Watch this video to know the 12 steps of postnatal ...

Intro

Umbilical Cord Care: During pregnancy, the umbilical cord was a lifeline to your baby. However, after birth, it isn't required anymore.

Breastfeeding: You can start breastfeeding your baby about an hour or two after birth. The initial milk is thick, yellowish, and is nutrient-rich! It is called colostrum.

Initial Breathing: were previously filled with fluid, are now filled with air. This sudden shift can be difficult for a baby.

Eye Care: Your baby's eyes are extremely sensitive. Within an hour after birth, the doctor will put some eye drops to prevent any infection. Regularly wipe the eyes with a damp cloth.

Rooting.

Sucking. On anything within reach.

Tongue Thrusts

Diving for a Nipple.

Name That Cue

Poop Cues: Thoughtful expression, pursed lips, furrowed brow, grunting

Tired Cues: Yawning Dull glassy expression Rubbing eyes & ears

Disengagement Cues: Glassy eyes Jerky Movements Turn Away, Push Things Away

Overstimulation Cues: Stiff Body Tight Muscles Grinding Cry

Instead of adding more stimulation: Try swaddling, rocking, and white noise.

When baby first falls asleep, it's light sleep. (REM)

Light sleep signs: Twitching, Fluttery eyelids, Sucking

Deep Sleep Signs: Relaxed Body & Face Quiet, rhythmic breathing.

You Feel like this Has Gotten to the Point Where It's Not Something You Can Handle by Yourself and I'M Going To Tell the Birth Partners Often the Mom Is So Exhausted She Can't See this Herself and So She May Need the Birth Partners To Step Forward and Say Hey I Think this Is Something That You Need a Little Bit of Support for that You'Re Not Able To Do on Your Own so if You Do There Is a Maternal Mental Health Line That We Have and There Is a Group That You Can Talk to that Are Very Good at Helping You Transition through that Stage

We Will Often Not Be Able To Answer the Phone Directly because the Same Nurse That Is Answering the Baby Line and Staffing the Baby Line Is Usually Also Seeing Clients That Come In so They Will Maybe Have a Lag Time of When You Leave a Message Getting Back to You but We Will Always Get Back to You before the End of the Day with Whatever Your Questions or Concerns Are if You Call the Baby Line You Can Call the Baby Line Not Just for Lactation Needs but for All Your Maternal Child Health Needs because that Is Staffed by Our Ends and Ibclc Certified Lactation Consultants the Baby Line Is Nine Four Nine Seven Six Four Two Two Two Nine that Baby Line Is Also Something That You Would Call To Schedule an Appointment with the Lactation Clinic

We Expect Them To Lose Weight When They'Re Born a Lot of that Is Water Weight but by 2 Weeks of Age We Want Them To Have Regained Their Weight Back to Their Birth Weight So for At Least the First Two Weeks You'Re Never Going To Let the Baby Go More than Three Hours without Feeding the Baby and if You'Re Breastfeeding You Need To Wake the Baby Up To Breastfeed any Way To Empty the Breasts so a Lot of Times It Depends on the Baby Themselves some of Them Will Continue To Wake To Eat at Six Months
