How to Write Successful Letters of Recommendation

The first book-length guide to academic recommendation letters, supported by real-world examples

Writing Recommendation Letters

The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

The Professor Is In

Offers advice and suggestions to educators on how to write powerful letters of recommendation for students with post-secondary plans, and features fifty-two sample letters that highlight the special skills or qualities of different types of students.

This new edition incorporates newer teaching and learning pedagogy. The book has been updated to reflect the role of technology both inside and outside the classroom. In addition, a new chapter has been added that discusses successfully transitioning from being a teaching assistant to being hired as a full-time instructor.

First Day to Final Grade

Seasoned classroom veterans, pre-tenured faculty, and neophyte teaching assistants alike will find this book invaluable. HHMI Professor Jo Handelsman and her colleagues at the Wisconsin Program for Scientific Teaching (WPST) have distilled key findings from education, learning, and cognitive psychology and translated them into six chapters of digestible research points and practical classroom examples. The recommendations have been tried and tested in the National Academies Summer Institute on Undergraduate Education in Biology and through the WPST. Scientific Teaching is not a prescription for better teaching. Rather, it encourages the reader to approach teaching in a way that captures the spirit and rigor of scientific research and to contribute to transforming how students learn science.

Die Bundesrepublik Deutschland ist ein Bundesstaat mit föderativer Gliederung. Das bedeutet, dass der Staat die wichtigen Dinge regelt und die eher unwichtigen Dinge ganz oder teilweise den Bundesländern überlässt. Dazu gehören das Polizeiwesen, Seuchengesetze und auch das Schul-/Hochschulwesen. Das nennt sich Bildungsföderalismus. Und darauf sind wir Deutschen stolz. Leider hindert uns dieses System daran, gemeinsame Wege zu gehen. Jedes Bundesland hat eigene Ideen und Systeme und möchte die Herrschaft darüber nicht abtreten. Also plagen wir uns herum mit aberwitzigen Schulbezeichnungen, Titeln, Abschlüssen und Studiengängen. Sie kennen sicher den feinen Unterschied zwischen Gemeinschaftsschule und Gesamtschule oder zwischen Magister und Master oder zwischen fachgebundenes Abitur und Fachabitur oder Hochschule und Universität. Was ist eine Orientierungsstufe, eine Regelschule, eine Mittelschule, eine Oberschule etc.? Mit diesem kleinen, sehr spezifischen und sicherlich nicht vollständigem Wörterbuch - dazu ist der fortwährende Erfindungsreichtum der einzelnen Kultusministerien viel zu groß - soll die Problematik der Übersetzung etwas aufgelockert werden. Entstanden ist es im Laufe von unzähligen Übersetzungen von Schul-, Universitäts- und Berufsabschlusszeugnissen sowie Zeugnissen der unterschiedlichsten Schultypen und Bildungsträger.

Human Resource and Contract Management in the Public School

The major research questions for this study were: (a) What forms do teacher interview portfolios take? (b) What meaning do school principals make of these portfolios? (c) How, if at all, are teacher portfolios being used by principals in deciding whom to hire? This was a case study using qualitative research procedures. The study was situated in the hiring policies and practices of Central City School District from 1995 to 1999. Semi-structured interviews of 18 k-12 principals and 4 key informants were primary means of data gathering. Document analyses supplemented interview data. Interview portfolios typically consisted of lesson plans; photographs of projects, activities, and teacher-student interactions; and supporting examples of classroom practice. Statements of educational philosophy, credentials, letters of reference, transcripts, and other background information were also included. Most principals viewed portfolios as a way for candidates to express their educational beliefs, illustrate skills and methods, and supplement the interview with examples from applicants' experience. Principals expressed a desire for more evidence of having used the portfolio development process as a means of reflection and introspection. Overall, interview portfolios were not key contributors to principals' hiring decisions. The reasons for this varied. Some principals mentioned time constraints during interviews. Others expressed skepticism that portfolios provided meaningful evidence of candidates' teaching ability and people skills. Propositions and implications for future research center on portfolio format and assessment criteria, authenticity and self-knowledge, selection interview procedures, teacher preparation, teacher recruitment and hiring, and information management in Central City School District. Perhaps one of the most valuable benefits of the portfolio process lies in the development of a new norm for the profession: placing discussion and debate about what constitutes "good teaching" into a public forum.

The quality and success of schools depend upon school leadership. Increasingly, in many countries worldwide, this belief has led to designing and implementing appropriate training and development programs for educational leaders. In an international comparative research project, current school leader training and development programs in fifteen countries across Europe, Asia, Australia, and North America are analyzed, compared, and discussed. *Preparing School Leaders for the 21st Century* provides insights and constructive ideas, for those planning and carrying out school leadership development in different countries and those conducting research in this field. * Part one in the book reflects on roles, tasks, competences, and conceptions of school leadership, exploring the changing context in which school leaders find themselves, focusing on the new demands on the school leaders and suitable leadership theories. * Part two provides a comparative discussion of the various leadership development models, identifying similarities and differences, based on a set of criteria selected and going beyond a mere juxtaposition. In describing common issues and challenges, it also looks for common solutions, and considers what the different countries might be able to learn from each other, and successfully transfer. * Part three identifies current international trends deduced from these programs. Nineteen recommendations for designing future programs are outlined, and instructive examples of best and promising practice are given. * Part four comprises well structured country reports, which provide information about the education system and school system of those countries, about recent changes and their impact on school leadership, about the overall school leader training and development approach.

The Chicago Guide to Landing a Job in Academic Biology is an indispensable guide for graduate students and post-docs as they enter that domain red in tooth and claw: the job market. An academic career in the biological sciences typically demands well over a decade of technical training. So it's ironic that when a scholar reaches the most critical stage in that career—the search for a job following graduate work—he or she receives little or no formal preparation. Instead, students are thrown into the job market with only cursory guidance on how to search for and land a position. Now there's help. Carefully, clearly, and with a welcome sense of humor, The Chicago Guide to Landing a Job in Academic Biology leads graduate students and postdoctoral fellows through the perils and rewards of their first job search. The authors—who collectively have for decades mentored students and served on hiring committees—have honed their advice in workshops at biology meetings across the country. The resulting guide covers everything from how to pack an overnight bag without wrinkling a suit to selecting the right job to apply for in the first place. The authors have taken care to make their advice useful to all areas of academic biology—from cell biology and molecular genetics to evolution and ecology—and they give tips on how applicants can tailor their approaches to different institutions from major research universities to small private colleges. With jobs in the sciences ever more difficult to come by, The Chicago Guide to Landing a Job in Academic Biology is designed to help students and post-docs navigate the tricky terrain of an academic job search—from the first year of a graduate program to the final negotiations of a job offer.

Teachers as Learners

This practical, performance based methods text for middle and second school pre-service teachers is organized around four developmental components: Why—gives the rationale to support the components that follow What—what you will be teaching How—how you will teach it How well—how well you are teaching it. Organized into four parts that are then split up into ten modules, the text begins with a

history of education going back to colonial times. The modules then cover the many and varied aspects of teaching pre and early adolescents, such as teaching students with exceptionalities, classroom management, diversity, instructional planning, using technology in the classroom, assessing student achievement, and self-assessment and continued professional development. The authors contend that the best teacher is one who has an eclectic style and can monitor their own progress and make changes and adapt their strategies if they are not succeeding. The ninth edition has been carefully updated to reflect the diversity and current topics in the field today. The book is a valuable resource for students today and as a reference for many years to come. New To This Edition: NEW! Improved balance of content between middle and secondary schools—this emphasizes that middle school is uniquely different from both high school and the traditional junior high school and that pre-and early adolescence is different from late adolescence. NEW! Technology has been integrated throughout every module of the book—New features including “Teaching Scenarios,” “Activities,” and “Technology Rich” features were added to all modules. NEW! Contributions from pre-service and in-service middle and secondary school teachers, teacher educators, and educational researchers have been added--to strengthen the tie between theory and practice.
