Michel Foucault's Conception of Discourse as Knowledge and Power - Michel Foucault's Conception of Discourse as Knowledge and Power by University Quick Course 154,833 views 4 years ago 11 minutes, 39 seconds - This video provides a basic overview of Foucauldian discourse, defined by **Foucault**, as ways of constituting knowledge, together ...

Discourse means you have a range of statements that provide a language with the way of talking about something. It provides a language with a way of representing knowledge about a particular subject matter at a particular given historical juncture.

"All social practices entail meaning and meaning shapes and influences what we do---all the practices that we have possess a discursive aspect to them" (Hall, The West and the Rest, 1992, Pg. 291).

Discourse is about the production of knowledge through language---that there are rules and practices that produce meaningful statements and that regulate discourse in particular historical periods.

Discourse constructs the topic. It defines and produces the objects of our knowledge.

Discourse never consists of just one statement or just one action or one source of information. The same discourse that characterizes a way of talking or thinking in a state of knowledge at any one time can cross a range of texts that may lead to different forms of conduct within different institutional sites within a society.

Objects have no real meaning outside discourse---the way one talks about them and acts upon these ideas.

It is impossible to determine what the meaning of an object is outside of how it is used. Physical things and actions exist but they only take on meaning and become objects of knowledge within discourse---how they are talked about and how they are put into practice and become institutionalized.

Meaning only comes through discourse (objects + practice) produces knowledge--- a way of thinking about and acting on things that then become institutionalized.

The power accorded to discourse is similar to that given to language by other cultural theorists---the power to define how the world is categorized and perceived.

Foucault believed individuals give meaning to objects and events.

Foucault argued that portraying an object or an event will reflect journalistic interpretation and ways of thinking and seeing

Foucault rejected the reduction of the relationship between knowledge and power to one solely confined to class interests--- preferring to believe that other social forces are in operation as well (Hall, 1997, Pg. 48).

It is discourse, not the subjects who speak it, which produces knowledge. Subjects may produce particular texts, but they are operating within the limits of the episteme, the discursive formation, the regime of truth, of a particular period and culture. Indeed, this is one of Foucault's most radical propositions: the subject' is produced within discourse.

"This subject of discourse cannot be outside discourse, because it must be subjected to discourse. It must submit to its rules and conventions, to its dispositions of power/knowledge. The subject can become the bearer of the kind of knowledge which discourse produces. It can become the object through which power is relayed. But it cannot stand outside power/knowledge as its source and author" (Hall, 1997, Pg. 55).

(ed.). (1996). Feminist interpretations of **Michel Foucault**, **University**, Park: The ...

In The History of Madness, Foucault drew a distinction between mental illness and madness; the latter, he argued, is a social construct based on subjective assumptions.

Foucault's intellectual contributions were based on his claim that no one person or group alone possesses power: as the individual is constructed from the power relations in which he or she lives, escape from those power relations is impossible.

For Foucault, discipline is not the top-down application of direct coercion but power used in a way that makes the individual self-regulate.

historically contingent

Foucault seeks to analyze punishment in its social context, and to examine how changing power relations affected punishment.

Prison reformers proposed a theater of punishment, in which a complex system of representations and signs was displayed publicly.

Discipline is a series of techniques by which the body's operations can be controlled. Discipline worked by coercing and arranging the individual's movements and his experience of space and time. Disciplinary power has three elements: hierarchical observation, normalizing judgment and examination. Observation and the gaze are key instruments of power.

Criticism of the failure of prisons misses the point, because failure is part of its very nature. The process by which failure and operation are combined is the carceral system.

The aim of prison, and of the carceral system, is to produce delinquency as a means of structuring and controlling crime.

In Discipline and Punish,, Foucault begins a deep examination of the relationship between the physical body, the individual, and what he calls power-knowledge — the marriage of power and knowledge that allows the powerful to classify and control people and things.

What Does Discipline and Punish Say?

Foucault suggested that the Panopticon and the mechanisms of power it contains extend beyond the prison and into other institutions of society.

Why Does Discipline and Punish Matter?

Discipline and Punish traces the evolution of modern power structures such as current prison systems and considers their effects on human freedom and identity.

Foucault's analyses encouraged scholars to dramatically re-evaluate how they view the operation of power, knowledge, and what constitutes the individual.

The theory advanced in Discipline and Punish is often used to understand how individuals internalize power and the effect this has on both social relations and the possibility of resistance.
