## The Power Of Positive Thinking

Positive mental attitude is a concept that has been developed in many areas of life as a key to success. In 1937, Napoleon Hill introduced the importance of positive thinking in the book Think and Grow Rich. Later on, other scholars such as W. Clement Stone found positive mental attitude as a very critical

component to personal success and productivity. The right mental attitude is associated with positive characteristics such as hope, courage, faith, optimism, generosity, initiative, tolerance, kindness, tact and good common sense. Positive attitude is more of a philosophy that builds on the fact that having an optimistic disposition in any circumstance of life can help you in enhancing achievement and positive changes. It is a state of mind that tirelessly seeks for ways of victory regardless of the surrounding circumstances. Positivity by its mere definition opposes negativity, hopelessness and defeatism. To develop mental strength, you need deliberate measures and commitment. A resilient mind is one that never loses focus even when subjected to the most stressful conditions. Mental toughness will help you maneuver through stress and emerge stronger than before. A mental attitude is the bridge that connects success and failure. On one end of the bridge is failure which is characterized by negativity while on the other end it is success which is denoted by a positive attitude. At any one given time, individuals are between the two points emotionally. They are at liberty to swing towards any end but they must also be ready to bear the consequences. It is true that you can overcome negativity but you must be determined. Having a clear understanding of the end result can motivate you to changing you from negativity into positivity. It is possible to turn situations of failure into success. With a positive attitude, your setback can be a setup for a comeback. Difficult times come to each one of us without an introduction. These situations can sink us deeper leaving us more depressed and devastated internally. Being positive in life will help you to handle these circumstances and find a way around them. This is because a positive attitude gives you a unique dimension that takes into account the storm that you are currently passing through and the lull that is imminent immediately after the storm is over. With these two perspectives, you can develop a coping strategy that has both endurance and hope knowing that good times are still ahead

## Succeed and Grow Rich Through Persuasion

Many developed countries despite having superior infrastructure and significant investments in public health haven't been able to tackle the onslaught of Covid-19. It was in this backdrop that India's ability to rise to the challenge had been written off entirely by many leading 'experts'. Doomsday predictions were made which included mass deaths and anarchy. However, Prime Minister Modi's robust grip on the administration changed India's fortunes in the fight against the virus. He took absolute control of the country's response mechanisms and streamlined systems to cut red-tape. Led by fact-based scientific advice, the Indian government galvanized their inheritance of less-than-adequate resources, augmented capacities rapidly and prudently spent its reserves on the most effective solutions. Hence, even after two waves of the pandemic, India has managed to save more lives than most countries in the world. India has proved the cynics wrong with one of the lowest fatality rates. As a testament to its scientific and technological prowess, India has not only developed multiple indigenous vaccines but is running the world's largest vaccination drive supported by superb infrastructure. True to our nature as a nurturer, India has been acting as the 'pharmacy of the world' by providing life-saving drugs and medical equipment to other nations. With a staunch resolve to help all of humanity emerge out of the pandemic, India has committed over five billion vaccine doses in 2022 for countries in need and intends to provide more until every human being is secure. This book aims to be a definitive account of India's pandemic response from the top echelons of leadership and government.
