Practical Astrology for Beginners & Self-Discovery

The diseases are the result of our past karmas and indicated by weak and afflicted planets. This can be easily understood by an astrologer. Therefore every book on astrology has discussed the diseases and yogas for these diseases are scattered throughout the astrological literature. Some of these Yogas have been compiled in this book for the intelligent readers with the observations and experiences of author. Author has used the astrology for the purpose of diagnosis as other laboratory tests, MRI and CAT SCAN etc. It gave good results to understand whether the chronic diseases are curable or not. Moreover it has helped to understand the time period of onset of the disease which no other science can explain. Therefore astrology is science of sciences. One must be careful while predicting diseases because so many factors are involved in prediction. Only the yoga for disease is not sufficient. If the yoga is aspected by benefic planets, the results will be nullification of malefic influence. The disease depends on the strength of the disease producing planets. Even if a disease may be indicated from a house from lagna but from Moon and navamsha lagna the same house is strong and lord is fortified, the malefic influence may get cancelled. Therefore while judging one must consider the house, lord of house and karaka of the house, rashish where the lord of house is posited i.e. dispositor, and navamshesh, the lord of house in navamsha chart where the lord of the house is posited, and relationship in navamsha chart between lagna lord and lord of the house into consideration from lagna, Moon, navamsha lagna and nakshatra of the planet in which he is posited. One must take into consideration the nature and qualities of the planets causing the disease; functional benefic or malefic to the lagna house in which they are posited. The benefic planet will certainly cause less harm than the malefic planet. The relationship between the two planets also affects the disease producing capacity. The relationship is also natural and functional. The aspect and conjunction of the planets should also be taken into consideration. The retrograde malefic planet is more powerful in causing diseases than the normal malefic planet. The retrograde benefic planet does not protect the native. When a benefic planet is lord of maraka house and posited in that house, it becomes strong maraka planet. Keeping the above factors into consideration we can predict the timing of onset of diseases with the help of dasha system and Gochar. The most common dasha system employed is Vimshottari dasha system. Still we can divided the timing of diseases into: 1. Yogas present in the horoscope 2. Dasha/bhukti/Paratyantar dasha 3. Transit (Gochar) 4. Horary All these factors have been discussed in this book in detail.

Astrology for Beginners

Most introductory astrology books, such as this one, are content to teach you the ABC's of astrology: Planets, signs, houses, aspects, pretty much in that order. You're then congratulated that, by the time you reach the end of the book, you can look up the individual pieces and spit out canned interpretations, by rote. Vivian Robson (1890-1942, a man, by the way), expected better. Here is an example: Having found the significator of the matter concerned interpret all aspects to it as things and people affecting it. Suppose Jupiter were chief significator of money and afflicted by Saturn. We should judge that money matters would be hampered by poor conditions, depressing surroundings, ill-health, or whatever Saturn signified in that horoscope. In other words, we should give Jupiter the chief consideration as significator of the matter enquired into, and interpret the action of Saturn in its relation to Jupiter, and not vice-versa. On the other hand if Saturn were the significator we should judge that fits of generosity or extravagance would affect the finances, because Jupiter is expansive in its action, and its afflicting aspect would cause trouble and loss. This general judgment is then refined by taking into account the sign and house occupied by the aspecting planet, and the houses it rules. Thus, suppose with Saturn as significator that Jupiter threw an adverse aspect from the 5th house. Then we should judge that the extravagance would arise from too much indulgence in pleasure, or from gambling, or other matters ruled by the 5th house. This would be modified by the sign containing Jupiter. A water sign would incline more to self-indulgence, a fiery one to gambling, a sign ruled by Venus to expenditure on women, and so on, thus enabling us to enlarge on the judgement obtained from the house position alone. We should next look to see what houses Jupiter ruled. If it ruled the 3rd we should judge expense and extravagance over journeys, relatives and other third house matters, and by blending the influences, that gambling losses (5th) would come through the advice of relatives (3rd) or some other appropriate blending. . . . This, however, is not the only way the influences would work. . . . There is method to be used, and it is one which needs considerable practice, but it is well-worth the trouble involved, and the student will himself be amazed to find how accurately the most trifling details may be predicted. As a word of advice to the beginner I would say - Do not be afraid to let yourself go in this way. You will make many

mistakes to start with, but it is the only way to make your Astrology of practical use. There is too great a tendency nowadays to float about in a comfortable haze of so-called esotericism. The first need of Astrology is accuracy and definition, not pseudo-religious speculation, and it is only by concentrating on the practical and scientific side that we can really make Astrology of service, and obtain for it the recognition it deserves. (pgs. 110-113: go have a look) Someday a picture of the man will be found. Until then, read his books!
