Goodbye, Perfect

"How do rebels give up arms and return to the same political processes that they had once sought to overthrow? The question of weaning rebels away from extremist groups is highly significant in the context of counterinsurgency as well as pacification of insurgencies. Existing explanations focus mostly on state capacity, counterinsurgency operations, or on socioeconomic development. This book, drawing

primarily on several rounds of interviews with Maoist rebels as well as other stakeholders in conflict zones, shows that from the rebel's perspective, what is of paramount importance is whether or not they quit extremism is the ease with which they can exit and lay down their arms without getting killed in the process. This fear is further exacerbated by the belief that while they could lose their lives, the Indian state, they believed, would lose nothing even if it failed to protect retired rebels and keep its side of the bargain. This created a problem of credible commitment, which, in the absence of institutional mechanisms, is addressed locally by informal exit networks that grow out of grassroots civic associations in the gray zones of democracy-insurgency interface. The book shows that a lot of Maoist rebels quit in the South of India because robust and harmonic exit networks in the South resolve the problem of credible commitment locally and create conditions for safety and reintegration of former Maoists. In the North, on the other hand, very few rebels quit the same insurgent organization during the same time because scrawny, discordant exit networks in the North exacerbate rebels' fear, discouraging retirement and impeding reintegration. This book also highlights how the various steps in the process of disengagement from extremism are linked more fundamentally to the nature of societal linkages between insurgencies and society, thereby bringing civil society into the study of insurgency in a theoretically coherent way"--

Ulysses, Dante, and Other Stories presents a unique form of creative scholarship. It employs Dante's late medieval take on Ulysses and his tragic pursuit of 'virtue and knowledge' as a prism that refracts an ancient myth of journey and return into a modern story of discovery and nostalgia. Working notes, fragments from Ulysses' many stories, personal memories, illuminations, and rewritings combine to form a new chain of narratives about the desire to create, the art of travelling, and the will of self-reinvention.

Mano a Mano is a satirical story based on historical events in Zimbabwe, when Robert Gabriel Mugabe transformed himself from the much-loved Prime Minister to a controversial, polarizing figure. Millions of people have left Zimbabwe due to horrific economic times and widespread starvation. The villagers of Maze Wibb who remain behind have no choice but to rely on themselves in their fight for real independence-and soon discover that a good beginning does not guarantee a happy ending. Through sweat and blood, they build a school, hoping to secure a bright future for their children, but it soon becomes clear that the headmaster has other ideas. The book is divided into two parts: the first is a fictionalized account of true events, encompassing comprehensive descriptions of the narrator's life, his country, and his people; The second part weaves a variety of stories into one, creating a dialogue that provides an introspective look into the ways and customs of a culture across the world. This insightful novel is not just about an African country but about the strong and beautiful people who live within its borders and struggle to survive despite the appalling and dangerous conditions that surround them each day.

New Pattern SBI Clerk Junior Associate Preliminary Exam MegaBook - (Guide + Past Papers + 15 Practice Sets) 2nd edition

The Picture of Dorian Gray, the only novel by Oscar Wilde, was first published in 1890. A substantially revised and expanded edition was published in April 1891. For the new edition, Wilde revised the content of the novel's existing chapters, divided the final chapter into two chapters, and created six entirely new additional chapters. Whereas the original edition of the novel contains 13 chapters, the revised edition of the novel contains 20 chapters. The 1891 version was expanded from 13 to 20 chapters, but also toned down, particularly in some of its overt homoerotic aspects. Also, chapters 3, 5, and 15 to 18 are entirely new in the 1891 version, and chapter 13 from the first edition is split in two (becoming chapters 19 and 20). The novel tells of a young man named Dorian Gray, the subject of a painting by artist Basil Hallward. Dorian is selected for his remarkable physical beauty, and Basil becomes strongly infatuated with Dorian, believing that his beauty is responsible for a new mode of art. The Picture of Dorian Gray is considered one of the last works of classic gothic horror fiction with a strong Faustian theme. It deals with the artistic movement of the decadents, and homosexuality, both of which caused some controversy when the book was first published. However, in modern times, the book has been referred to as "one of the modern classics of Western literature". Oscar Wills Wilde (1854 – 1900) was an Irish writer and poet. After writing in different forms throughout the 1880s, he became one of London's most popular playwrights in the early 1890s. Today he is remembered for his epigrams, his only novel (The Picture of Dorian Gray), his plays, and the circumstances of his imprisonment and early death.

The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there

is usually another group of kids ready to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!.

Goodbye, Evil Eye

Can you believe in someone who can't believe in himself? Maybe... Maybe I just wanted to get through Year 12, coaching, and soccer with no distractions. Maybe life had other plans. Maybe I shouldn't be drawn to Cole; the new guy who gets into fights and smokes. Maybe I should want to date Jaime; the nice, steady guy who's always been there. Maybe you can't help who you fall for, whether they're good for you or not. Maybe it shouldn't matter as long as you're happy. Maybe each new bruise on Cole's face is a reason to walk away. Maybe there's more to the secrets he hides and that's a reason to be there for him. Maybe a lifetime of pain can't be washed away by anyone else but you. Maybe finally proving that someone else isn't going to walk away is enough. Or, maybe it's time I got out of my own head and stopped wondering. Maybe it's time I just live by my own rules and find out the answers to all those maybes. It's time for no more maybes. A sweet YA romance about first love and learning to understand different experiences, this is Cole's story from Aurora's point of view. The companion novel, *Gray's Blade*, is from Cole's point of view; much like the characters themselves, Cole's version is darker, dirtier, and rougher. Read through to the end of *No More Maybes* for a sneak peek at chapter one of Cole's side. Please be aware that this story is set in Australia and therefore uses Australian English spelling and syntax.

The Neuropsychiatric Mental Status Examination

There are almost as many explanations for psychiatric disorders as there are patients with them. Each explanation is intriguing, some of them are systematic, all of them have intellectually powerful champions. Yet their very multitude is a scandal. It provokes the professionally debilitating challenge: Why does every psychiatric explanation satisfy some people and not others? Recently this question has received a simple answer. We cannot satisfactorily explain that which we lack the skill to describe. To develop the fundamental skill a student must see many patients under the direction of an experienced and involved instructor to whom he can show his results, accept correction and advance in his abilities. But we need a means to amplify the clinical experience, a text to supplement the instructor in bringing forth and strengthening the vocabulary needed to describe the phenomenology, presentations and distinctions amongst psychiatric patients. A "programmed text" such as this one is a satisfactory means because it can cover rapidly many themes and variations of a vast clinical experience. It can permit the reader to progress at his own speed but bring a sense of mastery to him as he progresses. He can check his knowledge as he sees patients on the clinical services. This kind of text combined with

patient practice is thorough, fast and fun, but should succeed in the important task of rapidly building for the student an authentic set of terms and concepts suitable for both clinical work and research.

New research on different areas of cognition, focusing on language, with contributions that treat topics explored in Ray Jackendoff's pioneering research. This volume offers new research in cognitive science by leading scholars, exploring different areas of cognition with an emphasis on language. The contributions—in such fields as linguistic theory, psycholinguistics, evolution, and consciousness—reflect the thriving interdisciplinary scholarship in cognitive science today. Ray Jackendoff's pioneering cross-disciplinary work was instrumental in establishing the field, and *Structures in the Mind*, with contributions from Jackendoff's colleagues and former students, is a testament to his lasting influence. After an introduction that includes short reflections on Jackendoff's work by such scholars as Paul Bloom, Noam Chomsky, Barbara Partee, and Steven Pinker, the book presents chapters on linguistics, which build on Jackendoff's theories of conceptual semantics and parallel architectures; psycholinguistics, reaching from linguistics to psychology and neuroscience; and other topics as varied as the evolution of linguistic and musical abilities, consciousness, music theory, and the grammar of comics—with this particular chapter taking the form of a comic. The chapters present fresh data, bold claims, and stimulating theoretical discussions, offering a celebration of cognitive science today. Contributors Daniel Buring, Neil Cohn, Peter W. This book is an important contribution to the understanding of the complex education policies of the twenty-first century. It unites world renowned comparatists of education in an effort to respond to the challenges raised by the multidimensional and multi-scalar aspects of education policies. In their attempt to decipher the tangled world of education policies, the authors underline the power of numbers, the power of networks and the power of new concepts and methodologies. The power of numbers – education through numbers via students' assessments and national or international testing impacts upon our educational choices and reinforces its instrumental aspects. The power of networks – sheds light on the complexity of the education global governance network by focusing on how international governmental organisations (IGOs), such as UNESCO, the OECD and the World Bank carry out policy and on the intricate ways an educational concern becomes part of the international agenda. The power of concepts and methods – policymaking is increasingly dynamic and involves many different stakeholders, including states, private corporations, IGOs, scholars and non-profit organisations. Contributors to this volume have developed new conceptual and methodological perspectives to study the circulation of educational models worldwide. A relational notion of space, the concept of 'diaspora' as a space of relations of social actors or the global comparative approach and a methodology drawn on actors-network theory are among the propositions yielded by the authors in order to make sense of and grasp the complexity of education policies today. This book was originally published as a special issue of Globalisation, Societies and Education.

Structures in the Mind

Vertigo or vestibular disorders have become a common handicap across the globe, which poses a great burden on health care resources. Vertigo is not a disease entity per se, but rather a leading symptom of many etiologically different diseases. These conditions include dysfunction of the vestibular system, both peripheral (inner ear, vestibular nerve) and central (brainstem, cerebellum), functional dizziness, and diseases of other causes, including blood pressure regulation disorders, such as orthostatic dizziness, and adverse drug reactions. Previous studies demonstrated that vestibular disorders might be a modifiable condition and a possible target for secondary prevention of cognitive impairment due to aging, dementia, social isolation, late-life depression, frailty, and increased risk of mortality.

If you want something you never had, You must be willing to do Something you've never done.

Behind every successful man there's a lot of unsuccessful years.

Try not to become a man of succes, but rather try to become a man of value.

The only place where success comes before work is in the dictionary.

SUCCESS is on the same road as FAILURE. Success is just a little further down the road.

If you don't build your dream someone will hire you to help build theirs.

A compulsive compendium of hilarious quips and quotes from children On Love: "You get shot with an arrow or something, but it's not meant to be as painful after that." Reciting The Lord's Prayer: "Our Father which aren't in heaven . . . Halloween be thy name . . . Deliver us from e-mail." The world is a confusing place—especially for little ones—and their innocent observations and questions can often be side-splittingly hilarious. They can also be a tiny bit embarrassing if you're, say, behind an elderly gentleman at a busy checkout and your little angel loudly asks you, "Is that man all wrinkly because he's been in the bath too long?"

Whether in science (Q: What is the highest frequency noise that a human can register? A: Mariah Carey), the humanities (Q: What did Mahatma Gandhi and Genghis Khan have in common? A: Unusual names), math, or other subjects, these 250 entries prove that while everyone enjoys the spectacle of failure, it's even sweeter to see a FAIL turn into a WIN.

If you like adult jokes, you'll love this book. Great for Parties! "I'd buy joke books and try doing them at school; I always had jokes. That would be my go-to thing at parties: I'd be able to get through them if I just told enough jokes. Otherwise, I wouldn't end up talking to anybody." - Drew Carey Review from Alexander V. Ph.D. "I really enjoyed this book and I'm giving it high five. Of course, not all jokes in there gave me the jolt but there were many others which after reading still made me grin and giggle to myself like a doped Halloween pumpkin for quite a while. I have the suspicion some people around though I must have gone loony from too much work. So, the five stars are meant for those jokes. The jokes cover a broad range of topics and the reader will find a good one for just about any situation and conversation which will appeal for just about everyone. If you manage to memorize a few that would make it a handy addition to your arsenal of ice-breakers and conversation-rekindlers in case the situation seems completely frozen and awkward." Excerpt: An international flight from Asia to the US was carrying 198 passengers but the crew, unfortunately, discovered an hour into the flight there were only 40 meals on the plane. After trying to figure out what to do, the Flight Crew came up with a solution. They advised the passengers, "We apologize to you and we are still trying to figure out how this occurred, but we have only 40 dinners on board, and we need to feed all 198 of you on this flight." A loud muttering and moaning started amongst the passengers. The chief flight attendant continued to try and quiet everyone down, "Anyone who is kind enough to give up their dinner so someone else could eat, will receive unlimited free alcoholic beverages during the entire duration of the flight." A second announcement was made two hours later, "If anyone wants to change their mind, we still have 40 dinners available." All alphabetically arranged by topic, you'll find a large assortment of enjoyable jokes, intriguing stories, thought-provoking quotes, and lots of humor in the 320+ pages. We leave the choice of jokes or stories you want to share up to you as individual humor and tastes vary. Sit back in a comfortable chair with your favorite beverage away from all distractions and get this book and enjoy reading this hilarious book!

Winner of the Whitbread Book of the Year 'Outstanding...a stunningly good read' Observer 'Mark Haddon's portrayal of an emotionally dissociated mind is a superb achievement... Wise and bleakly funny' Ian McEwan The Curious Incident of the Dog in the Night-Time is a murder mystery novel like no other. The detective, and narrator, is Christopher Boone. Christopher is fifteen and has Asperger's Syndrome. He knows a very great deal about maths and very little about human beings. He loves lists, patterns and the truth. He hates the colours yellow and brown and being touched. He has never gone further than the end of the road on his own, but when he finds a neighbour's dog murdered he sets out on a terrifying journey which will turn his whole world upside down.

The Importance of Being Earnest is the final play of Oscar Wilde, and it is considered his masterpiece. The play is a farcical comedy with the theme of switched identities: the play's two protagonists engage in "bunburying" (the maintenance of alternative personas in the town and country) which allows them to escape Victorian social mores. Working within the social conventions of late Victorian London, the play's major motives are the triviality with which it treats institutions as serious as marriage, and the resulting satire of Victorian ways.

In American society, the ends and means of education have been debated vigorously throughout its history. Most Americans enthusiastically and eagerly supported the development of public education in the mid-19th century. They perceived it to be a positive force for mobility and democracy. While some complained that too much Obook learningO was a waste of time, most Americans were delighted with the developments of the American educational system which appeared to be a foundation for our political system.

India, a Reference Annual

Written by a man with first-hand knowledge of the ravages of mental illness, The Stigma of Mental Illness provides a hard-hitting, realistic, and at time humorous look at a variety of conditions and disorders and their impact on sufferers and their families. At the core of the work, however, stands a message of hope and faith, encapsulated in the words and poetry of the author and the experiences of his fellow sufferers. His story of faith, grounded in the love of Jesus Christ, sustains him. The poignancy of the author's words is enhanced when the reader realizes that, after penning this book, Mr. Deslauriers went to be with his saviour, eternally free of the illness that plagued him for so many years. A transparent, honest, and powerful account of the struggles faced by millions every day, The Stigma of Mental Illness will touch the hearts of sufferers and caregivers alike.

Quoting is all around us. But do we really know what it means? How do people actually quote today, and how did our present systems come about? This book brings together a down-to-earth account of contemporary quoting with an examination of the comparative and historical background that lies behind it and the characteristic way that quoting links past and present, the far and the near. Drawing from anthropology, cultural history, folklore, cultural studies, sociolinguistics, literary studies and the ethnography of speaking, Ruth Finnegan's fascinating study sets our present conventions into cross-cultural and historical perspective. She traces the curious history of quotation marks, examines the long tradition of quotation collections with their remarkable recycling across the centuries, and explores the uses of quotation in literary, visual and oral traditions. The book tracks the changing definitions and control of quoting over the millennia and in doing so throws new light on ideas such as imitation, allusion, authorship, originality and plagiarism.
