

European Economic Integration

[#European Union](#) [#EU single market](#) [#economic integration](#) [#Eurozone](#) [#European trade policy](#)

European Economic Integration describes the comprehensive process through which countries in Europe, predominantly through the European Union, have removed trade barriers and harmonized economic policies to create a more unified market. This intricate system facilitates the free movement of goods, services, capital, and people, aiming to foster greater economic stability, growth, and political cohesion across the continent.
