## Maurine

Maurine and Other Poems by Ella Wheeler Wilcox is a clever collection of poems about a woman named Maurine receiving mail, chatting with the mailman, visiting with Aunt Ruth, and doing other everyday activities. Excerpt: "The clock chimed three, and we yet strayed at will About the yard in morning dishabille, When Aunt Ruth came, with apron o'er her head, Holding a letter in her hand, and said, "Here is a note, from Vivian I opine; At least his servant brought it. ### Maurine and Other Poems - Scholar's Choice Edition

Born on November 5th 1850 in Johnstown, Wisconsin, Ella Wheeler was the youngest of four children. She began to write as a child and by the time she graduated was already well known as a poet throughout Wisconsin. Regarded more as a popular poet than a literary poet her most famous work 'Solitude' reflects on a train journey she made where giving comfort to a distressed fellow traveller she wrote how the others grief imposed itself for a time on her 'Laugh and the world laughs with you, Weep and you weep alone'. It was published in 1883 and was immensely popular. The following year, 1884, she married Robert Wilcox. They lived for a time in New York before moving to Connecticut. Their only child, a son, died shortly after birth. Here we publish one of her many poetry books, the classic Maurine, that so endeared her to her audience. Ella died of breast cancer on October 30th, 1919.

### Maurine

Among the twelve hundred poems which have emanated from my too prolific pen there are some forty or fifty which treat entirely of that emotion which has been denominated "the grand passion"-love. A few of those are of an extremely fiery character. When I issued my collection known as "Maurine, and Other Poems," I purposely omitted all save two or three of these. I had been frequently accused of writing only sentimental verses; and I took pleasure and pride in presenting to the public a volume which contained more than one hundred poems upon other than sentimental topics. But no sooner was the book published than letters of regret came to me from friends and strangers, and from all quarters of the globe, asking why this or that love poem had been omitted. These regrets were repeated to me by so many people that I decided to collect and issue these poems in a small volume to be called "Poems of Passion." By the word "Passion" I meant the "grand passion" of love. To those who take exception to the title of the book I would suggest an early reference to Webster's definitions of the word.

Tea gowns, bleached damask, and yards of flannel and pillow-case lace, stereoscopes, books of gospel hymns and ballroom gems, the New Improved Singer Sewing Machine, side saddles, anti-freezing well pumps, Windsor Stoves, milk skimmers, straight-edged razors, high-button shoes, woven cane carpet beaters, spittoons, the Studebaker Road Cart, commodes and washstands, the "Fire Fly" single wheel hoe, cultivator, and plow combined, flat irons, and ice cream freezers. What man, woman, or child of the 1890s could resist these offerings of the Montgomery Ward catalogue, the one book that was read avidly, year after year, by millions of Americans on farms and in small towns across the nation? The Montgomery Ward catalogue provides one of the few irrefutably accurate pictures of what life was "really like" in the gay nineties, for it described and illustrated almost anything that anybody could possibly need or want in the way of "store-bought" goods. In fact, in that pre-department store era, it was usually the only source for such goods. Imagine if Montgomery Ward had issued an illustrated catalogue in the days of Louis XIV, or Elizabeth I, or Charlemagne: what insights would we have into

the daily life of the "common folk," the farmers and shopkeeper, housewives and schoolchildren . . . what sources of information for historians and scholars, collectors and dealers, what models for artists and designers. In 1895, Montgomery Ward was the oldest, largest, and most representative mail-order house in the country. The brainchild of a former traveling salesman, it issued its first catalogue in 1872, a one-page listing of items. By 1895, the catalogue, reprinted here, had grown to 624 pages and listed some 25,000 items, almost all of them illustrated with live drawings. Montgomery Ward was by then a multi-million dollar business that profoundly affected the American economy; and since it reached the most isolated farms and backwoods cabins, its effect on American culture was almost as great. Now once again available, it is our truest, most unbiased record of the spirit of the 1890s. An introduction on the history of the Montgomery Ward Company and its catalogue has been prepared especially for this edition by Boris Emmet, Ph.D. (Johns Hopkins), a foremost expert on retail merchandising. His monumental work *Catalogues and Counters* has long been recognized as a landmark in the study of American economic history.

American women have created an especially vigorous and innovative poetry, beginning in 1632 when Anne Bradstreet set aside her needle and picked up her "poet's pen." The topics of American women poets have been various, their images their own, and their modes of expression original. Emily Stipes Watts does not imply that the work of American men and that of American women are two different kinds of poetry, although they have been treated as such in the past. It is her aim, rather, to delineate and define the poetic tradition of women as crucial to the understanding of American poetry as a whole. By 1850, American women of all colors, religions, and social classes were writing and publishing poetry. Within the critical category of "female poetry," developed from 1800 to 1850, these women experimented boldly and prepared the way for the achievement of such women as Emily Dickinson in the second half of the nineteenth century. Indeed at times—for example from 1860 through 1910—it was women who were at the outer edge of prosodic experimentation and innovation in American poetry. Moving chronologically, Professor Watts broadly characterizes the state of American poetry for each period, citing the dominant male poets; she then focuses on women contemporaries, singling out and analyzing their best work. This volume not only brings to light several important women poets but also represents the discovery of a tradition of women writers. This is a unique and invaluable contribution to the history of American literature.

#### Silencing the Past

In this provocative analysis of historical narrative, Michel-Rolph Trouillot demonstrates how power operates, often invisibly, at all stages in the making of history to silence certain voices. From the West's failure to acknowledge the Haitian Revolution, the most successful slave revolt in history, to the continued debate over denials of the Holocaust, and the meaning of Columbus's arrival in the Americas, Trouillot shows us that history is not simply the recording of facts and events, but a process of actively enforced silences, some unconscious, others quite deliberate.

#### Silencing the Past

Now part of the HBO docuseries *Exterminate All the Brutes*, written and directed by Raoul Peck. The 20th anniversary edition of a pioneering classic that explores the contexts in which history is produced—now with a new foreword by renowned scholar Hazel Carby. Placing the West's failure to acknowledge the Haitian Revolution—the most successful slave revolt in history—alongside denials of the Holocaust and the debate over the Alamo, Michel-Rolph Trouillot offers a stunning meditation on how power operates in the making and recording of history. This modern classic resides at the intersection of history, anthropology, Caribbean, African-American, and post-colonial studies, and has become a staple in college classrooms around the country. In a new foreword, Hazel Carby explains the book's enduring importance to these fields of study and introduces a new generation of readers to Trouillot's brilliant analysis of power and history's silences.

### Global Transformations

Through an examination of such disciplinary keywords, and their silences, as the West, modernity, globalization, the state, culture, and the field, this book aims to explore the future of anthropology in the Twenty-first-century, by examining its past, its origins, and its conditions of possibility alongside the history of the North Atlantic world and the production of the West. In this significant book, Trouillot challenges contemporary anthropologists to question dominant narratives of globalization and to radically rethink the utility of the concept of culture, the emphasis upon fieldwork as the central methodology of the discipline, and the relationship between anthropologists and the people whom they study.

### Alternative Historiographies of the Digital Humanities

"Alternative Historiographies of the Digital Humanities examines the process of history in the narrative of the digital humanities and deconstructs its history as a straight line from the beginnings of humanities computing. By discussing alternative histories of the digital humanities that address queer gaming, feminist game studies praxis, Cold War military-industrial complex computation, the creation of the environmental humanities, monolingual discontent in DH, the hidden history of DH in English studies, radical media praxis, cultural studies and DH, indigenous futurities, Pacific Rim post-colonial DH, the issue of scale and DH, the radical, indigenous, feminist histories of the digital database, and the possibilities for an antifascist DH, this collection hopes to re-set discussions of the DH straight, white origin myths. Thus, this collection hopes to reexamine the silences in such a straight and white masculinist history and how power comes into play to shape this straight, white DH narrative."--Page 4 of cover

### The Silence of the Archive

Foreword by Anne J Gilliland, University of California Evaluating archives in a post-truth society. In recent years big data initiatives, not to mention Hollywood, the video game industry and countless other popular media, have reinforced and even glamorized the public image of the archive as the ultimate repository of facts and the hope of future generations for uncovering 'what actually happened'. The reality is, however, that for all sorts of reasons the record may not have been preserved or survived in the archive. In fact, the record may never have even existed – its creation being as imagined as is its contents. And even if it does exist, it may be silent on the salient facts, or it may obfuscate, mislead or flat out lie. The Silence of the Archive is written by three expert and knowledgeable archivists and draws attention to the many limitations of archives and the inevitability of their having parameters. Silences or gaps in archives range from details of individuals' lives to records of state oppression or of intelligence operations. The book brings together ideas from a wide range of fields, including contemporary history, family history research and Shakespearian studies. It describes why these silences exist, what the impact of them is, how researchers have responded to them, and what the silence of the archive means for researchers in the digital age. It will help provide a framework and context to their activities and enable them to better evaluate archives in a post-truth society. This book includes discussion of: enforced silences expectations and when silence means silenced digital preservation, authenticity and the future dealing with the silence possible solutions; challenging silence and acceptance the meaning

of the silences: are things getting better or worse? user satisfaction and audience development. This book will make compelling reading for professional archivists, records managers and records creators, postgraduate and undergraduate students of history, archives, librarianship and information studies, as well as academics and other users of archives.

### The Old Regime and the Haitian Revolution

The Haitian Revolution (1789-1804) was an epochal event that galvanized slaves and terrified planters throughout the Atlantic world. Rather than view this tumultuous period solely as a radical rupture with slavery, Malick W. Ghachem's innovative study shows that emancipation in Haiti was also a long-term product of its colonial legal history. Ghachem takes us deep into this volatile colonial past, digging beyond the letter of the law and vividly re-enacting such episodes as the extraordinary prosecution of a master for torturing and killing his slaves. This book brings us face-to-face with the revolutionary invocation of Old Regime law by administrators seeking stability, but also by free people of color and slaves demanding citizenship and an end to brutality. The result is a subtle yet dramatic portrait of the strategic stakes of colonial governance in the land that would become Haiti.

### Trouillot Remixed

This collection of writings from Haitian anthropologist Michel-Rolph Trouillot includes his most famous, lesser known, and hard to find writings that demonstrate his enduring importance to Caribbean studies, anthropology, history, postcolonial studies, and politically engaged scholarship more broadly.

### Exterminate All The Brutes

Over twenty years ago, Sven Lindqvist, one of the great pioneers of a new kind of experiential history writing, set out across Central Africa. Obsessed with a single line from Conrad's *The Heart of Darkness* - Kurtz's injunction to 'Exterminate All the Brutes' - he braided an account of his experiences with a profound historical investigation, revealing to the reader with immediacy and cauterizing force precisely what Europe's imperial powers had exacted on Africa's peoples over the course of the preceding two centuries. Shocking, humane, crackling with imaginative energies and moral purpose, *Exterminate All the Brutes* stands as an impassioned, timeless classic. It is essential reading for anybody ready to come to terms with the brutal, racist history on which Europe built its wealth.

### Processing the Past

*Processing the Past* explores the dramatic changes taking place in historical understanding and archival management, and hence the relations between historians and archivists. Written by an archivist and a historian, it shows how these changes have been brought on by new historical thinking, new conceptions of archives, changing notions of historical authority, modifications in archival practices, and new information technologies. The book takes an "archival turn" by situating archives as subjects rather than places of study, and examining the increasingly problematic relationships between historical and archival work. By showing how nineteenth- and early twentieth-century historians and archivists in Europe and North America came to occupy the same conceptual and methodological space, the book sets the background to these changes. In the past, authoritative history was based on authoritative archives and mutual understandings of scientific research. These connections changed as historians began to ask questions not easily answered by traditional documentation, and archivists began to confront an unmanageable increase in the amount of material they processed and the challenges of new electronic technologies. The authors contend that historians and archivists have divided into two entirely separate professions with distinct conceptual frameworks, training, and purposes, as well as different understandings of the authorities that govern their work. *Processing the Past* moves toward bridging this divide by speaking in one voice to these very different audiences. Blouin and Rosenberg conclude by raising the worrisome question of what future historical archives might be like if historical scholars and archivists no longer understand each other, and indeed, whether their now different notions of what is archival and historical will ever again be joined.

### Thinking About History

What distinguishes history as a discipline from other fields of study? That's the animating question of Sarah Maza's *Thinking About History*, a general introduction to the field of history that revels in its eclecticism and highlights the inherent tensions and controversies that shape it. Designed for the

classroom, *Thinking About History* is organized around big questions: Whose history do we write, and how does that affect what stories get told and how they are told? How did we come to view the nation as the inevitable context for history, and what happens when we move outside those boundaries? What is the relation among popular, academic, and public history, and how should we evaluate sources? What is the difference between description and interpretation, and how do we balance them? Maza provides choice examples in place of definitive answers, and the result is a book that will spark classroom discussion and offer students a view of history as a vibrant, ever-changing field of inquiry that is thoroughly relevant to our daily lives.

### The Return of Martin Guerre

The clever peasant Arnaud du Tilh had almost persuaded the learned judges at the Parlement of Toulouse when, on a summer's day in 1560, a man swaggered into the court on a wooden leg, denounced Arnaud, and reestablished his claim to the identity, property, and wife of Martin Guerre. The astonishing case captured the imagination of the continent. Told and retold over the centuries, the story of Martin Guerre became a legend, still remembered in the Pyrenean village where the impostor was executed more than 400 years ago. Now a noted historian, who served as consultant for a new French film on Martin Guerre, has searched archives and lawbooks to add new dimensions to a tale already abundant in mysteries: we are led to ponder how a common man could become an impostor in the sixteenth century, why Bertrande de Rols, an honorable peasant woman, would accept such a man as her husband, and why lawyers, poets, and men of letters like Montaigne became so fascinated with the episode. Natalie Zemon Davis reconstructs the lives of ordinary people, in a sparkling way that reveals the hidden attachments and sensibilities of nonliterate sixteenth-century villagers. Here we see men and women trying to fashion their identities within a world of traditional ideas about property and family and of changing ideas about religion. We learn what happens when common people get involved in the workings of the criminal courts in the ancien régime, and how judges struggle to decide who a man was in the days before fingerprints and photographs. We sense the secret affinity between the eloquent men of law and the honey-tongued village impostor, a rare identification across class lines. Deftly written to please both the general public and specialists, *The Return of Martin Guerre* will interest those who want to know more about ordinary families and especially women of the past, and about the creation of literary legends. It is also a remarkable psychological narrative about where self-fashioning stops and lying begins.

### Truth, Silence and Violence in Emerging States

Around the world in the twentieth century, political violence in emerging states gave rise to different kinds of silence within their societies. This book explores the histories of these silences, how they were made, maintained, evaded, and transformed. This book gives a comprehensive view of the ongoing evolutions and multiple faces of silence as a common strand in the struggles of state-building. It begins with chapters that examine the construction of "regimes of silence" as an act of power, and it continues through explorations of the ambiguous limits of speech within communities marked by this violence. It highlights national and transnational attempts to combat state silences, before concluding with a series of considerations of how these regimes of silence continue to be extrapolated in the gaps of records and written history. This volume explores histories of the composed silences of political violence across the emerging states of the late twentieth century, not solely as a present concern of aftermath or retrospection but as a diachronic social and political dimension of violence itself. This book makes a major original contribution to international history, as well as to the study of political terror, human rights violations, social recovery, and historical memory.

### The Haitian Revolution

Toussaint L'Ouverture was the leader of the Haitian Revolution in the late eighteenth century, in which slaves rebelled against their masters and established the first black republic. In this collection of his writings and speeches, former Haitian politician Jean-Bertrand Aristide demonstrates L'Ouverture's profound contribution to the struggle for equality.

## Telling the Truth about History

A passionate and insightful account by a leading historian of Haiti that traces the sources of the country's devastating present back to its turbulent and traumatic history. Even before the 2010 earthquake destroyed much of the country, Haiti was known as a benighted place of poverty and corruption. Maligned and misunderstood, the nation has long been blamed by many for its own wretchedness. But as acclaimed historian Laurent Dubois makes clear, Haiti's troubled present can only be understood by examining its complex past. The country's difficulties are inextricably rooted in its founding revolution—the only successful slave revolt in the history of the world; the hostility that this rebellion generated among the colonial powers surrounding the island nation; and the intense struggle within Haiti itself to define its newfound freedom and realize its promise. Dubois vividly depicts the isolation and impoverishment that followed the 1804 uprising. He details how the crushing indemnity imposed by the former French rulers initiated a devastating cycle of debt, while frequent interventions by the United States—including a twenty-year military occupation—further undermined Haiti's independence. At the same time, Dubois shows, the internal debates about what Haiti should do with its hard-won liberty alienated the nation's leaders from the broader population, setting the stage for enduring political conflict. Yet as Dubois demonstrates, the Haitian people have never given up on their struggle for true democracy, creating a powerful culture insistent on autonomy and equality for all. Revealing what lies behind the familiar moniker of "the poorest nation in the Western Hemisphere," this indispensable book illuminates the foundations on which a new Haiti might yet emerge.

## Haiti: The Aftershocks of History

A philosophical interpretation of history, examining the significance of historical study as a science and a reflection of social values.

## What is History?

*Modernity Disavowed* is a pathbreaking study of the cultural, political, and philosophical significance of the Haitian Revolution (1791–1804). Revealing how the radical antislavery politics of this seminal event have been suppressed and ignored in historical and cultural records over the past two hundred years, Sibylle Fischer contends that revolutionary antislavery and its subsequent disavowal are central to the formation and understanding of Western modernity. She develops a powerful argument that the denial of revolutionary antislavery eventually became a crucial ingredient in a range of hegemonic thought, including Creole nationalism in the Caribbean and G. W. F. Hegel's master-slave dialectic. Fischer draws on history, literary scholarship, political theory, philosophy, and psychoanalytic theory to examine a range of material, including Haitian political and legal documents and nineteenth-century Cuban and Dominican literature and art. She demonstrates that at a time when racial taxonomies were beginning to mutate into scientific racism and racist biology, the Haitian revolutionaries recognized the question of race as political. Yet, as the cultural records of neighboring Cuba and the Dominican Republic show, the story of the Haitian Revolution has been told as one outside politics and beyond human language, as a tale of barbarism and unspeakable violence. From the time of the revolution onward, the story has been confined to the margins of history: to rumors, oral histories, and confidential letters. Fischer maintains that without accounting for revolutionary antislavery and its subsequent disavowal, Western modernity—including its hierarchy of values, depoliticization of social goals having to do with racial differences, and privileging of claims of national sovereignty—cannot be fully understood.

## Modernity Disavowed

This book is available as open access through the Bloomsbury Open Access programme and is available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com). This book outlines what theory for a global age might look like, positing an agenda for consideration, contestation and discussion, and a framework for the research-led volumes that follow in the series. Gurminder K. Bhambra takes up the classical concerns of sociology and social theory and shows how they can be rethought through an engagement with postcolonial studies and decoloniality, two of the most distinctive critical approaches of the past decades.

## Connected Sociologies

Collects two works; the first explores the roots of genocide and European racism in the form of a travel diary, the second, Australia's "no man's land" that was claimed by the British because the "lower races" inhabited it.

### The Dead Do Not Die

On January 1, 1804, Jean-Jacques Dessalines declared the independence of Haiti, thus bringing to an end the only successful slave revolution in history and transforming the colony of Saint-Domingue into the second independent state in the Western Hemisphere. The historical significance of the Haitian Revolution has been addressed by numerous scholars, but the importance of the Revolution as a cultural and political phenomenon has only begun to be explored. Although the path-breaking work of Michel-Rolph Trouillot and Sibylle Fischer has illustrated the profound silences surrounding the Haitian Revolution in Western historiography and in Caribbean cultural production in the aftermath of the Revolution, contributors to this volume argue that, while suppressed and disavowed in some quarters, the Haitian Revolution nonetheless had an enduring cultural and political impact, particularly on peoples and communities that have been marginalized in the historical record and absent from the discourses of Western historiography. *Tree of Liberty* interrogates the literary, historical, and political discourses that the Revolution produced and inspired across time and space and across national and linguistic boundaries. In so doing, it seeks to initiate a far-reaching discussion of the Revolution as a cultural and political phenomenon that shaped ideas about the Enlightenment, freedom, postcolonialism, and race in the modern Atlantic world. ### Tree of Liberty

Vividly recounting the lives of enslaved women in eighteenth-century Bridgetown, Barbados, and their conditions of confinement through urban, legal, sexual, and representational power wielded by slave owners, authorities, and the archive, Marisa J. Fuentes challenges how histories of vulnerable and invisible subjects are written.

### Dispossessed Lives

This collection of case studies from around the world uses a new approach in historical anthropology, one that focuses on heterogeneity within cultures rather than coherence to explain how we commemorate certain events, while silencing others.

### Between History and Histories

In this book, one of the world's leading social theorists presents a critical, alarmed, but also nuanced understanding of the post-traditional world we inhabit today. Jeffrey Alexander writes about modernity as historical time and social condition, but also as ideology and utopia. The idea of modernity embodies the Enlightenment's noble hopes for progress and rationality, but its reality brings great suffering and exposes the destructive impulses that continue to motivate humankind. Alexander examines how twentieth-century theorists struggled to comprehend the Janus-faced character of modernity, which looks backward and forward at the same time. Weber linked the triumph of worldly asceticism to liberating autonomy but also ruthless domination, describing flights from rationalization as systemic and dangerous. Simmel pointed to the otherness haunting modernity, even as he normalized the stranger. Eisenstadt celebrated Axial Age transcendence, but acknowledged its increasing capacity for barbarity. Parsons heralded American community, but ignored modernity's fragmentations. Rather than seeking to resolve modernity's contradictions, Alexander argues that social theory should accept its Janus-faced character. It is a dangerous delusion to think that modernity can eliminate evil. Civil inclusion and anti-civil exclusion are intertwined. Alexander enumerates dangerous frictions endemic to modernity, but he also suggests new lines of social amelioration and emotional repair.

### The Dark Side of Modernity

"Writing History in the Digital Age began as a one-month experiment in October 2010, featuring chapter-length essays by a wide array of scholars with the goal of rethinking traditional practices of

researching, writing, and publishing, and the broader implications of digital technology for the historical profession. The essays and discussion topics were posted on a WordPress platform with a special plug-in that allowed readers to add paragraph-level comments in the margins, transforming the work into socially networked texts. This first installment drew an enthusiastic audience, over 50 comments on the texts, and over 1,000 unique visitors to the site from across the globe, with many who stayed on the site for a significant period of time to read the work. To facilitate this new volume, Jack Dougherty and Kristen Nawrotzki designed a born-digital, open-access platform to capture reader comments on drafts and shape the book as it developed. Following a period of open peer review and discussion, the finished product now presents 20 essays from a wide array of notable scholars, each examining (and then breaking apart and reexamining) how digital and emergent technologies have changed the ways that historians think, teach, author, and publish"--

### Writing History in the Digital Age

Decolonization revolutionized the international order during the twentieth century. Yet standard histories that present the end of colonialism as an inevitable transition from a world of empires to one of nations—a world in which self-determination was synonymous with nation-building—obscure just how radical this change was. Drawing on the political thought of anticolonial intellectuals and statesmen such as Nnamdi Azikiwe, W.E.B Du Bois, George Padmore, Kwame Nkrumah, Eric Williams, Michael Manley, and Julius Nyerere, this important new account of decolonization reveals the full extent of their unprecedented ambition to remake not only nations but the world. Adom Getachew shows that African, African American, and Caribbean anticolonial nationalists were not solely or even primarily nation-builders. Responding to the experience of racialized sovereign inequality, dramatized by interwar Ethiopia and Liberia, Black Atlantic thinkers and politicians challenged international racial hierarchy and articulated alternative visions of worldmaking. Seeking to create an egalitarian postimperial world, they attempted to transcend legal, political, and economic hierarchies by securing a right to self-determination within the newly founded United Nations, constituting regional federations in Africa and the Caribbean, and creating the New International Economic Order. Using archival sources from Barbados, Trinidad, Ghana, Switzerland, and the United Kingdom, *Worldmaking after Empire* recasts the history of decolonization, reconsiders the failure of anticolonial nationalism, and offers a new perspective on debates about today's international order.

### Worldmaking After Empire

This book introduces methodological concepts aimed at including women in the canon of the history of philosophy. The history of women philosophers is as long and strong as the history of philosophy, and this holds true not only for the European tradition, as the research of women philosophers of the past shows. The phenomenon of ignoring and excluding women in 19th and 20th century views on the history of philosophy was a result of the patriarchal tradition that ostracized women in general. In this book, leading feminist philosophers discuss methodologies for including women thinkers in the canon and curricula of philosophy. How does the recovery of women thinkers and their philosophies change our view of the past, and how does a different view of the past affect us in the present? Studying a richer and more pluralistic history of philosophy presents us with worlds we have never entered and have never been able to approach. This book will appeal to philosophers and intellectual historians wanting to view the history of philosophy in a new light and who are in favor of an inclusive perspective on that history.

### Methodological Reflections on Women's Contribution and Influence in the History of Philosophy

*American History Now* collects eighteen original historiographic essays that survey recent scholarship in American history and trace the shifting lines of interpretation and debate in the field. Building on the legacy of two previous editions of *The New American History*, this volume presents an entirely new group of contributors and a reconceptualized table of contents. The new generation of historians showcased in *American History Now* have asked new questions and developed new approaches to scholarship to revise the prevailing interpretations of the chronological periods from the Colonial era to the Reagan years. Covering the established subfields of women's history, African American history, and immigration history, the book also considers the history of capitalism, Native American history, environmental history, religious history, cultural history, and the history of "the United States in the world." *American History Now* provides an indispensable summation of the state of the field for those interested in the study and teaching of the American past.

### American History Now

This book is a thematic history of the world from 1780, the pivotal year of the revolutionary age, to the outbreak of the First World War in 1914. It brings together historical data and arguments from different societies in order to show how interconnected the world was, even before the onset of modern globalization. "The Birth of the Modern World, 1780-1914 demonstrates how events in Asia, Africa, and South America, from the decline of the eighteenth-century Islamic empires to the anti-European Boxer rebellion of 1900 in China, had a direct impact on European and American history. Conversely, it sketches the "ripple effects" of crises such as the European revolutions and the American Civil War. The book also considers the great themes of the nineteenth-century world: the rise of the modern state, industrialization, liberalism, and the progress of world religions. Engaging and original, this book both challenges and complements the dominant regional and national approaches traditionally adopted by historians.

#### The Birth of the Modern World, 1780-1914

A Pulitzer Prize-winning historian's "breathtakingly original" (Junot Diaz) reinterpretation of the eight decades surrounding the Civil War. "Capacious [and] buzzing with ideas." --The Boston Globe Volume 3 in the Penguin History of the United States, edited by Eric Foner In this ambitious story of American imperial conquest and capitalist development, Pulitzer Prize-winning historian Steven Hahn takes on the conventional histories of the nineteenth century and offers a perspective that promises to be as enduring as it is controversial. It begins and ends in Mexico and, throughout, is internationalist in orientation. It challenges the political narrative of "sectionalism," emphasizing the national footing of slavery and the struggle between the northeast and Mississippi Valley for continental supremacy. It places the Civil War in the context of many domestic rebellions against state authority, including those of Native Americans. It fully incorporates the trans-Mississippi west, suggesting the importance of the Pacific to the imperial vision of political leaders and of the west as a proving ground for later imperial projects overseas. It reconfigures the history of capitalism, insisting on the centrality of state formation and slave emancipation to its consolidation. And it identifies a sweeping era of "reconstructions" in the late-nineteenth and early twentieth centuries that simultaneously laid the foundations for corporate liberalism and social democracy. The era from 1830 to 1910 witnessed massive transformations in how people lived, worked, thought about themselves, and struggled to thrive. It also witnessed the birth of economic and political institutions that still shape our world. From an agricultural society with a weak central government, the United States became an urban and industrial society in which government assumed a greater and greater role in the framing of social and economic life. As the book ends, the United States, now a global economic and political power, encounters massive warfare between imperial powers in Europe and a massive revolution on its southern border the remarkable Mexican Revolution which together brought the nineteenth century to a close while marking the important themes of the twentieth.

#### A Nation Without Borders

This book traces the lives of slaves before, during, and after the largest slave auction in US history in 1859.

#### The Weeping Time

Acclaimed historian Margaret MacMillan explores here the many ways in which history affects us all. She shows how a deeper engagement with history, both as individuals and in the sphere of public debate, can help us understand ourselves and the world better. But she also warns that history can be misused and lead to misunderstanding. History is used to justify religious movements and political campaigns alike. Dictators may suppress history because it undermines their ideas, agendas, or claims to absolute authority. Nationalists may tell false, one-sided, or misleading stories about the past. Political leaders might mobilize their people by telling lies. It is imperative that we have an understanding of the past and avoid these and other common traps in thinking to which many fall prey. This brilliantly reasoned work, alive with incident and figures both great and infamous, will compel us to examine history anew—and skillfully illuminates why it is important to treat the past with care.

The earliest of the four Gospels, the book portrays Jesus as an enigmatic figure, struggling with enemies, his inner and external demons, and with his devoted but disconcerted disciples. Unlike other gospels, his parables are obscure, to be explained secretly to his followers. With an introduction by Nick Cave

## The Gospel According to Mark

From the best-selling author of *The Dew Breaker*, a major work of nonfiction: a powerful moving family story that centers around the men closest to her heart - her father, Mira, and his older brother, Joseph. From the age of four, Edwidge Danticat came to think of her uncle Joseph, a charismatic pastor, as her 'second father', when she was placed in his care after her parents left Haiti for a better life in America. Listening to his sermons, sharing coconut-flavored ices on their walks through town, roaming through the house that held together many members of a colorful extended family, Edwidge grew profoundly attached to Joseph. He was the man who 'knew all the verses for love'. And so she experiences a jumble of emotions when, at twelve, she joins her parents in New York City. She is at last reunited with her two youngest brothers, and with her mother and father, whom she has struggled to remember. But she must also leave behind Joseph and the only home she's ever known. Edwidge tells of making a new life in a new country while fearing for the safety of those still in Haiti as the political situation deteriorates. But *Brother I'm Dying* soon becomes a terrifying tale of good people caught up in events beyond their control. Late in 2004, his life threatened by an angry mob, forced to flee his church, the frail, eighty-one-year-old Joseph makes his way to Miami, where he thinks he will be safe. Instead, he is detained by U.S. Customs, held by the Department of Homeland Security, brutally imprisoned, and dead within days. It was a story that made headlines around the world. His brother, Mira, will soon join him in death, but not before he holds hope in his arms: Edwidge's firstborn, who will bear his name - and the family's stories, both joyous and tragic - into the next generation. Told with tremendous feeling, this is a true-life epic on an intimate scale: a deeply affecting story of home and family - of two men's lives and deaths, and of a daughter's great love for them both.

## Brother, I'm Dying

Nominated for the Heritage Toronto Book Award • Longlisted for the Toronto Book Awards • A Globe and Mail Book of the Year • A CBC Books Best Canadian Nonfiction of 2021 From plantation rebellion to prison labour's super-exploitation, Walcott examines the relationship between policing and property. That a man can lose his life for passing a fake \$20 bill when we know our economies are flush with fake money says something damning about the way we've organized society. Yet the intensity of the calls to abolish the police after George Floyd's death surprised almost everyone. What, exactly, does abolition mean? How did we get here? And what does property have to do with it? In *On Property*, Rinaldo Walcott explores the long shadow cast by slavery's afterlife and shows how present-day abolitionists continue the work of their forebears in service of an imaginative, creative philosophy that ensures freedom and equality for all. Thoughtful, wide-ranging, compassionate, and profound, *On Property* makes an urgent plea for a new ethics of care.

## On Property

Winner of the 2019 Stone Book Award, Museum of African American History A remarkable intellectual history of the slave revolts that made the modern revolutionary era *The Common Wind* is a gripping and

colorful account of the intercontinental networks that tied together the free and enslaved masses of the New World. Having delved deep into the gray obscurity of official eighteenth-century records in Spanish, English, and French, Julius S. Scott has written a powerful “history from below.” Scott follows the spread of “rumors of emancipation” and the people behind them, bringing to life the protagonists in the slave revolution. By tracking the colliding worlds of buccaneers, military deserters, and maroon communards from Venezuela to Virginia, Scott records the transmission of contagious mutinies and insurrections in unparalleled detail, providing readers with an intellectual history of the enslaved. Though *The Common Wind* is credited with having “opened up the Black Atlantic with a rigor and a commitment to the power of written words,” the manuscript remained unpublished for thirty-two years. Now, after receiving wide acclaim from leading historians of slavery and the New World, it has been published by Verso for the first time, with a foreword by the academic and author Marcus Rediker.

### The Common Wind

Lisette, a Saint-Domingue-born Creole slave and daughter of an African-born bossale, has inherited not only the condition of slavery but the traumatic memory of the Middle Passage as well. The stories told to her by her grandmother and godmother, including the horrific voyage aboard the infamous slave ship *Rosalie*, have become part of her own story, the one she tells in this haunting novel by the acclaimed Haitian writer Évelyne Trouillot. Inspired by the colonial tale of an African midwife who kept a cord of some seventy knots, each one marking a child she had killed at birth, the novel transports us back to Saint-Domingue, before it became Haiti. The year is 1750, and a rash of poisonings is sowing fear among the plantation masters, already unsettled by the unrest caused by Makandal, the legendary Maroon leader. Through this tumultuous time, Lisette struggles to maintain her dignity and to imagine a future for her unborn child. In telling Lisette's story, Trouillot gives the revolution that will soon rock the island a human face and at long last sheds light on the invisible women and men of Haitian history. The original French edition of *Rosalie l'infâme* received the Prix Soroptimist de la romancière francophone, honoring a novel written by a woman from a French-speaking country which showcases the cultural and literary diversity of the French-speaking world.
