Personality tests. Team-building exercises. Forced Fun. Desktop surveillance. Open-plan offices. Acronyms. Diminishing job security. Hot desking. Pointless perks. Hackathons. If any of the above sound familiar, welcome to the modern economy. In this hilarious, but deadly serious book, bestselling author Dan Lyons looks at how the world of work has slowly morphed from one of unions and steady career progression to a dystopia made of bean bags and unpaid internships. And that's the 'good' jobs...With the same wit that made *Disrupted* an international bestseller, Lyons shows how the hypocrisy of Silicon Valley has now been exported globally to a job near you. Even low-grade employees are now expected to view their jobs with a cult-like fervour, despite diminishing prospects of promotion. From the gig economy to the new digital oligarchs, Lyons deliciously roasts the new work climate, while asking what can be done to recoup some sanity and dignity for the expanding class of middle-class serfs.

Jay Shetty, social media superstar and host of the #1 podcast On Purpose, distills the timeless wisdom he learned as a monk into practical steps anyone can take every day to live a less anxious, more meaningful life. When you think like a monk, you'll understand: -How to overcome negativity -How to stop overthinking -Why comparison kills love -How to use your fear -Why you can't find happiness by looking for it -How to learn from everyone you meet -Why you are not your thoughts -How to find your purpose -Why kindness is crucial to success -And much more... Shetty grew up in a family where you could become one of three things—a doctor, a lawyer, or a failure. His family was convinced he had chosen option three: instead of attending his college graduation ceremony, he headed to India to become a monk, to meditate every day for four to eight hours, and devote his life to helping others. After three years, one of his teachers told him that he would have more impact on the world if he left the monk's path to share his experience and wisdom with others. Heavily in debt, and with no recognizable skills on his resume, he moved back home in north London with his parents. Shetty reconnected with old school friends—many working for some of the world's largest corporations—who were experiencing tremendous stress, pressure, and unhappiness, and they invited Shetty to coach them on well-being, purpose, and mindfulness. Since then, Shetty has become one of the world's most popular influencers. In 2017, he was named in the Forbes magazine 30-under-30 for being a game-changer in the world of media. In 2018, he had the #1 video on Facebook with over 360 million views. His social media following totals over 38 million, he has produced over 400 viral videos which have amassed more than 8 billion views, and his podcast, On Purpose, is consistently ranked the world's #1 Health and Wellness podcast. In this inspiring, empowering book, Shetty draws on his time as a monk to show us how we can clear the roadblocks to our potential and power. Combining ancient wisdom and his own rich experiences in the ashram, Think Like a Monk reveals how to overcome negative thoughts and habits, and access the calm and purpose that lie within all of us. He transforms abstract lessons into advice and exercises we can all apply to reduce stress, improve relationships, and give the gifts we find in ourselves to the world. Shetty proves that everyone can—and should—think like a monk.

The Big Book of Whole School Wellbeing

Strategy and Management of Industrial Brands is the first book devoted to business-to-business products and services. Looking at numerous companies, this book defines two brand objectives that are specific to the industrial and service sectors and which must be added to the traditional functions of branding: the minimization of risk as perceived by buyers, and the facilitation of the customer company's performance by the supplier brand. Different ways of classifying brands are suggested, providing a better understanding of brand strategies adopted by business-to-business companies, as well as new

concepts such as brand 'printability', 'visibility', and 'purchaseability'. Five major brand categories are dealt with in separate chapters: -entering goods brands; -intermediary equipment goods brands; -equipment goods brands; -business-to-business service brands; and -industrial distributor brands. From a practical point of view, the aim of the book is to address the main concerns of managers: How to create and protect brands? What type of visual identity is appropriate? How to manage international brands? An analysis of 1,500 industrial brands as well as 40 case studies are included in this book. These brands are used in both the industrial (automotive, building, aeronautics, IT, etc.) and consumer sectors (clothing, electronics, food packaging, telecommunications, etc.). This book has been written for professors and students of universities and business schools, as well as managers and people working in industry or the service sector.

The papers included in this book cover a wide range of topics, including: Wastes as construction materials; Wastes as fuels; Waste treatment technologies; MSW management; Recycling of wastes and materials recovery; Environmental, economic and social aspects in waste management; Life cycle assessment; Circular economy and wastes refineries; Logistics, policies, regulatory constraints and markets in waste management.

Intelligent Transport Systems (ITS) are the way forward for sustainable growth of mobility at all levels (local, regional, national, transnational). The book reviews the current status of Research & Development. It includes connected (and autonomous) cars and buses, real-world large-scale field trials, data analysis and assessment of technological solutions. Standards and normative aspects in the domain of Electronic Fee Collection and Cooperative Systems oriented to probe data collection, safety and non-safety critical applications in vehicular networks, are studied. The book provides the rational, perspectives, and technical issues for the implementation of ITS solutions in a genuine inter-modal scenario, taking the example of a Mediterranean seaport, actively involved in testing and validation of ITS standards. The novelty of this book is that it covers R&D, standards, and pilots, all under one cover. Rather than stressing the novelty in ICT, the authors have presented the need for system-level integration, assessment of existing (standard) solutions, and piloting experiments in real-world industrial scenarios.

Computer Security – ESORICS 2023

What if we had a government prepared to implement the policies that could radically change 21st-century Britain and improve people's lives? Social and economic policies are rarely communicated clearly to the public, but it's never been more important for citizens to understand and contribute to the debate around the country's future. In everyday language, *Rethinking Britain* presents a range of ideas from some of the country's most influential thinkers such as Kate Pickett and Ha-Joon Chang. From inflation to tax, and health to education, each contribution offers solutions which, if implemented, would lead to a fairer society. Curated by leading economists from the Progressive Economics Group and accompanied by a 'jargon buster', this book is an essential aid for citizens who are interested in critiquing inequalities while looking to build a better future.

Strategy and Management of Industrial Brands

A Lean Action Workbook from the Lean Enterprise Academy, a affiliate of the Lean Global Network and the Lean Enterprise Institute For the first time, *Making Hospitals Work* provides a practical road map for healthcare leaders seeking to create truly lean hospitals. It outlines a clear framework for focusing improvement activities on the most important challenges facing each hospital. It uses the same evidence-based, scientific method as clinicians use to diagnose and treat medical problems to analyze and redesign the core emergency and elective patient journeys from arrival to discharge. It opens everyone's eyes to the big win-win-win opportunities to eliminate unnecessary waiting time for patients, to synchronize activities so clinical staff can spend more time caring for patients, and to free up capacity by reducing length of stay and cut the overtime and agency budget. It also introduces the key new role of the value-stream manager in gaining agreement on what needs to be done by whom in every department across the hospital. Every step described in *Making Hospitals Work* has been tried and tested in the three years' action research that led to this workbook. It is the critical breakthrough to take the next steps on the lean healthcare journey.

Intellectual Property

This book is for anyone who wants to live in a place of greater freedom, peace and fulfilment. *Living Your Best Life* reflects the heart of God for us to live fully as the people we were destined to be. Each chapter integrates the restorative power of Christian spirituality with evidence based psychological tools, drawing on our relationship with God as a source of healing and wholeness. Readers are invited to enter into a personal journey of growth and transformation as they are empowered with practical skills to flourish spiritually, think healthily and thrive emotionally.

The Problem with Plastic

Liberal left orthodoxy holds that Brexit is a disastrous coup, orchestrated by the hard right and fuelled by xenophobia, which will break up the Union and turn what's left of Britain into a neoliberal dystopia. Richard Tuck's ongoing commentary on the Brexit crisis demolishes this narrative. He argues that by opposing Brexit and throwing its lot in with a liberal constitutional order tailor-made for the interests of global capitalists, the Left has made a major error. It has tied itself into a framework designed to frustrate its own radical policies. Brexit therefore actually represents a golden opportunity for socialists to implement the kind of economic agenda they have long since advocated. Sadly, however, many of them have lost faith in the kind of popular revolution that the majoritarian British constitution is peculiarly well-placed to deliver and have succumbed instead to defeatism and the cultural politics of virtue-signalling. Another approach is, however, still possible. Combining brilliant contemporary political insights with a profound grasp of the ironies of modern history, this book is essential for anyone who wants a clear-sighted assessment of the momentous underlying issues brought to the surface by Brexit.

Wastes: Solutions, Treatments and Opportunities III

As audiences avoid negative news and public risk perceptions fracture across polarized media ecologies, journalists are being called upon to tell engaging and optimistic stories about the future. Consequently, solutions journalism has moved from the margins to the global mainstream, resulting in

a plurality of new solutions-focused practices. *Solutions Journalism: News at the Intersection of Hope, Leadership, and Expertise* explores the professional dynamics and tensions concerning solutions journalism, clarifies these related practices and, in so doing, provides scholars and journalists with a nuanced appreciation of the opportunities and liabilities of reporting solutions. Drawing upon a year-long study of journalism in Tasmania, Bill Dodd develops a tripartite theory of solutions journalism at the intersection of three core concepts: hope, leadership, and expertise. In Australia's lagging southernmost province, where development propositions have sparked global protest movements, 'New Tasmania' represented a newly optimistic spirit of bipartisanship. Yet, in this book, a close reading of solutions-focused discourse reveals deeper asymmetries regarding whose voices are routinely privileged in framing the future. On this basis, the book argues for a solutions journalism founded on a nuanced understanding of hope and a plurality of community leaders and practical expertise.

'Entertaining and gripping . . . For those at the helm, the philanthropic plutocrats and aspiring "change agents" who believe they are helping but are actually making things worse, it's time for a reckoning with their role in this spiraling dilemma' Joseph Stiglitz, *New York Times Book Review* 'In Anand's thought-provoking book his fresh perspective on solving complex societal problems is admirable. I appreciate his commitment and dedication to spreading social justice' Bill Gates An insider's trenchant investigation of how the global elite's efforts to "change the world" preserve the status quo and obscure their culpability Former *New York Times* columnist Anand Giridharadas takes us into the inner sanctums of a new gilded age, where the rich and powerful fight for equality and justice any way they can - except ways that threaten the social order and their position atop it. We see how they rebrand themselves as saviours of the poor; how they lavishly reward "thought leaders" who redefine "change" in winner-friendly ways; and how they constantly seek to do more good, but never less harm. But why should our gravest problems be solved by the unelected upper crust instead of the public institutions it erodes by lobbying and dodging taxes? Rather than rely on scraps from the winners, Giridharadas argues that we must take on the gruelling democratic work of building more robust, egalitarian institutions. Trenchant and revelatory, *Winners Take All* is a call to action for elites and citizens alike.

Macroeconomic policy is one of the most important policy domains, and the tools of macroeconomics are among the most valuable for policy makers. Yet there has been, up to now, a wide gulf between the level at which macroeconomics is taught at the undergraduate level and the level at which it is practiced. At the same time, doctoral-level textbooks are usually not targeted at a policy audience, making advanced macroeconomics less accessible to current and aspiring practitioners. This book, born out of the Masters course the authors taught for many years at the Harvard Kennedy School, fills this gap. It introduces the tools of dynamic optimization in the context of economic growth, and then applies them to a wide range of policy questions – ranging from pensions, consumption, investment and finance, to the most recent developments in fiscal and monetary policy. It does so with the requisite rigor, but also with a light touch, and an unyielding focus on their application to policy-making, as befits the authors' own practical experience. *Advanced Macroeconomics: An Easy Guide* is bound to become a great resource for graduate and advanced undergraduate students, and practitioners alike.

Rethinking Britain

Social isolation and loneliness are serious yet underappreciated public health risks that affect a significant portion of the older adult population. Approximately one-quarter of community-dwelling Americans aged 65 and older are considered to be socially isolated, and a significant proportion of adults in the United States report feeling lonely. People who are 50 years of age or older are more likely to experience many of the risk factors that can cause or exacerbate social isolation or loneliness, such as living alone, the loss of family or friends, chronic illness, and sensory impairments. Over a life course, social isolation and loneliness may be episodic or chronic, depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality, comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high-volume and high-frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and mitigate the adverse health impacts of social isolation and loneliness in older adults. *Social Isolation*

and Loneliness in Older Adults summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low income, underserved, and vulnerable populations. This report makes recommendations specifically for clinical settings of health care to identify those who suffer the resultant negative health impacts of social isolation and loneliness and target interventions to improve their social conditions. Social Isolation and Loneliness in Older Adults considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish.

Making Hospitals Work

Why our democracies need urgent reform, before it's too late A generation after the fall of the Berlin Wall, the world is once again on the edge of chaos. Demonstrations have broken out from Belgium to Brazil led by angry citizens demanding a greater say in their political and economic future, better education, healthcare and living standards. The bottom line of this outrage is the same; people are demanding their governments do more to improve their lives faster, something which policymakers are unable to deliver under conditions of anaemic growth. Rising income inequality and a stagnant economy are threats to both the developed and the developing world, and leaders can no longer afford to ignore this gathering storm. In *Edge of Chaos*, Dambisa Moyo sets out the new political and economic challenges facing the world, and the specific, radical solutions needed to resolve these issues and reignite global growth. Dambisa enumerates the four headwinds of demographics, inequality, commodity scarcity and technological innovation that are driving social and economic unrest, and argues for a fundamental retooling of democratic capitalism to address current problems and deliver better outcomes in the future. In the twenty-first century, a crisis in one country can quickly become our own, and fragile economies produce a fragile international community. *Edge of Chaos* is a warning for advanced and emerging nations alike: we must reverse the dramatic erosion in growth, or face the consequences of a fragmented and unstable global future.
