A Slow Death: 83 Days of Radiation Sickness: NHK TV Crew

The story is a fascinating tale of a man who was exposed to an open nuclear reactor (in essence), and how his health slowly over 83 days went from no problems, to having the most horrific symptoms of radiation poisoning which ultimately took his life. Reading this book is not easy.

A Slow Death 83 Days Of Radiation : NHK TV Crew

22 Jun 2019 — Japan's worst nuclear radiation accident took place at a uranium reprocessing facility in Tokaimura, northeast of Tokyo, on 30 September 1999. The direct cause of the accident was cited as the depositing of a uranyl nitrate solution--containing about 16.6 kg of uranium, which exceeded the critical ...
