Building off the success of Zill and Dewar's popular Precalculus with Calculus Previews, Fourth Edition, the new Expanded Volume includes all the outstanding features and learning tools found in the original text while incorporating additional coverage that some courses may require. With a continued aim to keep the text complete, yet concise, the authors added three additional chapters making the text a clear choice for many mainstream courses. New chapters include: Triangle Trigonometry, Systems of Equations and Inequalities, and Sequences and Series. This student-friendly, four-color text offers numerous exercise sets and examples to aid in students' learning and understanding, and graphs and figures throughout serve to better illuminate key concepts. The exercise sets include engaging problems that focus on algebra, graphing, and function theory, the sub-text of so many calculus problems. The authors are careful to use the terminology of calculus in an informal and comprehensible way to facilitate the student's successful transition into future calculus courses.

Books a la Carte are unbound, three-hole-punch versions of the textbook. This lower cost option is easy to transport and comes with same access code or media that would be packaged with the bound book. Ratti and McWaters wrote this series with the primary goal of preparing students to be successful in calculus. Having taught both calculus and precalculus, the authors saw firsthand where students would struggle, where they needed help making connections, and what material they needed in order to succeed in calculus. Their experience in the classroom shows in each chapter, where they emphasize conceptual development, real-life applications, and extensive exercises to encourage a deeper understanding. With a new addition to the series, Precalculus Essentials, this text offers the best of both worlds: fast-paced, rigorous topics and a friendly, "teacherly" tone. This text is developed with a focus on key topics for calculus preparation. This Package Contains: Precalculus Essentials, (a la Carte edition) with MyMathLab/MyStatLab Student Access Kit

This manual is intended to accompany Essentials of Precalculus with Calculus Previews, Fifth Edition, by Dennis G. Zill and Jacqueline M. Dewar. It consists of five parts, described below. Topics in Algebra: This part consists of short discussions of appropriate topics from a prerequisite algebra course (such as synthetic division), as well as topics intended to assist the student in becoming a more effective problem solver (such as implicit conditions in a word problem). Use of a Calculator: While much of the material discussed will be pertinent to any graphing calculator, the references in this manual will be to the TI-84 family of calculators. After a few brief comments on the use of the TI-84 calculator, this manual will focus on how to use the calculator to either assist in the solution of some of the problems in the text or to check that your solution is correct or at least reasonable. Basic Skills: This is a list for each section in the text of the skills needed to solve the more manipulative problems in the section. Selected Solutions: Includes complete solutions to every third problem in each section of the text are given. Final Examination Answers: As indicated by the title of this part, the answers are provided for each of the 70 problems on the final examination.
