Mountains of the Pharaohs

A world-renowned archaeologist and the official guardian of Egypt's timeless treasures weaves the latest archaeological data and an enthralling family history into spellbinding narrative.

mountains of the pharaohs

World-renowned archaeologist Zahi Hawass weaves a spellbinding narrative about how the pyramids were built and why, new in paperback Nearly five thousand years ago, the fourth dynasty of Egypt's Old Kingdom reigned over a highly advanced civilization. Believed to be gods, the royal family lived amid colossal palaces and temples built to honor them and their deified ancestors. In Mountains of the Pharaohs, Zahi Hawass brings these extraordinary historical figures to life, detailing a soap opera-like saga complete with murder, incest, and the triumphant ascension to the throne of one of only four queens ever to rule Egypt. It was during this dynasty that the magnificent pyramids of Giza were built. These monuments attest not only to the dynasty's supreme power, but also to the engineering expertise and architectural sophistication that flourished under its rule. Hawass tells the complete story of the pyramids, weaving archaeological data with a history of Egypt's powerful pharaohs, and argues that the pyramids--including the Great Pyramid of Khufu, the only one of the Seven Wonders of the World still standing--were built by skilled craftsmen who took great pride in their work. Illustrated with black-and-white photographs and drawings, Mountains of the Pharaohs is a compelling account of one of civilization's greatest achievements.

Mountains of the Pharaohs

In Dr David's study, the builders of the pyramids are revealed as simple people with ordinary preoccupations: who worried about their families, grumbled about working conditions - and even planned a strike to improve them.

Mathematics forms bridges between knowledge, tradition, and contemporary life. The continuous development and growth of its many branches, both classical and modern, permeates and fertilizes all aspects of applied science and technology, and so has a vital impact on our modern society. The book will focus on these aspects and will benefit from the contribution of several world-famous scientists from mathematics and related sciences, such as: Ralph Abraham, Andrew Crumey, Peter Markowich, Claudio Procesi, Clive Ruggles, Ismail Serageldin, Amin Shokrollahi, Tobias Wallisser.

The New Cultural Atlas of Egypt

Ancient Near Eastern History and Culture offers an historical overview of the civilizations of the ancient Near East spanning ten thousand years of history. This new edition is a comprehensive introduction to the history and culture of the Near East, from prehistory and the beginnings of farming to the fall of Achaemenid Persia. Through text, images, maps, and historical documents, readers discover the material, social, and political world of cultures from Egypt to India, allowing students to see how these intertwined cultures interacted throughout history. Now fully updated and incorporating the latest scholarship on society, religion, and the economy, this book highlights the changing fortunes of these great civilizations. A special feature of this book is its many "Debating the Evidence" sections, where the reader becomes familiar with scholarly disputes concerning the interpretation of textual and archaeological evidence on a variety of topics and case studies. The fourth edition of Ancient Near Eastern History and Culture remains a crucial textbook for undergraduates and general readers studying the ancient Near East, particularly the political and social history of ancient Egypt and Mesopotamia, as well as students of archaeology and biblical studies who are working on the region.

Ancient Near Eastern History and Culture

The book is divided into two parts. In the first, the reader is taken on an ideal 'world tour' of many wonderful and enigmatic places in almost every continent, in search of traces of astronomical knowledge and lore of the sky. In the second part, Giulio Magli uses the elements presented in the tour to show that the fundamental idea which led to the construction of the astronomically-related giant monuments was the foundation of power, a foundation which was exploited by 'replicating' the sky. A possible interpretive model then emerges that is founded on the relationship the ancients had with "nature", in the sense of everything that surrounded them, the cosmos. The numerous monumental astronomically aligned structures of the past then become interpretable as acts of will, expressions of power on the part of those who held it; the will to replicate the heavenly plane here on earth and to build sacred landscapes. Finally, having formulated his hypothesis, Professor Magli returns to visit one specific place in detail, searching for proof. This in-depth examination studies the most compelling, the most intensively studied, the most famous and, until recently, the most misunderstood sacred landscape on the planet - Giza, in Egypt. The archaeoastronomical analysis of the orientation of the Giza pyramids leads to the hypothesis that the pyramids of Cheops and Chephren belong to the same construction project.

Fodor's Essential Egypt

"World-renowned archaeologist Zahi Hawass. He is one of the world's authorities on the Giza pyramids, and has spent his life excavating around the pyramids and the Sphinx. He made major important discoveries such as the tombs of the pyramid builders and the secret doors inside the pyramid of Khufu. Dr. Hawass has received five honorary doctorates from different international universities and was named as one of the Top 100 Most Influential People for the year 2006 by Time Magazine. His adventures around the pyramids have been presented in many TV shows. In this book, you will feel the thrill and the adventures of the modern-day Indiana Jones."

Magic of the Pyramids

This beautifully produced new paperback edition of *Silent Images* explores a puzzling contradiction: Despite the multitude of artifacts and texts that have come to us from ancient Egypt, much still remains obscure regarding the lives of women. Women were, from the historical perspective, silent-but how should this silence be interpreted? What was the reality of women's lives behind the standardized images? We know that their chief role in society as mothers and anchors of the family was honored and respected, although it meant a degree of segregation and, in most periods, excluded them from public office. Nevertheless, in law they were the equals of men and they could, and did, own property, which they administered and disposed of themselves. Zahi Hawass's book searches for a more realistic picture of women's lives in ancient Egypt. As well as reconsidering the evidence from tomb and temple, the author draws on unpublished material from his excavations at the workers' cemetery at Giza, which sheds light on the womenfolk of the workmen who built and maintained the pyramids. The text is complemented by lavish illustrations of places and objects, many made especially for this book.

The Publishers Weekly

Comprising a unique collection of primary sources, this book critically examines several topics relating to ancient Egypt that are of high interest to readers but about which misconceptions abound. With its pyramids, mummies, and sphinxes, ancient Egypt has fascinated us for centuries. It has been the setting of many films and novels, figuring prominently in popular culture. Much of what the average reader believes about this civilization, however, is mistaken. Through a unique collection of primary source documents, this book critically examines several topics related to ancient Egypt and about which misconceptions abound. Primary sources, many in new translations by the author, are drawn from ancient Egyptian, classical Greek and Roman, Muslim, early Christian, and modern European documents. These sources shed light on popular misconceptions. Such topics include the divinity of the pharaoh, the role of animals in ancient Egyptian religion, the purpose of the Egyptian pyramids, the use of slave labor, the Egyptian hieroglyphic writing system, the role of Cleopatra in the defeat of Marc Antony and the fall of the Roman Republic, and the influence of Egyptian religion on the development

of early Christianity. By studying these documents, users will be able to develop their skills interpreting and evaluating primary sources.

The Pyramid Builders of Ancient Egypt

Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

Silent Images

This handbook provides an overview of the society, culture, geography, history, and politics of contemporary Egypt. While such historic monuments as the pyramids at Giza, the Karnak Temple, and the Valley of the Kings draw visitors to Egypt each year, the country is today a large and varied collection of some 79 million people. An important political and cultural force in the Middle East and home to one of Africa's most advanced economies, Egypt is rapidly becoming a major player in the 21st-century world. This comprehensive text examines all facets of life in Egypt, including its land, history, politics, and culture. It is written in a manner that makes the subject accessible and engaging for readers with little prior knowledge about the country, but also provides a critical analysis of the latest research for students and scholars familiar with Egypt and its people. Special attention is given to the historical period following the rise of Islam to enable a greater understanding of Egypt's contemporary government, religious practices, popular culture, and current events.

The Egyptian Museum in Cairo, the greatest repository of ancient Egyptian artifacts in the world, receives hundreds of thousands of visitors every year. But many of its treasures, long kept in basement storerooms or in magazines at archaeological sites around the country, or recently discovered at ongoing excavations, have never been seen by the general public. To celebrate the centenary of the Museum, many of these unknown pieces of exquisite beauty or great historical importance--and often both--have been brought out of the darkness to form a unique exhibition in a very appropriate setting: a converted section of the great basement storerooms of the Museum. With some 250 artifacts from the earliest beginnings of pharaonic culture to its latest flowerings, the exhibition spans the whole of ancient Egyptian history, and the one hundred masterpieces beautifully photographed for this volume represent the whole range of the exhibition: the Predynastic Period, the Old Kingdom, the First Intermediate Period, the Middle Kingdom, the Second Intermediate Period, the New Kingdom, the Third Intermediate Period, and the Late Period. This handsome book will serve as a prized memento for visitors to the exhibition and as a window onto it for Egyptophiles everywhere.

Pyramids of Ancient Egypt

Penned by a scholar who was personally involved in research into the enigmatic young pharaoh, this fully illustrated study reviews our knowledge about the life, death, and burial of Tutankhamun. Zahi Hawass places the king in the broader context of Egyptian history, unravelling the intricate and much debated relationship between various members of the royal family, and the circumstances surrounding the turbulent Amarna period.

The Mountains of Pharaoh

The Pyramid Texts are the oldest body of extant literature from ancient Egypt. First carved on the walls of the burial chambers in the pyramids of kings and queens of the Old Kingdom, they provide the earliest comprehensive view of the way in which the ancient Egyptians understood the structure of the universe, the role of the gods, and the fate of human beings after death. Their importance lies in their antiquity and in their endurance throughout the entire intellectual history of ancient Egypt. This volume contains the complete translation of the Pyramid Texts, including new texts recently discovered and published. It incorporates full restorations and readings indicated by post-Old Kingdom copies of the texts and is the first translation that presents the texts in the order in which they were meant to be read in each of the original sources.

A History of Egypt Under the Pharaohs

An illustrated story of Tutankhamun by leading Egyptian archaeologist Zahi Hawass that reveals details of the boy king's life and dynasty, archival photographs of Howard Carter's discovery in 1922, and images of artifacts that were buried with the pharaoh.

Empire of Ancient Egypt

Il celebre archeologo Zahi Hawass è una delle maggiori autorità mondiali sulle piramidi di Giza. Ha trascorso la sua vita a scavare attorno alle piramidi e alla Sfinge. Ha fatto importanti scoperte come le tombe dei costruttori delle piramidi e le porte segrete all'interno della piramide di Cheope. Ha ricevuto cinque dottorati honoris causa da diverse università internazionali ed è stato nominato dalla rivista Time come una delle 100 persone più influenti nell'anno 2006. Le sue avventure intorno alle piramidi sono state presentate in molti shows televisivi. In questo libro si sentono le emozioni e le avventure di questo moderno Indiana Jones.

Secrets From The Sand

The astonishing discovery of the Valley of the Golden Mummies in Bahariya Oasis, deep in the Western Desert of Egypt, is considered perhaps the most spectacular Egyptian archaeological discovery since that of Tutankhamun's tomb. This vast site was uncovered by accident, when a donkey stumbled into the opening of one of the many underground tombs of a 2,000-year-old cemetery believed to cover

approximately two square miles. Never before have so many mummies been discovered at a single site: multi-chambered tombs dating from the Roman period in Egypt held rows of mummies, many adorned with gilded masks and painted cases, others wrapped in linen. Whole families were found placed together. Jewelry, pottery, amulets, and other artifacts were also uncovered, and it is estimated that as many as 10,000 mummies may ultimately be uncovered from the site, which has escaped plunderers and is thus remarkably intact. Featuring some 250 color illustrations, most of which have never before been published, this exciting book reveals the lives, customs, and religious beliefs of this until now little-known community. As such, it will both fascinate and enthrall all those with an interest in the ancient history of Egypt.

Hidden Treasures of the Egyptian Museum

A biography of the pharaoh Snefru, first pharaoh of Egypt's fourth dynasty and builder of some of its greatest pyramids.

Discovering Tutankhamun

The ultimate book on King Tut and his tomb—the most exciting archaeological find the world has ever known—now in a compact edition The tomb of Tutankhamun, with its breathtaking treasures, remains the most sensational archaeological find of all time. This brilliantly illustrated volume takes the reader through Tutankhamun's tomb room-by-room in the order that it was discovered and excavated by Howard Carter, illuminating the tomb's most magnificent artifacts and objects. Leading authority Dr. Zahi Hawass imbues the text with his own inimitable flavor, imagining how the uncovering and opening of the tomb must have felt for Carter, while Sandro Vannini's extraordinary photographs reproduce the objects in infinitesimal detail. Now available in a compact edition, and published to coincide with a global touring exhibition that begins in Los Angeles in March 2018 and ends at the Metropolitan Museum of Art in New York in 2023, this sumptuous volume is the definitive record of Tutankhamun's legacy.

the valley of the golden mummies

Les grandes pyramides de Gizeh ont intrigué l'humanité depuis des milliers d'années. Cependant, de nombreuses interrogations demeurent aujourd'hui encore sur les méthodes de leur construction, et surtout sur les raisons qui ont poussé les anciens Egyptiens à bâtir ces monuments majestueux. Des recherches récentes ont permis d'apporter des informations nouvelles permettant de répondre à ces questions. Signé par le secrétaire général du Conseil suprême des antiquités d'Égypte, par ailleurs égyptologue de renommée mondiale, ce livre nous informe des toutes dernières données archéologiques découvertes sur le plateau de Gizeh. Elles permettent au Dr Zahi Hawass de défendre la théorie selon laquelle ces pyramides - y compris la Grande Pyramide de Khéops, la seule des Sept Merveilles du monde encore debout - furent construites non par des esclaves, mais par des ingénieurs, des contremaîtres, des artisans et des ouvriers spécialisés, qui ont mené ces chantiers gigantesques et surhumains avec art et fierté. Mais l'auteur nous conte aussi l'histoire captivante des familles royales qui ont entrepris de bâtir les pyramides. Il y a presque cinq mille ans, la 4e dynastie de l'Ancien Empire règne sur une civilisation déjà très avancée. Apparentés aux dieux, les membres de ces familles vivent dans des palais colossaux et honorent dieux et ancêtres dans de grands temples. Zahi Hawass ramène à la vie ces figures historiques hors du commun, obnubilées par l'idée d'éternité, dont il fait les héros d'une passionnante saga.
