

The Autobiography Of A Transgender Scientist The Mit Press

[#transgender scientist](#) [#autobiography](#) [#MIT Press](#) [#gender identity](#) [#science memoir](#)

Explore the compelling journey of a transgender scientist in this groundbreaking autobiography published by The MIT Press. This book delves into the intersection of personal identity and scientific pursuits, offering a unique perspective on navigating the complexities of gender transition within the academic world and beyond. It's a must-read for anyone interested in understanding the challenges and triumphs of transgender individuals in STEM fields.

You can freely download papers to support your thesis, dissertation, or project.

Thank you for accessing our website.

We have prepared the document Transgender Scientist Memoir Mit Press just for you. You are welcome to download it for free anytime.

The authenticity of this document is guaranteed.

We only present original content that can be trusted.

This is part of our commitment to our visitors.

We hope you find this document truly valuable.

Please come back for more resources in the future.

Once again, thank you for your visit.

This document remains one of the most requested materials in digital libraries online. By reaching us, you have gained a rare advantage.

The Autobiography of a Transgender Scientist

A leading scientist describes his life, his gender transition, his scientific work, and his advocacy for gender equality in science. Ben Barres was known for his groundbreaking scientific work and for his groundbreaking advocacy for gender equality in science. In this book, completed shortly before his death from pancreatic cancer in December 2017, Barres (born in 1954) describes a life full of remarkable accomplishments—from his childhood as a precocious math and science whiz to his experiences as a female student at MIT in the 1970s to his female-to-male transition in his forties, to his scientific work and role as teacher and mentor at Stanford. Barres recounts his early life—his interest in science, first manifested as a fascination with the mad scientist in Superman; his academic successes; and his gender confusion. Barres felt even as a very young child that he was assigned the wrong gender. After years of being acutely uncomfortable in his own skin, Barres transitioned from female to male. He reports he felt nothing but relief on becoming his true self. He was proud to be a role model for transgender scientists. As an undergraduate at MIT, Barres experienced discrimination, but it was after transitioning that he realized how differently male and female scientists are treated. He became an advocate for gender equality in science, and later in life responded pointedly to Larry Summers's speculation that women were innately unsuited to be scientists. Privileged white men, Barres writes, “miss the basic point that in the face of negative stereotyping, talented women will not be recognized.” At Stanford, Barres made important discoveries about glia, the most numerous cells in the brain, and he describes some of his work. “The most rewarding part of his job,” however, was mentoring young scientists. That, and his advocacy for women and transgender scientists, ensures his legacy.

Data Feminism

A new way of thinking about data science and data ethics that is informed by the ideas of intersectional feminism. Today, data science is a form of power. It has been used to expose injustice, improve health

outcomes, and topple governments. But it has also been used to discriminate, police, and surveil. This potential for good, on the one hand, and harm, on the other, makes it essential to ask: Data science by whom? Data science for whom? Data science with whose interests in mind? The narratives around big data and data science are overwhelmingly white, male, and techno-heroic. In *Data Feminism*, Catherine D'Ignazio and Lauren Klein present a new way of thinking about data science and data ethics—one that is informed by intersectional feminist thought. Illustrating data feminism in action, D'Ignazio and Klein show how challenges to the male/female binary can help challenge other hierarchical (and empirically wrong) classification systems. They explain how, for example, an understanding of emotion can expand our ideas about effective data visualization, and how the concept of invisible labor can expose the significant human efforts required by our automated systems. And they show why the data never, ever “speak for themselves.” *Data Feminism* offers strategies for data scientists seeking to learn how feminism can help them work toward justice, and for feminists who want to focus their efforts on the growing field of data science. But *Data Feminism* is about much more than gender. It is about power, about who has it and who doesn't, and about how those differentials of power can be challenged and changed.

#HashtagActivism

This “well-researched, nuanced” study of the rise of social media activism explores how marginalized groups use Twitter to advance counter-narratives, preempt political spin, and build diverse networks of dissent (Ms.) The power of hashtag activism became clear in 2011, when #IranElection served as an organizing tool for Iranians protesting a disputed election and offered a global audience a front-row seat to a nascent revolution. Since then, activists have used a variety of hashtags, including #JusticeForTrayvon, #BlackLivesMatter, #YesAllWomen, and #MeToo to advocate, mobilize, and communicate. In this book, Sarah Jackson, Moya Bailey, and Brooke Foucault Welles explore how and why Twitter has become an important platform for historically disenfranchised populations, including Black Americans, women, and transgender people. They show how marginalized groups, long excluded from elite media spaces, have used Twitter hashtags to advance counternarratives, preempt political spin, and build diverse networks of dissent. The authors describe how such hashtags as #MeToo, #SurvivorPrivilege, and #WhyIStayed have challenged the conventional understanding of gendered violence; examine the voices and narratives of Black feminism enabled by #FastTailedGirls, #YouOKSis, and #SayHerName; and explore the creation and use of #GirlsLikeUs, a network of transgender women. They investigate the digital signatures of the “new civil rights movement”—the online activism, storytelling, and strategy-building that set the stage for #BlackLivesMatter—and recount the spread of racial justice hashtags after the killing of Michael Brown in Ferguson, Missouri, and other high-profile incidents of killings by police. Finally, they consider hashtag created by allies, including #AllMenCan and #CrimingWhileWhite.

Gender(s)

Why gender is strange, even when it's played straight, and how race and money are two of its most dramatic ingredients. In this volume in the MIT Press Essential Knowledge series, Kathryn Bond Stockton explores the fascinating, fraught, intimate, morphing matter of gender. Stockton argues for gender's strangeness, no matter how “normal” the concept seems; gender is queer for everyone, she claims, even when it's played quite straight. And she explains how race and money dramatically shape everybody's gender, even in sometimes surprising ways. Playful but serious, erudite and witty, Stockton marshals an impressive array of exhibits to consider, including dolls and their new gendering, the thrust of Jane Austen and Lil Nas X, gender identities according to women's colleges, gay and transgender ballroom scenes, and much more. Stockton also examines gender in light of biology's own strange ways, its out-of-syncness with “male” and “female,” explaining attempts to fortify gender with clothing, language, labor, and hair. She investigates gender as a concept--its concerning history, its bewitching pleasures and falsifications--by meeting the moment of where we are, with its many genders and counters-to-gender. This compelling background propels the question that drives this book and foregrounds race: what is “the opposite sex,” after all? If there is no opposite, doesn't the male/female duo undergirding gender come undone?

The Man Who Saw Tomorrow

The first full-length biography of a brilliant, self-taught inventor whose innovations in information and energy technology continue to shape our world. The *Economist* called Stanford R. Ovshinsky

(1922–2012) “the Edison of our age,” but this apt comparison doesn't capture the full range of his achievements. As an independent, self-educated inventor, Ovshinsky not only created many important devices but also made fundamental discoveries in materials science. This book offers the first full-length biography of a visionary whose energy and information innovations continue to fuel our post-industrial economy. In *The Man Who Saw Tomorrow*, Lillian Hoddeson and Peter Garrett tell the story of an unconventional genius with no formal education beyond high school who invented, among other things, the rechargeable nickel metal hydride batteries that have powered everything from portable electronics to hybrid cars, a system for mass-producing affordable thin-film solar panels, and rewritable CDs and DVDs. His most important discovery, the Ovshinsky effect, led to a paradigm shift in condensed matter physics and yielded phase-change memory, which is now enabling new advances in microelectronics. A son of the working class who began as a machinist and toolmaker, Ovshinsky focused his work on finding solutions to urgent social problems, and to pursue those goals, he founded Energy Conversion Devices, a unique research and development lab. At the end of his life, battered by personal and professional losses, Ovshinsky nevertheless kept working to combat global warming by making solar energy “cheaper than coal”—another of his many visions of a better tomorrow.

Butch Heroes

Portraits and texts recover lost queer history: the lives of people who didn't conform to gender norms, from the fifteenth through the twentieth centuries. “A serious—and seriously successful—queer history recovery project.” —Publishers Weekly Katherina Hetzeldorfer, tried “for a crime that didn't have a name” (same sex sexual relations) and sentenced to death by drowning in 1477; Charles aka Mary Hamilton, publicly whipped for impersonating a man in eighteenth-century England; Clara, aka “Big Ben,” over whom two jealous women fought in 1926 New York: these are just three of the lives that the artist Ria Brodell has reclaimed for queer history in *Butch Heroes*. Brodell offers a series of twenty-eight portraits of forgotten but heroic figures, each accompanied by a brief biographical note. They are individuals who were assigned female at birth but whose gender presentation was more masculine than feminine, who did not want to enter into heterosexual marriage, and who often faced dire punishment for being themselves. Brodell's detailed and witty paintings are modeled on Catholic holy cards, slyly subverting a religious template. The portraits and the texts offer intriguing hints of lost lives: cats lounge in the background of domestic settings; one of the figures is said to have been employed variously as “a prophet, a soldier, or a textile worker”; another casually holds a lit cigarette. Brodell did extensive research for each portrait, piecing together a life from historical accounts, maps, journals, paintings, drawings, and photographs, finding the heroic in the forgotten.

Civic Media

Examinations of civic engagement in digital culture—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life. Countless people around the world harness the affordances of digital media to enable democratic participation, coordinate disaster relief, campaign for policy change, and strengthen local advocacy groups. The world watched as activists used social media to organize protests during the Arab Spring, Occupy Wall Street, and Hong Kong's Umbrella Revolution. Many governmental and community organizations changed their mission and function as they adopted new digital tools and practices. This book examines the use of “civic media”—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life. Scholars from a range of disciplines and practitioners from a variety of organizations offer analyses and case studies that explore the theory and practice of civic media. The contributors set out the conceptual context for the intersection of civic and media; examine the pressure to innovate and the sustainability of innovation; explore play as a template for resistance; look at civic education; discuss media-enabled activism in communities; and consider methods and funding for civic media research. The case studies that round out each section range from a “debt resistance” movement to government service delivery ratings to the “It Gets Better” campaign aimed at combating suicide among lesbian, gay, bisexual, transgender, and queer youth. The book offers a valuable interdisciplinary dialogue on the challenges and opportunities of the increasingly influential space of civic media.

The Concept of Climate Migration

This timely book offers a unique interdisciplinary inquiry into the prospects of different political narratives on climate migration. It identifies the essential angles on climate migration – the humanitarian

narrative, the migration narrative and the climate change narrative – and assesses their prospects. The author contends that although such arguments will influence global governance, they will not necessarily achieve what advocates hope for. He discusses how the weaknesses of the concept of “climate migration” are likely to be utilized in favour of repressive policies against migration or for the defence of industrial nations against perceived threats from the Third World.

Trap Door

Essays, conversations, and archival investigations explore the paradoxes, limitations, and social ramifications of trans representation within contemporary culture. The increasing representation of trans identity throughout art and popular culture in recent years has been nothing if not paradoxical. Trans visibility is touted as a sign of a liberal society, but it has coincided with a political moment marked both by heightened violence against trans people (especially trans women of color) and by the suppression of trans rights under civil law. *Trap Door* grapples with these contradictions. The essays, conversations, and dossiers gathered here delve into themes as wide-ranging yet interconnected as beauty, performativity, activism, and police brutality. Collectively, they attest to how trans people are frequently offered “doors”—entrances to visibility and recognition—that are actually “traps,” accommodating trans bodies and communities only insofar as they cooperate with dominant norms. The volume speculates about a third term, perhaps uniquely suited for our time: the trapdoor, neither entrance nor exit, but a secret passageway leading elsewhere. *Trap Door* begins a conversation that extends through and beyond trans culture, showing how these issues have relevance for anyone invested in the ethics of visual culture. Contributors Lexi Adsit, Sara Ahmed, Nicole Archer, Kai Lumumba Barrow, Johanna Burton, micha cárdenas, Mel Y. Chen, Grace Dunham, Treva Ellison, Sydney Freeland, Che Gossett, Reina Gossett, Stamatina Gregory, Miss Major Griffin-Gracy, Robert Hamblin, Eva Hayward, Juliana Huxtable, Yve Laris Cohen, Abram J. Lewis, Heather Love, Park McArthur, CeCe McDonald, Toshio Meronek, Fred Moten, Tavia Nyong'o, Morgan M. Page, Roy Pérez, Dean Spade, Eric A. Stanley, Jeannine Tang, Wu Tsang, Jeanne Vaccaro, Chris E. Vargas, Geo Wyeth, Kalaniopua Young, Constantina Zavitsanos

Design Justice

An exploration of how design might be led by marginalized communities, dismantle structural inequality, and advance collective liberation and ecological survival. What is the relationship between design, power, and social justice? “Design justice” is an approach to design that is led by marginalized communities and that aims explicitly to challenge, rather than reproduce, structural inequalities. It has emerged from a growing community of designers in various fields who work closely with social movements and community-based organizations around the world. This book explores the theory and practice of design justice, demonstrates how universalist design principles and practices erase certain groups of people—specifically, those who are intersectionally disadvantaged or multiply burdened under the matrix of domination (white supremacist heteropatriarchy, ableism, capitalism, and settler colonialism)—and invites readers to “build a better world, a world where many worlds fit; linked worlds of collective liberation and ecological sustainability.” Along the way, the book documents a multitude of real-world community-led design practices, each grounded in a particular social movement. *Design Justice* goes beyond recent calls for design for good, user-centered design, and employment diversity in the technology and design professions; it connects design to larger struggles for collective liberation and ecological survival.

Norbert Wiener-A Life in Cybernetics

Norbert Wiener's celebrated autobiography, available for the first time in one volume. Norbert Wiener—*A Life in Cybernetics* combines for the first time the two volumes of Norbert Wiener's celebrated autobiography. Published at the height of public enthusiasm for cybernetics—when it was taken up by scientists, engineers, science fiction writers, artists, and musicians—*Ex-Prodigy* (1953) and *I Am a Mathematician* (1956) received attention from both scholarly and mainstream publications, garnering reviews and publicity in outlets that ranged from the *New York Times* and *New York Post* to the *Virginia Quarterly Review*. Norbert Wiener was a mathematician with extraordinarily broad interests. The son of a Harvard professor of Slavic languages, Wiener was reading Dante and Darwin at seven, graduated from Tufts at fourteen, and received a PhD from Harvard at eighteen. He joined MIT's Department of Mathematics in 1919, where he remained until his death in 1964 at sixty-nine. In *Ex-Prodigy*, Wiener offers an emotionally raw account of being raised as a child prodigy by an overbearing father. In *I Am a*

Mathematician, Wiener describes his research at MIT and how he established the foundations for the multidisciplinary field of cybernetics and the theory of feedback systems. This volume makes available the essence of Wiener's life and thought to a new generation of readers.

The Transgender Exigency

At no other point in human history have the definitions of "woman" and "man," "male" and "female," "masculine" and "feminine," been more contentious than now. This book advances a pragmatic approach to the act of defining that acknowledges the important ethical dimensions of our definitional practices. Increased transgender rights and visibility has been met with increased opposition, controversy, and even violence. Who should have the power to define the meanings of sex and gender? What values and interests are advanced by competing definitions? Should an all-boys' college or high school allow transgender boys to apply? Should transgender women be allowed to use the women's bathroom? How has growing recognition of intersex conditions challenged our definitions of sex/gender? In this timely intervention, Edward Schiappa examines the key sites of debate including schools, bathrooms, the military, sports, prisons, and feminism, drawing attention to the political, practical, and ethical dimensions of the act of defining itself. This is an important text for students and scholars in gender studies, philosophy, communication, and sociology. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Gonda

Gonda, a new book by Ursula Mayer and Maria Fusco, experiments in cinematic and linguistic registers through polyphonic monologue. Taking the form of a ciné-roman, the book is based on Mayer's 16mm film of the same name, with a screenplay written by Maria Fusco and commissioned by Film London. *Gonda* is informed by Ayn Rand's 1934 play *Ideal*. In the play's script, controversial Russian American writer and philosopher Rand lays out her philosophical system of "Objectivism" with its stubbornly anti-altruistic and individualistic position. As a critical counter to Rand, *Gonda* creates kaleidoscopic printed spaces in which image and text shift roles to affect presupposed ideals of identity and existence. Noting how the cinematic image actually gazes back on us, the book utilizes highly stylized and precisely composed full-color imagery, and features Dutch transgender model Valentijn de Hingh. The screenplay, printed in full in this book, is developed from a series of interdisciplinary workshops where academics, curators, critics, and writers considered the possibilities of writing through or by rather than about Rand's play. The screenplay's key textual reference is the production structure of Félix Guattari's unrealized 1986 Project for a Film by Kafka, in which Guattari proposed a made-for-television mini-series inspired by episodes in Kafka's writings and life. *Gonda* cannibalizes original writing and transcribed workshop material together with five letter-based passages from *Ideal*, nudging them into alternative personal pronouns, to make *Gonda* a book of voices. Ursula Mayer is an Austrian artist based in London. Working predominantly with film, performance, and photography, her work has been recently shown in the Baltic Triennial, Vilnius; Whitechapel Gallery, London; and Performa, New York. Maria Fusco is a Northern Irish writer, critic, and editor based in London. She is director of art writing at Goldsmiths, University of London, and editor of the journal *The Happy Hypocrite*. Her book of short stories, *The Mechanical Copula*, was published by Sternberg Press in 2010.

The Spike

The story of a neural impulse and what it reveals about how our brains work We see the last cookie in the box and think, can I take that? We reach a hand out. In the 2.1 seconds that this impulse travels through our brain, billions of neurons communicate with one another, sending blips of voltage through our sensory and motor regions. Neuroscientists call these blips "spikes." Spikes enable us to do everything: talk, eat, run, see, plan, and decide. In *The Spike*, Mark Humphries takes readers on the epic journey of a spike through a single, brief reaction. In vivid language, Humphries tells the story of what happens in our brain, what we know about spikes, and what we still have left to understand about them. Drawing on decades of research in neuroscience, Humphries explores how spikes are born, how they are transmitted, and how they lead us to action. He dives into previously unanswered mysteries: Why are most neurons silent? What causes neurons to fire spikes spontaneously, without input from other neurons or the outside world? Why do most spikes fail to reach any destination? Humphries presents a new vision of the brain, one where fundamental computations are carried out by spontaneous spikes that predict what will happen in the world, helping us to perceive, decide, and

react quickly enough for our survival. Traversing neuroscience's expansive terrain, *The Spike* follows a single electrical response to illuminate how our extraordinary brains work.

American Eugenics

Traces the history of eugenics ideology in the United States and its ongoing presence in contemporary life. The Nazis may have given eugenics its negative connotations, but the practice--and the "science" that supports it--is still disturbingly alive in America in anti-immigration initiatives, the quest for a "gay gene," and theories of collective intelligence. Tracing the historical roots and persistence of eugenics in the United States, Nancy Ordover explores the political and cultural climate that has endowed these campaigns with mass appeal and scientific legitimacy. *American Eugenics* demonstrates how biological theories of race, gender, and sexuality are crucially linked through a concern with regulating the "unfit." These links emerge in Ordover's examination of three separate but ultimately related American eugenics campaigns: early twentieth-century anti-immigration crusades; medical models and interventions imposed on (and sometimes embraced by) lesbians, gays, transgendered people, and bisexuals; and the compulsory sterilization of poor women and women of color. Throughout, her work reveals how constructed notions of race, gender, sexuality, and nation are put to ideological uses and how "faith in science" can undermine progressive social movements, drawing liberals and conservatives alike into eugenics-based discourse and policies.

George

"Allow me to introduce you to a remarkable book, full of love, wonder, hope, and the importance of getting to be who you were meant to be. You must read this." - David Levithan, author of *Every Day* and editor of *George*. When people look at *George*, they think they see a boy. But she knows she's not a boy. She knows she's a girl. *George* thinks she'll have to keep this a secret forever. Then her teacher announces that their class play is going to be *Charlotte's Web*. *George* really, really, REALLY wants to play Charlotte. But the teacher says she can't even try out for the part . . . because she's a boy.

The Outer Limits of Reason

This exploration of the scientific limits of knowledge challenges our deep-seated beliefs about our universe, our rationality, and ourselves. "A must-read for anyone studying information science." —Publishers Weekly, starred review Many books explain what is known about the universe. This book investigates what cannot be known. Rather than exploring the amazing facts that science, mathematics, and reason have revealed to us, this work studies what science, mathematics, and reason tell us cannot be revealed. In *The Outer Limits of Reason*, Noson Yanofsky considers what cannot be predicted, described, or known, and what will never be understood. He discusses the limitations of computers, physics, logic, and our own intuitions about the world—including our ideas about space, time, and motion, and the complex relationship between the knower and the known. Yanofsky describes simple tasks that would take computers trillions of centuries to complete and other problems that computers can never solve: • perfectly formed English sentences that make no sense • different levels of infinity • the bizarre world of the quantum • the relevance of relativity theory • the causes of chaos theory • math problems that cannot be solved by normal means • statements that are true but cannot be proven Moving from the concrete to the abstract, from problems of everyday language to straightforward philosophical questions to the formalities of physics and mathematics, Yanofsky demonstrates a myriad of unsolvable problems and paradoxes. Exploring the various limitations of our knowledge, he shows that many of these limitations have a similar pattern and that by investigating these patterns, we can better understand the structure and limitations of reason itself. Yanofsky even attempts to look beyond the borders of reason to see what, if anything, is out there.

A Lab of One's Own

A riveting memoir-manifesto from the first female director of the National Science Foundation about the entrenched sexism in science, the elaborate detours women have taken to bypass the problem, and how to fix the system. If you think sexism thrives only on Wall Street or in Hollywood, you haven't visited a lab, a science department, a research foundation, or a biotech firm. Rita Colwell is one of the top scientists in America: the groundbreaking microbiologist who discovered how cholera survives between epidemics and the former head of the National Science Foundation. But when she first applied for a graduate fellowship in bacteriology, she was told, "We don't waste fellowships on women." A lack of support from some male superiors would lead her to change her area of study six times before

completing her PhD. *A Lab of One's Own* documents all Colwell has seen and heard over her six decades in science, from sexual harassment in the lab to obscure systems blocking women from leading professional organizations or publishing their work. Along the way, she encounters other women pushing back against the status quo, including a group at MIT who revolt when they discover their labs are a fraction of the size of their male colleagues'. Resistance gave female scientists special gifts: forced to change specialties so many times, they came to see things in a more interdisciplinary way, which turned out to be key to making new discoveries in the twentieth and twenty-first centuries. Colwell would also witness the advances that could be made when men and women worked together—often under her direction, such as when she headed a team that helped to uncover the source of the anthrax used in the 2001 letter attacks. *A Lab of One's Own* shares the sheer joy a scientist feels when moving toward a breakthrough, and the thrill of uncovering a whole new generation of female pioneers. But it is also the science book for the #MeToo era, offering an astute diagnosis of how to fix the problem of sexism in science—and a celebration of the women pushing back.

Programmed Inequality

This “sobering tale of the real consequences of gender bias” explores how Britain lost its early dominance in computing by systematically discriminating against its most qualified workers: women (Harvard Magazine). In 1944, Britain led the world in electronic computing. By 1974, the British computer industry was all but extinct. What happened in the intervening thirty years holds lessons for all postindustrial superpowers. As Britain struggled to use technology to retain its global power, the nation's inability to manage its technical labor force hobbled its transition into the information age. In *Programmed Inequality*, Mar Hicks explores the story of labor feminization and gendered technocracy that undercut British efforts to computerize. That failure sprang from the government's systematic neglect of its largest trained technical workforce simply because they were women. Women were a hidden engine of growth in high technology from World War II to the 1960s. As computing experienced a gender flip, becoming male-identified in the 1960s and 1970s, labor problems grew into structural ones and gender discrimination caused the nation's largest computer user—the civil service and sprawling public sector—to make decisions that were disastrous for the British computer industry and the nation as a whole. Drawing on recently opened government files, personal interviews, and the archives of major British computer companies, *Programmed Inequality* takes aim at the fiction of technological meritocracy. Hicks explains why, even today, possessing technical skill is not enough to ensure that women will rise to the top in science and technology fields. *Programmed Inequality* shows how the disappearance of women from the field had grave macroeconomic consequences for Britain, and why the United States risks repeating those errors in the twenty-first century.

Peculiar Places

The queer recluse, the shambling farmer, the clannish hill folk—white rural populations have long disturbed the American imagination, alternately revered as moral, healthy, and hardworking, and feared as antisocial or socially uncouth. In *Peculiar Places*, Ryan Lee Cartwright examines the deep archive of these contrary formations, mapping racialized queer and disability histories of white social nonconformity across the rural twentieth-century United States. Sensationalized accounts of white rural communities' aberrant sexualities, racial intermingling, gender transgressions, and anomalous bodies and minds, which proliferated from the turn of the century, created a national view of the perversity of white rural poverty for the American public. Cartwright contends that these accounts, extracted and estranged from their own ambivalent forum of community gossip, must be read in kind: through a racialized, materialist queercrip optic of the deeply familiar and mundane. Taking in popular science, documentary photography, news media, documentaries, and horror films, *Peculiar Places* orients itself at the intersections of disability studies, queer studies, and gender studies to illuminate a racialized landscape both profoundly ordinary and familiar.

Thomas Jefferson's Lives

Who was the “real” Thomas Jefferson? If this question has an answer, it will probably not be revealed reading the many accounts of his life. For two centuries biographers have provided divergent perspectives on him as a man and conflicting appraisals of his accomplishments. Jefferson was controversial in his own time, and his propensity to polarize continued in the years after his death as biographers battled to control the commanding heights of history. To judge from their depictions, there existed many different Thomas Jeffersons. The essays in this book explore how individual biographers have

shaped history—as well as how the interests and preoccupations of the times in which they wrote helped to shape their portrayals of Jefferson. In different eras biographers presented the third president variously as a proponent of individual rights or of majority rule, as a unifier or a fierce partisan, and as a champion of either American nationalism or cosmopolitanism. Conscripted to serve Whigs and Democrats, abolitionists and slaveholders, unionists and secessionists, Populists and Progressives, and seemingly every side of almost every subsequent struggle, the only constant was that Jefferson's image remained a mirror of Americans' self-conscious conceptions of their nation's virtues, values, and vices. *Thomas Jefferson's Lives* brings together leading scholars of Jefferson and his era, all of whom embrace the challenge to assess some of the most important and enduring accounts of Jefferson's life. Contributors: Jon Meacham, presidential historian * Barbara Oberg, Princeton University * J. Jefferson Looney, Thomas Jefferson Foundation at Monticello * Christine Coalwell McDonald, Westchester Community College * Robert M.S. McDonald, United States Military Academy * Andrew Burstein, Louisiana State University * Jan Ellen Lewis, Rutgers University * Richard Samuelson, California State University, San Bernardino * Nancy Isenberg, Louisiana State University * Joanne B. Cogliano, University of Edinburgh * Annette Gordon-Reed, Harvard University * Gordon S. Wood, Brown University

An Apartment on Uranus

A “dissident of the gender-sex binary system” reflects on gender transitioning and political and cultural transitions in technoscientific capitalism. Uranus, the frozen giant, is the coldest planet in the solar system as well as a deity in Greek mythology. It is also the inspiration for uranism, a concept coined by the writer Karl Heinrich Ulrich in 1864 to define the “third sex” and the rights of those who “love differently.” Following Ulrich, Paul B. Preciado dreams of an apartment on Uranus where he might live beyond existing power, gender and racial strictures invented by modernity. “My trans condition is a new form of uranism,” he writes. “I am not a man. I am not a woman. I am not heterosexual. I am not homosexual. I am not bisexual. I am a dissident of the gender-sex binary system. I am the multiplicity of the cosmos trapped in a binary political and epistemological system, shouting in front of you. I am a uranist confined inside the limits of technoscientific capitalism.” This book recounts Preciado's transformation from Beatriz into Paul B., but it is not only an account of gender transitioning. Preciado also considers political, cultural, and sexual transition, reflecting on issues that range from the rise of neo-fascism in Europe to the technological appropriation of the uterus, from the harassment of trans children to the role museums might play in the cultural revolution to come. *An Apartment on Uranus* is a bold, transgressive, and necessary book.

Irreversible Damage

NAMED A BOOK OF THE YEAR BY THE ECONOMIST AND ONE OF THE BEST BOOKS OF 2021 BY THE TIMES AND THE SUNDAY TIMES “*Irreversible Damage* . . . has caused a storm. Abigail Shrier, a Wall Street Journal writer, does something simple yet devastating: she rigorously lays out the facts.” —Janice Turner, *The Times* of London Until just a few years ago, gender dysphoria—severe discomfort in one's biological sex—was vanishingly rare. It was typically found in less than .01 percent of the population, emerged in early childhood, and afflicted males almost exclusively. But today whole groups of female friends in colleges, high schools, and even middle schools across the country are coming out as “transgender.” These are girls who had never experienced any discomfort in their biological sex until they heard a coming-out story from a speaker at a school assembly or discovered the internet community of trans “influencers.” Unsuspecting parents are awakening to find their daughters in thrall to hip trans YouTube stars and “gender-affirming” educators and therapists who push life-changing interventions on young girls—including medically unnecessary double mastectomies and puberty blockers that can cause permanent infertility. Abigail Shrier, a writer for the Wall Street Journal, has dug deep into the trans epidemic, talking to the girls, their agonized parents, and the counselors and doctors who enable gender transitions, as well as to “detransitioners”—young women who bitterly regret what they have done to themselves. Coming out as transgender immediately boosts these girls' social status, Shrier finds, but once they take the first steps of transition, it is not easy to walk back. She offers urgently needed advice about how parents can protect their daughters. A generation of girls is at risk. Abigail Shrier's essential book will help you understand what the trans craze is and how you can inoculate your child against it—or how to retrieve her from this dangerous path.

Pollution Is Colonialism

In *Pollution Is Colonialism* Max Liboiron presents a framework for understanding scientific research methods as practices that can align with or against colonialism. They point out that even when researchers are working toward benevolent goals, environmental science and activism are often premised on a colonial worldview and access to land. Focusing on plastic pollution, the book models an anticolonial scientific practice aligned with Indigenous, particularly Métis, concepts of land, ethics, and relations. Liboiron draws on their work in the Civic Laboratory for Environmental Action Research (CLEAR)—an anticolonial science laboratory in Newfoundland, Canada—to illuminate how pollution is not a symptom of capitalism but a violent enactment of colonial land relations that claim access to Indigenous land. Liboiron's creative, lively, and passionate text refuses theories of pollution that make Indigenous land available for settler and colonial goals. In this way, their methodology demonstrates that anticolonial science is not only possible but is currently being practiced in ways that enact more ethical modes of being in the world.

Data and Society

The standard teaching text for Data and Society modules explaining to undergraduates, in different social-science disciplines, the Big Data Revolution in an accessible and critical way.

Memes in Digital Culture

Taking “Gangnam Style” seriously: what Internet memes can tell us about digital culture. In December 2012, the exuberant video “Gangnam Style” became the first YouTube clip to be viewed more than one billion times. Thousands of its viewers responded by creating and posting their own variations of the video—“Mitt Romney Style,” “NASA Johnson Style,” “Egyptian Style,” and many others. “Gangnam Style” (and its attendant parodies, imitations, and derivations) is one of the most famous examples of an Internet meme: a piece of digital content that spreads quickly around the web in various iterations and becomes a shared cultural experience. In this book, Limor Shifman investigates Internet memes and what they tell us about digital culture. Shifman discusses a series of well-known Internet memes—including “Leave Britney Alone,” the pepper-spraying cop, LOLCats, Scumbag Steve, and Occupy Wall Street’s “We Are the 99 Percent.” She offers a novel definition of Internet memes: digital content units with common characteristics, created with awareness of each other, and circulated, imitated, and transformed via the Internet by many users. She differentiates memes from virals; analyzes what makes memes and virals successful; describes popular meme genres; discusses memes as new modes of political participation in democratic and nondemocratic regimes; and examines memes as agents of globalization. Memes, Shifman argues, encapsulate some of the most fundamental aspects of the Internet in general and of the participatory Web 2.0 culture in particular. Internet memes may be entertaining, but in this book Limor Shifman makes a compelling argument for taking them seriously.

Causal Inference

The application of causal inference methods is growing exponentially in fields that deal with observational data. Written by pioneers in the field, this practical book presents an authoritative yet accessible overview of the methods and applications of causal inference. With a wide range of detailed, worked examples using real epidemiologic data as well as software for replicating the analyses, the text provides a thorough introduction to the basics of the theory for non-time-varying treatments and the generalization to complex longitudinal data.

Strange Attractor Journal Four

From Haiti and Hong Kong to the fourth dimension and beyond: discover the secrets of madness in animals, voodoo soul and dub music, ancient peacock deities, Chinese poisoning cults, the history of spider silk weaving, heathen mugwort magic, sentient lightning, Jesuit conspiracy theories, junkie explorers, Dali's Atlantis, the resurgence of Pan (in London's Crouch End), anarchist pirates on Madagascar, an ancient Greek Rip Van Winkle and Alan Moore's unpublished John Dee opera.

Transgender Architectonics

Combining transgender studies with the ‘neomodernist’ architectures of the internationally renowned firm, Diller Scofidio + Renfro (DS+R) and with modernist writers (Samuel Beckett and Virginia Woolf) whose work anticipates that of transgender studies, this book challenges the implicit ‘spatial models’ of popular narratives of transgender - interiority, ownership, sovereignty, structure, stability, and do-

mesticity - to advance a novel theorization of transgender as a matter of exteriority, groundlessness, ornamentation, and movement. With case studies spanning the US and UK, Transgender Architectonics examines the ways in which modernist architecture can contribute to our understanding of how it is that humans are able to transform, shedding light on the manner in which architecture, space, and the spatial metaphors of gender can play significant - if often unrealized - potential roles in body and gender transformation. By remedying both the absence of actual architecture in queer theory's discussions of space and also architectural theory's marginal treatment of transgender, this volume constitutes a serious intervention in the field of 'queer space'. It draws on modernist literature in order to reckon with and rebuild the architectural ideas that already implicitly structure common understandings of the queer and transgender self. As such, it will appeal to scholars with interests in queer theory, the body and transformation, gender and sexuality, modernist writing and architectural theory.

Histories of the Transgender Child

A groundbreaking twentieth-century history of transgender children With transgender rights front and center in American politics, media, and culture, the pervasive myth still exists that today's transgender children are a brand new generation—pioneers in a field of new obstacles and hurdles. *Histories of the Transgender Child* shatters this myth, uncovering a previously unknown twentieth-century history when transgender children not only existed but preexisted the term transgender and its predecessors, playing a central role in the medicalization of trans people, and all sex and gender. Beginning with the early 1900s when children with “ambiguous” sex first sought medical attention, to the 1930s when transgender people began to seek out doctors involved in altering children's sex, to the invention of the category gender, and finally the 1960s and '70s when, as the field institutionalized, transgender children began to take hormones, change their names, and even access gender confirmation, Julian Gill-Peterson reconstructs the medicalization and racialization of children's bodies. Throughout, they foreground the racial history of medicine that excludes black and trans of color children through the concept of gender's plasticity, placing race at the center of their analysis and at the center of transgender studies. Until now, little has been known about early transgender history and life and its relevance to children. Using a wealth of archival research from hospitals and clinics, including incredible personal letters from children to doctors, as well as scientific and medical literature, this book reaches back to the first half of the twentieth century—a time when the category transgender was not available but surely existed, in the lives of children and parents.

Transgender History

Covering American transgender history from the mid-twentieth century to today, *Transgender History* takes a chronological approach to the subject of transgender history, with each chapter covering major movements, writings, and events. Chapters cover the transsexual and transvestite communities in the years following World War II; trans radicalism and social change, which spanned from 1966 with the publication of *The Transsexual Phenomenon*, and lasted through the early 1970s; the mid-'70s to 1990—the era of identity politics and the changes witnessed in trans circles through these years; and the gender issues witnessed through the '90s and '00s. *Transgender History* includes informative sidebars highlighting quotes from major texts and speeches in transgender history and brief biographies of key players, plus excerpts from transgender memoirs and discussion of treatments of transgenderism in popular culture.

Lab Girl

Lab Girl is a book about work and about love, and the mountains that can be moved when those two things come together. It is told through Jahren's remarkable stories: about the discoveries she has made in her lab, as well as her struggle to get there; about her childhood playing in her father's laboratory; about how lab work became a sanctuary for both her heart and her hands; about Bill, the brilliant, wounded man who became her loyal colleague and best friend; about their field trips - sometimes authorised, sometimes very much not - that took them from the Midwest across the USA, to Norway and to Ireland, from the pale skies of North Pole to tropical Hawaii; and about her constant striving to do and be her best, and her unswerving dedication to her life's work. Visceral, intimate, gloriously candid and sometimes extremely funny, Jahren's descriptions of her work, her intense relationship with the plants, seeds and soil she studies, and her insights on nature enliven every page of this thrilling book. In *Lab Girl*, we see anew the complicated power of the natural world, and the power that can come from facing with bravery and conviction the challenge of discovering who you are.

Trans Care

A radical and necessary rethinking of trans care What does it mean for trans people to show up for one another, to care deeply for one another? How have failures of care shaped trans lives? What care practices have trans subjects and communities cultivated in the wake of widespread transphobia and systemic forms of trans exclusion? *Trans Care* is a critical intervention in how care labor and care ethics have been thought, arguing that dominant modes of conceiving and critiquing the politics and distribution of care entrench normative and cis-centric familial structures and gendered arrangements. A serious consideration of trans survival and flourishing requires a radical rethinking of how care operates. *Forerunners* is a thought-in-process series of breakthrough digital works. Written between fresh ideas and finished books, *Forerunners* draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and the synergy of academic exchange. This is gray literature publishing: where intense thinking, change, and speculation take place in scholarship.

Data Science for Undergraduates

Data science is emerging as a field that is revolutionizing science and industries alike. Work across nearly all domains is becoming more data driven, affecting both the jobs that are available and the skills that are required. As more data and ways of analyzing them become available, more aspects of the economy, society, and daily life will become dependent on data. It is imperative that educators, administrators, and students begin today to consider how to best prepare for and keep pace with this data-driven era of tomorrow. Undergraduate teaching, in particular, offers a critical link in offering more data science exposure to students and expanding the supply of data science talent. *Data Science for Undergraduates: Opportunities and Options* offers a vision for the emerging discipline of data science at the undergraduate level. This report outlines some considerations and approaches for academic institutions and others in the broader data science communities to help guide the ongoing transformation of this field.

Transgender Marxism

Transgender Marxism is the first volume of its kind, offering a provocative and groundbreaking synthesis of transgender studies and Marxist theory. Reflecting on the relations between gender and labour, it shows how these linked phenomena structure antagonisms in particular social and historical situations. While no one is spared gendered conditioning, the contributors argue that transgender people nonetheless face particular pressures, oppressions and state persecution. The collection makes a particular contribution to Marxist feminism and social reproduction theory, through both personal and analytic examinations of the social activity demanded of trans people around the world. Exploring trans lives and movements through a Marxist lens, the book also assesses the particular experience of surviving as trans in light of the totality of gendered experience under capitalism. Twinning Marxism with other schools of thought - including psychoanalysis, phenomenology and Butlerian performativity - *Transgender Marxism* ultimately offers an insight into transgender experience, and an exciting renewal of Marxist theory itself.

Science Not Silence

Signs, artwork, stories, and photographs from the March for Science Movement and community. In January 2017, an idea on social media launched the global March for Science movement. In a few short months, more than 600 cities, 250 partners, and countless volunteers banded together to organize a historical event that drew people of all backgrounds, interests, and political leanings. On April 22, 2017, more than one million marchers worldwide took to the streets to stand up for the importance of science in society and their own lives—and each of them has a story to tell. Through signs, artwork, stories, and photographs, *Science Not Silence* shares some of the voices from the March for Science movement. From Antarctica to the North Pole, from under the sea to the tops of mountains, whether alone or alongside thousands, people marched for science. A citizen scientist with advanced ALS spent countless hours creating an avatar using technology that tracks his eye movements so that he could give a speech. Couples carrying babies born using in vitro fertilization dressed them in shirts that said “Made By Science.” The former U.S. Chief Data Scientist spoke about what really makes America great. Activists championed the ways science should serve marginalized communities. Artists created stunning signs, patients marched with the doctors who saved them, and scientists marched with the community that supports them. Every story is a call to action. The march was just the beginning. Now the real work begins. *Science Not Silence* celebrates the success of the movement, amplifies the passion and creativity of its supporters, and reminds everyone how important it is to keep marching.

Trans Affirmations Coloring Book

If you're transgender, non-binary, or another gender under the wide and wonderful trans umbrella, this book is for you. With ten coloring pages celebrating trans identity, beauty, and relationships, the Trans Affirmation Coloring Book is a reminder to treat yourself kindly, because who you are is amazing. Also, everyone in this book is trans. The Trans Affirmation Coloring Book is also available as a free download at gumroad.com/theonicole

Sorted

An unflinching and endearing memoir from LGBTQ+ advocate Jackson Bird about how, through a childhood of gender mishaps and an awkward adolescence, he finally sorted things out and came out as a transgender man in his mid-twenties. When Jackson Bird was twenty-five, he came out as a transgender to his friends, family, and anyone in the world with an internet connection. Assigned female at birth and raised as a girl, he often wondered if he should have been born a boy. Jackson didn't share this thought with anyone because he didn't think he could share it with anyone. Growing up in Texas in the 1990s, he had no transgender role models. He barely remembers meeting anyone who was openly gay, let alone being taught that transgender people existed outside of punchlines. In this "soulful and heartfelt coming-of-age story" (Jamia Wilson, director and publisher of the Feminist Press), Jackson chronicles the ups and downs of growing up gender confused. Illuminated by journal entries spanning childhood to adolescence to today, he candidly recalls the challenges and loneliness he endured as he came to terms with both his gender and his bisexual identity. With warmth and wit, Jackson also recounts how he navigated the many obstacles and quirks of his transition—like figuring out how to have a chest binder delivered to his NYU dorm room and having an emotional breakdown at a Harry Potter fan convention. From his first shot of testosterone to his eventual top surgery, Jackson lets you in on every part of his journey—taking the time to explain trans terminology and little-known facts about gender and identity along the way. "A compassionate, tender-hearted, and accessible book for anyone who might need a hand to hold as they walk through their own transition or the transition of a loved one" (Austin Chant, author of *Peter Darling*), *Sorted* demonstrates the power and beauty in being yourself, even when you're not sure who "yourself" is.

Glia

The majority of cells in the nervous system are glia. Long thought of as passive bystanders, glial cells are increasingly being appreciated for their active roles in nourishing, supporting, and protecting the neuronal cells that relay electrical signals through the nervous system. Written and edited by experts in the field, this collection from Cold Spring Harbor Perspectives in Biology examines the development of the major classes of glial cells—astrocytes, oligodendrocytes, Schwann cells, and microglia—and their roles in normal physiology and disease. The contributors describe how glia help establish and refine synaptic connections, maintain the metabolic and ionic milieu of nerve cells, myelinate axons, modulate nerve signal propagation, and contribute to the blood-brain barrier. The biological characteristics of glial cells in vertebrate and invertebrate model systems, including those of *Drosophila*, *Caenorhabditis elegans*, and zebrafish, are also covered. The authors also discuss the roles of glia in repair and regeneration, as well as in cancer and neurodegenerative diseases (e.g., Alzheimer's). This volume is therefore a valuable reference for all neurobiologists and biomedical scientists wishing to understand these diverse and dynamic cells.

The Fate of Gender

Frank Browning takes us into human gender geographies around the world, from gender-neutral kindergartens in Chicago and Oslo to women's masturbation classes in Shanghai, from conservative Catholics in Paris fearful of God and Nature to transsexual Mormon parents in Utah. As he shares specific and engaging human stories, he also elucidates the neuroscience that distinguishes male and female biology, shows us how all parents' brains change during the first weeks of parenthood, and finally how men's and women's responses to age differ worldwide based not on biology but on their earlier life habits. Starting with Simone de Beauvoir's world-famous observation that one is not born a woman but instead becomes a woman, Browning goes on to show equally that no one is born a man but learns how to perform as a man, and that there is no fixed way of being masculine or feminine. Increasingly, the categories of "male" and "female" and even "gay" and "straight" seem old-fashioned and reductive. Just visible on the horizon is a world of gender and sexual fluidity that will remake our world in fundamental ways. Linking science to culture and behavior, and delving into the lives of individuals challenging historic notions, Browning questions the traditional division of Nature vs. Nurture

in everything from plant science to sexual expression, arguing in the end that life consists of an endless waltz between these two ancient notions.

Intro

Fundamental Techniques in Handling People

Give honest and sincere appreciation

Appeal to another person's interest

Smile

Remember that a person's name is

Be a good listener Encourage others to talk about themselves

Talk in terms of the other person's interest

Make the other person feel important and do it sincerely

The only way to get the best of an argument is to avoid it

Begin in a friendly way

If you are wrong admit it quickly and emphatically

Let the other person do a great deal of talking

Honestly try to see things from the other person's point of view

Be sympathetic to the other person's ideas and desires

Start with questions to which the other person will answer "yes"

Let the other person feel that the idea is his or hers

Appeal to the nobler motive

Dramatize your ideas

Throw down a challenge

Final part of this book is about changing people without

Talk about your own mistakes before criticizing the other person

Ask questions instead of giving orders

Let the person save the face

Make the fault seem easy to correct

Make the person happy about doing the things you suggest

Ben Franklin, Inventor and Founding Father | Biography - Ben Franklin, Inventor and Founding Father | Biography by Biography 54,252 views 6 years ago 2 minutes, 44 seconds - Learn about **Benjamin Franklin's**, youth, his "Poor Richard's Almanack," and his revolutionary work in printing, electricity, and ...

He helped guide the colonies' transformation into a unified nation

Franklin left home for Philadelphia at age 17

before long he established himself as a well-respected printer

In the 1740's he shifted his focus to developing inventions

that ranged from quirky musical instruments like the "armonica"

to his groundbreaking experiments harnessing electricity

He played a sizeable political role for the colonies

returning home in 1776 to sign the Declaration of Independence

Late in life, Franklin became a vocal anti-slavery advocate

On April 17, 1790, he died at home in Philadelphia

His funeral drew a crowd of over 20,000 mourners

The Autobiography Of a Boy;

With a flick of his locks and a lash of his tongue, Boy George waltzed into musical stardom in 1982 with his smash hit "Do You Really Want to Hurt Me?" As the quintessential pop star of the 1980s, Boy George was constantly in the public eye, with a string of platinum Culture Club hits, sensational personal appearances, camp behavior, and gender-bending dress fueling the media's infatuation. A Grammy Award for "Karma Chameleon" sealed Boy George's pop-icon status as the avant-garde star whose beguiling melodies and impertinent one-liners seduced an unsuspecting public. But after he reached the pinnacle of success, his life took a devastating turn. Culture Club went into eclipse, his hushed-up relationship with drummer Jon Moss fell apart, and Boy George found a new and dangerous obsession: drugs. In this electrifying memoir, Boy George tells the story of the crazy highs and desperate lows; the family struggles; the friends and lovers—gay, straight, and transvestite; the obsessive media infatuation; and the agony, shame, and despair of withdrawal. Filled with confession, revelation, and inspiration, *Take It Like a Man* is the mesmerizing account of how George achieved the nearly impossible—coming back from addiction and achieving health, sobriety, and a new horizon of musical success.

Take It Like a Man

Excerpt from *The Autobiography of a Boy: Passages Selected by His Friend* In fulfilling a promise made to my friend, whom by your leave I will call simply Tubby, I have been conscious of a somewhat difficult dilemma. When he went to Canada, he placed the manuscript of his autobiography in my hands, with power to select and abridge. I perceived that if I published it in all its length nobody would read it: his life in England was not various, his orbit was circumscribed, the people he met and the situations he faced had a certain sameness, the comments he made on them dealt in repetitions. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority

of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

The Autobiography of a Boy

From the creator of Dad's Army comes the wonderfully written and evocative tale of the life and adventures that inspired the hit TV shows. Highly entertaining and funny, A Stupid Boy gives fascinating insights into Perry's Dad's Army and his other much-loved British comedies including It Ain't Half Hot, Mum and Hi-De-Hi!: the real-life individuals who inspired the characters and events, and behind-the-scenes stories - including how Dad's Army came about, and how it was very nearly dropped, never to appear on our screens.

The Autobiography of a Boy

Charming, funny, a good friend, a less than perfect boyfriend, Spencer Matthews is one of the most talked-about stars of Made in Chelsea. But what lies behind his sometimes controversial behaviour? In Confessions of a Chelsea Boy, his honest and revealing autobiography, Spencer opens up about life before the cameras, including growing up on the beautiful island of St Barths where his parents own the exclusive Eden Rock hotel. He also writes movingly about the devastating loss of his brother on Everest, and the close family ties that ground him. Spencer describes his antics at Eton, where the masters declared they'd never met a boy like him before (this was not entirely a compliment), and introduces us to his friends Proudlock, Jamie, Hugo and Caggie. He takes us from his first kiss to his many romantic adventures (and misadventures) and describes the four loves of his life so far and why things didn't work out. From St Barths to St Tropez, from London to New York, Spencer also gives us glimpses into his world as he gambles with Hollywood stars, runs away from an enraged Middle-Eastern despot, and narrowly avoids death in a powerboat crash. Sensational, entertaining, full of laughter, this is the real Spenny as you've never seen him before.

A Stupid Boy

My Autobiography is written predominantly for the benefit of my children, Grandchildren and my Great Grandchildren and it has been my urgent desire to leave them this tangible legacy, that paints a picture in their minds of who the man was who wrote the words of this book and to remember me as the years pass on. My greatest wish is that my Mother and my Father's loving memory, drawn across the pages of this book would not fade and die with time but will always remain fresh in the minds of those who follow in my blood line, that their lives will be recorded for many years to come. May my story show that the events that changed my Father's destiny was after all in the plan of Almighty God and that my dear Mother's life would not have been in vain but that her evacuation to England during the dark days of World War two will be seen as God's will. Contained in the pages of this book are over 120 illustrated (Mostly coloured) photographs, my Spanish family tree with seven generations from the 1860s up till 2013, together with a colourful honest profile of the Author. But most poignantly is the whole chapter devoted to my family; personal letters I have written to each of them from my heart, as though sent from Heaven, with all the tenderness and love that I can muster. This is my own story told as though it had only just happened, but perhaps as you read through my Autobiography you will feel an urgent call to write down your story too for the generations that follow after you. I present to you therefore my book, which has taken me more than two years to put together and in writing has opened deep wounds in my heart that had long been forgotten. This then is the enthralling Autobiography of a boy who almost missed being born. All the material in this book is subject to copyright protection 2013 (c)

Autobiography of a Beggar Boy

Phizzwhizzing new cover look and branding for the World's NUMBER ONE Storyteller! BOY, Roald Dahl's bestselling autobiography, is full of hilarious anecdotes about his childhood and school days, illustrated by Quentin Blake. As a boy, all sorts of unusual things happened to Roald Dahl. There was the time he and four school friends got their revenge on beastly Mrs Pratchett in her sweet shop. There are stories of holidays in fishing boats, African adventures and the days of tasting chocolate for Cadbury's. You'll hear tales of horrible school bullies and the motor-car accident when Roald's nose was nearly sliced clean off . . . Roald Dahl vividly shares his memories; some are funny. Some are painful. Some are unpleasant. All are true. You can listen to all of Roald Dahl's stories on Puffin Audiobooks, read by some very famous voices, including Kate Winslet, David Walliams and Steven Fry - plus there are added squelchy sound effects from Pinewood Studios! Also look out for new Roald Dahl apps in the

App store and Google Play- including the disgusting TWIT OR MISS! and HOUSE OF TWITS inspired by the revolting Twits.

the autobiography of a beggar boy

Acting wasn't a long-held childhood dream for Larry Lamb, instead his childhood memories are filled with recollections of his parents continuously fighting. Life in the Lamb household veered from laughter and happy moments to hysterical outbursts. Larry was only too often caught in the middle and found himself at the centre of his father's raging anger, tormented by a man who struggled with the enormity of fatherhood. When his parents' marriage finally broke down, Larry's mother moved out. For years Larry didn't know where his mum lived and he didn't dare talk of her at home, his mother's absence left a gaping hole. As soon as Larry was old enough, he left home. Putting as much distance as he could between himself and his volatile childhood, he set off on a journey - looking for the close female companionship he'd missed out on with his mother as he went - that would take him to work as an encyclopaedia salesman in Germany, in the oil business in Libya and Nova Scotia until he found himself starring on Broadway. In time it would take him to Hollywood too and bring him leading roles on the Square in Eastenders and in Billerica in the much-loved comedy Gavin and Stacey.

Confessions of a Chelsea Boy

'The best memoir by a politician you will ever read' The Times School on the Kings Road, Chelsea in the Swinging 60s, the rock-and-roll years, the race riots; this boy has seen it all. Alan Johnson's childhood was not so much difficult as unusual - particularly for a man who was destined to become Home Secretary. Not in respect of the poverty, which was shared with many of those living in Britain's post-war slums, but in its transition from being part of a two-parent family to having a single mother and then to no parents at all... This is essentially the story of two incredible women: Alan's mother, Lily, who battled against poor health, poverty, domestic violence and loneliness to try to ensure a better life for her children; and his sister, Linda, who had to assume an enormous amount of responsibility at a very young age and who fought to keep the family together and out of care when she herself was still only a child. This Boy is one man's story, but it is also the story of England and the West London slums which are hard to imagine in the capital today. No matter how harsh the details, Alan Johnson writes with a spirit of generous acceptance, of humour and openness which makes his book anything but a grim catalogue of miseries. _____ PRAISE FOR THIS BOY: 'Moving and unforgettable' Sunday Times 'Poignant' Telegraph 'Eloquent' Guardian 'Wonderful' Spectator 'Tribute to two strong women' Daily Mail

The Cutting of a Rough Diamond

My Autobiography is written predominantly for the benefit of my children, Grandchildren and my Great Grandchildren and it has been my urgent desire to leave them this tangible legacy, that paints a picture in their minds of who the man was who wrote the words of this book and to remember me as the years pass on. Boy

Identifies a literary genre that flourished between the Civil War and World War I--the American boy book--showing it as distinct from other genres such as the didactic story for boys or the developmental

autobiography of childhood, and studying what gave rise to it, the forms it took, what problems it addressed, and why it disappeared. Annotation copyright by Book News, Inc., Portland, OR

Mummy's Boy

Danny Boy grew up on one of the most influential record labels in the history of rap music. As the adopted son of Suge Knight, Danny rubbed elbows with the best of the best in the music industry. He sang for Teena Marie, collaborated with Lisa Left Eye Lopes, and formed a friendship with Jodeci members, K-Ci and JoJo. He witnessed both the rise and fall of Death Row Records, traveled with Suge and Tupac, and performed with some of the greatest musicians of all times. Danny is probably most widely known for "I Ain't Mad at Cha," the iconic song he recorded with the late Tupac Shakur. But there's more to his story. In this autobiography, he shares his secrets, his heartaches, and loves; he takes the reader on a journey that is unforgettable.

This Boy

This autobiography of the first Dean of the College of Agriculture at Cornell University offers an unconventional account of farm life in New York and the Middle West during the nineteenth century, and of the difficulties attendant upon building up a vital and progressive agricultural college. Born in Seneca County, New York, in 1833, Isaac Phillips Roberts emigrated west—first to Indiana, where he worked as a carpenter until he was able to buy a farm, and taught school during the winters; then, in 1862, to Mount Pleasant, Iowa, in a pioneer wagon with his wife, Margaret, and daughter. In 1869, he became the Superintendent of the Farm and Secretary of the Board of Trustees of the Iowa Agricultural College at Ames, where he soon became Professor of Agriculture. In 1873, he returned to New York to take a similar position at Cornell University; shortly thereafter, he was made Dean of the Faculty of Agriculture and Director of the Experiment Station. During his thirty years of service in Ithaca, he wrote voluminously on agricultural subjects, and after his retirement, penned *Autobiography of a Farm Boy*, initially published in 1916, reissued by Cornell University Press in 1946, and now made available in paperback. He died in Palo Alto, California, in 1928.

The Cutting of a Rough Diamond

Shortlisted for the William Hill Sports Book of the Year Award The Sunday Times Sports Book of the Year The Times Sports Book of the Year Telegraph Football Book of the Year 'Ferris's wonderful memoir represents a twin triumph. He has endured every kind of setback in life but has invariably reinvented himself; and his writing is a pure pleasure.' The Sunday Times 'Enough depth and humanity to make your average football autobiography look like a Ladybird book.' Telegraph 'A masterpiece of the genre' Brian McNally 'Football memoirs rarely produce great literature but Ferris's *The Boy on the Shed* is a glistening exception.' Guardian 'Fascinating and stylishly told.' David Walsh, The Sunday Times *The Boy on the Shed* is a story of love and fate. At 16, Paul Ferris becomes Newcastle United's youngest-ever first-teamer. Like many a tricky winger from Northern Ireland, he is hailed as 'the new George Best'. As a player and later a physio and member of the Magpies' managerial team, Paul's career acquaints him not only with Kevin Keegan, Kenny Dalglish and Bobby Robson, Ruud Gullit, Paul Gascoigne and Alan Shearer but also with injury, insecurity and disappointment. Yet this autobiography is more than a tale of the vagaries of sporting fortune. It begins during 'The Troubles' in a working-class Catholic family in the Protestant town of Lisburn, near Belfast. After a childhood scarred by his mother's illness and sectarian hatred, Paul meets the love of his life, his future wife Geraldine. Talented and carefree on the pitch, shy and anxious off it, he earns a tilt at stardom. His first spell at Newcastle turns sour, as does his return as a physio, although obtaining a Masters degree shows him what he could achieve away from football. When Paul qualifies as a barrister, a career in Law beckons. Instead, a craving to prove himself in the game draws him back to St James' Park as part of Shearer's management triumvirate - with unfortunate consequences. Written with brutal candour, dark humour and consummate style, *The Boy on the Shed* is a riveting and moving account of a life less ordinary

Take it Like a Man

Published in 1913, when Henry James was 70, *A Small Boy and Others* is the first of three late volumes that taken together have sometimes been called the 'autobiography' of Henry James. The focus of *A Small Boy* is on the years of his infancy and boyhood up to the age of 15. Henry James was the final survivor of a remarkable family, and his memoir, written at the end of a long and tireless career, was prompted initially by the death of his "ideal Elder Brother," the psychologist and philosopher William

James. *A Small Boy and Others* recounts the novelist's earliest years in Albany and, more importantly, New York City, where he was allowed to wander at will. He evokes the theatrical entertainments he enjoyed, the varied social scene in which the family mixed, and the piecemeal nature of his education. With the first of several extended trips, the "romance" of Europe begins as the small boy becomes acquainted with a British culture already familiar from his precocious reading of the great Victorian novelists. And it is in France, in the Louvre's Galerie d'Apollon, that he undergoes an initiation into the aesthetic power of great art and an intimation of all the "fun" it might bring him. Yet the child also registered, within this privileged and extended family group, signs of dysfunction and failure. James's autobiography has significantly determined the nature and even the terms of the extensive biographical and critical interest he continues to enjoy.

Being a Boy Again

Stranded on Death Row

My Autobiography is written predominantly for the benefit of my children and Grandchildren. It has been my urgent desire to leave them this tangible legacy, that paints a picture in their minds of who the man was who wrote the words of this book and to remember me as the years pass on.

Autobiography of a Farm Boy

The fascinating autobiography from the creator of "Dad's Army" and "It Ain't Half Hot, Mum." Very funny, and illustrated with over a hundred photographs, this highly entertaining autobiography is full of the people, stories and experiences from Jimmy Perry's childhood in London, his time in the Home Guard, as a Gunner in Burma, as a member of the Royal Artillery Concert Party entertaining the troops in India, and much more. These are the stories that inspired many of the characters and scenes from his much-loved comedies.

The Boy on the Shed: A remarkable sporting memoir with a foreword by Alan Shearer

Journalist and television producer Will Wyatt's account of growing up in Oxford in the 1940s and 1950s is a delightful, absorbing read.... He writes with fondness and humour, recalling the simple pleasures of England in the period.' -The Lady, 'Book of the Week' 'A very enjoyable read. Joyful and often very funny, the story moves along at a constantly entertaining pace. It's a great celebration of growing up.' -Michael Palin 'This is a remarkable memoir. Oxford Boy offers us a complete picture of a family's way of life. Aunts and uncles crowd its pages: tales of bricklaying, betting, school friendships and corner shops... all recalled fondly and evocatively. This is not academic Oxford, but the Oxford of Cowley workers and ex-servicemen. And, at its heart, a petty crime that launched Will Wyatt towards his remarkable BBC career.' -Joan Bakewell This is one boy's tale of growing up in Oxford in the forties and fifties. It is a foreign land of being caned on hand and bottom, of teachers washing out a child's mouth with soap as punishment for swearing. It was a time of conkers, fag cards and prozzie watching, when children asked strangers to take them in to the 'flicks' of collecting autographs in the Parks where that nice man asked the way to the gents... For this boy a scandalous act opened the door to everything important in the life that followed. His mother, who looked up to the 'proper gentry', was from a large Oxfordshire family in which several of her apparent siblings were her nephews and nieces. There was Auntie Daisy with her missing finger, who liked the American servicemen, and Uncle Stan, who took cash to buy his Jaguar while his brother rode passenger with loaded shotgun. The boy's father, wary of those who 'talked poundnoteish', came from an even larger, East Oxford family in which the boys were bricklayers whose hobby was diddling bookmakers and some of the girls provided R and R for undergrads. It is a

picture of parents providing a rock steady home as they improved their position in life and encouraged their son to catch his 'golden ball'. He was fortunate in being guided by gifted teachers through the teenage years of discovering music, grappling with frothy petticoats, untold hours of sport and wasting time trying to imitate Harold Pinter. Oxford Boy provides a vivid picture of a long-lost city and of a childhood transformed by an unexpected event.

A Small Boy & Others

Presents humorous anecdotes from the author's childhood which includes summer vacations in Norway and an English boarding school.

A Small Boy and Others

A Small Boy and Others is a book of autobiography by Henry James published in 1913. The book covers James' earliest years and discusses his intellectually active family, his intermittent schooling, and his first trips to Europe. Summary and themes This memoir tells of a precocious boy who loved the sights and sounds of his childhood but felt reticent about full participation in life. The note is sounded from the first chapters, as James recounts the limitations-and rewards-of the child he was: "For there was the very pattern and measure of all he was to demand: just to be somewhere-almost anywhere would do-and somehow receive an impression or an accession, feel a relation or a vibration. He was to go without many things, ever so many-as all people do in whom contemplation takes so much the place of action; but everywhere...he was to enjoy more than anything the so far from showy practice of wondering and dawdling and gaping: he was really, I think, much to profit by it." James clearly suffered from a sense of his inferiority in the "showy," active parts of life. His older brother William always seemed superior in ability; his classmates scorned his hopelessness at math and science; even at a party he felt too embarrassed to join in the dancing. But he still observed and fantasized about all his family and his surroundings had to offer. When a cousin of his was told "don't make a scene," he suddenly realized that scenes could be made by telling a story or inventing a play. He went often to the theater and fell forever under its spell. His family met William Thackeray and Charles Dickens on their American tours, and James even remembered Thackeray mock-scolding his sister Alice for her crinoline dress: "Crinoline? I was suspecting it! So young and so depraved!" In fact, for all his surface diffidence, James harbored almost Napoleonic dreams of glory as an artist. Near the close of A Small Boy and Others he tells how, in much later years, he dreamed of routing a monstrous attacker and chasing him away through the halls of the Louvre, which he had seen as a child. The small boy, as hesitant and uncertain as he might seem, would triumph over his fears and develop his superb aptitude for narrative fiction... Henry James, OM (15 April 1843 - 28 February 1916) was an American-British author regarded as a key transitional figure between literary realism and literary modernism, and is considered by many to be among the greatest novelists in the English language. He was the son of Henry James Sr. and the brother of renowned philosopher and psychologist William James and diarist Alice James.

The Autobiography of a Boy; Passages Selected by His Friend, G.S. Street

'The thought behind this book is not just me wanting to tell my story in the standard autobiographical fashion but to create a kind of self-help book that includes my story. There are many things people don't know about me and maybe when they read about those things they will have an understanding of the journey I have been on, why I've made the mistakes I have and hopefully help other people overcome their adversities.' Life has presented its fair share of setbacks for James Arthur, from his disrupted childhood - during which he felt like a stray and a misfit, entering the care system in his teens - to a very public fall from favour just at the point when all his dreams should have been coming true. With an extraordinary comeback in 2016, starting with No. 1 single 'Say You Won't Let Go' and his Platinum album Back From The Edge, Back To The Boy shows the British singer and songwriter reflecting not only on his past but also on his return to the charts, and the phenomenal global success that followed. James shares his struggles with mental health issues which led to drug abuse, and how he dealt with the feelings of intense pressure and loneliness that accompanied his sudden rise to fame. Back to the Boy gives an insight into the life of one of the most exciting musicians of today, and how his experiences are reflected in the raw emotion and passion in his music. This is a story of hope and self-discovery to inspire those who have ever hit rock-bottom and managed to pick themselves up again.

Cutting of a Rough Diamond

RULES FOR BEING A MAN Don't Cry; Love Sport; Play Rough; Drink Beer; Don't Talk About Feelings But Robert Webb has been wondering for some time now: are those rules actually any use? To anyone? Looking back over his life, from schoolboy crushes (on girls and boys) to discovering the power of making people laugh (in the Cambridge Footlights with David Mitchell), and from losing his beloved mother to becoming a husband and father, Robert Webb considers the absurd expectations boys and men have thrust upon them at every stage of life. Hilarious and heartbreaking, *How Not To Be a Boy* explores the relationships that made Robert who he is as a man, the lessons we learn as sons and daughters, and the understanding that sometimes you aren't the Luke Skywalker of your life - you're actually Darth Vader.

A Stupid Boy

Bill Pieri was born in Ardrossan, Scotland in 1939. In 1946, on his father's return from active service, Bill suddenly found himself in a Roman Catholic orphanage in Aldershot, England. He was to remain in orphanages for the next eight years. This is his account of how he struggled to come to terms with this separation from his parents. It is also the account of how Bill sought to make something of his life and achieve financial security for his family. He writes of his failed marriage, his attempts under difficult circumstances to help his children and of his battle with cancer.

Oxford Boy

"So the old man was home again. He could be heard roaring and then grumbling and then roaring again, cursing profusely in his drunken stupor, growling as he stumbled around the lower level. The children and the mother made room for him, much as one wittingly gets out of the way of a big, unfriendly animal. But none of these people were the animal's prey. Upstairs, the telltale slapping of the screen door sent a silent scream of alarm through the child. He jumped up in a single reflexive motion from his cozy place by the light on the floor and slipped through the bedroom door and far back into the corner to the window. He had learned to move quickly, before the old man could hear him leaving the vent. He had learned not to hide under the covers. He had learned not to hide at all. It was useless." *Child of Woe* is a story that must be told. The devastating trauma of child abuse is brought to light in this amazing true-life story of Maury Blair. Born into a world of hate and rejection, it seemed here was no hope for this lonely, frightened boy. Read His Story...and God's Miracle! ~ David Mainse, Host of 100 Huntley Street

Boy

An Alabama boy's innocence is shaken by murder and madness in the 1960s South in this novel by the New York Times–bestselling author of *Swan Song*. It's 1964 in idyllic Zephyr, Alabama. People either work for the paper mill up the Tecumseh River, or for the local dairy. It's a simple life, but it stirs the impressionable imagination of twelve-year-old aspiring writer Cory Mackenson. He's certain he's sensed spirits whispering in the churchyard. He's heard of the weird bootleggers who lurk in the dark outside of town. He's seen a flood leave Main Street crawling with snakes. Cory thrills to all of it as only a young boy can. Then one morning, while accompanying his father on his milk route, he sees a car careen off the road and slowly sink into fathomless Saxon's Lake. His father dives into the icy water to rescue the driver, and finds a beaten corpse, naked and handcuffed to the steering wheel—a copper wire tightened around the stranger's neck. In time, the townsfolk seem to forget all about the unsolved murder. But Cory and his father can't. Their search for the truth is a journey into a world where innocence and evil collide. What lies before them is the stuff of fear and awe, magic and madness, fantasy and reality. As Cory wades into the deep end of Zephyr and all its mysteries, he'll discover that while the pleasures of childish things fade away, growing up can be a strange and beautiful ride. "Strongly echoing the childhood-elegies of King and Bradbury, and every bit their equal," *Boy's Life*, a winner of both the Bram Stoker and World Fantasy Awards, represents a brilliant blend of mystery and rich atmosphere, the finest work of one of today's most accomplished writers (Kirkus Reviews).

A Small Boy and Others

In *Going Solo*, the world's favourite storyteller, Roald Dahl, tells of life as a fighter pilot in Africa. 'They did not think for one moment that they would find anything but a burnt-out fuselage and a charred skeleton, and they were astounded when they came upon my still-breathing body lying in the sand nearby.' In 1938 Roald Dahl was fresh out of school and bound for his first job in Africa, hoping to find adventure far from home. However, he got far more excitement than he bargained for when the

outbreak of the Second World War led him to join the RAF. His account of his experiences in Africa, crashing a plane in the Western Desert, rescue and recovery from his horrific injuries in Alexandria, flying a Hurricane as Greece fell to the Germans, and many other daring deeds, recreates a world as bizarre and unnerving as any he wrote about in his fiction. 'Very nearly as grotesque as his fiction. The same compulsive blend of wide-eyed innocence and fascination with danger and horror' Evening Standard 'A non-stop demonstration of expert raconteurship' The New York Times Book Review Roald Dahl, the brilliant and worldwide acclaimed author of *Charlie and the Chocolate Factory*, *James and the Giant Peach*, *Matilda*, and many more classics for children, also wrote scores of short stories for adults. These delightfully disturbing tales have often been filmed and were most recently the inspiration for the West End play, *Roald Dahl's Twisted Tales* by Jeremy Dyson. Roald Dahl's stories continue to make readers shiver today.

Ottawa Boy

The author tells of his life from early childhood to school years, work, marriage and retirement.

Back to the Boy

Frank O'Connor's acclaimed autobiography, now in one volume *When Frank O'Connor was born*, his parents—Minnie O'Connor, a former maid raised in an orphanage, and Michael O'Donovan, a veteran of the Boer War and the drummer in a local brass-and-reed band—lived above a sweet-and-tobacco shop in Cork, Ireland. The young family soon moved, however, to a two-room cottage at the top of Blarney Street, a lane that originates, as O'Connor so vividly describes it, "near the river-bank, in sordidness, and ascends the hill to something like squalor." From this unlikely beginning, a poor boy born Michael Francis Xavier O'Donovan set out on the remarkable journey that transformed him into Frank O'Connor, one of Ireland's greatest writers. *An Only Child*, the first installment of O'Connor's wonderfully evocative autobiography, captures the joy and pain of his early years: joy in the colorful people and places of Cork and in his devoted relationship with his mother, pain in the family's impoverished situation and in his father's melancholy moods and drunken outbursts. Fifteen years old when he joins the Irish Republican Army in the fight for independence, O'Connor finds himself on the losing side of the ensuing civil war and is imprisoned by the government of the new nation. *My Father's Son* begins with his release from an internment camp and follows him to Dublin and the world-renowned Abbey Theatre, where he meets W. B. Yeats, J. M. Synge, and other members of the Irish Literary Revival, and takes the first steps toward becoming one of the twentieth century's most beloved authors. As richly detailed and eloquent as the best of his short fiction, Frank O'Connor's autobiography is an entertaining portrait of a fascinating time and place, and the inspiring account of a young artist finding his voice.

How Not To Be a Boy

'I have him bitched, balloxed and bewildered, for there's a system and a science in taking the piss out of a screw and I'm a well-trained man at it.' So writes Brendan Behan, poet, writer and literary legend, of the episode that coloured his life. Arrested in Liverpool as an agitator for the IRA, he was tried and sent to reform school. He was sixteen years old. The world he entered was brutal and coldly indifferent. Conditions were primitive, and violence simmered just below the surface. Yet Brendan Behan found something more positive than hate in Borstal: friendship, solidarity and healing flashes of kindness. Extraordinarily vivid, fluent, and moving, this is a superb and unforgettable piece of writing. *Borstal Boy* was adapted into a film in 2000.

The Boy in the Photograph - The Autobiography

First published anonymously in 1857, *Autobiography of a Beggar Boy* is a fascinating firsthand account of life on the streets of mid-19th century London. Written by James Dawson Burn, a former beggar who turned his life around and became a successful lawyer, this autobiographical work provides a valuable insight into the social and economic realities of Victorian England. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support

of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Child of Woe

First edition in book form, originally published in the columns of the Northern Warder according to the dedication. The author, who worked first in a spinning mill, writes of the moral degradation of the female spinners and the drinking habits in mills, and of his own reading (Defoe, Smollet, Bunyan). He then turned shoemaker, met Robert Nicoll, the poet, married, and settled down. An uncommon contribution to Victorian working-class literature.
