The Dilbert Paradox

Key Impact of Digital Technology

Is It Possible that There Is a Better Return on Assets for Smaller Companies

Rate of Business Failure among Entrepreneurial Ventures

We Couldn't Possibly Bring Them in Front of an Executive Team a Senior Executive Team because They'Re So Unpredictable They'Re Loose Cannons You Don't Know What They Would Say or Do in Front of these Executives so We Have To Keep Them Mine Locked Doors in a Separate Area and every Once in a While We'LI Slide a Pizza underneath the Door To Keep Them Fed so this Is You Know the Heart of Creativity and Passion Speaking about How They Treat Passionate People in Their Organization Yeah So I Think that that's that's a Red Flag That We'Re Basically in a World That Does Not Value Passion I Would Say Again

Again We Have a Whole Part of the Book Which Is Really Focused on What We Call Pulling from the Top Institutional Leadership and the Challenge for Institutional Leaders in this in this Emerging Era Is They CanNot Do It Themselves in the Past in a Hierarchical Command and Control Organization You Could Mandate this Is the Way It's Going To Be Done and You Got Things Done So What We'Re What We Focus on in the Book Is a Notion of the Function of a Leader Is First of all To Identify Really Central Performance Challenges That the Company Is Facing Preferably What on What We Would Describe Is the Edge of the Company Not in the Core I Don't Try To Change the Core

So There's Been some Great Pockets of Innovation One Example Has Been Xerox in the 70s with Amazing Work like Apples Advanced Technology Group You Know Atari and a Lot of these Places Did Not Have Leaders with Business School Degrees so My Question Is Do You Think Business Schools Are Outdated or Are They Causing Harm or Are They Just Not Is What They'Re Teaching Just Not Relevant Anymore Oh Boy Thank You all for Coming Yeah I Will Say that Business Schools

like Companies Are Egging To Catch Up To Understand the Nature of these Fundamental Changes That Are Playing Out and To Restructure How They Approach Education and Learning Given those Kinds of Changes

If You Have Mounting Pressure the Only Way You Will Succeed in Mounting Pressure Is if You'Re Passionate about What You'Re Doing Otherwise You Will Quickly Burn Out It Will Be Marginalized You Will Not Be Success and So I Believe Intensely that One of the Key Requirements for Us as Individuals Is To Figure Out What Our Passion Is and Make the Passion Our Profession and I Think that Can Be Done in Many Different Ways but if You Don't Do that All this Other Stuff about Pull People Who Use Pull Most Effectively Are the Ones Who Are Really Passionate John Hagel Thank You Very Much Thank You
