopian texts in secondary education. The volume details the urgency of dystopian texts for secondary students, providing theoretical frameworks, classroom examples and practical research. The function of dystopian texts, such as George Orwell's *1984*, as social and political critique is demonstrated as central to their power. *Teaching with Dystopian Text: Exploring Orwellian Spaces for Student Empowerment and Resilience* makes a case that dystopian texts can be instrumental in the transfer of spatial practices to pedagogical practices. Pedagogical application creates links between the text and the student through defamiliarization, connecting the student to practices of resistance in the space of the classroom. The volume also addresses the challenges of teaching dystopian text in a dystopian educational climate including the COVID-19 lockdown. In addition to appealing to scholars and researchers of literacy education, language education and dystopian text, this book will also be a powerful yet accessible resource for secondary teachers as they address dystopian concerns with students in the complicated twenty-first century.
