Flora of tropical East Africa. Gymnospermae

A descriptive account of the Gymnospermae native and naturalised in Kenya, Tanzania and Uganda, together with information on exotic ornamental and crop plants. At least one species per genus is illustrated, and the bibliography and synonymy are sufficiently detailed to explain the nomenclature and taxonomic circumscriptions within a broad regional context.

Gymnospermae

The flora is prepared at Royal Botanic Gardens, Kew, in close collaboration with East African Herbarium and in liaison with the University of Dar es Salaam, the University of Nairobi and the Makerere University. Significant contributions are also made by specialists elsewhere. The flora is designed to a high academic standard and should be a useful resource reference for anyone concerned with the identification and utilization of plants in eastern Africa. Each family is published as a separate part.

Flora of Tropical East Africa - Tiliaceae & Muntingiaceae (2001)

The flora is prepared at Royal Botanic Gardens, Kew, in close collaboration with East African Herbarium and in liaison with the University of Dar es Salaam, the University of Nairobi and the Makerere University. Significant contributions are also made by specialists elsewhere. The flora is designed to a high academic standard and should be a useful resource reference for anyone concerned with the identification and utilization of plants in eastern Africa. Each family is published as a separate part.

Angiospermae

Part of a series on the flora of tropical East Africa, this work considers Musaceae. The flora is prepared at Royal Botanic Gardens, Kew in close collaboration with East African Herbarium and in liaison with the University of Dar es Salaam, the University of Nairobi and the Makerere University. Significant

contributions are also made by specialists from elsewhere. The flora should be a useful reference for anyone concerned with the identification and utilization of plants in eastern Africa. Each family is published as a separate part. New parts are published annually. All back volumes are also available.

Flora of Tropical East Africa

A descriptive account of the Cyperaceae native and naturalised in Kenya, Tanzania and Uganda, together with information on exotic ornamental and crop plants. At least one species per genus is illustrated, and the bibliography and synonymy are sufficiently detailed to explain the nomenclature and taxonomic circumscriptions within a broad regional context.

Flora of Tropical East Africa - Azollaceae (1999)

Prepared at the Royal Botanic Gardens, Kew, in close collaboration with the East African Herbarium and in liaison with the University of Dar es Salaam, the University of Nairobi and the Makerere University, this series is designed to the highest academic standards and is a useful reference for anyone concerned with the identification and utilization of plants in eastern Africa. Each family is published as a separate part.

Flora of Tropical East Africa

Flora of Tropical East Africa - Palmae (1986) was prepared at the Royal Botanic Gardens/Kew with the assistance from the East African Herbarium. Palmae can be classed as trees to shrublets and climbers that are armed or unarmed, with woody stems, very short to immensely tall, sometimes climbing, solitary or clustered smooth or covered with leaf-base remains or leaf-sheaths.
