The Intellectuals And Socialism Studies In Social Theory

[{"keyword":"Intellectuals"} {"keyword":"Socialism"} {"keyword":"Social Theory"} {"keyword":"Political Philosophy"} {"keyword":"Academic Studies"}](#)

This comprehensive study explores the complex relationship between intellectuals and socialism, examining various theoretical frameworks and historical movements within the broader field of social theory. It delves into how intellectual thought has shaped socialist ideologies and practices, and conversely, how socialist movements have influenced the role and discourse of intellectuals across different societies and eras.

Culture, Ideology, Hegemony

This volume explores the interconnections between culture, ideology and hegemony in an effort to understand and explain how Indians came to terms with colonial subjection and envisioned a future for the society in which they lived. The process of exploring the indigenous epistemological tradition and assessing it in the context of advances made by the west was not unilinear and undifferentiated; it was driven with contradictions, contentions and ruptures. Locating intellectual history at the intersection of social and cultural history, the eight essays in this book cover a wide range of issues, moving from an overview of religious and social ideas in colonial India to empirical studies of themes such as indigenous medicine, the family and literary fiction. Professor Panikkar contests both the imperialist and nationalist paradigms of intellectual history. Meticulously researched and lucidly argued, his analysis is illuminated by a rare sensitivity to the nature of class formation and class values, as well as to the material conditions of human existence.

CULTURAL ASPIRATIONS Essays on the Intellectual History of the Colonial Tamil Nadu

"Errata: pages 6 and 11 have got inadvertently exchanged"--P. 1.

History, Society, and Land Relations

This book analyzes the diverse facets of the social history of health and medicine in colonial India. It explores a unique set of themes that capture the diversities of India, such as public health, medical institutions, mental illness and the politics and economics of colonialism. Based on inter-disciplinary research, the contributions offer valuable insight into topics that have recently received increased scholarly attention, including the use of opiates and the role of advertising in driving medical markets. The contributors, both established and emerging scholars in the field, incorporate sources ranging from palm leaf manuscripts to archival materials. This book will be of interest to scholars of history, especially the history of medicine and the history of colonialism and imperialism, sociology, social anthropology, cultural theory, and South Asian Studies, as well as to health workers and NGOs.

The Social History of Health and Medicine in Colonial India

This book offers one of the first critical evaluations and in-depth analysis of the intellectual movement in Maharashtra in the 19th century. Arguing against the prevalent view that Indian rationality was imported from Europe through the colonial agency, it traces the rational roots of the movement to indigenous intellectual traditions and history. It also questions the centrality assigned to the 'Bengal Renaissance' as being the representative of the contemporary intellectual movement in the country. Strongly grounded in primary research, this volume brings forth many new facts and facets into the scholarly discourse on topics such as the idea of 'Drain' and the rise of Indian nationalism, so far seen as a predominantly political process divorced from its cultural dimensions. It re-examines the

view that cultural consciousness that preceded political agitation was a separate sphere of activity and suggests that both were integral stages of anti-colonialism in the country. The author maintains that rationalism and nationalism were closely connected as a means-and-end continuum. He also provides a new and substantially different understanding of the 19th-century intellectuals Mahatma Jotirao Phule and Pandita Ramabai among others. Lucid, accessible and thought provoking, this book will interest scholars and researchers of modern Indian history, Indian political thought, sociology, philosophy and Marathi literature.

Rise of Reason

Fifty Key Works of History and Historiography introduces some of the most important works ever written by those who have sought to understand, capture, query and interpret the past. The works covered include texts from ancient times to the present day and from different cultural traditions ensuring a wide variety of schools, methods and ideas are introduced. Each of the fifty texts represents at least one of six broad categories: early examples of historiography (e.g. Herodotus and Augustine) non-western works (e.g. Shaddad and Fukuzawa) 'Critical' historiography (e.g. Mabillon and Ranke) history of minorities, neglected groups or subjects (e.g. Said and Needham) broad sweeps of history (e.g. Mumford and Hofstadter) problematic or unconventional historiography (e.g. Foucault and White). Each of the key works is introduced in a short essay written in a lively and engaging style which provides the ideal preparation for reading the text itself. Complete with a substantial introduction to the field, this book is the perfect starting point for anyone new to the study of history or historiography.

Fifty Key Works of History and Historiography

Offers a new perspective on the making of colonial education and the history of modern schooling in India.

Empire, Civil Society, and the Beginnings of Colonial Education in India

This book gives a flavour of the Indian response to modern science by analysing the lives and careers of four scientifically influential personalities in Bengal. His analysis of the careers of two scientists, J. C. Bose and P. C. Ray, and two institution builders, Mahendralal Sircar and Asutosh Mookerjee, brings to light the issues related to science at a time of colonialism and nationalism. Scientists often had to depend on British institutions for legitimation and funding, while also supporting the nationalist cause for greater autonomy. One of the central claims of this book is that the protagonists aimed to contribute to a modern world science, one based on a strong sense of universalism. They did not aim to construct any alternative sciences, though they did express and apply their work by drawing on their cultural heritage. This makes Science and National Consciousness a work of particular relevance today, when a homogenous, instrumentalist and totally Western conception of science is being globally accepted.

Science and National Consciousness in Bengal

Filippo and Caroline Osella, anthropologists who spent three years in rural Kerala, south India, write about the modern search for upward social mobility: the processes involved, the ideologies that support or thwart it, and what happens to the people involved. They focus on the caste called Izhavas, a group that in the mid-19th century consisted of a small land-owning and titled elite and a large mass of landless and small tenants who were largely illiterate and considered untouchable, and who eked out a living by manual labor and petty trade. In the 20th century, Izhavas pursued mobility in many social arenas, both as a newly united caste and as families. The work considers how successful the mobility has been and looks at the effects on their society of an ethos of progress. Distributed by Stylus. Social Mobility In Kerala

Poonam Bala's Contesting Colonial Authority explores the interplay of conformity and defiance amongst the plural medical tradition in colonial India. The contributors reveal how Indian elites, nationalists, and the rest of the Indian population participated in the move to revisit and frame a new social character of Indian Medicine.

Contesting Colonial Authority

Focuses On The Alliance Between The Neo-Liberal Economic Policies And Hindu Fundamentalism, Its Implications And The Destruction Of Educational System. Also Discuss The Hindu Right Wing Cultural Project And Outlines The Agenda For Struggle Against This Homegrown Fascism.

An Agenda for Cultural Action and Other Essays

The history of education in the modern world is a history of transnational and cross-cultural influence. This collection explores those influences in (post) colonial and indigenous education across different geographical contexts. The authors emphasize how local actors constructed their own adaptation of colonialism, identity, and autonomy, creating a multi-centric and entangled history of modern education. In both formal as well as informal aspects, they demonstrate that transnational and cross-cultural exchanges in education have been characterized by appropriation, re-contextualization, and hybridization, thereby rejecting traditional notions of colonial education as an export of pre-existing metropolitan educational systems.

Connecting Histories of Education

This book grew out of a need to examine the practice the teaching and research of sociology in India. This need was, in turn, prompted by the experience of the contributors as students and teachers, of the problems of understanding/communicating the connections between sociology and the society in which one lives, and between sociological theory and empirical studies.

The Practice of Sociology

An exploration of the shaping of childhood in the colonial period.

Colonial Childhoods

In the years since independence, the Indian subcontinent has witnessed an alarming rise in violence against marginalized communities, with an increasing number of groups pushed to the margins of the democratic order. Against this background of violence, injustice and the abuse of rights, this book explores the critical, 'insurgent' possibilities of constitutionalism as a means of revitalising the concepts of non-discrimination and liberty, and of reimagining democratic citizenship. The book argues that the breaking down of discrimination in constitutional interpretation and the narrowing of the field of liberty in law deepen discriminatory ideologies and practices. Instead, it offers an intersectional approach to jurisprudence as a means of enabling the law to address the problem of discrimination along multiple, intersecting axes. The argument is developed in the context of the various grounds of discrimination mentioned in the constitution — caste, tribe, religious minorities, women, sexual minorities, and disability. The study draws on a rich body of materials, including official reports, case law and historical records, and uses insights from social theory, anthropology, literary and historical studies and constitutional jurisprudence to offer a new reading of non-discrimination. This book will be useful to those interested in law, sociology, gender studies, politics, constitutionalism, disability studies, human rights, social exclusion, etc.

This edited volume moves the study of South Asia to the center of sociological analysis, bringing together recent scholarship across sites in India, Sri Lanka, Nepal, and Pakistan, as well as in Ethiopia and the USA. This book situates the project of decolonizing the discipline within a rich transnational intellectual legacy and reveals how South Asia offers a uniquely generative site from which to rethink sociological practice. Recognizing local and global influences at their specific sites, the contributing authors highlight the historical ravages of colonialism and imperialism, modernization projects of the postcolonial era, and the kaleidoscopic ways in which gender, caste, class, and sexuality structure everyday life under neoliberalism today. The sociology of South Asia centers the voices and experiences of those marginalized by local and global systems of power in order to produce knowledge that advances interconnected projects of liberation.

Sociology of South Asia

This special issue focusses on refugees from Nazi-occupied Europe in British colonies, dominions and overseas territories. It deals with aspects like internment, identity and cultural representation in not well-known destinations of forced migration like India, New Zealand, Canada or Kenya.

Praise for the hardback edition: 'an impressively scholarly and immensely detailed text... a welcome and strongly recommended contribution to World History and India History collections.' Library Bookwatch "Recommended" -- Choice A History of Modern India provides a comprehensive chronological analysis of India's vibrant and diverse history. As well as examining the evolution of the relationship between the society and the state in its various economic, social, cultural and political forms, A History of Modern India analyses the major empires in modern India from the Moghuls (1580-1739) to the Raj (1818-1947), and discusses the economic, social and intellectual dynamism that accompanied intervening periods of political fragmentation. The book explores the difficulties confronting the rise of Indian nationalism and the consequent confrontation between religious communities: what should have been the crowning victory of a pacifist anti-colonial movement was instead brutally resolved with the violence of Partition in 1947.

A History of Modern India, 1480-1950

This book deals with Punches and Punch-like magazines in 19th and 20th century Asia, covering an area from Egypt and the Ottoman Empire in the West via British India up to China and Japan in the East. It traces an alternative and largely unacknowledged side of the history of this popular British periodical, and simultaneously casts a wide-reaching comparative glance on the genesis of satirical journalism in various Asian countries. Demonstrating the spread of both textual and visual satire, it is an apt demonstration of the transcultural trajectory of a format intimately linked to media-bound public spheres evolving in the period concerned.

The cultural universe of urban, English-speaking middle class in India shows signs of growing inclusiveness as far as English is concerned. This phenomenon manifests itself in increasing forms of bilingualism (combination of English and one Indian language) in everyday forms of speech - advertisement jingles, bilingual movies, signboards, and of course conversations. It is also evident in the startling prominence of Indian Writing in English and somewhat less visibly, but steadily rising, activity of English translation from Indian languages. Since the eighties this has led to a frenetic activity around English translation in India's academic and literary circles. Kothari makes this very current phenomenon her chief concern in *Translating India*. The study covers aspects such as the production, reception and marketability of English translation. Through an unusually multi-disciplinary approach, this study situates English translation in India amidst local and global debates on translation, representation and authenticity. The case of Gujarati - a case study of a relatively marginalized language - is a unique addition that demonstrates the micro-issues involved in translation and the politics of language. Rita Kothari teaches English at St. Xavier's College, Ahmedabad (Gujarat), where she runs a translation research centre on behalf of Katha. She has published widely on literary sociology, postcolonialism and translation issues. Kothari is one of the leading translators from Gujarat. Her first book (a collaboration with Suguna Ramanathan) was on English translation of Gujarati poetry (*Modern Gujarati Poetry: A Selection*, Sahitya Akademi, New Delhi, 1998). Her English translation of the path-breaking Gujarati Dalit novel *Angaliyat* is in press (*The Stepchild*, Oxford University Press). She is currently working on an English translation of Gujarati short stories by women of Gujarat, a study of the nineteenth-century narratives of Gujarat, and is also engaged in a project on the Sindhi identity in India.

Translating India

This book attempts to capture the reconfiguration of the pre-modern power structure within colonialism, in the specific context of education and linguistic policies implemented by the colonial administration in Western India. The interrelationship existing between caste power, dominance, colonialism and their cultural implications has been a rather ignored subject in postcolonial theory; analysis of the interplay between primordial power structures like caste and colonial modernity has only recently been reflected in some post-colonial writings. Against this backdrop, the book offers a nuanced understanding of the

collusive role that the indigenous elites played in working out new ways to preserve their privileges and dominance, which also strengthened the hold of the colonial regime without fully altering and disturbing the existing modes of dominance. The book attempts to dispel the theory that a thorough eradication of pre-capitalist relationships is a pre-requisite to the growth and advancement of modern capitalism. The Indian case points to the contrary. The colonial state could engender its capitalist motives without substantially altering the existing feudal, hierarchical socio-economic and political arrangements. Drawing upon the theoretical framework of Marx, Gramsci, Althusser and Jotirao Phule, the volume attempts to delineate the relationship between language and power in colonial Western India.

Language Politics under Colonialism

The book examines the shaping of popular culture of Orissa over the last two hundred years. It brings together six articles, which delineate different aspects of the social and cultural history of Orissa health and disease, caste, class, gender, popular perceptions and literary constructions. Also included are two field notes that focus on certain vital issues of contemporary relevance in Korapat.

Situating Social History

This book explores the positive psychological aspects of religion and spirituality in the Indian context. It discusses the concepts and practices of Hinduism, Islam, Buddhism, Christianity, Jainism, and Sikhism and their impact on overall well-being. As the global enthusiasm for Indian spirituality grows, this book brings together scholars to share their perspectives and reflections on various religious aspects. The chapters offer readers a psychological "capsule" of mental health, well-being, compassion, kindness, character strength, mind-body relationship, and mindfulness, providing practical strategies for a better quality of life. Furthermore, this book offers insights into the different perspectives of happiness and well-being measured across diverse demographics. It also provides a qualitative conceptualization of happiness among older people, reflections on positive aging, and highlights the facilitators and inhibitors of happiness. With its comprehensive coverage and multidisciplinary approach, this book serves as a valuable reference for postgraduate and doctoral students of Psychology, as well as a treasure trove in the libraries for researchers and faculties associated with spiritual psychology, positive psychology, religious studies, comparative literature, mental health professionals, academicians, and anyone interested in allied health fields.

Subalterns and Raj presents a unique introductory history of India with an account that begins before the period of British rule, and pursues the continuities within that history up to the present day. Its coverage ranges from Mughal India to post-independence Pakistan, Bangladesh and Sri Lanka, with a focus on the 'ordinary' people of India and South Asia. Subalterns and Raj examines overlooked issues in Indian social history and highlights controversies between historians. Taking an iconoclastic approach to the elites of South Asia since independence, it is critical of the colonial regime that went before them. This book is a stimulating and controversial read and, with a detailed guide to further reading and end-of-chapter bibliographies, it is an excellent guide for all students of the Indian subcontinent.

Rabindranath Tagore is widely regarded as a poet-philosopher and educationist, but his novels remain a relatively underexplored aspect of his oeuvre. Focusing on gender and modernity as key features of his fiction, this book charts Tagore's evolution as a novelist from self-conscious psychologizing in *Chokher Bali* to an engagement with nationalism in *Gora* and *Ghare Baire* (*The Home and the World*); a portrayal of asceticism and desire in *Chaturanga* (*Quartet*); an analysis of marriage, sexuality and change in Bengali society in *Yogayog* (*Relationships*); an effervescent fusion of social satire and literary experimentation in *Shesher Kabita* (*Farewell Song*); and an intense, dramatic study of love, politics and terrorism in *Char Adhyay* (*Four Chapters*). This study demonstrates that Tagore's writings cannot be readily assimilated within current theoretical frameworks, and urges us to rethink the conventional oppositions between tradition and modernity, masculinity and femininity, East and West, and local and global. Addressing a major gap in the field, the book reconstructs Tagore as a novelist of eminent stature, demonstrates the range and complexity of his creative genius, his contribution to literary history and the relevance of his reflections to our times. Enriched by insights into the biographical and socio-historical contexts of his novels, this book will be of special interest to researchers, teachers and students of comparative and world literature, history, postcolonial studies and gender studies, as also to Tagore enthusiasts.

Islam in India, as elsewhere, continues to be seen as a remainder in its refusal to "conform" to national and international secular-modern norms. Such a general perception has also had a tremendous impact on the Muslims of the Indian subcontinent, who as individuals and communities have been shaped and transformed over centuries of socio-political and historical processes, by eroding their world-view and steadily erasing their life-worlds. This book traces the spectral presence of Islam across narratives to note that difference and diversity, demographic as well as cultural, can be espoused rather than excised or exorcized. Focusing on Malabar - home to the Mappila Muslim community in Kerala, South India - and drawing mostly on Malayalam sources, the author investigates the question of Islam from various angles by constituting an archive comprising popular, administrative, academic, and literary discourses. The author contends that an uncritical insistence on unity has led to a formation in which "minor" subjects embody an excess of identity, in contrast to the Hindu-citizen whose identity seemingly coincides with the national. This has led to Muslims being the source of a deep-seated anxiety for secular nationalism and the targets of a resurgent Hindutva in that they expose the fault-lines of a geographically and socio-culturally unified nation. An interdisciplinary study of Islam in India from the

South Indian context, this book will be of interest to scholars of modern Indian history, political science, literary and cultural studies, and Islamic studies.

Islam and Nationalism in India

A medical sociologist with a historian's obsession with detail and documentation, Poonam Bala tenaciously follows the developmental trajectory of medical pluralism in India with a keen eye to the dynamic social production of health and healing systems as social systems, practices, and technologies of power. Covering a broad swathe of history, this book explores how a turbulently emerging Indian State with shifting alliances and evolving rules ideologies (with the accompanying emergence of class and caste identities and opportunities) gave rise to a particular growth of scientific and, specifically, medical traditions in India. As a set of healing practices, a literary art, and a cultural knowledge base, India's medical traditions represent 'an acculturated product' of competing ideologies and the expression of contested State, and social and religious policies over time. Bala focuses on the power of State intervention and multiple levels of patronage to shape medical practice and theory, and in turn, India's very history.

Postcolonialism

This book gives a detailed political analysis of nationbuilding processes and how these are closely linked to statebuilding and to issues of war crime, gender and sexuality, and marginalization of minority groups. With a focus on the Indian subcontinent, the author demonstrates how the state itself is involved in the construction of a gendered identity, and how control of women and their sexuality is central to the nationbuilding project. She applies a critical feminist approach to two major conflicts in the Indian subcontinent – the Partition of India in 1947 and the Liberation War of Bangladesh in 1971 – and offers suggestions for addressing historical injustices and war crimes in the context of modern Bangladesh. Addressing how the social and political elites were able to construct and legitimize a history of the state that ignored these issues, the author suggests a critical re-examination of the national narrative of the creation of Bangladesh which takes into account the rise of Islamic rights and their alleged involvement in war crimes. Looking at the impact that notions of nation-state and nationalism have on women from a critical feminist perspective, the book will be an important addition to the literature on gender studies, international relations and South Asian politics.

This anthology is a collective endeavor of scholars from India and Pakistan devoted to Sufi mystics, literature and shrines with a detailed introduction. The essays explore the methods adopted by the Punjab Sufis to popularize the mystic ideology and praxis in the medieval socio-cultural milieu. These writings also delve into the different genres of Sufi literature, both in the elite and vernacular languages, intending to appreciate the nuances of Punjab Sufism. Apart from the architectural features of the Sufi shrines, the anthology attempts to illumine the organic linkages between these institutions and the Punjabis and, thus, underscore the Sufi non-communitarian devotion as a primary ingredient of the

Punjabi cultural fusion. This title is co-published with Aakar Books. Print editions not for sale in South Asia (India, Sri Lanka, Nepal, Bangladesh, Pakistan and Bhutan)

Folklore Studies in India: Critical Regional Responses is an interesting compilation of twenty-eight critical articles on the beginning of folklore studies in the different parts of India. In the absence of a book that could map the history of Indian folklore studies single-handedly, this book can be deemed as the first-of-its-kind to feature the historical development of folklore studies in the different states of India. This book succinctly introduces the readers to the folk culture, folk arts, and folk genres of a particular region and to the different aspects of folkloristic researches carried out in that region.

Feminist Theory

First published in 1985, with coverage going up to 1982, this book has established itself as the classic survey and analysis of the roots and development of American feminist theory. Additions include coverage of the recent past: feminism, poststructuralism, multiculturalism, traditional liberalism, science and the environment. Bibliography. Index.

Feminist Theory

This first major study of feminist theory, which is revised and completely reset, now takes the reader into the twentieth century. It chronicles a renaissance of feminist theory through the so-called third wave of the present day, which follows significant "waves" of earlier periods: the fifteenth through early eighteenth centuries as well as the more widely recognized nineteenth century; and the 1960s through the 80s.

Feminist Theory, Fourth Edition

This first major study of feminist theory, revised and updated here in its fourth edition, now takes the reader into the twenty-first century. It addresses the basic question, "What is feminism?" by outlining the various strands of feminist theory: liberal, cultural, Marxist-socialist, Freudian, and radical. This fourth edition brings the discussion up-to-date, integrating the developments in feminist theory that have emerged in the last two decades, such as ecofeminism, multiculturalism, postmodernism, and global feminism-including new material since the publication of the third edition (2000).

Feminist Theorists

Celebrates a rich but neglected tradition of feminist thought. In twenty-one lively and inspiring portraits, modern-day feminists such as Alix Kates Shulman and Ann Oakley recapture the lives and work of the outstanding feminist thinkers of the last three centuries, both in the context of their own day and in light of the present women's movement.--Back cover.

Feminist Theorists

Provocative revelations about the flourishing black women's intellectual traditions in nineteenth-century America

Feminist Theories

In spite of the double burden of racial and gender discrimination, African-American women have developed a rich intellectual tradition that is not widely known. In *Black Feminist Thought*, Patricia Hill Collins explores the words and ideas of Black feminist intellectuals as well as those African-American women outside academe. She provides an interpretive framework for the work of such prominent Black feminist thinkers as Angela Davis, bell hooks, Alice Walker, and Audre Lorde. The result is a superbly crafted book that provides the first synthetic overview of Black feminist thought.

Black Women's Intellectual Traditions

In *Beyond Animal Rights*, Josephine Donovan and Carol J. Adams introduced feminist "ethic of care" theory into philosophical discussions of the treatment of animals. In this new volume, seven essays from *Beyond Animal Rights* are joined by nine new articles-most of which were written in response to that book-and a new introduction that situates feminist animal care theory within feminist theory and the larger debate over animal rights. Contributors critique theorists' reliance on natural rights doctrine and utilitarianism, which, they suggest, have a masculine bias. They argue for ethical attentiveness and sympathy in our relationships with animals and propose a link between the continuing subjugation of women and the human domination of nature. Beginning with the earliest articulation of the idea in the mid-1980s and continuing to the theory's most recent revisions, this volume presents the most complete portrait of the evolution of the feminist-care tradition.

Black Feminist Thought

For Johnson, feminism must recognize itself as a humanism in order to avoid certain theoretical quagmires. [The argument] is extremely provocative, and even, I would say, necessary. This book is sure to be controversial and of interest to a wide audience in feminist theory. I know of no other treatment of

feminism and humanism that is so clear, cogent, and systematic. Judith Grant University of Southern California Feminism is currently at an impasse. Both the liberation feminism of the 1970's and the more recent feminism of difference are increasingly faced with the limitations of their own perspectives. While feminists today generally acknowledge the need to recognise diversity, they lack a coherent framework through which this need can be articulated. In *Feminism as Radical Humanism*, Pauline Johnson calls for a reassessment of feminism's relationship to modern humanism. She argues that despite its very thorough and necessary critique of mainstream formulations of humanist ideals, feminism itself remains strongly committed to humanist values. Drawing on a broad range of political and intellectual traditions, Johnson demonstrates that, only by proudly affirming its own humanist commitments can feminist theory find a way to negotiate the impasse in which it currently finds itself. *Feminism as Radical Humanism* is an important and controversial contribution to feminist theory, and to the ongoing debate about the meaning of contemporary humanism.

The Feminist Care Tradition in Animal Ethics

A continuation of Josephine Donovan's exploration of American women's literary traditions, begun with *New England Local Color Literature: A Women's Tradition*, which treats the nineteenth-century realists, this work analyzes the writing of major women writers of the early twentieth century—Edith Wharton, Willa Cather, and Ellen Glasgow. The author sees the Demeter-Persephone myth as central to these writers' thematics, but interprets the myth in terms of the historical transitions taking place in turn-of-the-century America. Donovan focuses on the changing relationship between mothers and daughters—in particular upon the "new women's" rebellion against the traditional women's culture of their nineteenth-century mothers (both literary and literal). An introductory chapter traces the male-supremacist ideologies that formed the intellectual climate in which these women wrote. Reorienting Wharton, Cather, and Glasgow within women's literary traditions produces major reinterpretations of their works, including such masterpieces as *Ethan Frome*, *Summer*, *My Antonia*, *Barren Ground*, and others.

Feminism As Radical Humanism

The second wave of feminism which challenged and changed many assumptions about the world in which we live was a product of various western cultures, with no single country possessing a monopoly on the writing of the texts that became the canonical statements of the 'new' feminism. Though many of the contributions to feminist scholarship that went on to become internationally significant hailed from Europe and the United States, these works were often formed within the context of local debates and framed within traditions of feminism and other political engagements specific to these nations. *Transatlantic Conversations* explores the differences yielded by such conditions and their consequences for the meaning of feminism. Examining the meaning and implications of the different ways in which various shared categories have been treated on both sides of the Atlantic, this volume both analyses differences within feminism and provides a framework for the wider discussion of what is sometimes assumed to be the homogeneity of The West. With leading scholars from either side of the Atlantic presenting brand new work, *Transatlantic Conversations* suggests directions for future research which will be of interest to scholars of feminism, gender studies, sociology, political science and international relations, geography and cultural studies, as well as anyone concerned with the ways in which the different political and intellectual traditions of Europe and the US have shaped current political and intellectual debates.

"A first-rate introduction to the field, accessible to scholars working from a variety of disciplinary and theoretical perspectives. Highly recommended..." -- Choice "... offers both broad theoretical considerations and applications to specific art forms, diverse methodological perspectives, and healthy debate among the contributors.... [an] outstanding volume." -- Philosophy and Literature "... this volume represents an eloquent and enlightened attempt to reconceptualize the field of aesthetic theory by encouraging its tendencies toward openness, self-reflexivity and plurality." -- Discourse & Society "All of the authors challenge the traditional notion of a pure and disinterested observer that does not allow for questions of race/ethnicity, class, sexual preference, or gender." -- Signs These essays examine the intellectual traditions of the philosophy of art and aesthetics. Containing essays by scholars and by the writer Marilyn French, the collection ranges from the history of aesthetic theory to a philosophical

reflection on fashion. The contributions are unified by a sustained scrutiny of the nature of "feminist," "feminine," or "female" art, creativity, and interpretation.

Feminism and the Politics of Childhood offers an innovative and critical exploration of perceived commonalities and conflicts between women and children and, more broadly, between various forms of feminism and the politics of childhood. This unique collection of 18 chapters brings into dialogue authors from a range of geographical contexts, social science disciplines, activist organisations, and theoretical perspectives. The wide variety of subjects include refugee camps, care labour, domestic violence and childcare and education. Chapter authors focus on local contexts as well as their global interconnections, and draw on diverse theoretical traditions such as poststructuralism, psychoanalysis, posthumanism, postcolonialism, political economy, and the ethics of care. Together the contributions offer new ways to conceptualise relations between women and children, and to address injustices faced by both groups. Praise for *Feminism and the Politics of Childhood: Friends or Foes?* 'This book is genuinely ground-breaking.' Val Gillies, University of Westminster 'Feminism and the Politics of Childhood: Friends or Foes? asks an impossible question, and then casts prismatic light on all corners of its impossibility.' Women and the Rise of the Novel, 1405-1726

Two of the most important political movements of the late twentieth century are those of environmentalism and feminism. In this book, Val Plumwood argues that feminist theory has an important opportunity to make a major contribution to the debates in political ecology and environmental philosophy. *Feminism and the Mastery of Nature* explains the relation between ecofeminism, or ecological feminism, and other feminist theories including radical green theories such as deep ecology. Val Plumwood provides a philosophically informed account of the relation of women and nature, and shows how relating male domination to the domination of nature is important and yet remains a dilemma for women.

Feminism and the Politics of Childhood

In this important new book from a distinguished scholar, Josephine Donovan develops a new aesthetics of care, which she establishes as the basis for a critical approach to the representation of animals in literature. *The Aesthetics of Care* begins with a guide to the relationship between ethics and aesthetics, leading to a reconceptualization of key literary critical terms such as mimesis and catharsis, before moving on to an applied section, with interpretations of the specific treatment of animals handled by a wide range of authors, including Willa Cather, Leo Tolstoy, George Sand, and J.M. Coetzee. The book closes with three concluding theoretical chapters. Clear, original, and provocative, *The Aesthetics of Care* introduces and makes new contributions to a number of burgeoning areas of study and debate: aesthetics and ethics, critical theory, animal ethics, and ecofeminist criticism.

Feminist Politics and Human Nature (Philosophy and Society)

Makes key excerpts from Daly's work accessible to readers who are seeking to access the essence of her thought in a single volume. Outrageous, humorous, inflammatory, Amazonian, intellectual, provocative, controversial, and a discoverer of Feminist word-magic, Mary Daly's influence on Second Wave feminism was enormous. She burst through constraints to articulate new ways of being female and alive. This comprehensive reader offers a vital introduction to the core of Daly's work and the complexities secreted away in the pages of her books. Her major theories—Bio-philía, Be-ing as Verb, and the life force within words—and major controversies—relating to race, transgender identity, and separatism—are all covered, and the editors have provided introductions to each selection for context. The text has been crafted to be accessible to a broad readership, without diluting Daly's witty but complicated vocabulary. Begun in collaboration with Daly while she was still alive, and completed after her death in 2010, the chapters in this book will surprise even those who thought they knew her work. They contain highlights from Mary Daly's published works over a forty-year span, including her major books *Beyond God the Father*, *Gyn/Ecology*, and *Pure Lust*, as well as smaller articles and excerpts, with additional contributions from Robin Morgan and Mary E. Hunt. Perfect for those seeking an introduction to this path-breaking feminist thinker, *The Mary Daly Reader* makes key excerpts from her work accessible to new readers as well as those already familiar with her work who are seeking to access the essence of her thought in a single volume.

The Feminist Standpoint Theory Reader

Having enjoyed more than twenty years of development, feminist epistemology and philosophy of science are now thriving fields of inquiry, offering current scholars a rich tradition from which to draw. In addition to a recognition of the power of knowledge itself and its effects on women's lives, a central feature of feminist epistemology and philosophy of science has been the attention they draw to the role of power dynamics within knowledge-seeking practices and the implications of these dynamics for our understandings of knowledge, science, and epistemology. *Feminist Epistemology and Philosophy of Science: Power in Knowledge* collects new works that address today's key challenges for a power-sensitive feminist approach to questions of knowledge and scientific practice. The essays build upon established work in feminist epistemology and philosophy of science, offering new developments in the fields, and representing the broad array of the feminist work now being done and the many ways in which feminists incorporate power dynamics into their analyses.

The Mary Daly Reader

The *Oxford Handbook of Feminist Theory* provides a rich overview of the analytical frameworks and theoretical concepts that feminist theorists have developed to analyze the known world. Featuring leading feminist theorists from diverse regions of the globe, this collection delves into forty-nine subject areas, demonstrating the complexity of feminist challenges to established knowledge, while also engaging areas of contestation within feminist theory. Demonstrating the interdisciplinary nature

of feminist theory, the chapters offer innovative analyses of topics central to social and political science, cultural studies and humanities, discourses associated with medicine and science, and issues in contemporary critical theory that have been transformed through feminist theorization. The handbook identifies limitations of key epistemic assumptions that inform traditional scholarship and shows how theorizing from women's and men's lives has profound effects on the conceptualization of central categories, whether the field of analysis is aesthetics, biology, cultural studies, development, economics, film studies, health, history, literature, politics, religion, science studies, sexualities, violence, or war.

Feminist Epistemology and Philosophy of Science

Though many pioneering feminists were deeply influenced by American pragmatism, their contemporary followers have generally ignored that tradition because of its marginalization by a philosophical mainstream intent on neutral analyses devoid of subjectivity. In this revealing work, Charlene Haddock Seigfried effectively reunites two major social and philosophical movements, arguing that pragmatism, because of its focus on the emancipatory potential of everyday experiences, offers feminism its most viable and powerful philosophical foundation. With careful attention to their interwoven histories and contemporary concerns, Pragmatism and Feminism effectively invigorates both traditions, opening them to new interpretations and appropriations and asserting their timely philosophical relevance. This foundational work in feminist theory simultaneously invites and guides future scholarship in an area of rapidly emerging significance.

The Oxford Handbook of Feminist Theory

This open-ended anthology is a journey into the very canon that Mary Daly has argued to be patriarchal and demeaning to women. This volume deauthorizes the official canon of Western philosophy and disrupts a related story told by some feminists who claim that Daly's work is unworthy of re-reading because it contains fatal errors. The editors and contributors attempt to prove that Mary Daly is located in the Western intellectual tradition. Daly may be highly critical of conventional Western epistemological and theological traditions, but she nevertheless appropriates themes & "out-of-context" for the building of her own systematic philosophy. The following are just a few of the many themes explored in this volume: • the question of subjectivity understood as an ongoing process of be-coming • the ambiguity of the need for feminists of colonial nations to speak out about violence against women in other parts of the world while that speaking carries with it the stamp of a colonial location • the territoriality of lesbian and women's space • the theological dimensions of twentieth-century Western philosophy. Contributors are Wanda Warren Berry, Purushottama Bilimoria, Debra Campbell, Molly Dragiewicz, Frances Gray, Amber L. Katherine, AnaLouise Keating, Anne-Marie Korte, María Lugones, Geraldine Moane, Sheilagh A. Mogford, Laurel C. Schneider, Renuka Sharma, and Marja Suhonen.

Pragmatism and Feminism

The second edition of the Handbook of Feminist Research: Theory and Praxis, presents both a theoretical and practical approach to conducting social science research on, for, and about women. The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies, methodologies, and methods that have had a significant impact on feminist research practice and women's studies scholarship. The Handbook continues to provide a set of clearly defined research concepts that are devoid of as much technical language as possible. It continues to engage readers with cutting edge debates in the field as well as the practical applications and issues for those whose research affects social policy and social change. It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology, methodology and method. The second edition of this Handbook will provide researchers with the tools for excavating subjugated knowledge on women's lives and the lives of other marginalized groups with the goals of empowerment and social change.

Feminist Interpretations of Mary Daly

This text challenges mainstream thinking on welfare states, citizenship, family, work and social policy. It analyses the corresponding shifts in political discourse, and the changes in socio-political configurations that mirror changing gender relations. The discussion is both international and interdisciplinary, and focuses on exclusion and inclusion, care, civil society and representation, amongst others. The contributors examine these issues in relation to current policy debates and consider how they are embedded in particular European intellectual traditions. They also explore how feminist scholarship

has emerged with these issues, and assess how these contested concepts can improve understanding both of the position of women and of gender relations more broadly.

Handbook of Feminist Research

Autonomy is fundamental to liberalism. But autonomous individuals often choose to do things that harm themselves or undermine their equality. In particular, women often choose to participate in practices of sexual inequality—cosmetic surgery, gendered patterns of work and childcare, makeup, restrictive clothing, or the sexual subordination required by membership in certain religious groups. In this book, Clare Chambers argues that this predicament poses a fundamental challenge to many existing liberal and multicultural theories that dominate contemporary political philosophy. Chambers argues that a theory of justice cannot ignore the influence of culture and the role it plays in shaping choices. If cultures shape choices, it is problematic to use those choices as the measure of the justice of the culture. Drawing upon feminist critiques of gender inequality and poststructuralist theories of social construction, she argues that we should accept some of the multicultural claims about the importance of culture in shaping our actions and identities, but that we should reach the opposite normative conclusion to that of multiculturalists and many liberals. Rather than using the idea of social construction to justify cultural respect or protection, we should use it to ground a critical stance toward cultural norms. The book presents radical proposals for state action to promote sexual and cultural justice.

Contested Concepts in Gender and Social Politics

For more than a decade Nina Baym has pioneered in the reexamination of American literature. She has led the way in questioning assumptions about American literary history, in critiquing the standard canon of works we read and teach, and in rediscovering lost texts by American women writers. *Feminism and American Literary History* collects fourteen of her most important essays published since 1980, which, combining feminist perspectives with original archival research, significantly revise standard American literary history. In Part I, "Rewriting Old American Literary History," the focus is on male writers. Essays range from close readings of individual works to ambitious critiques of the main paradigms by which scholars have conventionally linked disparate texts and authors in a narrative of nationalist literary history: the self-in-the-wilderness myth, the romance-novel distinction, the myth of New England origins. Part II, "Writing New American Literary History," studies examples of women's writing from the Revolution through the Civil War. Stressing much overtly public and political writing that has been overlooked even by feminist scholars, noting public and political themes in supposedly domestic works, the essays substantially modify and historicize the paradigm by which premodern American women's writing is currently understood. The contentious and influential essays in Part III, "Two Feminist Polemics," address feminist literary theory and pedagogy, advocating a pluralist practice as the basis for scholarship, criticism, and humane feminism. No one interested in American literature or in women's writing can afford to ignore Baym's revisionist work. Humorous and gracefully written, this book is enjoyable and indispensable.

Sex, Culture, and Justice

There is a growing knowledge base in understanding the differences and similarities between women and men, as well as the diversities among women and sexualities. Although genetic and biological characteristics define human beings conventionally as women and men, their experiences are contextualized in multiple dimensions in terms of gender, sexuality, class, age, ethnicity, and other social dimensions. Beyond the biological and genetic basis of gender differences, gender intersects with culture and other social locations which affect the socialization and development of women across their life span. This handbook provides a comprehensive and up-to-date resource to understand the intersectionality of gender differences, to dispel myths, and to examine gender-relevant as well as culturally relevant implications and appropriate interventions. Featuring a truly international mix of contributors, and incorporating cross-cultural research and comparative perspectives, this handbook will inform mainstream psychology of the international literature on the psychology of women and gender.

Feminism and American Literary History

How should feminist theories conceive of the subject? What is it to be a legal person? What part does embodiment play in subjectivity? Can there be a conception of rights which does justice to the social contexts in which rights claims are embedded? Is the way the law constitutes legal subjects a form

of violence? These questions lie at the heart of contemporary feminist theory, and in this collection they are addressed by a group of distinguished international scholars working in law, philosophy and politics. The volume, in which the concerns of one author are taken up by others, advances current debate on two interconnected levels. First, it contains original and ground-breaking discussions of the questions raised above. At the same time, it contains a more reflexive strand of argument about the intellectual resources available to feminist thinkers, and the advantages and dangers of borrowing from non-feminist traditions of thought. It thus provides an exceptionally rich examination of contemporary legal and political feminist theory.

The Cambridge Handbook of the International Psychology of Women

Despite recent advances in the study of black thought, black women intellectuals remain often neglected. This collection of essays by fifteen scholars of history and literature establishes black women's places in intellectual history by engaging the work of writers, educators, activists, religious leaders, and social reformers in the United States, Africa, and the Caribbean. Dedicated to recovering the contributions of thinkers marginalized by both their race and their gender, these essays uncover the work of unconventional intellectuals, both formally educated and self-taught, and explore the broad community of ideas in which their work participated. The end result is a field-defining and innovative volume that addresses topics ranging from religion and slavery to the politicized and gendered reappraisal of the black female body in contemporary culture. Contributors are Mia E. Bay, Judith Byfield, Alexandra Cornelius, Thadious Davis, Corinne T. Field, Arlette Frund, Kaiama L. Glover, Farah J. Griffin, Martha S. Jones, Natasha Lightfoot, Sherie Randolph, Barbara D. Savage, Jon Sensbach, Maboula Soumahoro, and Cheryl Wall.

Visible Women

A critical study of 19th century women writers of New England, (orig. pub. 1983) evaluates the originality of the group that included Harriet Beecher Stowe, Annie Fields, Rose Terry Cooke, Elizabeth Stuart Phelps, Sarah Orner Jewett, Mary E. Wilkes [Freeman].

Toward an Intellectual History of Black Women

A collection of essays written in the field of feminist theory, this book reflects the social consequences of biological research and the political struggles waged by socialist and radical feminists. The contributors suggest that there is a pervasive racism within the feminist movement.

New England Local Color Literature

Philosophy's traditional 'man of reason'—independent, neutral, unemotional—is an illusion. That's because the 'man of reason' ignores one very important thing—the woman. As feminist philosophy grew in the 1980s and '90s, it became clear that the attributes philosophical tradition wrote off as 'womanly' are in fact part of human nature. No longer can philosophy maintain the dichotomy between the rational man and the emotional woman, but must now examine a more complex human being, able to reason and feel. Yet feminist philosophy also makes it clear that men and women theorize the world in different ways, from different perspectives. *Representing Reasons: Feminist Theory and Formal Logic* collects new and old essays that shed light on the underexplored intersection of logic and feminism. The papers in this collection cross over many of the traditional divides between continental and analytic philosophy, between philosophical reflection and empirical investigation, and between empirical investigations with an individual or societal grain of analysis. This is possible because *Representing Reasons* frames the relationship between logic and feminism in terms of issues rather than historical figures or methodologies. As such, the articles serve as a model for crossing these divides, just as they break down the traditional divide between logic and feminism.

A Reader in Feminist Knowledge

In *Retrieving Experience*, Sonia Kruks engages critically with the postmodern turn in feminist and social theory. She contends that, although postmodern analyses yield important insights about the place of discourse in constituting subjectivity, they lack the ability to examine how experience often exceeds the limits of discourse. To address this lack and explain why it matters for feminist politics, Kruks retrieves and employs aspects of postwar French existential theory—a tradition that, she argues, postmodernism has obscured by militantly rejecting its own genealogy. Kruks seeks to refocus our attention on the

importance for feminism of embodied and "lived" experiences. Through her original readings of Simone de Beauvoir and other existential thinkers—including Sartre, Fanon, and Merleau-Ponty—and her own analyses inspired by their work, Kruks sheds new light on central problems in feminist theory and politics. These include debates about subjectivity and individual agency; questions about recognition and identity politics; and discussion of whether embodied experiences may sometimes facilitate solidarity among groups of different women.

Representing Reason

Charts the development of feminist philosophy as a recognized contributor to intellectual debate, beginning with its origins outside the philosophical establishment in activism, cultural criticism, and social engagement. The fresh approaches of black feminists, lesbian philosophers, American Indian feminists, and ecological feminists are brought into the dialogue. In addition, Cole surveys feminist criticism of the traditional philosophical problems of metaphysics, epistemology, and ethics. She concludes that neither feminism nor philosophy thrives when viewed as the "property" of specialists or in-groups, but that feminist philosophy is a powerful, vital, and inclusive conversation about the concerns most basic to human beings. Suggestions for further readings at the end of each chapter assist students to explore subjects of interest in more depth.
