HOW TO SOLVE A RUBIK'S CUBE Advanced Method ...

The reason for doing the cross on the bottom layer is that you then don't have to turn the cube over when starting the second layer. This saves time not only by not physically moving the cube, but whilst you are completing the cross you can be looking ahead for your first move of F2L.

Advanced Method - Kupendeza

As you practise, you will get quicker and more confident with the cube until you too have your own version of the best way. Step 2 - F2L This step involves solving the first layer corners and second layer at the same time, to get this: To see all of the cases and what to do for each, go here.

Advanced Active Learning Strategies

This advanced technique developed by Jessica Fridrich divides the puzzle into layers and you have to solve the cube layer by layer using algorithms in each step, not messing up the pieces already in place. These steps are the following: Cross, F2L, OLL and PLL, as seen on the illustration above. The method developed by ...
