Ford Focus (2005 - 2011) Diesel - Replace the thermostat - Ford Focus (2005 - 2011) Diesel - Replace the thermostat by Haynes Manuals 70,046 views 3 years ago 8 minutes, 54 seconds - Do you need to Replace the thermostat on your **Ford**, Focus (2005 - 2011) **Diesel Diesel**, but don't know where to start? This video ...

- . using the key release the bonnet
- disconnect the negative battery terminal
- and remove the necessary battery covers
- pull the terminal upwards from the negative battery post
- unscrew the fasteners
- disconnect the mass airflow sensor wiring
- release the rubber retaining strap at the front of the housing
- disconnect the coolant hoses from the thermostat housing
- disconnect the wiring plug from the engine coolant
- undo the four retaining bolts
- remove the thermostat
- clean the engine mating surface
- fit the thermostat housing assembly to the engine
- tighten the front and rear thermostat housing retaining bolts
- refit the coolant bypass pipe retaining
- connect the mass airflow sensor wiring plug
- cover the filler opening loosely with the cap
- check for signs of overheating
- uncover the expansion tank filler

Ford Focus (2005 - 2011) Diesel - Replace the alternator - Ford Focus (2005 - 2011) Diesel - Replace the alternator by Haynes Manuals 105,658 views 3 years ago 12 minutes, 33 seconds - Do you need to Replace the alternator on your **Ford**, Focus (2005 - 2011) **Diesel Diesel**, but don't know where to start? This video ...

Make sure the engine is completely cool before beginning this procedure.

Wait at least 5 minutes after turning off the ignition switch before disconnecting the battery. This is to allow sufficient

If a Ford Keycode' audio unit is fitted, the unit will not function again on reconnection until the correct security code is entered.

After reconnecting the battery, the engine may run erratically until it's been driven for a few minutes to allow the PCM to relearn.

Ford Focus (2001 - 2005) - Starter motor removal and refitting - Ford Focus (2001 - 2005) - Starter motor removal and refitting by Haynes Manuals 105,253 views 3 years ago 4 minutes, 23 seconds - Do you need to replace the Starter **motor**, removal and refitting on your 2001 to 2005 **Ford**, Focus but don't know where to start?

- rotate the key clockwise to release
- remove the cover from the battery
- disconnect the air intake duct from the mass airflow
- disconnect the wiring plug from the throttle position
- slacken the starter motor upper mounting
- apply the handbrake
- place the jack head under the reinforced section of the sill
- unscrew the nuts and disconnect
- slacken and remove the starter motor lower mounting
- maneuver the starter motor into place
- refit the wiring to the starter motor
- remove the axle stand
- refit the starter motor upper retaining bolts
- reconnect the crankshaft position sensor wiring
- locate the negative lead clamp over the terminal
- reconnected refit the battery cover

EGR valve cleaning WITHOUT DISMANTLING - Cleaner kit test Before/After - EGR valve cleaning WITHOUT DISMANTLING - Cleaner kit test Before/After by TutoBuild Eng 8,993,279 views 9 years ago 7 minutes, 34 seconds - How to clean an EGR valve without dismantling with a Bardahl EGR valve cleaner kit. EDIT 12/02/2015: The video uses the pack ...

Test of a EGR valve cleaner kit without dismantling (Diesel engine)

The product which will be tested is a professional product for professional use

According to the manual, the engine mileage must be less than 95 000 miles

The vehicle which will be tested has exceeded this limit (113 602 miles)

Here the valve before cleaning

The valve refitting

The kit contains an EGR valve aerosol cleaner and an EGR valve diesel additive to add into the fuel tank

The aerosol must be pulverized between the air filter and the intake manifold, after the air-flow sensor

This vehicle does not have an air-flow sensor (Renault Megane 1), the spraying is performed directly after the air filter

This vehicle has an air-flow sensor (Peugeot 206 hdi), the spraying is performed after the air-flow sensor

Disconnect the air intake pipe

Spray 3 or 4 short bursts of 1 second maximum into the air intake pipe

Wait-1-minute between each spray while changing engine speed from 1000 to 3000 rev / min

Renew the operations until exhaustion of the aerosol by doing a pause all the 10 times

Pause the tenth time

Then resume operations

Engine speed between 1500 and -2000 rpm

Stop when the aerosol is empty

Refit the air intake pipe

Pour the diesel additive in 20 liters of fuel

Drive for 10 miles while regularly increasing engine speed to 3000 rpm

Removing the EGR valve to judge the effectiveness of the product (this is not done in the normal operating mode!)

Despite the too high mileage of the engine (110 000 miles); it is noted that the product managed to eliminate the main impurities

If a fault indicator is displayed on the dashboard, ask a mechanic to erase the fault code with a diagnostic tool

Ford 1.8TDCi Engine INA Timing Belt Setup Procedure - Ford 1.8TDCi Engine INA Timing Belt Setup Procedure by GSF Car Parts 71,502 views 3 years ago 11 minutes, 1 second - Tim Adams INA product specialist talks us through the timing belt setup procedure for a **Ford, 1.8TDCi Engine**, - commonly fitted to ...
