Amazing Sharks

The great white shark is the biggest predatory fish on Earth. Its formidable teeth and ability to swim up to 37 miles (60 km) per hour make it a deadly enemy. Readers can check out the great white shark up close, as well as 19 other amazing species of shark. Full-color photographs introduce readers to the teeth, fins, and other body adaptations that make sharks some of the coolest animals out there. Fact boxes detail each shark's behaviors, including hunting practices, and statistics telling their lifespan, size, and range.

Stealthy Sharks

Fearsome predators lurk in both the depths and the shallow waters of the world's oceans, waiting to attack their prey with clever precision. Vibrant photographs will provide an up-close look into the world of sharks that will fascinate readers. Clear and informative text explains the extreme advantages this ancient predator has over its prey and engaging facts will keep readers entertained from cover to cover.

Tiger Sharks

This book takes readers on a journey under the sea to discover the fascinating facts about tiger sharks, including physical features, habitat, life cycle, food, and more. Misunderstood Shark

From bestselling author Ame Dyckman and illustrator Scott Magoon comes the laugh-out-loud story about a Misunderstood Shark who just wants to show the world who he really is... Every beachgoer knows that there's nothing more terrifying than a... SHARRRK! But this shark is just misunderstood, or is he? In a wholly original, sidesplittingly funny story, New York Times bestselling author Ame Dyckman and illustrator Scott Magoon take this perennial theme and turn it on its (hammer)head with a brand-new cheeky character. The filming of an underwater TV show goes awry when the crew gets interrupted by a... SHARRRK! Poor Shark, he wasn't trying to scare them, he's just misunderstood! Then he's accused of trying to eat a fish. Will Shark ever catch a break? After all, he wasn't going to eat the fish, he was just showing it his new tooth! Or was he? Explosively funny, extraordinarily clever, and even full of fun shark facts, this surprisingly endearing story gets to the heart of what it feels like to be misunderstood by the people around you. With a surprise twist ending, our Misunderstood Shark will have kids rolling with laughter!

But guess who likes, sharks, too? The book is filled with tons of fun facts, and also information about different shark breeds.

20 Fun Facts About Sharks

Sharks are one of nature's fiercest predators. Sharks also don't have any bones, and they can lose up to 30,000 teeth in a lifetime. Sharks have to keep swimming all the time in order to keep breathing. Inside this book, readers will discover these and many more fun sharks facts. Amazing photographs of nature's deadliest creatures in the wild are sure to thrill readers of all ages.

Emperors of the Deep

In this remarkable groundbreaking book, a documentarian and conservationist, determined to dispel misplaced fear and correct common misconceptions, explores in-depth the secret lives of sharks--magnificent creatures who play an integral part in maintaining the health of the world's oceans and ultimately the planet. From the Jaws blockbusters to Shark Week, we are conditioned to see sharks as terrifying cold-blooded underwater predators. But as Ocean Guardian founder William McKeever reveals, sharks are evolutionary marvels essential to maintaining a balanced ecosystem. We can learn much from sharks, he argues, and our knowledge about them continues to grow. The first book to reveal in full the hidden lives of sharks, Emperors of the Deep examines four species--Mako, Tiger, Hammerhead, and Great White--as never before, and includes fascinating details such as: Sharks are 50-million years older than trees; Sharks have survived five extinction level events, including the one that killed off the dinosaurs; Sharks have electroreception, a sixth-sense that lets them pick up on electric fields generated by living things; Sharks can dive 4,000 feet below the surface; Sharks account for only 6 human fatalities per year, while humans kill 100 million sharks per year. McKeever goes back through time to probe the shark's pre-historic secrets and how it has become the world's most feared and most misunderstood predator, and takes us on a pulse-pounding tour around the world and deep under the water's surface, from the frigid waters of the Arctic Circle to the coral reefs of the tropical Central Pacific, to see sharks up close in their natural habitat. He also interviews ecologists, conservationists, and world-renowned shark experts, including the founders of Greenpeace's Rainbow Warrior, the head of the Massachusetts Shark Research Program, and the self-professed "last great shark hunter." At once a deep-dive into the misunderstood world of sharks and an urgent call to protect them, Emperors of the Deep celebrates this wild species that hold the key to unlocking the mysteries of the ocean--if we can prevent their extinction from climate change and human hunters.

The Shark Caller

WINNER OF THE EDWARD STANFORD CHILDREN'S TRAVEL BOOK OF THE YEAR 2022 A SUNDAY TIMES CHILDREN'S BOOK OF THE WEEK Dive beneath the waves with this spell-binding adventure of friendship, forgiveness and bravery, set on the shores of Papua New Guinea, perfect for fans of Katherine Rundell and Eva Ibbotson. Rokea

Werewolf: The Apocalypse is about anger over the loss of what the shapeshifting Garou hold dearest: Gaia, the Earth itself. Corruption from without and within has caused the destruction not only of the Garou's environment, but also of their families, friends and culture, which extends in an unbroken line to the very dawn of life. No matter how righteously the Garou hold themselves, no matter how they prey on their destroyers, the corruption spreads. Now the time for reconciliation is past. This grave insult against Gaia can end in only one way: blood, betrayal... and rage. A complete reference to the savage and deadly weresharks.

If you could have any animal's front teeth, whose would you choose? What If You Had Animal Teeth! takes children on a fun, informative, and imaginative journey as they explore what it would be like if their own front teeth were replaced by those of a different animal. Featuring a dozen animals (beaver, great white shark, narwhal, elephant, rattlesnake, naked mole rat, hippopotamus, crocodile, and more), this book explores how different teeth are especially adapted for an animal's survival. At the end of the book, children will discover why their own teeth are just right for them. And they'll also get a friendly reminder to take good care of their teeth, because they're the only teeth they'll ever have. Each spread features a photograph of the animal using its specialized teeth on the left and a humorous illustrated image of a child using that animal's teeth on the right.
