Leo Portnoff

Over the course of an astonishingly long career, Elliott Carter has engaged with many musical developments of the twentieth and now twenty-first centuries - from his early neo-classic music of the interwar period, to his modernist works of conflict and opposition in the 1960s and 1970s, to the reshaping of a modernist aesthetic in his latest compositions. Elliott Carter Studies throws new light on these many facets of Carter's extensive musical oeuvre. This collection of essays presents historic, philosophic, philological and theoretical points of departure for in-depth investigations of individual compositions, stylistic periods in Carter's output and his contributions to a variety of genres, including vocal music, the string quartet and the concerto. The first multi-authored book to appear on Carter's music, it brings together new research from a distinguished team of leading international Carter scholars, providing the reader with a wide range of perspectives on an extraordinary musical life.

inch....this work is likely to become a standart work very quickly and is to be recommended to all schools where recorder studies are undertaken inch. (Oliver James,Contact Magazine) A novel and comprehensive approach to transferring from the C to F instrument. 430 music examples include folk and national songs (some in two parts), country dance tunes and excerpts from the standard treble repertoire of•Bach, Barsanti, Corelli, Handel, Telemann, etc. An outstanding feature of the book has proved to be Brian Bonsor's brilliantly simple but highly effective practice circles and recognition squares designed to give, in only a few minutes, concentrated practice on the more usual leaps to and from each new note and instant recognition of random notes. Quickly emulating the outstanding success of the descant tutors, these books are very popular even with those who normally use tutors other than the Enjoy the Recorder series.

This is a compact, composite and authoritative survey of the history and development of the cello and its repertory since the origins of the instrument. The volume comprises thirteen essays, written by a team of nine distinguished scholars and performers, and is intended to develop the cello's historical perspective in breadth and from every relevant angle, offering as comprehensive a coverage as possible. It focuses in particular on four principal areas: the instrument's structure, development and fundamental acoustical principles; the careers of the most distinguished cellists since the baroque era; the cello repertory (including chapters devoted to the concerto, the sonata, other solo repertory, and ensemble music); and its technique, teaching methods and relevant aspects of historical and performance practice. The Sounds of Early Cinema

The Sounds of Early Cinema is devoted exclusively to a little-known, yet absolutely crucial phenomenon: the ubiquitous presence of sound in early cinema. "Silent cinema" may rarely have been silent, but the sheer diversity of sound(s) and sound/image relations characterizing the first 20 years of moving picture exhibition can still astonish us. Whether instrumental, vocal, or mechanical, sound ranged from the improvised to the pre-arranged (as in scripts, scores, and cue sheets). The practice of mixing sounds with images differed widely, depending on the venue (the nickelodeon in Chicago versus the summer Chautauqua in rural Iowa, the music hall in London or Paris versus the newest palace cinema in New York City) as well as on the historical moment (a single venue might change radically, and many times, from 1906 to 1910). Contributors include Richard Abel, Rick Altman, Edouard Arnoldy, Mats Björkin, Stephen Bottomore, Marta Braun, Jean Châteauneuf, Ian Christie, Richard Crangle, Helen Day-Mayer, John Fullerton, Jane Gaines, André Gaudreault, Tom Gunning, François Jost, Charlie Keil, Jeff Klenotic, Germain Lacasse, Neil Lerner, Patrick Loughney, David Mayer, Domini Nasta, Bernard Perron, Jacques Polet, Lauren Rabinovitz, Isabelle Raynald, Herbert Reynolds, Gregory A. Waller, and Rashit M. Yangirov.

Narrative Inquiry in Music Education

Margaret S. Barrett and Sandra L. Stauffer We live in a "congenial moment for stories" (Pinnegar & Daynes, 2007, p. 30), a time in which narrative has taken up a place in the "landscape" of inquiry in the social sciences. This renewed interest in storying and stories as both process and product (as eld text and research text) of inquiry may be attributed to various methodological and conceptual "turns," including the linguistic and cultural, that have taken place in the humanities and social sciences over the past decades. The purpose of this book is to explore the "narrative turn" in music education, to - amine the uses of narrative inquiry for music education, and to cultivate ground for narrative inquiry to seed and ourish alongside other methodological approaches in music education. In a discipline whose early research strength was founded on an alignment with thesocialsciences,particularlythepsycho- metrictradition,oneofthekeychallenges for those embarking on narrative inquiry in music education is to ensure that its use is more than that of a "musical ornament," an elaboration on the established themes of psychometric inquiry, those of measurement and certainty. We suggest that narrative inquiry is more than a "turn" (as noun), "a melodic embellishment that is played around a given note" (Encarta World English Dictionary, 2007, n. p.); it is more than elaborationon a position, the adding of extra notes to make a melody more beautiful or interesting.

The Sound of Innovation

How a team of musicians, engineers, computer scientists, and psychologists developed computer music as an academic field and ushered in the era of digital music. In the 1960s, a team of Stanford musicians, engineers, computer scientists, and psychologists used computing in an entirely novel way: to produce and manipulate sound and create the sonic basis of new musical compositions. This group of interdisciplinary researchers at the nascent Center for Computer Research in Music and Acoustics (CCRMA, pronounced "karma") helped to develop computer music as an academic field, invent the technologies that underlie it, and usher in the age of digital music. In *The Sound of Innovation*, Andrew Nelson chronicles the history of CCRMA, tracing its origins in Stanford's Artificial Intelligence Laboratory through its present-day influence on Silicon Valley and digital music groups worldwide. Nelson emphasizes CCRMA's interdisciplinarity, which stimulates creativity at the intersections of fields; its commitment to open sharing and users; and its pioneering commercial engagement. He shows that Stanford's outsized influence on the emergence of digital music came from the intertwining of these three modes, which brought together diverse supporters with different aims around a field of shared interest. Nelson thus challenges long-standing assumptions about the divisions between art and science, between the humanities and technology, and between academic research and commercial applications, showing how the story of a small group of musicians reveals substantial insights about innovation. Nelson draws on extensive archival research and dozens of interviews with digital music pioneers; the book's website provides access to original historic documents and other material.

Published in 1993, this brave, original novel is considered to be the finest account ever written of the complexities of a transgendered existence. Woman or man? That's the question that rages like a storm around Jess Goldberg, clouding her life and her identity. Growing up differently gendered in a blue-collar town in the 1950s, coming out as a butch in the bars and factories of the prefeminist 60s, deciding to pass as a man in order to survive when she is left without work or a community in the early 70s. This powerful, provocative and deeply moving novel sees Jess coming full circle, she learns to accept the complexities of being a transgendered person in a world demanding simple explanations: a he-she emerging whole, weathering the turbulence.
