Zionist Israel and Apartheid South Africa

This book is a comparison of two ethnic-national "apartheid" states – South Africa and Israel – which have been in conflict, and how internal dissent has developed. In particular it examines the evolution of effective white protest in South Africa and explores the reasons why comparably powerful movements have not emerged in Israel. The book reveals patterns of behaviour shared by groups in both cases. It argues that although the role played by protest groups in peace-building may be limited, a tipping point, or 'magic point', can become as significant as other major factors. It highlights the role played by intermediate variables that affect the pathways of protest groups: such as changes in the international system; the visions and strategies of resistance movements and their degree of success; the economic relationship between the dominant and dominated side; and the legitimacy of the ideology in power (apartheid or Zionism). Although the politics and roles of protest groups in both cases share some similarities, differences remain. Whilst white protest groups moved towards an inclusive peace agenda that adopts the ANC vision of a united non-racial democratic South Africa, the Jewish Israeli protest groups are still, by majority, entrenched in their support for an exclusive Jewish state. And as such, they support separation between the two peoples and a limited division of mandatory Palestine / 'Eretz Israel'. This timely book sheds light on a controversial and explosive political issue: Israel being compared to apartheid South Africa.

Peacemakers in Israel-Palestine

This book offers an analysis of the major sources of the Israeli-Palestinian conflict and suggests principles and processes for building a peacemaking platform. The primary aim of this book is to analyze the crucial roles and capacities of mid-level, nongovernmental peacemakers as they provide unique approaches to transforming the Israel-Palestinian conflict. It also aims to analyze and experience dialogue as the primary mode of peacemaking communication. The two-part format of this book creates a structural dialogue. Part One provides an academic introduction to the Israeli-Palestinian conflict, why it matters, the role of identities, and strategies for transforming the conflict based on international law and human rights. Part Two is presented in a dialogue format, providing further conflict analysis through storytelling and dialogues with peacemakers. This book will be of great interest to anyone engaged with peace and conflict transformation, ethnography, social justice, communication studies, and Middle Eastern studies, human rights and international law.

Peacebuilding in Northern Ireland, Israel and South Africa

Political accommodation in Northern Ireland, Israel and South Africa at the macro level may not, by itself, be sufficient to achieve the long-term goals of building peace and reconciliation. This book uses Lederach's peace-building model to explore issues which may provide a basis for transformation and a lasting peace in the three countries.

Mobilizing for Peace

Focusing on the work of nongovernmental organizations (NGOs) in Northern Ireland, South Africa & Israel/Palestine, the contributors investigate the nature of these organizations & how their social systems influence their functions & structures.

Peace-making in Divided Societies

An exploration of the lessons that the unresolved Israel-Palestinian conflict can draw from South Africa's 'negotiated revolution'. Six realms are compared: economic interdependence, religious divisions, third party intervention, leadership, political culture and violence. Contrasting insights from two opposite solutions to a nationalist conflict shed light on the nature of ethnicity as well as the limits of negotiation politics.

Zionist Israel and Apartheid South Africa

This book is a comparison of two ethnic-national "apartheid" states – South Africa and Israel – which have been in conflict, and how internal dissent has developed. In particular it examines the evolution of effective white protest in South Africa and explores the reasons why comparably powerful movements have not emerged in Israel. The book reveals patterns of behaviour shared by groups in both cases.

It argues that although the role played by protest groups in peace-building may be limited, a tipping point, or 'magic point', can become as significant as other major factors. It highlights the role played by intermediate variables that affect the pathways of protest groups: such as changes in the international system; the visions and strategies of resistance movements and their degree of success; the economic relationship between the dominant and dominated side; and the legitimacy of the ideology in power (apartheid or Zionism). Although the politics and roles of protest groups in both cases share some similarities, differences remain. Whilst white protest groups moved towards an inclusive peace agenda that adopts the ANC vision of a united non-racial democratic South Africa, the Jewish Israeli protest groups are still, by majority, entrenched in their support for an exclusive Jewish state. And as such, they support separation between the two peoples and a limited division of mandatory Palestine / 'Eretz Israel'. This timely book sheds light on a controversial and explosive political issue: Israel being compared to apartheid South Africa.

Arab Minority Nationalism in Israel

National minorities and their behaviour have become a central topic in comparative politics in the last few decades. Using the relationship between the state of Israel and the Arab national minority as a case study, this book provides a thorough examination of minority nationalism and state-minority relations in Israel. Placing the case of the Arab national minority in Israel within a comparative framework, the author analyses major debates taking place in the field of collective action, social movements, civil society and indigenous rights. He demonstrates the impact of the state regime on the political behaviours of the minorities, and sheds light on the similarities and differences between various types of minority nationalisms and the nature of the relationship such minorities could have with their states. Drawing empirical and theoretical conclusions that contribute to studies of Israeli politics, political minorities, indigenous populations and conflict issues, this book will be a valuable reference for students and those in policy working on issues around Israeli politics, Palestinian politics and the broader Palestinian-Israeli conflict.

Peace Building in Northern Ireland, Israel and South Africa

Political accommodation in Northern Ireland, Israel, and South Africa at the macro level may not, by itself, be sufficient to achieve the long-term goals of building peace and reconciliation. This book uses Lederach's peace-building model to explore issues which may provide a basis for transformation and a lasting peace in the three countries.

The Political Right in Israel

This book takes a fresh look at the trajectories of Israeli politics since the election of Likud in 1977, examining how right wing parties have adopted populist policies in order to carve out an identity and win support at the polls. As such it demonstrates how populism has become a hugely significant factor in shaping Israeli politics and society. The original perspective taken by the author allows for an understanding of the central phenomena of the contemporary political system in Israel, such as the Likud's party centrality in Israeli politics, the political force of the religious Shas party and the growing influence of certain political leaders. Through this innovative analysis of the concept of populism, the book contributes to a better understanding of the Israeli political system. With Israel playing such a central role in the Middle East conflict, this analysis of the ways in which populism contributes to the consolidation of governing political forces in Israel will allow for a better understanding of this conflict. Combining the theoretical elaboration of the concept of populism with its application in the analysis of a specific test-case, this novel approach contributes to the ongoing research on populist politics, and as such will be a useful tool for understanding many issues in the study of populism, comparative politics and the Middle East.

Women, Reconciliation and the Israeli-Palestinian Conflict

Women, Reconciliation and the Israeli-Palestinian Conflict explores the most prominent instances of women's political activism in the occupied Palestinian territories and in Israel, focussing primarily on the last decade. By taking account of the heterogeneous narrative identities existing in such a context, the author questions the effectiveness of the contributions of Palestinian and Israeli Jewish women activists towards a feasible renewal of the 'peace process', founded on mutual recognition and reconciliation. Based on feminist literature and field research, this book re-problematizes the controversial liaison between ethno-national narratives, feminist backgrounds and women's activism in Palestine/Israel. In

detail, the most relevant salience of this study is the provision of an additional contribution to the recent debate on the process of making Palestinian and Israeli women activists more visible, and the importance of this process as one of the most meaningful ways to open up areas of enquiry around major prospects for the end of the Israeli-Palestinian conflict. Tackling topical issues relating to alternative resolutions to the Israeli-Palestinian conflict, this book will be a valuable resource for both academics and activists with an interest in Middle East Politics, Gender Studies, and Conflict Resolution.

Israel's Colonial Project in Palestine

Colonialism has three foundational concerns - violence, territory, and population control - all of which rest on racist discourse and practice. Placing the Zionist project in Israel/Palestine within the context of settler colonialism reveals strategies and goals behind the region's rules of governance that have included violence, repressive state laws and racialized forms of surveillance. In *Israel's Colonial Project in Palestine: Brutal Pursuit*, Elia Zureik revisits and reworks fundamental ideas that informed his first work on colonialism and Palestine three decades ago. Focusing on the means of control that are at the centre of Israel's actions toward Palestine, this book applies Michel Foucault's work on biopolitics to colonialism and to the situation in Israel/Palestine in particular. It reveals how racism plays a central role in colonialism and biopolitics, and how surveillance, in all its forms, becomes the indispensable tool of governance. It goes on to analyse territoriality in light of biopolitics, with the dispossession of indigenous people and population transfer advancing the state's agenda and justified as in the interests of national security. The book incorporates sociological, historical and postcolonial studies into an informed and original examination of the Zionist project in Palestine, from the establishment of Israel through to the actions and decisions of the present-day Israeli government. Providing new perspectives on settler colonialism informed by Foucault's theory, and with particular focus on the role played by state surveillance in controlling the Palestinian population, this book is a valuable resource for students and scholars interested in the Arab-Israeli Conflict and Colonialism.

Palestine-Israel in the Print News Media

Israel-Palestine in the Print News Media: Contending Discourses is concerned with conceptions of language, knowledge, and thought about political conflict in the Middle East in two national news media communities: the United States and the United Kingdom. Arguing for the existence of national perspectives which are constructed, distributed, and reinforced in the print news media, this study provides a detailed linguistic analysis of print news media coverage of four recent events in the Palestinian-Israeli conflict in order to examine ideological patterns present in print news media coverage. The two news communities are compared for lexical choices in news stories about the conflict, attribution of agency in the discussion of conflict events, the inclusion or exclusion of historical context in explanations of the conflict, and reliance upon essentialist elements during and within print representations of Palestine-Israel. The book also devotes space to first-hand testimony from journalists with extensive experience covering the conflict from within both news media institutions. Unifying various avenues of academic enquiry reflecting upon the acquisition of information and the development of knowledge, this book will be of interest to those seeking a new approach to the Palestinian-Israeli conflict.

Political Conflict and Exclusion in Jerusalem

The political conflict over the city of Jerusalem has resulted in the breach of Palestinian Jerusalemites' civil, political and social rights. While Israel claims sovereignty over East Jerusalem, it neglects to provide adequate services to the Palestinian residents of the city. The Israeli Jerusalem Municipality provides insufficient and highly politicised educational services to the Palestinians residents of the city, at the same time discriminating against the other Palestinian systems that provide educational services. *Political Conflict and Exclusion in Jerusalem* offers a detailed description of the structure of the education sector in East Jerusalem with its four main providers; the Palestinian Authority through Awqaf schools, the Israeli Authority through municipal schools, the United Nations Relief and Works Agency and private schools. Its study reveals that there is no single body that oversees the provision of educational services in the city to ensure that the services provided are sufficient and of quality. Employing a qualitative research strategy with semi-structured interviews and focus groups in Palestinian and Israeli schools, this book offers a comprehensive and revealing comparison of the educational services provided to both their students. It explores how Palestinian and Israeli students routinely receive vastly different learning opportunities, in terms of school funding, qualified staff, school

facilities and school programmes, which as a result disempowers Palestinians and ensures an Israeli Jewish hegemony over the city. One of the few academic books on a highly pertinent topic, this book will be of interest to students and scholars of Middle East Studies, and a key resource for those studying the social impacts of the Israeli-Palestinian conflict.

Arab-Jewish Activism in Israel-Palestine

Simply not another book on Israel and Palestine, Arab-Jewish Activism in Israel provides a refreshingly new empirical evidence and theoretical analysis on the connexion between interethnic alliances, civil society, and the potentials for actualising shared sociabilities - in a conflict-ridden society. An indispensable read to scholars wishing to gain original insights into transversal connections which transcend ethnicity.

Palestinian Refugees

More than four million Palestinian refugees live in protracted exile across the Middle East. Taking a regional approach to Palestinian refugee exile and alienation across the Levant, this book proposes a new understanding of the spatial and political dimensions of refugee camps across the Middle East. Combining critical scholarship with ethnographic insight, the essays uncover host states' marginalisation of stateless refugees and shed light on new terminology on refugees, migration and diaspora studies. The impact on the refugee community is detailed in novel studies of refugee identity, memory and practice and new legal approaches to compensation and "right of return". The book opens a critical debate on key concepts and proposes a new understanding of the spatial and political dimensions of refugee camps, better understood as laboratories of Palestinian society and "state-in-making". This strong collection of original essays is an essential resource for scholars and students in refugee studies, forced migration, disaster studies, legal anthropology, urban studies, international law and Middle East history.

Reparations to Palestinian Refugees

This book delves into the issue of reparations in relation to Palestinian refugees in their search for a solution to their displacement and dispossession. Highlighting the broad spectrum of reparations available as forms of remedy for a historical injustice, the author probes the reasons behind the failure to reach a reparations agreement till the present day and discusses the significance of issues of apology, recognition and acknowledgement of responsibility. In its approach, the book departs from traditional and modern perceptions of reparations as featuring in international law, history, politics and philosophy. The analysis is focused on a comparative study of two other cases - the German-Jewish reparations agreement of 1952 and the Cypriot conflict - in search of parameters that may constitute a framework to a potential reparations model applicable to the case of Palestinian refugees. When compared to the history of negotiations over reparations in the Israeli-Palestinian case, the findings of the comparison shed light on why reparations are still illusive. The book thus offers an explanation of why reparations to Palestinian refugees have failed, and offers suggestions on how to enhance prospects for reparations to Palestinian displacement and dispossessions. A unique contribution to the study of the Arab-Israeli peace process, this book will be an important reference for scholars of the Arab-Israeli conflict, and for students and scholars of politics, conflict resolution and history.

The Elusive Search for Peace

Examines key themes : dominant group values; the role of the security forces; policing; armed struggle; reform and revolution; nationalism; ethno-nationalism; and the mythology of struggle.

Palestinians in Jerusalem and Jaffa, 1948

Between November 1947 and May 1948 war between the Palestinian Arab community and the Jewish community encompassed Palestine, with Jerusalem and Jaffa becoming focal points in the conflict due to their centrality, size and symbolic importance. Palestinians in Jerusalem and Jaffa, 1948 examines Palestinian Arab society, institutions, and fighters in Jerusalem and Jaffa during the conflict. It is one of the first books in English that deals with the Palestinian Arabs at this crucial and tragic moment in their history, with extensive use of Arabic sources and an inquiry from the Palestinian vantage point. It examines the causes of the social collapse of the Palestinian Arab communities in Jerusalem and Jaffa during the 1948 inter-communal war, and the impact of this collapse on the military defeat. This

book reveals that the most important internal factors to the Palestinian defeat were the social changes that took place in Arab society during the British Mandate, namely internal migration from rural areas to the cities, the shift from agriculture to wage labour, and the rise of the urban middle class. By looking beyond the well-established external factors, this study uncovers how modernity led to a breakdown within Palestinian Arab society, widening social fissures without producing effective institutions, and thus alienating social classes both from each other and from the leadership. With careful examination of a range of sources and informed analysis of Palestinian social history, *Palestinians in Jerusalem and Jaffa, 1948* is a key resource for students and scholars interested in the modern Middle East, Palestinian Studies, the Arab-Israeli conflict and Israel Studies.

The Naqab Bedouin and Colonialism

The Naqab Bedouin and Colonialism brings together new scholarship to challenge perceived paradigms, often dominated by orientalist, modernist or developmentalist assumptions on the Naqab Bedouin. The past decade has witnessed a change in both the wider knowledge production on, and political profile of, the Naqab Bedouin. This book addresses this change by firstly, endeavouring to overcome the historic isolation of Naqab Bedouin studies from the rest of Palestine studies by situating, studying and analyzing their predicaments firmly within the contemporary context of Israeli settler-colonial policies. Secondly, it strives to de-colonise research and advocacy on the Naqab Bedouin, by, for example, reclaiming 'indigenous' knowledge and terminology. Offering not only a nuanced description and analysis of Naqab Bedouin agency and activism, but also trying to draw broader conclusion as to the functioning of settler-colonial power structures as well as to the politics of research in such a context, this book is essential reading for students and researchers with an interest in Postcolonial Studies, Development Studies, Israel/Palestine Studies and the contemporary Middle East more broadly.

Students and Resistance in Palestine

Exploring the Palestinian Student Movement from an historical and sociological perspective, this book demonstrates how Palestinian national identity has been built in the absence of national institutions, whilst emphasizing the role of higher education as an agent of social change, capable of crystallizing patterns of national identity. Focussing on the political and social activities of Palestinian students in two arenas – the West Bank and Gaza Strip, and the Palestinian diaspora, *Students & Resistance* covers the period from 1952-2000. The book investigates the commonality of the goal of the respective movements in securing independence and the building of a sovereign Palestinian state, whilst simultaneously comparing their development, social tone and the differing challenges each movement faced. Examining a plethora of sources including; Palestinian student magazines, PLO documents, Palestinian and Arabic news media, and archival records, to demonstrate how the Palestinian Student Movements became a major political player, this book is of interest to scholars and students of Palestinian History, Politics and the Arab-Israeli Conflict.

Trans-Colonial Urban Space in Palestine

Taking a multidisciplinary approach to examine the dynamics of ethno-national contestation and colonialism in Israel/Palestine, this book investigates the approaches for dealing with the colonial and post-colonial urban space, resituating them within the various theoretical frameworks in colonial urban studies. The book uses Henry Lefebvre's three constituents of space – perceived, conceived and lived – to analyse past and present colonial cases interactively with time. It mixes the non-temporal conceptual framework of analysis of colonialism using literature of previous colonial cases with the inter-temporal abstract Lefebvrian concepts of space to produce an inter-temporal re-reading of them. Israeli colonialism in the occupied areas of 1967, its contractions from Sinai and Gaza, and the implications on the West Bank are analysed in detail. By illustrating the transformations in colonial urban space at different temporal stages, a new phase is proposed - the trans-colonial. This provides a conceptual means to avoid the pitfalls of neo-colonial and post-colonial influences experienced in previous cases, and the book goes on to highlight the implications of such a phase on the Palestinians. It is an important contribution to studies on Middle East Politics and Urban Geography.

Diasporic Activism in the Israeli-Palestinian Conflict

Through an analysis of the activities of Arab-Palestinian and Jewish organizations on behalf of and towards their conflict-ridden homelands, *Diasporic Activism in the Israeli-Palestinian Conflict* provides

both a detailed picture of diasporic activism in the Middle East as well as advancing theory-building on the roles of diasporas in helping or hindering peace. Drawing on research into (transnational) social movements, diaspora studies and constructivist International Relations theory, this book retraces how this process of diversification occurred, and explains why neither the Jewish nor the Arab Diaspora community hold a unified position in the Israeli-Palestinian conflict, but are each comprised of both hawks and doves.

The Rise and Fall of Arab Jerusalem

This book examines the politics of Jerusalem since 1967 and the city's decline as an Arab city. Covering issues such as the Old City, the barrier, planning regulations and efforts to remove Palestinians from it, the book provides a broad overview of the contemporary situation and political relations inside the Palestinian community, but also with the Israeli authorities.

Conflict Transformation and the Palestinians

This book explores the challenges of transforming the violent conflict between the State of Israel and the Palestinians into just peace. There are many challenges involved in the bottom-up transformation of the violent structures that sustain the State of Israel's occupation of Palestinian territory. This book examines these structures as it assesses the actors and strategies that are contributing to the termination of cycles of violence and oppression. Consisting of contributions from both peace practitioners and academics who have conducted research within Israel and the occupied territory, the volume utilises a multidisciplinary perspective to examine promising strategies for conflict transformation in Israel and the occupied Palestinian territory. Moreover, it spells out the types of nonviolent strategy that are being used to expose and undermine occupation structures, and surveys the manner in which a variety of key actors are working towards the transformation of the ongoing conflict. As a whole, the volume presents a proposal for the transformation of the conflict between Palestinians and the State of Israel that embraces the constructive potential of conflict, engages with power asymmetry, and pushes for justice and accountability. This book will be of much interest to students of conflict resolution, peace studies, Middle Eastern studies, the Arab-Israeli conflict, and IR in general.

Zionism and Land Tenure in Mandate Palestine

A fundamental aspect of the conflict between Palestinians and Israelis is the territorial dispute which began long before the State of Israel was established. Analysing the land tenure system in Palestine under the administration of the British Mandate, this book questions whether, and to what extent, the land tenure system in Palestine facilitated Zionist land acquisition. The research uses benchmarks elaborated in the guidelines of the United Nations Human Settlements Programme as its analytical starting point, and looks at the formation and implementation of the land tenure system in Palestine. It goes on to place the penetration of Zionism into the land tenure system within the theoretical context of a colonial-settler framework, employing information from land registry records located at the Jordanian Department of Lands. Providing a political-historical analysis of the land tenure system from the end of Ottoman Rule until the end of the British Mandate, this book will be of interest to scholars and students of Middle Eastern History, Imperial and Colonial History, and Middle Eastern Politics.

UNRWA and Palestinian Refugees

Exploring the evolution of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), this book fills a lacuna in literature on the agency. UNRWA and Palestinian Refugees employs recent fieldwork in order to analyse challenges in programmes and service delivery, protection, camp governance, community participation, and camp improvement and reconstruction. The chapters examine the way UNRWA is adapting to a changing social, political and economic context, mostly within urban settings – a paradigmatic shift from understanding the Agency's role as simply a provider of relief and services to one comprehensively supporting the human development of Palestinian refugees. Examining the refugee debate using new disciplines and research frameworks, this collection aims to emphasise the centrality of the Palestinian refugee issue for Middle East peace-making and to contribute a better understanding of a unique agency. This book will be a useful aid for students and researchers with an interest in Middle East Studies, Politics, and the Israeli-Palestinian conflict.

The Re-Emergence of the Single State Solution in Palestine/Israel

Providing the first in-depth intellectual and organizational mapping of the single state idea's recent resurgence in Palestine/Israel, this book enquires into its nature as a phenomenon of resistance, as well as into its potential as a counterhegemonic force in the making against the processes of Zionism. Reconstructing this moment of re-emergence through primary material and interviews with diverse influential intellectuals—its analysis highlights their self-understandings, worldviews, strategies and perceptions of the phenomenon in which they are involved, while questioning whether the single state idea has the potential to become a Gramscian inspired movement of resistance against Zionism. In presenting this rare insight into a resistance movement in the making, this book resurrects an empowering image of Antonio Gramsci infused with the writings of Edward Said. This it does in an effort to both problematize the dominant interpretations of Gramsci's writings in International Relations, and to decolonise the abstract way in which resistance and counter hegemony are often studied in the discipline. Contributing a mapping of a silenced alternative and hopeful way forward in the context of escalating violence, this book is essential reading for those studying the Arab-Israeli conflict, Middle East Politics and International Relations.

Apartheid Israel

Uri Davis explores the Israeli-Palestinian conflict and charges that Israel has acted in blatant violation of most UN Security Council and General Assembly resolutions, including amassing weapons of mass destruction in violation of international law. Based on his conclusions, Davis then debates whether Israel deserves its reputation in the West as the Middle East's democratic exception.

Genealogies of Conflict

The evolution of two divided societies & their disparate strategies for dealing with ethnic conflict.

Palestine in the Interwar Period

The author examines Palestine's interwar political, social, and cultural landscape. The book sheds light on the complex forces at play in the region during this period, including colonial powers' support for the Zionist movement, the Balfour Declaration and Sykes-Picot Secret Agreement, the Peel Commission, the White Papers, the rise of Palestinian nationalism, the Palestinian revolution, and the internationalization of the Palestine question.

Seeking Mandela

Lessons from South Africa for the unresolved Israeli-Palestinian conflict.

2010

Every year, the Bibliography catalogues the most important new publications, historiographical monographs, and journal articles throughout the world, extending from prehistory and ancient history to the most recent contemporary historical studies. Within the systematic classification according to epoch, region, and historical discipline, works are also listed according to author's name and characteristic keywords in their title.

The British National Bibliography

"A clear, trenchant book on a topic of enormous importance . . . a courageous plunge into boiling waters. If The One-State Solution helps propel forward a debate that has hardly begun in this country it will have performed a signal scholarly and political function." ---Tony Judt, New York University ". . . a pioneering text. . . [A]s such it will take pride of place in a brewing debate." ---Gary Sussman, Tel Aviv University "The words 'The One-State Solution' seem to strike dread, at the least, or terror, at the most, in any established, institutional, or mainstream discourse having to do with the Israeli-Palestinian conflict. . . . It therefore takes great courage---and I use the word literally---to title explicitly a book under that infamous label. . . . Virginia Tilley is blessed with such courage and complements it with the requisite academic erudition. . . . Weaving her way through the historical progression of Zionism and through late 20th century and current international and Middle Eastern politics, she shows how the additional, pernicious state of settlement expansion (abetted by other massive human rights violations that go with the occupation) has brought us to the point where only a one-state solution can provide a just peace (and not just a state of conflict management going under the misnomer of peace)." ---

Anat Biletsky, Middle East Journal Recent events have once more put the Israeli-Palestinian issue on the front page. After decades of failed peace initiatives, the prospect of reconciliation is in the air yet again as the principal actors maneuver to end the conflict and---the world hopes---bring peace to the region. A one-state solution is a way toward that peace and needs serious, renewed consideration. The One-State Solution explains how Israeli settlements have encroached on the occupied territory of the West Bank and Gaza Strip to such an extent that any Palestinian state in those areas is unworkable. And it reveals the irreversible impact of Israel's settlement grid by summarizing its physical, demographic, financial, and political dimensions. Virginia Tilley elucidates why we should assume that this grid will not be withdrawn---or its expansion reversed---by reviewing the role of the key political actors: the Israeli government, the United States, the Arab states, and the European Union. Finally, Tilley focuses on the daunting obstacles to a one-state solution---including major revision of the Zionist dream but also Palestinian and other regional resistance---and offers some ideas about how those obstacles might be addressed. Virginia Tilley is Chief Research Specialist in the Democracy and Governance Division of the Human Resources Council in Cape Town, South Africa.

The One-State Solution

Collection of papers and keynote presentations that were delivered at a conference called "Pathways to Peace," which was held in March of 2008.

Resolving the Israeli-Palestinian Conflict

The book that is providing a storm of controversy, from 'Israel's bravest historian' (John Pilger) Renowned Israeli historian, Ilan Pappé's groundbreaking work on the formation of the State of Israel. 'Along with the late Edward Said, Ilan Pappé is the most eloquent writer of Palestinian history.' NEW STATESMAN Between 1947 and 1949, over 400 Palestinian villages were deliberately destroyed, civilians were massacred and around a million men, women, and children were expelled from their homes at gunpoint. Denied for almost six decades, had it happened today it could only have been called 'ethnic cleansing'. Decisively debunking the myth that the Palestinian population left of their own accord in the course of this war, Ilan Pappé offers impressive archival evidence to demonstrate that, from its very inception, a central plank in Israel's founding ideology was the forcible removal of the indigenous population. Indispensable for anyone interested in the current crisis in the Middle East. *** 'Ilán Pappé is Israel's bravest, most principled, most incisive historian.' JOHN PILGER 'Pappé has opened up an important new line of inquiry into the vast and fateful subject of the Palestinian refugees. His book is rewarding in other ways. It has at times an elegiac, even sentimental, character, recalling the lost, obliterated life of the Palestinian Arabs and imagining or regretting what Pappé believes could have been a better land of Palestine.' TIMES LITERARY SUPPLEMENT 'A major intervention in an argument that will, and must, continue. There's no hope of lasting Middle East peace while the ghosts of 1948 still walk.' INDEPENDENT

The Ethnic Cleansing of Palestine

The Israel-Palestine conflict is frequently characterised by the violence between the two sides, beneath which lie a whole series of issues and disagreements. This book uniquely brings together Israeli and Palestinian viewpoints on key topics, providing an invaluable guide to the latest thinking on the major topics that the peace process will be based around.

The Jewish National Fund

This publication explores violence, conflict and peace. It focuses on the non-governmental component in ethno-political conflicts. Civil society actors, or "conflict society organizations" (CoSOs), are increasingly central in view of the complexity of contemporary ethno-political conflicts. CoSOs are key players in ethno-political conflicts, both as violators and as promoters of human rights. Nevertheless, the precise relationships underpinning the human rights-civil society-conflict nexus have not been fully examined. This volume analyses the impact of civil society on ethno-political conflicts through their human rights-related activities, and identifies the means to strengthen the complementarity between civil society and international governmental actors in promoting peace. These aims are addressed in case studies on Bosnia-Herzegovina, Cyprus, Turkey's Kurdish question, and Israel-Palestine.

The Israel-Palestine Conflict

The Israeli-Palestinian conflict has long been intertwined with, and has had a profound influence on, the principles of modern international law. Placing a rights-based approach to the Israeli-Palestinian conflict at the centre of discussions over its peaceful resolution, this book provides detailed consideration of international law and its application to political issues. Through the lens of international law and justice, the book debunks the myth that law is not useful to its resolution, illustrating through both theory and practice how international law points the way to a just and durable solution to the conflict in the Middle East. Contributions from leading scholars in their respective fields give an in-depth analysis of key issues that have been marginalized in most mainstream discussions of the Israeli-Palestinian conflict: Palestinian refugees Jerusalem security legal and political frameworks the future of Palestine. Written in a style highly accessible to the non-specialist, this book is an important addition to the existing literature on the subject. The findings of this book will not only be of interest to students and scholars of Middle Eastern politics, International Law, International Relations and conflict resolution, but will be an invaluable resource for human rights researchers, NGO employees, and embassy personnel, policy staffers and negotiators.
