The information you provide on your resume should be placed in a specific order.

Make sure you use a simple but professional looking font such as Arial.

When writing your resume focus on any previous achievements you have gained that show you can ADD VALUE to their company in the role.

Where possible include numbers on your resume.

Any numbers will really stand out on your resume, and they allow a hiring manager to see how you are going to ADD VALUE to their company.

LET ME NOW TELL YOU HOW TO STRUCTURE YOUR RESUME! THESE ARE THE DIFFERENT SECTIONS TO INCLUDE.

Your resume should only be 2 pages in length. This makes it easy for the hiring manager to read it and to quickly decide whether they want to invite you to interview.

Now, because you are only working with 2-pages you need to use a concise structure that covers everything the hiring manager wants to see.

Personal Details And Contact Information; At the start of your resume include your name your address, email and contact telephone number. And don't forget to make sure any answer phone message on your cell phone is professional sounding. If they call you to invite you to interview and they get an unprofessional sounding answerphone message, they may hang up

The personal statement is the first thing the hiring manager will read. Therefore, it needs to grab their attention. The personal statement should ideally, be approximately 150-200 words in length, and contain powerful words and phrases that quickly explain who you are your values, and what you can bring to the role

Previous Work Experience; This section details in chronological order any previous jobs you have had. Make sure you include the job title, the name of the organization, and the years that you worked

Key Skills; Key skills are essentially the strengths you have that you can bring to the role These should be in bullet points

Education & Qualifications; in the education section list the qualifications you possess and don't forget to include brief details of any relevant courses you have attended and completed

References. At the end of your resume I strongly recommend you give the details of two people who would be willing to act as a positive reference for you

The demand for ...

Your resume must highlight your capabilities in testing, analysing and working with various chemicals while also focusing on your degree, affiliations to engineering societies, and the states in which you are a licensed and registered professional.

Resume objective The resume objective is used to detail the applicant's goals and how the position they were applying for related to them.

Certifications Your resume needs to highlight your certifications & licenses specifically relevant to the job-make these so that they are clearly identifiable among the rest. Good resumes will list both certifications and other endorsements. Certificate numbers should also be listed to help the employer to validate your qualifications

Achievements You should include your educational achievements along with professional achievements in your resume. Add descriptive bullet- points underneath your work experience entries, make sure to focus on your achievements rather than writing a simple list of duties and responsibilities. If you can make sure to use numbers and statistics!

HOW TO WRITE A RESUME! (5 Golden Tips for Writing a POWERFUL Resume or CV!) - HOW TO WRITE A RESUME! (5 Golden Tips for Writing a POWERFUL Resume or CV!) by CareerVidz 455,414 views 2 years ago 11 minutes, 19 seconds - If you want to how to write a killer **resume**,, don't forget to SUBSCRIBE to the channel, and please give the video a like, thank you ...

The information you provide on your resume should be placed in a specific order.

Make sure you use a simple but professional looking font such as Arial.

When writing your resume focus on any previous achievements you have gained that show you can ADD VALUE to their company in the role.

Where possible include numbers on your resume.

Any numbers will really stand out on your resume, and they allow a hiring manager to see how you are going to ADD VALUE to their company.

LET ME NOW TELL YOU HOW TO STRUCTURE YOUR RESUME! THESE ARE THE DIFFERENT SECTIONS TO INCLUDE.

Your resume should only be 2 pages in length. This makes it easy for the hiring manager to read it and to quickly decide whether they want to invite you to interview.

Now, because you are only working with 2-pages you need to use a concise structure that covers everything the hiring manager wants to see.

Personal Details And Contact Information; At the start of your resume include your name your address, email and contact telephone number. And don't forget to make sure any answer phone message on your cell phone is professional sounding. If they call you to invite you to interview and they get an unprofessional sounding answerphone message, they may hang up

The personal statement is the first thing the hiring manager will read. Therefore, it needs to grab their attention. The personal statement should ideally, be approximately 150-200 words in length, and

contain powerful words and phrases that quickly explain who you are your values, and what you can bring to the role

Previous Work Experience; This section details in chronological order any previous jobs you have had. Make sure you include the job title, the name of the organization, and the years that you worked

Key Skills; Key skills are essentially the strengths you have that you can bring to the role These should be in bullet points

Education & Qualifications; in the education section list the qualifications you possess and don't forget to include brief details of any relevant courses you have attended and completed

References. At the end of your resume I strongly recommend you give the details of two people who would be willing to act as a positive reference for you

Ask a Manager

'I'm a HUGE fan of Alison Green's "Ask a Manager" column. This book is even better' Robert Sutton, author of The No Asshole Rule and The Asshole Survival Guide 'Ask A Manager is the book I wish I'd had in my desk drawer when I was starting out (or even, let's be honest, fifteen years in)' - Sarah Knight, New York Times bestselling author of The Life-Changing Magic of Not Giving a F*ck A witty, practical guide to navigating 200 difficult professional conversations Ten years as a workplace advice columnist has taught Alison Green that people avoid awkward conversations in the office because they don't know what to say. You'll learn what to say when: · colleagues push their work on you - then take credit for it · you accidentally trash-talk someone in an email and hit 'reply all' · you're being micromanaged - or not being managed at all · your boss seems unhappy with your work · you got too drunk at the Christmas party With sharp, sage advice and candid letters from real-life readers, Ask a Manager will help you successfully navigate the stormy seas of office life.
